American Railroad Journal.

Saturday, February 22, 1868.

Stock Exchange and Money Market.

Money has been quite abundant all the week, and rates have been barely steady, at 4@5 per cent. on call, and 5½@7 per cent. per annum in the discount form. The banks have been losing ground a little, in the line of deposits and legal tender reserve, partly through the drain into the Sub-Treasury, and partly through the moderate increase in the requirements of general business; while they have been gaining slowly in the specie reserve. They report a loss of $2,375,497 in legal tender, and $1,084,720 in deposits, with a gain of $369,582 in specie, as the result of the past week's business. Their loans have been increased $460,434, and their circulation has been reduced $58,588. The exhibit was not regarded by the speculative element of the street as an encouraging one; yet it did not materially affect Stock or Gold values. The Sub-Treasury has added some *two and a half millions to its cash balances.* The improvement in general trade, though confined *thus far to* the leading kinds of domestic produce, including cotton and cotton goods, has tended to quicken the mercantile demand for accommodation; but this inquiry has been by no means active. According to the latest Washington advices (to Feb. 18,) the coin balances of the Treasury Department have been augmented over 5½ millions since the 1st inst., or from 98½ millions to 104 millions, and there have likewise been some additions made to the currency reserves. The specie reserve of the city banks is now $24,192,954, against $14,792,626 same time last year. The city bank deposits are now $216,759,828, against $196,072,292 week ending Feb. 16, 1867. The legal tender reserve amounts to $63,471,762, against $64,642,490 same time last year. The circulation now stands at $34,043,296, against $32,956,309 same time last year. The loans are now $271,015,970, against $253,131,328 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $91,753,531 a day, against a daily average of $99,540,433 the preceding week, and $106,241,504 the week ending with Feb. 1, 1868. The current week's exchanges average about $91,600,000 a day. The city banks, last week, lost $2,375,497 of legal tender, and $1,084,720 in the deposit line, while they gained $369,582 of their specie reserve. They increased their loans, $460,434; and their circulation, $58,538.

The Philadelphia Bank movement the past week shows a decrease in loans, of $9,502; a decrease of $24,721 in specie; a decrease in legal tenders of $113,772; a decrease of $836,188 in deposits; and a decrease of $1,598 in circulation. The Bank Clearings show a decrease of $3,998,956, and the balances, a decrease of $97,719.

National Bank notes to the amount of $151,318 were issued last week, making the total issue to 1,673 banks thus far, $306,282,641, against $282,555,440 at the close of the fiscal year ending June 30, 1868. *From the total issue is to be deducted the currency returned, including worn out* notes, amounting to $6,553,415, leaving, with the existing 1,639 banks, (having an aggregate capital of $418,845,738,) an actual circulation at this date, of $288,628,265. The United States bonds held by Treasurer Spinner in trust for National Banks as *security for circulating notes amount to* $341,319,800; and for the public deposits, $37,877,950—making a total of $379,197,750. The Treasury Department last week redeemed and destroyed $597,700 of worn and mutilated fractional currency, and issued $520,500 of new.

The U. S. Sub-Treasury receipts, week ending with Feb. 15, were $9,483,311, including $2,312,666 from customs duties; payments, $6,566,483, including $438,000 of coin interest; balance at the close of the week, $104,353,674, against $101,436,846, at the close of the preceding week, showing an increase of $2,916,848. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $1,340,718 including $592,281 from customs; and payments, $1,101,178; on Tuesday, receipts, $1,706,727 including $547,109 from customs, and

payments, $1,162,507. The balance at the close of business on Tuesday stood at $105,137,429, against $102,957,685 a week previous; and $99,584 225 on Feb. 4, 1868.

The aggregate issue of coin certificates by the U. S. Sub-Treasury, in this city, up to date of latest local report was $245,369,740; aggregate redemptions, $209,565,000; leaving outstanding certificates to the amount of $35,804,740. The latest report from the national capital made the outstanding amount of coin certificates on the 18th inst., $28,700,000, against $20,104,580 on the 1st of January.

Government revenues have been on a more liberal scale, in the customs line; but have been unusually limited in the form of excises. The excises, last week, yielded over six million, against $1,452,627 the preceding week; customs at the port of New York $2,312,666 and at the outports, about $800,000 (in coin) more, making the grand total income for the week equal to about $5,966,500 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,920,474, against $310,906,984 the preceding fiscal year; and $211,129,529 fiscal year ending with June 30, 1865. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $125,000,000.

Government received $7,541,247 from customs, through the port of San Francisco, from Jan. 1, to Dec. 31, 1867, against $7,189,763 in 1866, $6,812,368 in 1865, and $6,378,385 in 1864. The receipts from the same source, during the first ten days of January, 1868, were $187,956, against $98,080 same time last year.

A much less confident speculative movement has been noted in gold, since our last. The offerings, even for prompt delivery, have been more extensive; while the investment demand has been on a reduced scale. There has been a somewhat livelier call from the importing interest for custom house purposes; but the export inquiry has been quite moderate, despite the increased firmness and buoyancy in the foreign exchange market. The range of the price, through the week, has been from 141¾ down to 139½, and the latest figures were 140¼ on a drooping market. The specie shipments on Wednesday were unexpectedly light, having been confined to $108,200 by the *Java* for Liverpool. On Tuesday of this week, the Treasury Department held a coin reserve of 104 millions, of which $28,700,000 belonged to private deposits, as represented by outstanding coin certificates, issued through the Government office in this city. A Washington dispatch states that it has been informed that the receipts of gold from customs from this date to May 1, will be $28,000,000, making an aggregate of $103,000,000, out of which there is payable on the 1st of March next, $4,500,000, due on the ten-forty bonds; and on the 1st day of May, about $27,000,000, interest due on the five-twenty bonds; leaving a balance on hand of gold, after paying all expenses, of $98,500,000, or $71,000,000 after the coin certificates are deducted. These estimates are in case no sales of gold are made between the periods.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $410,580, against $159,664 same time last year. The customs demand for Gold last week, averaged $385,444 a day; thus far, this week, it has been equal to $569,695 a day, or equal to a weekly aggregate of $3,418,170. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $129,714, and from California, none. The total customs revenue of the Government, in coin, at this port, during the calendar year of 1867, was $116,958,654, against $180,222,092 same time in the preceding calendar year. The customs revenue, at the port, thus far, in the current fiscal year, commencing with July 1, 1867, has been $68,703,723, against $77,828,889 same time in the preceding fiscal year. The total receipts of California gold at this port in 1867, were $27,677,556, against $42,740,913 in 1866, showing a decrease in 1867, of $15,063,357. The receipts of California gold, at this port, thus far, in the current fiscal year, commencing with July 1, 1867, have been $19,967,774 against $28,422,940 same time in the preceding fiscal year, showing a decrease of $8,455,166 in 1867–'68. The exports of specie from this port, last week, were $767,394, against $563,497 same week last year. The exports of specie, hence, since July 1, 1867, have been $36,949,068, against $21,022,134 same time in 1866–'7. The total outflow of specie from the port, in 1867, was $51,841,678, against $62,553,700 in 1866. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $438,000, and since July 1, 1867, $50,871,520, against $33,431,408 same time in 1866–'7. The total coin interest disbursements through the Government office, in 1867, was $61,871,348, against $48,680,377 in 1866. The specie exports from San Francisco, from Jan. 1, to Dec. 31, 1867, reached $40,671,797, against $44,365,668 1866, $44,426,172 in 1865, and $55,707,201 in 1864. The exports from San Francisco, from Jan. 1, to Jan. 29, 1868, were $2,915,476, against $3,692,507 same time last year.

The offerings of prime bankers' drafts on London and Paris have been less extensive, since our last, while there has been a rather more liberal supply of produce bills. The demand has been moderate; yet the leading dealers have advanced their asking rates a fraction, the market closing firmly, though without special actively, for the steamers of Wednesday.

Bankers' prime sixty day bills on London closed on Wednesday at 109¾@109⅞, and on Paris to 5.17½c.@5.13¾; sight bills on London to 110@110¼, and on Paris to 5.12½c.@5.11¼. The offering of produce bills have been more extensive this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,686,417, against $3,297,924 same week last year; total, since July 1, 1867, $114,086,195, against $118,420,062 same time in 1866–'67. The total value of exports of produce and merchandise in 1867, was $189,688,044, against $192,329,554 in 1866.

A less active trade has been reported in the line of the public funds, which, however, have not been offered freely. In the absence of anything like a brisk movement, prices have yielded a fraction. The depression in Gold has had but little influence on values. At the close, the available supply of both bonds and notes was quite meagre, particularly of the new 5-20s, of the Ten-Forties, and of the Seven-Thirties. Government has not been recently marketing any of the new Five-Twenties, and, we believe that none of the authorized but unissued Ten-Forty bonds have been disposed of, during the week. The latter class of bonds have grown rapidly in favor with export buyers, in view of the specific promise in the creating act of the payment of the principal, as well as the interest, in coin. Government was bidding 107½ for Seven-Thirties on Wednesday in this market, but it secured no considerable amount of the notes at this rate, which was also freely bid by the street brokers. The conversions of Seven-Thirtes thus far in February have been very light, less than two millions. The outstanding balance of this loan on the 1st inst., was $214,953,850, as against the original aggregate issue of 880 millions, through the Government Loan Agency of Mr. Cooke.

Government through the Sub-Treasury in this city, has paid off $4,807,800 of the matured loan of 1847–'67, since Jan. 1, 1868.

U. S. sixes of 1881 closed here on Wednesday at 117⅞@112; U. S. Five-twenties of 1862, 111¼@111⅜; U. S. Five-twenties of 1864 at 109@109⅛; U. S. Five-twenties of 1865 at 109¾@109⅞; U. S. Five-twenties of 1865, consolidated, 107¾@108; U. S. Five-twenties of 1867, 108⅛@108¼; U. S. Ten-forties at 105⅛@105¼, and U. S. Seven-thirties at 107½@107⅝. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

May, 1865	117½	September, 1865	116⅛
August, 1865	116½	October, 1865	116
U. S. three per cent. certificates			100¼

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 5.	Feb. 12.	Feb. 19.
Consols	93⅜	93¼	92¾
U. S. 5-20's of 1862	72	71¾	72
Erie	48	48	49⅜
Ill. Central	87	88½	88¾

The railway and miscellaneous stock market has been quite active, excited, and variable, since our last. The prominent movement has been in Erie shares, in which there have been unusual fluctuations, as the result of the daring intrigues of the conflicting speculative interests. The whole market sympathized more or less closely, all through the week, with the disturbed course of Erie. The dealings on Wednesday indicated much hesitancy and weakness in the general speculation.

Domestic produce has attracted more attention, particularly plain, Grain, Provisions, Cotton and Cotton Goods. Prices have been firmer as a rule, especially for Cotton, which closed buoyantly on Wednesday on the basis of 24 for middling uplands, per lb. The stock of cotton now here is estimated at about 45,000 bales. The receipts at the port this week, have averaged about 3,500 bales a day. The receipts at all the shipping ports from Sept. 1, 1866, to Aug. 31, 1867, were 1,951,998 bales, against 2,154,476 bales the preceding cotton year; exports, 1,554,664 bales, against 1,557,054 bales the preceding year; estimated stock at close of the year, 80,296 bales against 253,000 bales same time last year. The receipts at all the ports, since Sept. 1, 1867, have been 1,410,000 bales, against 1,240,000 bales

same time last year; exports, same time, 851,000 bales, against 607,000 bales same time last year; stock on hand at latest dates, 350,000 bales, against 640,000 bales same date last year. At the Live Stock Market, this week, beeves have been in good demand and firmer ranging from 12@20 cents per lb.; week's receipts, 4,926. Veal calves, at from 9@13½ per lb.; receipts, 582. Sheep and lambs, at from 4¾@8¾c. per lb.; receipts, 23,301. Swine, at from 8⅞@9¼c. per lb., all live weight; receipts, 8,388. In the line of foreign goods, more activity has been reported in dry goods, and groceries, with a moderate trade in other articles. The total imports of foreign dry goods, last week, were $1,278,902, and the total amount marketed $1,616,960. The value of foreign merchandise imported last week, was $2,758,918—making the grand total specie value of last week's imports of dry goods and merchandise, $4,037,820, against $5,772,153, same week last year; total since July 1, 1867, $140,007,798, against $169,038,354 same time in 1866-'67. The aggregate for the year 1867, was $242,478,575, against $277,043,050 in 1866. The ocean freight market has been less active; rates have been quoted easier. For Liverpool we quote flour at 2s. 6d@3s. by sail, and 3s. 6d.@4s. by steamer, per bbl.; grain at 8½d.@9d. by sail, and 9½d.@10d. by steamer, per bushel; cotton at ⅜@$\frac{7}{16}$d. by sail, and $\frac{7}{16}$@½d. by steamer, per lb.; and heavy goods at 30s.@35s. by sail, and 40s.@50s. by steamer, per ton. Total number of vessels in port on Wednesday 509.

The New York exports, exclusive of specie, for the week ending Feb. 18, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week.....	$3,297,924	$3,686,417
Prev. reported.....	20,430,501	19,256,893
Since January 1.....	$23,728,425	$22,943,310

The New York imports for the week compare as follows:

	1867.	1868.
Dry goods	$1,699,087	$1,278,902
Gen. merchandise.....	4,073,066	2,758,918
Total for the week.....	$5,772,153	$4,037,820
Previously reported....	24,892,785	18,552,617
Since January 1.....	$30,664,938	$22,590,437

The balance in the Sub-Treasury on Wednesday was $105,725,647 57.

☞ A company has been formed at Ellsworth, Kansas to build a railroad thence to Fort Larned. The road will open up a fertile, rich and beautiful valley, along which a road can be constructed at a comparatively trifling expense. The distance from Ellsworth to the valley is about thirty-seven miles, and there are no engineering difficulties in this part of the route. After the valley is reached the route is a direct one on a nicely level route to Fort Larned.

Railroad Earnings.--Weekly.

The earnings of the Chicago and Northwestern Railroad for 2d week in Feb., 1868...$177,267 37
Corresponding week previous year .. 143,287 42

Increase $33,979 95

The earnings of the Detroit and Milwaukee Railroad for the week ending February 13, 1868, were $19,718 00
Corresponding week of 1867 ..... 24,623 00

Decrease $4,905 00

The earnings of the Atlantic and Great Western Railway for the first week in Feb., 1868, were $88,094 00
Corresponding week previous year... 83,243 00

Increase $4,851 00

The earnings of the Chicago and Rock Island Railroad for the first week in January, 1868, were $73,800 00
Corresponding week of previous year.. 53,200 00

Increase $20,600 00

The earnings of the Michigan Southern and Northern Indiana Road for the 2d week in Feb., 1868, were $74,150 00
Corresponding week of 1867 ..... 72,683 00

Increase $1,467 00

The earnings of the Toledo, Wabash and Western Railroad for the 2d week of Feb., 1868, were $59,731 56
Same week in 1867..... 53,950 94

Increase $5,780 62

Columbus, Chicago and Indiana Central Railway.

At a meeting of the stockholders of this company held at Columbus, Ohio, on the 12th inst., the following gentlemen were elected directors for the ensuing year: W. D. Thompson, Frederick R. Fowler, W. D. Judson, Amos Tenney, Henry Morgan, James W. Elwell and Lawrence Wells of New York; Joseph T. Thomas, of Pennsylvania; Joseph E. Young, of Illinois; John S. Newman and J. T. Conness, of Indiana; Benj. E. Smith, W. Dennison, J. Gardner and John R. Hillyard, of Ohio. Benj. E. Smith was elected President, Gordon Moodie, Secretary, and James Alexander Treasurer.

☞ The Cumberland *Alleghanian* says that Mr. Hughert, the President of the Pittsburg and Connellsville R. R. Co., has promised that the cars shall run from Connellsville to Cumberland within one year from the date of the restoration of the charter.

☞ The Pittsburg *Gazette* of 10th inst., says: "We feel warranted in announcing that within 30 days the work requisite to complete the Connellsville Railroad will be advertised for letting, and the whole will be finished probably in the space of a year, or at furthest, within 16 months."

☞ Books of subscription to the capital stock of the Sussex Valley R. R. Co. were recently opened at Deckertown. Two gentlemen, one from Goshen, and the other of Branchville, each subscribed $90,000, thus covering the whole amount of the capital stock ($175,000) and $5,000 over.

☞ The Directors of the Whitehall and Plattsburg Railroad Co., have placed under contract the grading and bridging of about sixteen miles of their road, from Fort Henry to Ticonderoga, to be completed and ready for the ties by the 1st of Nov. next. Messrs. George F. Harris & Co., the parties who are constructing the northern portion of the road, are the contractors.

Journal of Railroad Law.

LIABILITY OF RAILROADS AS COMMON CARRIERS.

The facts in the recent case of Coyle *vs.* Western Railroad Co. (47 Barb. 152) were as follows: The action was brought against the defendant as a common carrier, to recover the value of one hundred and one half beer barrels which were delivered to the defendant at one of its freight depots at East Albany, N. Y., on the 5th day of July 1861, for transportation to Boston, directed to a person in that city. On the evening of this day, the barrels, while in the possession of the defendant were destroyed by fire, which took place accidentally. On previous occasions, it had been the habit of the plaintiff to send receipts for the company to sign, on delivery of the last load. This practice was omitted at this time. The defendant who was the appellant had in its employ a receiving and shipping clerk, whose duty and practice it was, when notified of the delivery of the goods for transportation to correct, tally and check them and hand his account to the bookkeeper, who entered them in a book kept for the express purpose, and by this book the goods were shipped. Unless receipted the goods were not shipped. The barrels which were afterwards consumed by fire, had not been tallied, counted, booked or receipted. Some evidence was produced to show the receiving agent was present at the delivery of some of the articles and was notified of such delivery. Among other things it was found by the Judge, that the barrels were delivered for transportation, and received by the defendant as a common carrier, and that the plaintiff was entitled to recover for their value and interest $220 22; for which amount judgment was entered, and the defendant then appealed to the general term.

By the Court, MILLER, J. The question to be determined in this case is whether the defendant sustained the relation of common carrier, or warehouseman in reference to the property which was delivered by the plaintiff, and which is the subject matter of this controversy.

I think it is quite clear that the defendant received the barrels as freight, to be transported on the railroad of the company and was liable as a common carrier, for the loss occasioned by the fire which consumed them.

The evidence establishes that the barrels were delivered at one of the freight houses of the defendant, at the usual place for transacting such business and received by persons in the employ of the railroad company. The defendant's agent was present when a portion of the property was delivered, and according to the testimony of one of the witnesses, directed where it should be put.

I think there can be no doubt that the barrels were placed by the defendant's employees in the freight house, for the convenience of the company, with a view and for the purpose of facilitating their transportation to the place of destination for, which they were designed, and to which they were directed. These were not placed there to remain for any period of time, but to be forwarded at the earliest practicable period. Under such circumstances it is manifest that the defendant received the property for the purpose of transportation and not as a warehouseman, and that the company is liable as a common carrier. (Angell on carriers § 181, 144, Story on Bailm, 536, Edw. on Bailm, 446, 489. Redf. on Rail 246, 248. Blossom *vs.* Griffin 13 N. Y. Rep. 569 Ladue *vs.* Griffith 25 id. 364).

Several objections are urged to the alleged delivery of the property, but I am of opinion that they are not valid, and cannot be upheld.

It appears to me, that there is sufficient evidence to warrant the conclusion that the parties, received the property, were authorized to do so; that the delivery was brought home to the knowledge of the defendant's, that notice was given to those who acted for the defendant and the property was accepted for carriage.

The delivery was complete, so far as the plaintiff was concerned, as he had nothing more to do. The taking of a receipt for the property was not essential to complete the delivery. It was for the plaintiff's benefit and the defendant cannot complain, because he thus failed to protect himself by a written acknowledgement of the delivery, instead of relying upon verbal proof of that fact, should it be required.

Nor do I think that anything remained to be done by the consignor, or his agent, after the delivery of the property to the railroad company before they were ready to transport it.

The counting, checking and entering the property upon the books of the company for shipment were matters connected with the course of business of the defendant which were for the protection and the benefit of the railroad company, and which could not in any way effect the delivery. Suppose these had all been entirely neglected and the goods had been shipped before they were consumed and had been lost or destroyed; would the defendant have been exonerated? certainly not, for the very apparent reason, that these were acts of the defendant, and the plaintiff could not be made to suffer by their omission.

The property having been received into the possession of the defendant, in accordance with the usual course of business, the delivery was perfect and complete and the defendant is liable as a common carrier, for its loss. There was no error in the finding of the court, or in the refusals to charge as requested. The latter were based upon the questions already discussed, and it is therefore not essential to examine them at length.

The judgment must be affirmed, w;th costs.

[Albany Gen. Term, March 5, 1866, Miller, Ingalls and Hogeboom, Justices.]

Boonsboro' Br. of the Washington Co. R.R.

James Brown, Esq., of Boonsboro', delegated by the citizens of that place, in a public meeting, visited Baltimore last week, for the purpose of conferring with the president and directors of the Baltimore and Ohio Railroad, upon the subject of a branch road, from the main stem of the Washington County Railroad to Boonsboro'. Mr. Brown was very kindly received, as is manifested in the fact that the company will, at an early day, place a corps of engineers upon the line, with a view to an experimental survey of the route.—*Hagerstown Mail.*

☞ The Portland and Rochester Railroad is progressing very favorably. The splendid bridge at Saco River is now completed, and the work of leveling up the track between the river and that portion running to Waterboro' and Alfred is going on. Station houses have been built at Waterboro' and Alfred.

Commerce of New York.

The foreign imports at New York for the month of January, are officially stated as follows:

	1867.	1868.
Entered for consumpt'n.	$11,046,856	$7,855,830
Do. for warehousing....	9,087,702	6,647,871
Free goods	717,810	778,296
Specie and bullion	126,719	136,574
Total entered at port...	$20,979,087	$15,418,571
Withdrawn fr. wareh'use	9,380,484	6,731,624

The foreign imports at New York for seven months ending January 31st, were:

	1867.	1868.
Entered for consumpt'n.	$86,087,723	$70,424,231
Do. for warehousing...	62,894,173	53,333,519
Free goods.....	6,682,782	5,846,786
Specie and bullion.....	8,524,562	1,886,217
Total entered at port..	$164,189,240	$131,490,753
Withdrawn fr. wareh'se	59,627,912	54,019,789

The duties received at New York for seven months ending January 31st, were:

	1867.	1868.
Six months ending Jan. 1	$60,531,571 82	$54,731,301 44
In January.....	9,472,248 48	7,133,428 42
Total 7 months....	$70,003,820 30	$61,864,729 86

The exports from New York to foreign ports in the month of January, were:

	1867.	1868.
Domestic produce	$12,911,689	$13,766,496
Foreign free goods.....	114,207	12,680
Do. dutiable.....	422,751	669,151
Specie and bullion	2,551,351	7,349,825
Total exports.....	$15,999,998	$21,798,152
Do. exclusive of specie.	13,448,647	14,448,327

The exports from New York to foreign ports for seven months ending January 31, were:

	1867.	1868.
Domestic produce.....	$95,313,522	$100,829,047
Foreign free goods....	361,896	162,097
Do. dutiable	2,363,886	4,600,568
Specie and bullion.....	19,322,621	34,556,111
Total exports	$117,361,905	$140,147,823
Do. exclusive of specie	98,039,284	105,591,712

☞ A railroad from Hanover Junction, on the Northern Central Railway, to Peachbottom Ferry, is in contemplation. The total length of the new road will be about twenty-five miles, and the distance between York and Peachbottom, by this route, some thirty-three miles.

☞ A meeting in behalf of the projected White Lake Railroad, was recently held at Barryville. Some 200 shares of the capital stock were subscribed, in addition to the 400 shares taken at previous meetings. A Board of Directors was chosen with the following officers: M. T. Morse, President; R. Morrison, Vice President; F. W. Johnston, Secretary, and J. E. Gardner, Treasurer.

☞ Active operations are at once to be commenced on the extension of the Warwick Valley road. Ground has already been broken for the road from Newton to Franklin, and it is expected the cars will be in running order by the 1st of July next.

☞ The Legislature of West Virginia passed an act on the 6th inst., amending a former law, providing for the completion of a line of railroad from the waters of the Chesapeake to the Ohio River, in which a majority of the voters of a county or city shall be sufficient in voting on subscriptions to the road. No registration is required to enable persons to vote on this question.

[From the American Railway Times.]

Kerosene Oil for Lighting Cars.

Mr. Editor:—There have been several railway accidents during the past few weeks, in which passenger cars have been burned, resulting in one instance in a serious loss of life; and it has been stated that the use of kerosene oil for lighting the cars, has in some cases caused or increased the fires. As kerosene oil is so generally used, it may relieve the minds of many travellers to know that this statement is not correct, and that, with ordinary care, kerosene is not only the best light, but also a safe light for railway cars. In the accident at Angola, near Buffalo, which occurred in the day time, there were no kerosene lamps in the cars, but candles were used when lighting them; the fire was caused entirely by the stoves. The explosion of a lamp in a car on the Erie road, a short time ago, was not kerosene, but a mixed oil, in a lamp made specially for burning it. In the burning of the palace car "City of Chicago," on the Chicago, Burlington and Quincy Railway, on the 2d inst., it is not known with certainty how the fire was caused. The Chicago *Tribune*, of the 6th, says "the rear part of the car had taken fire probably from the over-heating of a stove pipe near the roof," and adds, "It was thought by some that this accident was caused by the explosion of one of the kerosene lamps in the car; but the officers of the road are confident that this was not the case, but that it started from the stove, as stated." The same paper, reporting the accident from the breaking of a rail and burning of cars on the Pennsylvania road, says, "The cars were lighted with candles, and the stoves bolted to the floor, protected with wrought iron casing, and the doors of the stoves locked. The cars took fire from the candles. During the last week two cars lighted with kerosene were thrown from the track, on the Boston and Providence Railway; one car was thrown flat on to its side, and the other about half way over. The stoves were firmly fastened down with iron straps. *The lights were at once put out by the rough motion of the car, as would usually be the case with kerosene*, and no further damage was done. If roads will be careful to purchase oil which will stand a fire test of 115°, which they can always do by the use of a pyrometer, or "oil-tester," kerosene may be used with safety. W.

☞ A meeting was recently held at Modena, to consider the feasibility of uniting with Newburgh in building the Newburgh, New Platz and Kingston Railroad. Thos. Hait, Esq., presided, and Dr. Hasbrouck acted as Secretary. The meeting was addressed by Homer Ramsdell and by delegations from Newburgh and New Platz. Resolutions were adopted in favor of energetic measures for raising the necessary stock and bonding the towns along the line of the proposed railroad.

☞ The work on the Dorchester and Delaware Railroad is progressing as rapidly as the weather will permit. A large force of workmen, numbering over a hundred, are now engaged near Federalsburg.

☞ An engineering party has commenced a reconnoisance of the proposed line for a railroad from Cleveland to Zanesville, Ohio. The route has been found very favorable, generally, with low grades and slight curves.

Washington, Alexandria and Georgetown Railroad.

A meeting of the bond and stockholders in this road was held in this city on the 12th inst., at which nearly seven-eighths of both classes of securities were represented. After detailed statements of the present condition of the company had been presented, including the various transactions of the late Treasurer of the company, a committee of bondholders and another of stockholders was appointed to draft a plan for the immediate re-organization of the company based upon a general compromise recognizing the securities of all classes, in order that the road may be taken out of the hands of the receiver and placed upon the footing to which its financial value and geographical importance entitles it. The meeting then adjourned, subject to a call from the Secretary as soon as the committees are prepared to report.

Extension of the St. Paul Railway.

The propositions of the Directors of the Milwaukee and St. Paul Railway having been fully accepted and complied with by the people of Winneconne, and the right of way, river crossing and depot grounds secured accordingly. The Appleton *Crescent* says the road will at once be extended from Omro to Winneconne, which point the cars will reach by the first of May, immediately after which Appleton may look for the commencement of work from that direction.

Michigan Grand Trunk Railway.

A meeting of the stockholders of this company was recently held at Jackson, Mich. The amount of subscriptions represented in the Convention was $395,000. The report of the Treasurer shows that he has received $17,919 74, and has paid out $9,805 92. Resolutions were offered favoring the immediate construction of the road between Niles and Union City.

Hudson River West Shore Railroad.

An important route of travel is proposed to be opened along the West bank of the Hudson River, by the Hudson River West Shore Railroad. The road will run from Hoboken to Athens, connecting at that place with a road to tap the New York Central at Schenectady. This will make the route twenty-six miles shorter than by the way of Albany. It is also intended to make connections with the proposed Midland road at Newburgh. By this connection the route to Chicago will be eighty-five miles less than by the New York Central.

☞ The Western R.R. *Gazette* says that a contract has been closed with Gen. Burnside to build the Cairo and Vincennes Railroad, and Fox, Howard & Co., having finished their contract of filling the streets of Cairo, will probably take a section of the proposed road.

☞ The Alton *Telegraph* says that the project of building a railroad thence to St. Charles, Missouri, has been revived under encouraging auspices; $1,000 per mile has been subscribed, and five per cent. of that amount paid in.

☞ The Rhode Island Locomotive Works, at Providence, R. I., have orders for 24 locomotives, 19 of them for the Union and Central Pacific Railroads. They will complete them in six months, about one a week.

☞ The Bloomington, Ills., *Pantagraph* says the Chicago and Alton Railroad Company will, next Summer, build 15 miles of a double track in the neighborhood of Dwight, which is probably the beginning of a double track between Bloomington and Chicago.

To Bridge Contractors.

ENGINEER'S OFFICE LOUISVILLE BRIDGE COMPANY,
Louisville, Ky., February 17, 1868.

PROPOSALS will be received by the undersigned until March 10th, 1868, for the construction of a portion of the superstructure of the OHIO RIVER BRIDGE AT LOUISVILLE, consisting of ten (10) spans of FINK'S IRON SUSPENSION TRUSS of the following lengths, from centre to centre of piers; four spans of 149.6 feet, two spans of 180 feet, two spans of 210 feet, and two spans of 227 feet.

Plans and specifications can be seen at this office.

F. W. VAUGHAN, *Ass't Engineer.* ALBERT FINK, *Chief Engineer.*

"Important to Railroad Companies."

SAFETY,
EFFICIENCY,
DURABILITY,
ECONOMY;

All Combined in the Safety Truck, for Locomotive Engines; Tested by ten years' use; Perfected by the best Engineering Skill in this Country and in England; Secured by Six Letters Patent; Adopted by Sixty-four Railroads; Between Five and Six Hundred in Operation in the United States; Extentensively introduced in Nine Foreign Countries; Approved by Leading Locomotive Builders, Master Mechanics and Locomotive Engineers; Should be Universally Adopted.

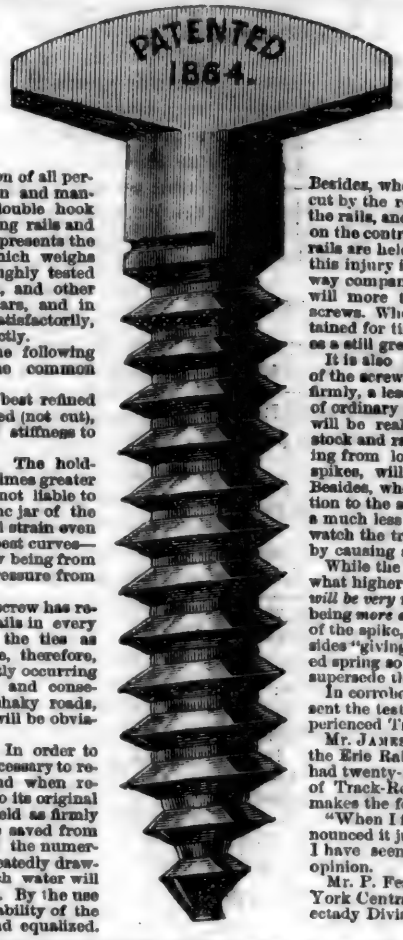
U. S. RAILROAD SCREW SPIKE COMPANY,



NO. 45 CLIFF STREET, NEW YORK,

MANUFACTURERS OF MONTIGNANI'S PATENT

RAILROAD SCREW SPIKE.

HENRY YOUNG, President.

G. B. HUBBELL, Secretary.

Works at
OSSINING,
Westchester Co., N. Y.

We respectfully call the attention of all persons engaged in the construction and management of railroads, to the double hook headed Screw Spike, for fastening rails and chairs to ties. The above cut represents the size and shape of the Screw, which weighs eight ounces. It has been thoroughly tested on the Erie, New York Central, and other Railways, from one to three years, and in every case it has stood the test satisfactorily, having performed its work perfectly.

The Screw Spike possesses the following important advantages over the common spike:

First.—They are made of the best refined Iron, and the thread, being forged (not cut), imparts additional strength and stiffness to them.

Second.—INCREASED SECURITY. The holding power of the screw is many times greater than that of the spike, and it is not liable to break nor become loosened by the jar of the cars, nor by the upward or lateral strain even on the steepest grades and sharpest curves—the holding capacity of each screw being from four to five tons, and the side pressure from three to four tons.

In three years' experience no screw has removed from its place, and the rails in every case have been held as firmly to the ties as when first put down. By its use, therefore, the numerous accidents constantly occurring from loose and broken spikes, and consequent loose and broken rails, shaky roads, and the spreading of the rails, will be obviated.

Third.—GREATER ECONOMY. In order to remove the rail it will only be necessary to reverse the screw one-quarter; and when replacing it, turn the screw back to its original position, when the rail will be held as firmly as before. The ties will thus be saved from the injury of splits, checks, and the numerous holes made in them by repeatedly drawing and replacing spikes, in which water will collect, causing their rapid decay. By the use of the screws, therefore, the durability of the ties will be greatly increased and equalized.

Besides, when the rails are loose the ties are cut by the repeated blows made on them by the rails, and are thereby materially damaged; on the contrary, where the screw is used, the rails are held so firmly in their place, that this injury is prevented. The saving to railway companies in ties alone, it is estimated will more than pay the whole cost of the screws. Where none but soft wood can be obtained for ties, the screw manifestly possesses a still greater advantage over the spike.

It is also calculated, that in consequence of the screws holding the rails to the ties so firmly, a less number will be required than of ordinary spikes, also a very great saving will be realized in the wear of the rolling stock and rails. The considerable loss arising from loose, bent, broken and missing spikes, will be almost entirely prevented. Besides, where the screw is in use, in addition to the saving of time in relaying rails, a much less number of men are required to watch the track and keep it in repair, thereby causing a great saving.

While the first cost of the screw is somewhat higher than the spike, *in the end they will be very much cheaper.* The screw therefore being *more economical*, and by its use in place of the spike, *making the roads more secure*, besides "giving to the track an easy and connected spring so much desired," it must entirely supersede the common spike.

In corroboration of the foregoing, we present the testimony of several of the most experienced Track Masters in this country.

Mr. JAMES R. HILLIARD, Track Master on the Erie Railway, (Union Division), who has had twenty-four years' experience as Master of Track-Repairs, after testing the screws makes the following report:

"When I first saw your Screw Spike I pronounced it just the article wanted, and since I have seen it in use I still hold the same opinion.

Mr. P. Featherly, Track Master on the New York Central Railroad, (Albany and Schenectady Division,) says, January 9th, 1866:—

"I put down your Screw Spikes sixteen months ago, on a section of our road where our heaviest work is done, viz., a steep grade on the main track, three miles from Albany, one-quarter of a mile above West Albany, and they are there to-day, firm and as secure as when first put down, while the adjacent track, fastened with common spikes, has been respiked several times during that time."

Mr. E. T. MARBLE, Track Master on the Albany and Saratoga Railroad, says:

"On examining the Screw Spikes put down by me September 16th, 1863, I find they have not started either upward or sideways, that they still hold the rail to the ties as securely as when first put down; while great numbers of common spikes are loose and out of place. And on examination I find the threads are bright and clean."

Mr. E. H. DE VERGNE, Track Master on the Shore Line Railroad, writes:—

"Having examined and tested your Screw Spikes on our road, I feel satisfied that they are more durable, safer and more reliable than common spikes. By their use our Railroads would be perfectly safe so far as the track is concerned. Although it requires somewhat more time to drive them than it does the common spike, yet it is more than counterbalanced by their greater durability and safety, and saving of time in relaying rails. With practice and the use of proper tools, even that objection can be overcome."

Mr. A. F. SNYDER, Track Master, Albany, January, 1867, writes as follows:

"This is to certify that the screw Spikes put down on the bridge over the Hudson River at Albany, N. Y., by the U. S. R. R. Screw Spike Co., February, 1866, have done their work perfectly—holding the rails securely and firmly to the ties—not having started in the least, while the ordinary spikes, which were put down on the bridge at the same time, have, many of them, started up, and are quite loose and useless."

Mr. J. W. POTTER, Superintendent of the Cincinnati, Dayton, and Eastern Rail Road, says, January 9th, 1867:—

"The Screw Spikes manufactured by your Company have thus far given entire satisfaction, more than equaling our expectations. We have had them tested at our crossings for the past six months, and find them solid in the tie as the day they were put in. I consider them invaluable for crossings and bridges."

IMPROVED BRONZE ALUMINUM
HUNTING CASED WATCHES.

(the qualities and resemblance of this new metal are such, compared to Gold, that even judges are deceived.)
and
ROSKOPF'S PAT'D PEOPLE'S WATCH.

The Improved Bronze Aluminum of which my watches are made, is a metal differing entirely from any ever offered to the public. It has seriously occupied the attention of scientific men, and has not only called forth the eulogium of the press, in consequence of its peculiar properties, but also has obtained a Gold Medal at the Paris Exposition, and even been favorably noticed by rescript of his holiness, Pius IX., authorizing its use in the manufacturing of church goods. The rich color it always retains is more pleasant to the eye than that of gold; it is therefore better adapted to the manufacture of watch cases than any composition ever found. The qualities of this metal are such that it is surpassed by none, if we except gold itself, and that only on account of the intrinsic value of the latter. Further details will be found in my circular, which will be sent, postpaid, on demand. My Watches are made of three sizes, all hunting cases, one small, for Ladies or Lads, and two for Gents. The movements are well finished and carefully put together by skillful workmen, and perfectly regulated. I can, therefore, warrant them excellent time-keepers. These goods being manufactured in my own factory, I am enabled to sell any of the above sizes at the extremely low price of $16. None genuine unless bearing my Trade Mark as above. A full assortment of all kinds of Chains always on hand. Goods sent by Express, C. O. D., with charges. Not responsible for money sent enclosed in letters. Address JULES D. HUGUENIN VUILLEMIN.
No. 44 Nassau Street, New York.

Safety Railroad Switch.
MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the ***MAIN TRACK IS NEVER BROKEN,*** and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns ***The Life and Limb of all Travelers upon Railroads.***

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

ENGINEERING WORKS.

ENGINEER'S FIELD BOOK,
By C. S. CROSS, Civil Engineer.

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent **free by mail,** upon receipt of the price. For sale at this office. Price **$1.50.**

LYONS' TABLES.
To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.				SHEET No			
1.	General Table for all Bases and all Slopes.			13.	for Base 18 ft. Slop.		1½ to 1
2.	For Side Hill Cuts and Fills.			14.	" 20 "		1½ to 1
3.	Base 12 ft. Slopes		1½ to 1	15.	" 24 "		¾ to 1
4.	" 14	"	1½ to 1	16.	" 24 "		1½ to 1
5.	" 15	"	¾ to 1	17.	" 25 "		1½ to 1
6.	" 13	"	1 to 1	18.	" 26 "		1½ to 1
7.	" 16	"	1½ to 1	19.	" 28 "		¾ to 1
8.	" 16	"	¾ to 1	20.	" 30 "		1 to 1
9	" 16	"	1 to 1	21.	" 30 "		1¼ to 1
10.	" 18	"	¾ to 1	22.	" 30 "		1½ to 1

American Railroad Journal.

New York, Saturday, February 29, 1868.

South Side (L. I.) Railroad.

We invite attention to the Advertisement, in another column, of Messrs. Smith, Gould, Martin & Co. This firm has for sale $250,000 of the first and only mortgage bonds of the South Side R. R. Co. These bonds are secured by a mortgage which covers the entire 55 miles of road, extending from South Seventh street, Brooklyn, E. D., (formerly Williamsburg) to Patchoque, in Suffolk Co., including franchise, locomotives, cars, etc. The mortgage is for $750,000. The capital stock of the company is $500,000—$450,000 of which has been expended in constructing and stocking the road. Some 34 miles of road have been completed and equipped, and 6 additional miles are prepared for the rails, which will be put down as soon as the weather permits. The remaining 10 miles, from Islip to Pachoque, will be completed by the 15th of June next. The earnings upon 26 miles of the road, operated during the fall and winter months have been more than sufficient to pay interest on the bonds. The cost of the road when completed and fully equipped will not be less that $1,800,000. The mortgage debt is less than $14,000 per mile, or less than one-half the cost of the road. The bonds have 19 years to run from March 1, 1868. The deed of trust securing the payment of both principal and interest of these bonds is drawn with especial care to the protection of the interests of the bondholders. The trustees are David R. Floyd Jones of Oyster Bay in Queens County, and Treadwell Ketcham of the city of New York.

The directors of the road are as follows: Charles Fox, J. Boorman Johnston, Robert P. Colt, Daniel F. Willetts, William Floyd Jones, A. J. Bergen, Hon. John A. Dix, William C. Rushmore, F. B. Baldwin, John Tappin, Martin Willets, Vanderwater Smith and Alexander McCue. President, Charles Fox; Superintendent W. R. White.

Peninsular Railway Co.

A meeting of the stockholders of the "Peninsular Railway Co.," and of the "Peninsular Railway Extension Co.," was held in Battle Creek, Mich., on the 13th inst., for the purpose of voting upon the agreement entered into by the directors on the 3d of January last for the consolidation of said companies; and by the unanimous vote of the stockholders of each company the agreement was sanctioned. The name of the new corporation is, "The Peninsular Railway Company;" the capital stock is $900,000; the number of shares, 18,000, of $50 each. The number of Directors, nine, two of whom are located in Eaton Co., three in Calhoun Co., two in Kalamazoo Co., and two in Cass Co. The line of the road is one hundred and nine miles in length, running on almost an air-line, from Lansing *via* Battle Creek, to the south-east corner of the town of Milton, in Cass Co.

Joseph Musgrave, of Charlotte, and Martin S. Brackett, of Bellevue, in Eaton Co., Leonidas D. Dibble, William Wallace and Alonzo Noble, of the City of Battle Creek, in Calhoun Co., Stephen Eldred, of Climax, and Frederick Dale, of Schoolcraft, in Kalamazoo Co., and Joseph Smith, of Cassopolis, and George B. Turner, of Jefferson, in Cass Co., were unanimously elected Directors. At a subsequent meeting of the directors, L. D. Dibble, of Battle Creek, was elected President, C. W. Clisbee, of Cassopolis, Secretary, Clement Wakelee, of Battle Creek, Treasurer, Martin S. Brackett of Bellevue, Attorney, and Right-of-Way Agent, and Clement F. Miller, of Battle Creek, Chief Engineer of the Company.

Much business of importance was transacted by the Board, among which, was the adoption of By-Laws, and the assessment of stock subscribed on seventeen miles on the west end of the line, upon which work will be commenced within the present month. The assessments are made payable on the first day of each month hereafter, at the rate of ten per cent. per month.

Resolutions were passed by the Board, authorizing the president of the company to make a mortgage on the road and other property, to an amount, not exceeding $1,800,000, and, also construction bonds, to be secured by said mortgage, for the purpose of the purchase of iron and rolling stock for the road, and also to negotiate for the sale of the bonds, and the purchase of iron and rolling stock.

Upwards of $400,000 has already been raised to build this road; 3,448 shares of stock were represented in the votes cast for Directors.

Great interest was manifested by all present, in the enterprise, and an earnest determination was expressed that the road should be completed within the year.

The Directors and officers chosen, were selected with especial reference to their fitness for their respective positions, and for their well known energy, and determination to push the work rapidly forward to an early completion.

General Railroad Law in New Jersey.

The bill recently introduced into the Legislature of this State, provides that any number of persons, not less than twenty, may associate themselves into a company for the purpose of constructing, owning and maintaining a railroad within that State, upon making a certificate setting forth, first, the corporate name; second, the names of the places between which the road is to be constructed, approximating the route; third, the total amount of the capital stock (which shall be divided into $100 shares); fourth, the names and residences of the stockholders, and the number of shares held by each. After an organization and so much of the stock paid in as shall be equal to one thousand dollars per mile of the

road, surveys may be made. The company may obtain land in the same way, as the Camden and Amboy company, may borrow money, and intersect or connect with other railroads.

Atlantic and Great Western Railway.

The following is the report of General Potter, the receiver of the line, for the seven months ending 31st October, 1867, compared with the corresponding period of the previous year:

Receipts:	April 1st to Oct. 31, 1866	April 1st to Oct. 31, 1867
Passenger	$816,633	$584,914
Freight	2,514,573	2,371,935
Mail	25,669	25,666
Express	63,283	53,547
Other sources	117,287	48,974
Total earnings	$3,537,445	$3,085,038
Deduct expenses	2,372,877	1,870,676
Balance	$1,164,567	$1,214,361
Expenditure:	**April 1 to Oct. 31, 1867.**	**April 1 to Oct. 31, '67.**
Office and station expenses	$214,604	$152,758
Cost of rufining	777,774	615,176
General expenses	178,134	105,420
Repairs of engines and cars	587,612	501,676
" track and roadway	278,620	263,886
" structures	26,432	17,622
Incidentals	186,935	97,509
Miscellaneous	122,763	116,626
Total ordinary expenses	$2,372,877	$1,870,676
Renewals	$96,737	$520,584
Construction	571,746	662,967
Rent of leased lines	197,367	159,992
Total	$865,851	$1,343,543
Grand total	$3,238,729	$3,214,220

J. C. Calhoun, Auditor.

Pittsburg, Ft. Wayne & Chicago Railway.

The following is a statement of the approximate earnings and expenses of this company during the month of January, as compared with the same period of the year 1867:

	1868.	1867.
From freight	$317,151 55	$345,798 04
" passengers	149,507 78	168,988 26
" express matter	8,626 50	8,958 00
" mail	7,825 00	7,825 00
" rent of railway	7,083 33	7,083 33
" miscellaneous	2,500 00	3,763 17
Total	$492,694 16	$542,415 80
Expenses	408,729 65	413,110 84
Net earnings	$83,964 51	$129,304 96

This shows a decrease in earnings of $49,721 64; with a decrease in expenses of $4,381 19—making the decrease of net earnings, $45,340 45.

The following is a statement of the approximate earnings and expenses of this company for the years ending December 31,

	1867.	1866.
Earnings	$7,237,187 62	$7,467,217 56
Expenses	4,864,073 27	5,147,686 54
Net earnings	$2,373,114 35	$2,319,531 02
Add profit in operating N. C. & L. Branches	70,000 00	55,460 56
Total net revenue	$2,443,114 35	$2,374,991 58

This shows a decrease in earnings of $230,029 94; with a decrease in expenses of $283,613 27—making the increase in net earnings, $53,583 33. Add increase of profit in operating N. C. and L. Branches, and the increase in revenue will be $68,122 77.

Chicago and Northwestern Railway.

The following is a comparative statement of earnings of this company for the month of January, 1867 and 1868:

	1867.	1868.
Passenger	$186,611 86	$219,860 10
Freight	449,409 49	471,162 24
Express	38,726 87	36,827 00
Mail	12,721 66	14,076 86
Total	$687,469 88	$741,926 20

From June 1, to January 31, (8 months), the earnings were:

	1866-'67.	1867-'68.
Passenger	$1,919,192 66	$2,852,952 96
Freight	4,913,881 83	5,772,551 04
Express	190,713 65	349,656 73
Mail	66,774 19	112,614 88
Miscellaneous	52,442 55	80,689 34
Total	$7,143,004 88	$8,668,464 95

This shows an increase in earnings for the month of January of $54,456 32; and for the eight months ending January 31st, of $1,525,460 07.

Marietta and Cincinnati Railroad.

The annual meeting of this company was held at Chillicothe, Ohio, on the 19th inst. Col. Jno. Medary was appointed chairman. The annual reports for 1867 were submitted and ordered to be published. The following gentlemen were elected directors for the ensuing year: Jno. King, Jr., Thos. Whitridge, Johns Hopkins, C. Oliver O'Donnell and Allan Chapman, of Baltimore; J. N. Camden, Parkersburg; Wm. Hutler, Constitution, Ohio; D. H. Schulte, Chillicothe; Nathaniel Wright, R. M. Bishop, H. C. Lord, Briggs Swift, Samuel B. Keys, of Ohio. John King, Jr., was elected President. A resolution was passed by a nearly unanimous vote stopping the further issue of scrip dividends. The whole number of shares represented at the meeting was 183,424, amounting to $9,171,215.

Pennsylvania Railroad.

Office of the Pennsylvania Railroad Co., Philadelphia, February 15, 1868.

To the Stockholders of the Pennsylvania Railroad Company:

Your directors have the gratification to report that the business of your railway, during the past year, has fully realized their expectations.

The following condensed statement will exhibit its earnings and expenses for 1867:

Earnings:		
From passengers		$3,431,508 13
" emigrant passengers		121,653 26
" United States, collected for transportation of troops		65,240 48
" mails		84,931 68
" express matter		330,494 60
" general freights		11,832,299 67
" miscellaneous sources		474,028 54
		$17,340,156 86
Expenses:		
Conducting transp.	$3,517,258 83	
Motive power	3,252,143 37	
Maintenance of cars	1,528,387 82	
Maintenance of road	3,602,748 92	
General expenses	179,760 70	
	12,080,299 64	
Leaving net earnings for the year 1867		$4,259,856 72

The total amount of revenues, compared with last year, is:

1867	$16,340,156 86
1866	16,583,882 84
Decrease	$243,726 48

Omitting the amounts collected for transportation of United States troops, are shown below:

1867	$16,274,915 88
1866	16,022,937 40
Increase in 1867	$251,978 48

The changes in the sources of revenue, omitting United States troops, are shown below:

Decrease in emigrant passengers		$18,067 99
" express matter		43,874 62
		$61,942 61
and		
Inc. in regular freights	$123,006 08	
" first-class passengers	185,708 07	
" United States mails	2,201 68	
" miscellaneous	8,005 26	
		318,921 09
Increase as before stated		$251,978 48

The gross revenues for 1867 are equal to $45,624 89 per mile of the main line of railroad.

The whole number of passengers carried in 1866 was 2,678,568, and in 1867 3,347,466; but the average distance traveled by each passenger in 1867, was 37 77-100 miles, while in the previous year it was 52 miles; showing that the increase has chiefly been in the local business of the road.

The number of tons of freight moved (including 281,314 tons of fuel and other material transported for the company) was 4,000,538, embracing 1,680,723 tons of coal. The increase in the coal traffic is 267,542 tons and the whole tonnage of the road exceeds that of last year 547,820 tons—nearly 16 per cent.

The results of the year, therefore, show a large increase in the business of the road, both in passengers and freights; but in consequence of reduced rates of freight, there is not a corresponding increase in gross revenues, while the continued high prices for labor and materials have prevented any material reduction of expenses.

The canals of the company, in conformity with the views expressed in the last Annual Report of the Board, have been sold and transferred to the Pennsylvania Canal Company; and the shareholders are referred, for information in relation to them, to the Report I. J. Wistar, the President, and T. T. Wierman, Chief Engineer and Superintendent.

The earnings of the Philadelphia and Erie Railroad, in 1867, were:

From passengers	$635,184 88
" troops	2,806 82
" freight	1,681,902 02
" express matter	28,875 10
" mails	18,436 08
" miscellaneous sources	16,605 09
	$2,383,759 94

The operating expenses during the same period were:

For conducting transportation	$565,295 61	
" maintena'ce of way	648,359 48	
" motive power	624,772 60	
" mainten'ce of cars	172,445 22	
Total	$2,010,872 86	
To which add 30 per cent. payable to Philadelphia & Erie Railroad	677,239 51	
		2,688,112 37
Showing a loss to this company, in operating the line under the lease, of		$354,352 48

Or $75,690 89 in excess of the same item in 1866.

The whole revenue of the Pennsylvania Railroad and its branches, and the Philadelphia and Erie Railroad, is as follows:

From the Pennsylvania Railroad and branches		$16,340,156 36
From the Philadelphia and Erie Railroad		2,333,759 94
Total		$18,673,916 30
And the expenses of operating these lines are:		
Pennsylvania R.R.	$12,080,299 64	
Philadelphia & Erie Railroad	2,010,872 86	
Thirty per cent. reserved to pay interest on debt of Philadelphia and Erie Railroad Co., etc.	677,239 51	
		14,768,412 01
Leaving the net profits from both Railways		$3,905,504 29
From which deduct two cash dividends of 3 per cent. each paid to shareholders in May and November last, and the taxes thereon	$1,337,668 52	
Interest on bonds, &c., and taxes on same	618,684 04	
Lease of Harrisburg and Lancaster R.R.	185,274 18	
Annual payment to the State of Pennsylvania, on account of purchase of main line of public works	460,000 00	
This amount, carried to the credit of "Extra Dividend Fund," in conformity with a resolution approved by the shareholders at their last meeting, payable in the capital stock of the Co.	1,190,000 00	
		3,741,626 74
Surplus		$163,877 55

The net profits of the Pennsylvania Railroad Company are nearly all derived from the business of its main line. The investments held in other lines, that have heretofore proved productive, have mostly been placed in the sinking fund established for the redemption of the Second Mortgage Bonds of this Company and the bonds of the Harrisburg and Lancaster Railroad Company, which together amount to $5,580,840. The value of the assets in this fund, at their present market price, may be stated at $5,000,000, and are deemed ample to meet at maturity the debts for which the fund was instituted. If the Second Mortgage Bonds should be exchanged for those under the General Mortgage authorized at your last annual meeting, this fund, after the payment of the seven hundred thousand dollar mortgage upon the Harrisburg and Lancaster line, will become the property of the company, to be disposed of in such manner as shall best promote its interest.

The shareholders are referred to the statement of the Treasurer annexed to this report, for an exhibit of the condition of the company at the close of the year. In comparing it with former statements, it will be seen that the cost of the railroad from Harrisburg to Pittsburg stands upon the books of the company at about the same sum ($13,540,950) that it did in 1854, the year that it was opened as a continuous single track railway between those cities. Since that time there has been added upon this portion of the railway, except three miles, a second track throughout, with shops, sidings, depots, &c., sufficient to accommodate more than five times the traffic that was then moved, the cost of which, if carried to construction account, would have swelled it to over $20,000,000.

A second track has also been added to the Harrisburg and Lancaster portion of the line between Columbia and Middletown, a distance of 19 miles, which has likewise been charged to expense account. The Philadelphia and Columbia Railroad, purchased of the State in a dilapidated condition, has had its superstructure renewed, and all of its wooden bridges east of Lancaster removed and new iron structures substituted, while the purchase money has at the same time been reduced from $6,500,000, its cost, to $5,375,000.

The construction account upon the whole line of double track from West Philadelphia to Pittsburg, 355 miles, and a single track between Dillerville and Middletown, *via* Mount Joy, of 25 miles, including branches to Indiana and to Hollidaysburg, of 27 miles, is but $20,799,233—a sum so small, compared with the cost of building such a work at this time, that no rival line—if there was a favorable route for one—could be constructed with any prospect of deriving a profit from the investment. This policy has been adopted by the Board, that reasonable rates of transportation may be maintained and at the same time satisfactory dividends continued to the shareholders. The Board is aware that this is not in accordance with the practice pursued by railway companies generally, particularly those of Great Britain, where their share and debt capital have increased to such enormous proportions compared with their revenues that dividends to ordinary shareholders have become the exception, while to maintain their revenues at the present standard, even with the advantages of cheap labor and materials for maintaining and operating their railways, the rates for travel and general freight are largely in excess of those charged by this company.

The practice of dividing the whole apparent net profits of the company, which has been the rule in Great Britain, has also had the disadvantage, by an exhibit of large dividends, on their completion of stimulating the construction of rival lines, thus increasing the railway capital that the traffic of the region is expected to meet, in an effort to secure a fair return for the money expended, which can only be effected by increased rates.

The securities created under the financial plan adopted at your last meeting to provide for the future wants of the company have been prepared, and will be issued from time to time, in exchange for its existing mortgage bonds, and in like amounts as the share capital of the company is increased—to provide for the demands of the railway for additional facilities for the accommodation, movement, or protection of its traffic. This plan contemplates the continuance of semi-annual cash dividends of three per cent., free from United States taxes—the remainder of the net profits of the year to be carried to an extra dividend fund, to be divided in shares whenever it is sufficient to justify a dividend of five per cent. upon the capital stock. Under the operations of this arrangement dividends of eleven per cent. were paid in 1867, and the same rate may be expected in 1868.

The Board, as stated in their last annual report, would have preferred and would still prefer to increase the capital stock of the company by a general distribution of it at par among the shareholders in proportion to the interest of each, but the alleged legal inability of Philadelphia to meet her share of this increase led to the adoption of the present plan, which it is believed will be found sufficient to meet the objects of the company and the requirements of its charter.

As the policy of investing funds of the company in feeders to the main line in and out of the State has been frequently adversely commented upon, the Board will again remind the shareholders that the investments made outside of Pennsylvania were expressly authorized and directed by themselves, with the full concurrence of the Directors, except in the subscription to the Marietta and Cincinnati line.

The wisdom of these investments, in view of the then isolation of the Pennsylvania Railroad at its western terminus, has been fully vindicated by the beneficial effect that the construction of the avenues thus facilitated with the trade centres of the West has had upon the revenues of the company and the prosperity of Philadelphia. The Board only exceeded the express authority of the shareholders, by a laborious but successful effort to save the funds—as far as advisable—that they had directed to be so invested.

The expenditures upon lines within the State—as explained in previous reports—was one of the conditions of a contract with the company, by which the company was relieved from the onerous burthens of a special tonnage tax, which dwarfed its usefulness and prevented its railway from developing the resources of the interior.

These expenditures have resulted in the construction of the Pittsburg and Steubenville Railroad, the Ebensburg and Cresson Railroad, the Tyrone and Clearfield Railroad, the Bald Eagle Valley Railroad, the Mifflin and Centre County Railroad to Milroy, and the extension of the Broad Top Railroad to Dallas. All of these works are valuable feeders to the main line, and in the aggregate will pay an interest upon the amounts *now* charged against them.

The Tyrone and Clearfield Railroad at present terminates at Phillipsburg. During the past year the road bed has been graded to the town of Clearfield, and the track will be laid upon it in the ensuing spring and summer.

That portion of the railway between Pittsburg and Columbus, Ohio, extending from Pittsburg to the Ohio River, across the State of West Virginia—in consequence of its great cost and long delay in its construction—became involved in inextricable financial difficulty, to free it from which it was sold under a decree of the Supreme Court. Arrangements are now being made to consolidate it with the Steubenville and Indiana Railroad, under the name of the Pittsburg, Cincinnati and St. Louis Railway Company, with a view to make but one corporation between Pittsburg and Columbus. In this line the Pennsylvania Railroad Company has a large interest in its shares, and we entertain the belief that its revenues will at once pay an interest upon the amount *now* charged to that account. The chief motive, however, in incurring this expenditure was, as already mentioned, the advantage it afforded to this company in securing the freight and travel to and from the Southwest, for which we had previously no independent connection. The line is now in full operation, and in this respect has met our expectations, gaining for the traveller a saving of several hours in his journey from Philadelphia and New York to Cincinnati, over any other route.

The Philadelphia and Erie Railroad has been operated since February 1, 1862, by this company, under a lease, at a heavy annual loss, which has to that extent reduced the profits of the main line. This loss is largely due to the unfinished character of the new portion of the work and the decayed condition of the bridges, &c., portion of the new upon the older parts of the line. In addition to these causes, it may be added that the line traverses a country which produces articles for transportation that can only be moved at low rates of freight—rates which, at the existing high prices for labor and materials, do not afford a sufficient margin of profit to meet the interest upon the debt of the company and the cost of operating the railway. This object can only be secured—if the causes of the high cost of operating railways should continue—by a largely increased traffic, to obtain which increased material outlays are required.

The Philadelphia and Erie Railroad Company, under the lease, is obliged to furnish the money to meet the expenditures for this object, but as it is without means or available credit, it devolves upon this company to supply the deficiency or continue an unprofitable arrangement. As neither the public advantage nor the permanent interest of this company will justify the latter alternative, the Board, with a view to apply the expenditures mentioned in a manner that will best promote the

objects in view, has purchased and converted obligations that have accrued against that company, into its capital stock to the extent of 31,636 shares of common, and 48,000 of preferred, amounting in all, at par, to nearly $4,000,000—sufficient to determine the future mode of managing the affairs of the company.

This line and the Pennsylvania Railroad occupy the only routes within this Commonwealth upon which a railway for through business can be built, and yield a reasonable return upon the capital that may be expended in its construction. Upon all other routes, several additional mountain summits will be encountered, besides the increased cost hereafter of constructing such a work. With this knowledge we may safely make outlays for the development of their traffic. The extent to which this can be done by a judicious enlargement of the field of operations of the Philadelphia and Erie line may be appreciated by referring to the history of our own railroad, which was only opened as a continuous railway in connection with the State road, between Philadelphia and Columbia, on the 15th of February, 1854—at which date the Eastern and Western Divisions of what was originally the Pennsylvania Railroad were united, avoiding the ten inclined planes, operated by stationary power, which had previously lifted the traffic over the Alleghanies. The revenues of this company, from the whole line, from Philadelphia to Pittsburgh, during 1854, the first year of its operation as a continuline, were $3,512,295. In 1867, between the same points—with addition of the local business of the State railroad—they were $16,583,000, an increase of nearly five-fold in money and much larger in tonnage.

It is true the Pennsylvania Railroad traversed a country that had been partially developed by the State improvements, and a large local traffic became immediately available, but at that time the through business was of inconsiderable extent. It has since vastly increased by the rapid growth of the West, both in population and wealth, and is capable of still greater development by the introduction of rates of freight that will successfully compete with those charged upon the lakes and the New York Canals.

A line possessing a large mixed traffic, such as commanded by the Pennsylvania Railroad, cannot fully meet this requirement without the construction of a third track throughout its length, by which trains can be moved at a low rate of speed without serious interruption to the traffic that will pay for the cost of a more rapid movement. Instead of a third track upon the Pennsylvania Railroad to meet this demand, as originally suggested, it has been proposed that the line of the Philadelphia and Erie Railroad, as far as practicable, be taken for such a thoroughfare. This line will cross the summit between the eastern and western waters where the elevation is fourteen hundred and fifty feet above tide, which may be overcome by gradients not exceeding a rise of a half of a foot in one hundred feet, passing through a region abounding in the best bituminous coal for fuel.

A road built to accommodate the object contemplated must be located and constructed with a view to secure the lowest possible cost of movement of trains, and its locomotives and cars adapted to the business they are intended to move and the speed they will travel. Instead of changing locomotives at the end of each day's service as at present, the trains under this system will be provided with double crews, alternating their time upon duty until their destination is completed and the return trip accomplished. The speed of the freight trains should not exceed an average of six miles per hour.

As through travel and general merchandise will seek lines where the movement is more rapid, a railway operated upon this principle can only be introduced with advantage to the community and profit to its shareholders, where the traffic that it will command is very large. The profits upon the capital invested in such a line must be realized from a small margin over cost upon a very large tonnage to be moved. But few, if any, locations at present afford a business sufficient to justify the construction of a railway specially operated upon this principle, and one between the east and west will be sufficient to meet the public demand for many years. In New York the Erie Canal fulfils the objects of such a work not only for that State but for through tonnage between the east and the west. No route in Pennsylvania or elsewhere between the seaboard and the West affords equal facilities for the introduction of this system as the line occupied by the eastern portion of the Philadelphia and Erie Railroad, where a basis for it may be laid with confidence as to its affording favorable results. A railroad operated upon this plan will ultimately be extended to the Mississippi River across the table lands of Ohio, Indiana and Illinois, south of the great lakes, which, when the tonnage is sufficient to justify its construction, will afford a medium of transportation at all seasons of the year, as cheap and more expeditious than via the lakes and Erie Canal, without materially interfering with the profits of existing lines. The general introduction of this system of railways to supersede the present lines can only end in a disastrous failure wherever tried.

The present system of operating railways is adapted to the wants of the country, and is the only one applicable to lines of mixed or moderate traffic, or that could now be profitably introduced into regions where new railways are required.

The preponderance of east-bound traffic upon all of the trunk lines must always give a preference to the faster lines for western shipments, while the financial value of expedition and the necessity for it in the conveyance of live stock must continue such traffic with the lines operated under the present system.

Since your last meeting the Board has received, with regret, the resignation of H. H. Houston, Esq., as General Freight Agent of this company, a position which he has held since the organization of the Transportation Department, performing at all times its delicate duties, with much credit to himself and fidelity to the company. In his successor, Stephen B. Kingston, the Board feel satisfied they have secured the services of a gentleman well qualified by long experience and sound judgment, to administer the important duties assigned to him.

The Board has also received the resignation of R. E. Ricker, Esq., Superintendent of Motive Power and Machinery, who left the service of this company to assume the more responsible position of General Superintendent of the New Jersey Central Railroad Company. To fill the vacancy thus caused, A. J. Cassatt, Esq., has been selected—a gentlemen who has been engaged in the service of the company since the commencement of his professional career.

In conclusion the Board desires to acknowledge the efficient manner in which the business of the company has been conducted by the officers and employes, generally, during the year.

By order of the Board,

J. Edgar Thomson, President.

General Account.

Capital stock	$21,045,750 00
First mortgage six per cent. bonds	4,972,000 00
Second " " "	4,880,840 00
General " " "	59,000 00
Lien of State upon the Public Works sold to the company, bearing five per cent. interest	6,375,738 48
Short bonds, or debentures, six per cent	3,400,000 00
Mortgages and ground rents, six per cent	117,809 32
Bills and accounts payable, including dividends due to stockholders, unpaid	2,727,493 25
Extra dividend fund	1,800,000 00
Contingent fund	1,000,000 00
Balance	221,798 95
	$46,100,424 95

By balance standing on books of company for the construction of the railroad between Harrisburg and Pittsburg, including branches to Indiana and Hollidaysburg, (in all 276 miles,) also for cost of stations, warehouses, shops and shop machinery, on the whole road from Philadelphia to Pittsburg	$18,540,950 00
Balance standing on the books of the company for the purchase of the Philadelphia and Columbia Railroad	5,375,738 48
Balance standing to debit of equipment of road, consisting of 518 locomotives, 269 passenger cars, 120 baggage, mail and express cars, 7,635 freight cars, and 973 road cars	4,476,849 98
Cost of real estate of company and telegraph line	3,481,641 54
Extension of Pennsylvania Railroad to the South Bank of the Monongahela and to the Delaware River, including wharves and grain elevator	2,239,843 95
	$29,115,018 90

Capital stock and advances to the Connecting Railway Company	1,262,978 69
Western Pennsylvania Railroad stock and bonds	554,304 58
31,636 shares capital stock of the Philadelphia and Erie Railroad Company	779,637 26
Stock and bonds upon the line of railway between Pittsburg and Columbus, Ohio, as standing upon the books of the company at this date	5,575,519 88
55,231 shares capital stock of the Pennsylvania Canal Company	1,101,155 00
Amount of other bonds and stocks of municipal and railroad corporations	522,343 67
Cost of bonds and stocks in the sinking fund	2,000,756 69
Amount of fuel and materials on hand for repairs to locomotives, cars, and maintenance of way on the Pennsylvania Railroad	1,074,947 07
Amount advanced to pay for fuel, and materials on hand for repairs to locomotives and cars, and maintenance of way for the Philadelphia and Erie Railroad	829,779 48
Amount advanced to operate the Philadelphia and Erie Railroad	405,518 09
Amount of bills and accounts receivable, and amount due from other railroads	1,593,062 03
Balance in hands of agents	496,889 81
Balance in hands of Treasurer	556,614 35
	$46,100,424 95

☞ The stockholders in the various railroads in the oil regions met at Philadelphia on the 25th inst., and confirmed the contracts of their respective roads for the consolidation of the lines merged in the Warren and Franklin Railroad, Oil Creek Railroad and Farmers' Railroad, all under the title of "Oil Creek and Allegheny River Railroad Co."

☞ The passage of the bill providing for the extension of the Dubuque and Sioux City Railroad secures a prompt completion of the road, and admits of no change in the route.

☞ Cars on the Council Bluffs and Sioux City Railroad, reached Woodberry—seven miles from Sioux City—on the 5th inst.

Boston, Hartford and Erie Railroad.

From the annual report to the Massachusetts Legislature of the Boston, Hartford and Erie Railroad corporation, the following facts are gathered:

The capital stock of the company is $20,000,000; number of shares, 143,840; increase of shares in 1867, 30,070; capital paid in, $14,884,000; increase of capital paid in 1867, $3,007,000; total present amount of funded and floating debt, $10,826,406; increase in 1867 of funded and floating debt, $2,077,076; average rate of interest paid in 1867, 8 per cent.; total cost of road and equipment, $19,242,081; increase in 1867 of cost of road and equipment, $6,318,268; whole length of road in Massachusetts, Rhode Island, Connecticut and New York, about 400 miles, of which about 245 are ironed and in operation. The total income of the road in 1867 was $369,577; in 1866, $84,579.

The company own 18 engines, 12 passenger cars, and 60 merchandise cars. The mortgages on the road and franchise, amount to $8,693,350, an increase of $492,000 since 1866. In December, 1866, the company rented the Norfolk County Railroad for three years, at $42,000 per annum, and the easterly ends of the line now extend to Boston, Brookline and Dedham. The road also extends from Providence, Rhode Island, reaching the main line at Willimantic, in Connecticut. The western terminus of the road is at Fishkill on the Hudson River. The directors are John S. Eldridge (President,) Mark Healey, Henry H. Farwell, Joseph W. Clark and James S. Whitney.

Southern Maryland Railroad.

The Commissioners appointed last year for the purpose of having surveyed a railroad route from the city of Baltimore to Drum Point, at or near the mouth of the Patuxent River, have made a report to the Maryland Legislature, in which they say:

The report of the Chief Engineer, Col. George W. Hughes, to which reference is made for further information on this subject, shows that a railroad communication between the city of Baltimore and the mouth of the Patuxent River may be established in connection with other works now existing or in course of construction, by a railroad of about 55 miles in length, and at a cost not exceeding $1,300,000, including road bed, fixtures and rolling stock.

The undersigned being fully satisfied that the construction of the railroad would confer great benefits on the country through which it would pass, on the city of Baltimore and on the State at large, respectfully petition your honorable bodies to grant a charter of incorporation for a company, under the designation of the "Southern Maryland Railroad Company," to build, stock and work said road, with the rights, privileges and liabilities usually devolved on incorporated companies for similar purposes, including the right to condemn land, to construct branches, and to connect with other roads now finished, or that may be built hereafter, with a capital stock of $1,500,000.

☞ The new management of the Delaware, Lackawanna and Western Railroad Company is as follows: President, Samuel Sloan; Treasurer, Andrew J. Odell; Secretary, Charles E. Carryl; Managers, William E. Dodge, Moses Taylor, George Bulkley, John I. Blair, Rufus R. Graves, Lowell Holbrook, Simeon B. Chittenden, John Brisbin, George Bliss, Percy R. Pyne, William Walter Phelps, Joseph H. Scranton, John C. Phelps, James Blair.

☞ The construction of a railroad from Reads Landing to Chippewa Falls, Wis., is in contemplation. Chippewa Falls, it is said, rests on a bed of iron ore.

Hoosac Tunnel.

The report of Hon. Alvah Crocker, Commissioner, acting as Superintendent of work upon the Troy and Greenfield Railroad and Hoosac Tunnel, together with the reports of the Chief and Consulting Engineers, has been laid before the Legislature. From these we learn that the only work on the Troy and Greenfield Railroad uncontracted for east of the Tunnel is the bridge and embankment over Deerfield river, near the Tunnel. A large portion of the road is already built and in use, and it will probably be opened to the Tunnel by July next. Mr. Crocker speaks strongly of the necessity of a railroad about eight miles in length up the Deerfield river from the mouth of the Tunnel, as deeply interwoven with the success of the Tunnel, opening as it will an almost inexhaustible supply of lumber, which now it is almost impossible to obtain at certain seasons of the year. The saving that might have been made in the purchase of lumber and supplies, had it existed, would up to the present time, have paid the whole cost of the road. As is well known, the progress of the work on the Tunnel was greatly delayed last year by the flooding of the west end by the tapping of secret springs of water. Pumps of sufficient capacity to remove it are now in operation, so that the work has been resumed for some time, and a side tunnel is in course of construction to assist in carrying off the water. An improved route for the two miles by railroad to North Adams has been surveyed, by which a saving of $75,000 to the State in land damages will be made, and the depot facilities will be better. The Burleigh machine drill employed in the tunnel is considered the best in use. Mr. Benjamin H. Latrobe, the Consulting Engineer, who visited Europe last year, says it is superior to the machine used in the Mont Cenis Tunnel. Experiments are to be made with nitro-glycerine. A greater rate of progress was attained last year than ever before, and Mr. Crocker is confident that a largely increased progress may be obtained in the future. At least one hundred and fifty feet per month may be accomplished, unless unexpected obstacles arise. On the 1st of November, 1867, the heading had reached a total of 4,482 feet from the eastern portal, and on the western shaft, eastward heading, 1,004 feet on the west heading 590 feet. Work has not yet been resumed on the central shaft, the works of which were destroyed by fire. Mr. Latrobe anticipates more trouble from water at the west end. He favors the contract system, as the most economical to the State. The progress made on the Mont Cenis Tunnel he regards as warranting the utmost confidence in the future rapid progress of the Hoosac Tunnel.

☞ The Public Treasurer of North Carolina has issued an order for $1,842,000 in State bonds to be delivered to the Western North Carolina Railroad Company. These are new bonds, and the State is liable for $340,000 more, which the Treasurer is notified will soon be required. These are issued under acts of previous Legislatures.

☞ A Railroad Convention was held at New Philadelphia, Ohio, on the 20th inst., to fix the river terminus of the proposed railroad to Toledo. Bridgeport, Ohio, was designated as the point. The road is to be called "The Wheeling and Toledo Railroad."

Rutland and Woodstock Railroad.

A meeting was held in Portland on the 18th inst., to consider the proposition of several Vermont capitalists for the building of the Rutland and Woodstock Railroad to White River Junction, forming a western connection with Portland across New Hampshire. Jonas H. Perley, President of the Board of Trade, presided.

Remarks favoring the project, and also the Portland and Ogdensburg Road, were made by several gentlemen. Among the speakers were Governor John B. Page of Vermont, President of the Rutland and Burlington Railroad, Hon P. T. Washburn of Woodstock, President of the Woodstock Road, Hon. Julius Converse of Woodstock, Charles Sheldon of Rutland, Hon. Henry Keyes of Rutland, President of the Passumpsic Road, Collector Israel Washburn, Jr., Hon. John A. Poor and others of Portland.

Resolutions were unanimously passed thanking the gentlemen from Vermont for the interesting information given, and responding in behalf of Portland in a liberal spirit, encouraging both the Portland and Rochester with the Rutland connection, and also the Portland and Ogdensburg project, and calling upon the merchants of Portland to give the subject their earnest attention.

A committee of twenty-five was appointed to consider the propositions presented, and make an early report. Among the committee are Hon. John B. Brown, Hon. John Lynch, Hon. Jacob McClellan, Hon. Israel Washburn, Jr., Hon. T. C. Hersey and other well known citizens.

Rutland and Burlington Railroad.

In answer to numerous inquiries from the Bondholders whom they represent, the Trustees deem it their duty to state that the Court of Chancery of Vermont has issued a strict injunction against the transfer, by the Trustees in possession, of any of the property in their hands, and against the payment, from the Trust funds, of any dividend upon the preferred stock of the so-called Rutland Railroad Company; and that the dividend now being paid is from funds raised upon the personal credit of individuals in the interest of the new Corporation organized by the Second Mortgage Bondholders.

☞ The Nashville *Press and Times*, says the Memphis and Charleston, Nashville and Decatur, Nashville and Chattanooga, Memphis and Ohio, Mobile and Ohio, Mississippi and Tennessee, Mississippi Central and Knoxville and Charleston Railroads, have all paid in full the January interest on the State bonds loaned to them. The East Tennessee and Virginia, East Tennessee and Georgia, Knoxville and Kentucky, and several other roads, have paid almost the entire interest required.

☞ A number of workmen are at present employed in grading and receiving the ties for the Baltimore and Potomac Railroad, at Watts', on the Annapolis and Elkridge Railroad, and from that point the work is being pushed on towards Covington. Watts' is about seven miles east of Annapolis Junction. The material for the road comes to that point by way of Annapolis.

☞ Benj. Ferguson, of Fox Lake, has been appointed Superintendent of the Fox Lake Railroad, vice J. T. Smith, resigned.

American Railroad Journal.

Saturday, February 29, 1868.

Stock Exchange and Money Market.

The offerings of capital have been less liberal, since our last. The city banks have been losing, in all the leading items of the cash balances; and have cut down their loan averages. The Sub-Treasury has been accumulating currency, thus lessening the supply available to speculative and mercantile borrowers, whose wants have been more urgent. Call loans have been quoted up to 5@6 per cent., and prime discounts to 6½@7 per cent. per annum. At these figures, there has been a livelier inquiry for accommodation, from all sources. Government for a few days past has been reported as selling gold, and buying the maturing Seven-Thirties. These operations have tended to stimulate private business in the loan and discount line. The bank deposits have been reduced nearly 7¾ millions, or to $209,095,351, as against $217,844,548 two weeks since, showing an aggregate reduction, for the fortnight, of about 8¾ millions. The loss of legal tender reserve within the week, has been $2,602,832, and since Jan. 25, full $6,285,231. The specie hoard has fallen off $1,678,973 during the week, and $2,592,819 since the 25th ult. There has been a decrease in the loan averages of 2¼ millions, since our last. The U. S. Sub-Treasury has added over five millions to its cash reserve. The specie reserve of the city banks is now $22,513,981, against $13,513,456 same time last year. The city bank deposits are now $209,095,351, against $198,420,347 week ending Feb. 23, 1867. The legal tender reserve amounts to $60,868,930, against $68,153,895 same time last year. The circulation now stands at $34,100,023, against $33,006,141 same time last year. The loans are now $267,766,643, against $257,923,994 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $90,484,320 a day, against a daily average of $91,753,531 the preceding week, and $99,540,433 the week ending with Feb. 8, 1868. The current week's exchanges average about $138,000,000 a day, the clearances of the Gold Exchange Bank being now included. The city banks, last week, lost $2,602,832 of legal tender, $7,664,477 in the deposit line, and $1,678,973 of their specie reserve. They reduced their loans, $3,249,327; and augmented their circulation, $56,727.

The Philadelphia Bank movement the past week shows a decrease in loans, of $139,780; a decrease of $58,228 in specie; an increase in legal tenders of $623,205; a decrease of $557,056 in deposits; and a decrease of $833 in circulation. The Bank Clearings show a decrease of $4,244,683, and the balances, a decrease of $653,621.

National Bank notes to the amount of $121,850 were issued last week, making the total issue to 1,673 banks thus far, $306,404,491, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $6,734,315, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,845,790,) an actual circulation at this date, of $299,670,176. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,606,550; and for the public deposits, $37,877,950—making a total of $379,484,500. The Treasury Department last week redeemed and destroyed $303,400 of worn and mutilated fractional currency, and issued $480,272 of new.

The U. S. Sub-Treasury receipts, week ending with Feb. 22, were $11,070,787, including $2,589,318 from customs duties; payments, $5,880,800, including $166,000 of coin interest; balance at the close of the week, $109,543,661, against $104,353,674, at the close of the preceding week, showing an increase of $5,189,987. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $4,733,393 including $388,522 from customs; and payments, $5,098,704; on Tuesday, receipts, $1,261,992 including $372,809 from customs, and payments, $1,358,256. The balance at the close of business on Tuesday stood at $109,082,086,

against $105,137,429 a week previous; and $102,957,685 on Feb. 11, 1868.

The aggregate issue of coin certificates by the U. S. Sub-Treasury, in this city, up to date of latest local report was $245,369,740; aggregate redemptions, $209,565,000; leaving outstanding certificates to the amount of $35,804,740. The latest report from the national capital made the outstanding amount of coin certificates on the 18th inst., $28,700,000, against $20,104,580 on the 1st of January.

In the line of Government revenues, there has been very meagre income derived from excises, during the week; while the customs have yielded quite satisfactorily. The excises, last week, yielded less than two millions against some six millions the preceding week; customs at the port of New York $2,586,099 and at the outports, about $850,000 (in coin) more, making the grand total income for the week equal to about $6,982,000 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,920,474, against $310,906,984 the preceding fiscal year; and $211,129,529 fiscal year ending with June 30, 1865. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $127,000,000.

Government received $7,541,247 from customs, through the port of San Francisco, from Jan. 1, to Dec. 31, 1867, against $7,189,763 in 1866, $6,812,368 in 1865, and $6,378,385 in 1864. The receipts from the same source, during the first ten days of January, 1868, were $187,956, against $98,080 same time last year.

The Gold Market was unusually active and excited for a day or two under the impeachment news from Washington, which had the effect of inflating the price to 144 on Monday. Since that day, the offerings have been more liberal; the demand has been less confident particularly on speculative account, and the price has fallen to 141@141⅛ closing languidly. The peaceful tenor of late advices from the national capital has tended to check operations for a rise. Government was a seller of gold on Tuesday and Wednesday, adding to the depression at the Gold Board. The customs call has been on a reduced scale, this week. The export inquiry has been quite moderate, the shipment thus far having been only about half a million.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $430,237, against $184,879 same time last year. The customs demand for Gold last week, averaged $517,219 a day; thus far, this week, it has been equal to $380,665 a day, or equal to a weekly aggregate of $2,283,990. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $19,657, and from California, $1,577,819. The total customs revenue of the Government, in coin, at this port, during the calendar year of 1867, was $116,958,654, against $130,222,092 same time in the preceding calendar year. The customs revenue, at the port, thus far, in the current fiscal year, commencing with July 1, 1867, has been $71,285,123, against $80,761,889 same time in the preceding fiscal year. The total receipts of California gold at this port in 1867, were $27,677,556, against $42,740,913 in 1866, showing a decrease in 1867, of $15,063,357. The receipts of California gold, at this port, thus far, in the current fiscal year, commencing with July 1, 1867, have been $21,545,593 against $29,384,811 same time in the preceding fiscal year, showing a decrease of $7,839,218 in 1867–'68. The exports of specie from this port, last week, were $934,264, against $473,009 same week last year. The exports of specie, hence, since July 1, 1867, have been $37,668,565, against $21,495,143 same time in 1866–'7. The total outflow of specie from the port, in 1867, was $51,841,678, against $62,553,700 in 1866. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $166,000, and since July 1, 1867, $51,037,520, against $33,513,408 same time in 1866–'7. The total coin interest disbursements through the Government office, in 1867, was $61,871,348, against $48,680,377 in 1866. The specie exports from San Francisco, from Jan. 1, to Dec. 31, 1867, reached $40,671,797, against $44,365,668, 1866, $44,426,172 in 1865, and $55,707,201 in 1864. The exports from San Francisco, from Jan. 1, to Jan. 29, 1868, were $2,915,476, against $3,692,507 same time last year.

The foreign exchange market has been rather variable, through the week, the opening dealings having been up to a fair average at buoyant figures, while the later transactions were on a restricted scale at a shade easier rates. The offerings of sterling drafts were more liberal on Tuesday and Wednesday.

Bankers' prime sixty day bills on London closed on Wednesday at 109¾@110, and on Paris to 5.18¾c.@5.13¾; sight bills on London to 110@110⅜, and on Paris to 5.12½c.@5.11¼. The offering of produce bills have been moderate this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $2,968,819, against $4,017,029 same week last year; total, since July 1, 1867, $117,055,014, against $122,437,091 same time in 1866–'67. The total value of exports of produce and merchandise in 1867, was $189,688,044, against $192,329,554 in 1866.

Government securities have been more freely offered for sale at the Boards, and through the commission houses, since our last, and as the demand has been less animated from all sources, prices have declined. On Wednesday, the inquiry improved, and the market exhibited more steadiness.

U. S. sixes of 1881 closed here on Wednesday at 117⅞@112; U. S. Five-twenties of 1862, 111¼@111⅜; U. S. Five twenties of 1864 at 109@109⅛; U. S. Five-twenties of 1865 at 109¾@109⅞; U. S. Five-twenties of 1865, consolidated, 107¾@108; U. S. Five-twenties of 1867, 108⅛@108¼; U. S. Ten-forties at 105⅛@105¼, and U. S. Seven-thirties at 107½@107⅝. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

May, 1865 ..... 117½	September, 1865.. 116⅛
August, 1865.... 116½	October, 1865 116

U. S. three per cent. certificates 100¼

Government through the Sub-Treasury in this city, has paid off $4,807,800 of the matured loan of 1847–'67, since Jan. 1, 1868.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 12.	Feb. 19.	Feb. 26.
Consols	93¼	92¾	93⅛
U. S. 5-20's of 1862....	71¾	72	71⅝
Erie	48	49⅜	44¼
Ill. Central	88½	88¾	88

The railway and miscellaneous share market has been excited and feverish, since our last. Values have been further depressed, by forced sales, chiefly on speculative account. On Tuesday and Wednesday, there was a rather sharp recovery, on a more confident investment call.

General business has shown considerable vigor, chiefly in the produce lines, but prices have been unsettled. Breadstuffs, provisions and cotton, as a rule, closed in favor of purchasers. Middling upland cotton left off at 22@22¼ per lb. The stock of cotton now here is estimated at about 47,000 bales. The receipts at the port this week, have averaged about 4,600 bales a day. The receipts at all the shipping ports from Sept. 1, 1866, to Aug. 31, 1867, were 1,951,998 bales, against 2,154,476 bales the preceding cotton year; exports, 1,554,664 bales, against 1,557,054 bales the preceding year; estimated stock at close of the year, 80,296 bales against 253,000 bales same time last year. The receipts at all the ports, since Sept. 1, 1867, have been 1,491,000 bales, against 1,283,000 bales same time last year; exports, same time, 907,000 bales, against 651,000 bales same time last year; stock on hand at latest dates, 351,000 bales, against 620,000 bales same date last year. At the Live Stock Markets, beeves have been fairly active through the week, at from 13@20c. per lb.; calves, at from 8½@13½c.; sheep and lambs, at from 4¾@9c.; and some at from 8½@9c. per lb., all live weight. The week's receipts include 4,188 beeves, 809 veal calves, 25,970 sheep and lambs, and 10,035 swine. The regular monthly sale of Scranton coal on Wednesday passed off with a fair degree of spirit, 50,000 tons having been very promptly taken by purcharers at from $3.45@$5.25 per ton of 2,240 lbs., deliverable at Elizabethport, N.J. Foreign merchandise has been attracting rather more attention from buyers, especially seasonable styles of dry goods, which have been quoted strong and buoyant in price. The total imports of foreign dry goods, last week, were $2,660,243, and the total amount marketed $2,974,960. The value of foreign merchandise imported last week, was $3,075,243—making the grand total specie value of last week's imports of dry goods and merchandise, $5,735,486, against $6,572,606, same week last year; total since July 1, 1867, $144,424,056, against $173,702,805 same time in 1866–'67. The aggregate for the year 1867, was $242,478,575, against $277,043,050 in 1866. The ocean freight market has been rather quiet, since our last, rates have favored shippers. For Liverpool we quote flour at 2s. by sail, and 2s. 6d. by steamer, per bbl.; grain at 8½d.@8¾d. by sail, and 9¾d.@10d. by steamer, per bushel; cotton at $\frac{5}{16}$d.@$\frac{3}{8}$d. by sail, and $\frac{7}{16}$@$\frac{3}{8}$d. by steamer, per lb.; and heavy goods at 25s.@30s. by sail, and 35s.@45s. by steamer, per ton. Total number of vessels in port on Wednesday 501.

The balance in the Sub-Treasury on Wednesday was $109,259,940 61.

The New York exports, exclusive of specie, for the week ending Feb. 25, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week.....	$4,017,029	$2,968,819
Prev. reported.....	23,728,425	22,943,310
Since January 1.....	$27,745,454	$25,912,129

The New York imports for the week compare as follows:

	1867.	1868.
Dry goods	$2,357,312	$2,660,243
Gen. merchandise.....	4,215,294	3,075,243
Total for the week.....	$6,572,606	$5,735,486
Previously reported....	30,664,938	22,590,437
Since January 1.....	$37,237,544	$28,325,923

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Portland and Kennebec Railroad.

The annual meeting of this company was held in Portland on the 10th inst., and the following gentlemen elected directors for the ensuing year: Richard D. Rice, Darius Alden, Augusta; John B. Brown, Geo. F. Shepley, H. N. Jose, Portland; William D. Sewall, Geo. F. Patten, Bath; N. M. Whitmore, Gardiner; Philander Coburn, Skowhegan. At a subsequent meeting of the directors, Richard D. Rice was elected President, Walter Hatch, Superintendent; John S. Cushing, Treasurer; J. W. Clapp, General Ticket Agent.

The total receipts of the road have been $576,479 16; total expenditures $404,416 57. In the latter sum is included $11,103 91 for new building, repairs and improvements in Bath and Skowhegan, rebuilding an engine in Portland at a cost of $8,942 02, for building one new passenger car, one new smoking car, and twenty new freight cars, in addition to ordinary repairs. The number of miles run by locomotives was 307,443, at a cost of $27 per mile.

The general condition of our road is good, better than ever before; its equipment is sound and efficient, and in the present condition of the country sufficient for the transaction of business with reasonable promptness.

During the next year the company will require new station buildings at Waterville, a new freight depot at Augusta, and car house in Portland, and some additional accommodations at Brunswick and Yarmouth, which will not fall within the line of ordinary repairs.

☞ Messrs. Thomas Firth & Sons, steel manufacturers, Sheffield, Eng., have appointed Messrs. Abbott & Howard, (who for more than twenty years have been connected with them as their New England Agents,) as their sole representatives in the United States. Their places of business and address are indicated in their Advertisement, which may be found on another page.

☞ A branch railway from Harrisburg or Lynden to Brantford, Canada, is spoken of.

Railroad Earnings.--Weekly.

The earnings of the Chicago and Northwestern Railroad for 3d week in Feb., 1868...$210,591 66
Corresponding week previous year .. 143,454 16

Increase $67,137 50

The earnings of the Atlantic and Great Western Railway for the second week in Feb., 1868, were.....$99,254 00
Corresponding week previous year....110,383 00

Increase $11,129 00

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in Feb., 1868, were.....$75,701 00
Corresponding week of 1867..... 71,946 00

Increase $3,755 00

The earnings of the Toledo, Wabash and Western Railroad for the 3d week of Feb., 1868, were.....$60,801 89
Same week in 1867..... 41,903 44

Increase.....$18,898 45

The earnings of the Michigan Central Railroad for the 2d week in Feb., 1868, were...$69,330 19
Corresponding week of previous year.. 63,887 39

Increase $5,442 80

The earnings of the Western Union Railroad for the 3d week in Feb., 1868.....$9,874 19
Corresponding week previous year.... 4,960 32

Increase $4,913 87

The earnings of the Detroit and Milwaukee Railroad for the week ending February 20, 1868, were $22,435 71
Corresponding week of 1867..... 25,306 42

Decrease $2,870 71

Hudson River Suspension Bridge.

The following is a general statement of facts and figures relating the Suspension Bridge to be built across the Hudson River, at St. Anthony's Nose near Peekskill; Clear span, 1,600 feet; length of bridge between the towers, 1,665; total length of bridge, including approaches, 2,499; height of bridge above high water, 155; working safe load for the railroad lines, 2,400 tons; working safe load for the highways, 2,880; total safe load for the bridge, 5,280; load that would break the bridge, 25,161; the bridge will carry at one time 32 passenger cars; the bridge would carry safely 34,560 people, and a train of 60 locomotives, if they could all be on it at once; 53 locomotives and 18,000 people would fill it; there are to be 20 cables in 4 systems; each cable will be about 14 inches diameter; the cable contain 371,-195,750 feet steel wire, or about 70,302 miles of steel wire; total weight of iron and steel in the bridge, 17,005 tons; total amount of masonry, 58,084 cubic yards; total suspended weight, 9,651 tons; height of towers above water, 280 feet; the bridge will leave the water way of the river untouched.

☞ The following gentlemen have been elected directors of the Pittsburg and Steubenville Railroad for the ensuing year: John Scott, President; R. H. Hartley, A. U. Howard, Alex. Chambers, J. B. Dorrington, Josiah Bacon, Wister Morris, J. G. Morris, James Means, Edmund Smith, Wm. M. Hersh, J. McC. Creighton, S. Livingston.

☞ The masonry of the Bridge at Burlington, Iowa, will soon be completed. One span of the iron work is up and the contractors are busy with the second.

Journal of Railroad Law.

COMMON CARRIERS NOT TO DELIVER AT UNSEASONABLE HOURS.

The facts in the recent case of Withers *vs.* New Jersey Steamboat Company (48 Barb., 455,) are fully set forth in the following opinion:

Appeal from a judgment rendered at the Circuit. Trial by the Court without a jury. Action to recover damages sustained on ninety-one kegs of tobacco transported by the defendants as common carriers from Albany to New York, in consequence of the negligence of the defendants. The allegations of the complaint were all put at issue by the answer, in respect to the title of the plaintiffs, the negligence of the defendants and the damage sustained.

The evidence showed that the tobacco was received by the defendants on board the steamer St. John, at Albany in good order, and brought to the city of New York, where it arrived at an early hour in the morning, and was landed on the dock. It was raining at the time, and the tobacco was exposed for several hours. It was imported from Canada, and the consignees were unable to remove it until a Custom House permit was obtained, after the lapse of several hours. The defendants did not notify the consignees of the arrival of the tobacco, but their carman saw it on the dock at about eight o'clock in the morning, at which time he notified the agents of the defendants, that it was suffering damage from the rain and required covering, which was then partially and insufficiently done. The carman then proceeded to the consignees and notified them of its arrival, at about nine o'clock A. M., and the tobacco was then removed with all the expedition that the entries at the Custom House would permit, but not till large damages had occurred. The defendants were notified of the injury sustained, and requested to examine the tobacco. A survey was held and the defendants notified, but they did not attend. The merchants who surveyed it reported it damaged; and they testified that the value when it arrived, if it had been in good order, was one dollar per pound, and that in its damaged condition, it was worth sixty-two and a half cents.

It was not sold until Sept. 8th, although the damage occurred July 25th, 1864.

During that time the market for sound tobacco fell off ten to fifteen per cent., but the ratio on damaged tobacco would be less. Some thought it would have brought more if it had been sold at once, and others thought it brought as much when it was sold as it would have done if sold earlier. There were some negotiations by the defendants for taking the tobacco for their own account, which delayed the sale till after the middle of August.

The tobacco had been sold by the plaintiffs to arrive—sixty-seven kegs to Smith & Co., and twenty-four kegs to Conolly & Co.

Smith & Co., were consignees of the whole of it, but they refused to take the tobacco in fulfillment of the sale to them, on account of its damaged condition, and so notified the plaintiffs. Conolly & Co. took the twenty-four kegs at the contract price—62½ cents per pound, agreed on in March preceding, but it does not appear that it was taken on account of that contract. The evidence does not appear to be directed to that question, as to Conolly & Co., but it cannot be credited that they would receive a damaged article, injured to the extent of almost one-half, as in fulfillment of a contract for the delivery of sound tobacco. The evidence does not show it to have been received on the March contract.

These facts do not warrant the point made by the defendants' counsel, that the tobacco was delivered by the plaintiffs to the purchasers, and that no right of action for the recovery of damages remained in the plaintiffs. The tobacco, which the plaintiffs agreed to deliver was to be a sound article. Before it reached the purchasers it was damaged, and could not be claimed as a performance of a contract for the delivery of sound tobacco.

Nor is there any ground of objecting that Smith & Co., could not act as agents or consignees of the tobacco for the account of the plaintiffs. That firm notified the plaintiffs, without delay, that they did not receive it as purchasers.

As the defendants landed the tobacco at an unseasonable hour, they could not have reasonably expected the consignees to be on hand to receive it instantly, especially as they had not notified them that it had arrived, or was being landed; and the article, being in bond, also would necessarily require some delay, after the commencement of business hours for the purpose of transacting the Custom House business.

The evidence proved the damage to the extent found by the Judge.

The complaint demanded $7,147 38 damages, and the Judge allowed $8,887 90 besides interest.

The complaint must be deemed amended, to conform to the fact found in this respect.

The judgment should be affirmed with costs.

(New York General Term, April 1, 1867.)

☞ The Treasury Department has decided that every change of a firm by which a member retires from the same, whether a new partner takes his place or not, or by which a former proprietor disposes of his entire business interest and a successor takes his place and continues the business, constitute alike, in contemplation of law, a new person or firm, liable to special tax from the first of the month in which such change took place, for the balance of the year for which tax has once been paid by the original firm or owner.

☞ A meeting was recently held in Syracuse at which resolutions were passed in favor of a railroad north of Oneida Lake to the Rome and Watertown road, and a railroad to the Chenango Valley, and declaring it good policy to loan the credit of the city to the amount of four hundred thousand dollars in their aid; conditioned on individual subscriptions being made to the extent of seven thousand dollars per mile.

☞ The following gentlemen have been elected directors of the Vermont and Massachusetts R. R. Co.: Daniel S. Richardson, William H. Hill, James A. Dupee, Francis Goodhue, George F. Fay.

☞ That portion of the work on the Baltimore and Potomac Railroad under contract by Messrs. E. G. W. Hall & Co., nine miles from Marlboro', is being carried on with energy. The road is now a fixed fact.

Boston, Clinton and Fitchburg Railroad.

At the recent annual meeting of the Boston, Clinton and Fitchburg Railroad Company, the following gentlemen were elected Directors: Lyman Nichols and Nathaniel Thayer, of Boston; Cyrus Gale, Northborough; Albert Ballard, Framingham; William D. Peck, Sterling; John H. Lockey, Leominster; Geo. A. Torrey, Hale W. Page and George E. Towne, Fitchburg; Francis B. Fay, Lancaster; Edwin A. Harris, Clinton, and D. D. Ferson, Fitchburg. At a subsequent meeting of the Directors, Lyman Nichols was chosen President, and H. F. Coggshall, Treasurer and Clerk.

Winona Eastern Connection Railroad.

The Winona *Republican* has assurances through General Sprague, General Manager of the Winona and St. Peter Railroad, who has just returned from a conference with the directors of the Chicago and Northwestern Company—that nothing has been done, and nothing is contemplated, looking to the abandonment of work on the Winona Eastern Connection Railroad; but on the contrary it is the fixed purpose of the Northwestern Company to push that enterprise forward to completion as vigorously as possible, and ultimately to extend the connection through to Madison, in accordance with a determination long since formed.

☞ The Trenton *American* says that the negotiations for the purchase of the properties of the Northern New Jersey Railroad by the Hudson River West Shore Railroad Company have been completed, and the last named company on the 19th inst. paid one hundred thousand dollars to insure the bargain.

☞ The Governor, of New Jersep, has signed the charter of the railroad from Paterson to Pompton. The road is to be immediately located.

NOTICE TO CONTRACTORS,

PROPOSALS will be received until March 1st, 1868, for the GRADING MASONRY, BRIDGING and TRACK LAYING of the OAKINGTON BRANCH RAILROAD, from its junction with the Philadelphia, Wilmington and Baltimore Railroad, two and one-half miles south of Havre de Grace to the Bay Shore at Oakington, 2 52-100 miles.

Bids to be made for the entire work, including the furnishing of TIES and IRON (50 lbs. to the yard), or for any part of the same. Plans and specifications to be seen at the office of R. K. HAWLEY & CO., No., 16 Eastern avenue, Baltimore, where proposals will be addressed.

R. K. HAWLEY, President.

NOTICE TO CONTRACTORS.

PROPOSALS will be received until March 4, 1868, at the office of the undersigned for the BUILDING AND CONSTRUCTION OF THE KENT COUNTY RAILROAD, a distance of thirty-two miles, commencing at Massy's Cross Roads and running to Swan, Creek via Chestertown. Profile, plot, plans and specifications will be exhibited at the Railroad office, in Chestertown, by Mr. J. B. Wingate, the engineer, who will furnish all needful information to any who may call.

GEORGE VICKERS,
President Kent County Railroad Co.

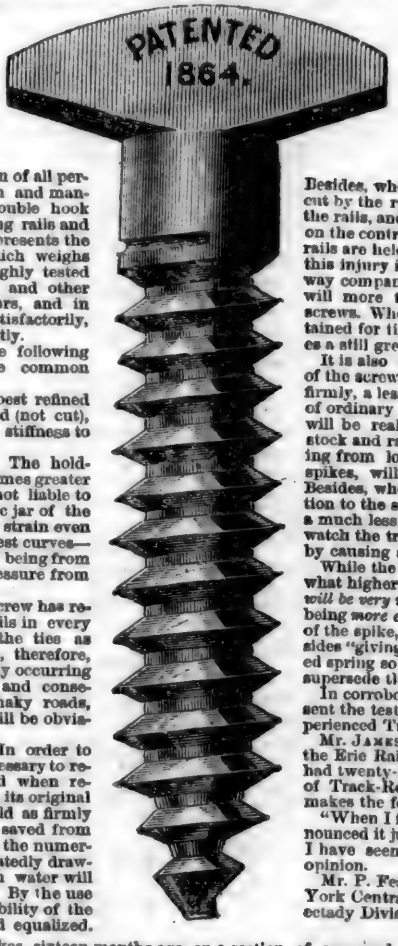
U. S. RAILROAD SCREW SPIKE COMPANY,



NO. 45 CLIFF STREET, NEW YORK,

MANUFACTURERS OF MONTIGNANI'S PATENT

RAILROAD SCREW SPIKE.

HENRY YOUNG, President.

G. B. HUBBELL, Secretary.

Works at
OSSINING,
Westchester Co., N. Y.

We respectfully call the attention of all persons engaged in the construction and management of railroads, to the double hook headed Screw Spike, for fastening rails and chairs to ties. The above cut represents the size and shape of the Screw, which weighs eight ounces. It has been thoroughly tested on the Erie, New York Central, and other Railways, from one to three years, and in every case it has stood the test satisfactorily, having performed its work perfectly.

The Screw Spike possesses the following important advantages over the common spike:

First.—They are made of the best refined Iron, and the thread, being forged (not cut), imparts additional strength and stiffness to them.

Second.—INCREASED SECURITY. The holding power of the screw is many times greater than that of the spike, and it is not liable to break nor become loosened by the jar of the cars, nor by the upward or lateral strain even on the steepest grades and sharpest curves—the holding capacity of each screw being from four to five tons, and the side pressure from three to four tons.

In three years' experience no screw has removed from its place, and the rails in every case have been held as firmly to the ties as when first put down. By its use, therefore, the numerous accidents constantly occurring from loose and broken spikes, and consequent loose and broken rails, shaky roads, and the spreading of the rails, will be obviated.

Third.—GREATER ECONOMY. In order to remove the rail it will only be necessary to reverse the screw one-quarter; and when replacing it, turn the screw back to its original position, when the rail will be held as firmly as before. The ties will thus be saved from the injury of splits, checks, and the numerous holes made in them by repeatedly drawing and replacing spikes, in which water will collect, causing their rapid decay. By the use of the screws, therefore, the durability of the ties will be greatly increased and equalized.

Besides, when the rails are loose the ties are cut by the repeated blows made on them by the rails, and are thereby materially damaged; on the contrary, where the screw is used, the rails are held so firmly in their place, that this injury is prevented. The saving to railway companies in ties alone, it is estimated will more than pay the whole cost of the screws. Where none but soft wood can be obtained for ties, the screw manifestly possesses a still greater advantage over the spike.

It is also calculated, that in consequence of the screws holding the rails to the ties so firmly, a less number will be required than of ordinary spikes, also a very great saving will be realized in the wear of the rolling stock and rails. The considerable loss arising from loose, bent, broken and missing spikes, will be almost entirely prevented. Besides, where the screw is in use, in addition to the saving of time in relaying rails, a much less number of men are required to watch the track and keep it in repair, thereby causing a great saving.

While the first cost of the screw is somewhat higher than the spike, *in the end they will be very much cheaper.* The screw therefore being *more economical*, and by its use in place of the spike, *making the roads more secure*, besides "giving to the track an easy and connected spring so much desired," it must entirely supersede the common spike.

In corroboration of the foregoing, we present the testimony of several of the most experienced Track Masters in this country.

Mr. JAMES R. HILLIARD, Track Master on the Erie Railway, (Union Division), who has had twenty-four years' experience as Master of Track-Repairs, after testing the screws makes the following report:

"When I first saw your Screw Spike I pronounced it just the article wanted, and since I have seen it in use I still hold the same opinion.

Mr. P. Featherly, Track Master on the New York Central Railroad, (Albany and Schenectady Division,) says, January 9th, 1866:—

"I put down your Screw Spikes sixteen months ago, on a section of our road where our heaviest work is done, viz., a steep grade on the main track, three miles from Albany, one-quarter of a mile above West Albany, and they are there to-day, firm and as secure as when first put down, while the adjacent track, fastened with common spikes, has been respiked several times during that time."

Mr. E. T. MARBLE, Track Master on the Albany and Saratoga Railroad, says:

"On examining the Screw Spikes put down by me September 16th, 1863, I find they have not started either upward or sideways, that they still hold the rail to the ties as securely as when first put down; while great numbers of common spikes are loose and out of place. And on examination I find the threads are bright and clean."

Mr. E. H. DE VERGNE, Track Master on the Shore Line Railroad, writes:—

"Having examined and tested your Screw Spikes on our road, I feel satisfied that they are more durable, safer and more reliable than common spikes. By their use our Railroads would be perfectly safe so far as the track is concerned. Although it requires somewhat more time to drive them than it does the common spike, yet it is more than counterbalanced by their greater durability and safety, and saving of time in relaying rails. With practice and the use of proper tools, even that objection can be overcome."

Mr. A. F. SNYDER, Track Master, Albany, January, 1867, writes as follows:

"This is to certify that the screw Spikes put down on the bridge over the Hudson River at Albany, N. Y., by the U. S. R. R. Screw Spike Co., February, 1866, have done their work perfectly—holding the rails securely and firmly to the ties—not having started in the least, while the ordinary spikes, which were put down on the bridge at the same time, have, many of them, started up, and are quite loose and useless."

Mr. J. W. FOTTER, Superintendent of the Cincinnati, Dayton, and Eastern Rail Road, says, January 9th, 1867:—

"The Screw Spikes manufactured by your Company have thus far given entire satisfaction, more than equaling our expectations. We have had them tested at our crossings for the past six months, and find them solid in the tie as the day they were put in. I consider them invaluable for crossings and bridges."

Safety Railroad Switch.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the *MAIN TRACK IS NEVER BROKEN,* and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns *The Life and Limb of all Travelers upon Railroads.*

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company. I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

MERRICK & SONS,

SOUTHWARK FOUNDRY,

430 WASHINGTON AV.,

PHILADELPHIA,

MANUFACTURE

Steam Engines—High and low pressure, for land, river, and marine service; Horizontal, Beam, and Vertical. Patterns on hand for 8x10, 14x13, 18x12 Oscillating; compact and cheap.

SOLE MANUFACTURERS IN PHILADELPHIA AND CHESTER OF WILLIAM WRIGHT'S PATENT VARIABLE CUT-OFF STEAM-ENGINES.

Boilers—Plain cylinder, flue, and tubular.

Steam-Hammers, of Nasmyth & Davy patterns, with all the recent improvements.

Strahan's Drill Grinding Rest and Twist Drill-Holder.

Castings—Loam, dry, and green sand, brass, &c.

Roofs—Iron frames for covering with slate or iron—neat, durable, and economical.

Gas-Holders of every description. *Builders of Holders for the Philadelphia Gas-Works of 100 and 160 feet diameter.*

Tanks of every form, for sugar estates, refineries, oil, &c.

Gas Machinery of every description, including Retorts, Bench-castings, Holders and Frames, Purifiers, Coke and Charcoal Barrows, Gas-Valves, Governors, Hoisting Machines, &c.

Manufacturers for the American Meter Company of their Patent Dry Center Valve for changing Purifiers.

Bartol's Patent Wrought Iron Retort-lid, durable, light and cheap.

Sugar Machinery, such as Vacuum Pans and Pumps, Defecators, Bone-Black and Bag Filters, Bone-Black Burners, Washers, and Elevators, Hydraulic Elevators, Sugar and Bone-black Cars, Strike Heaters, Open Steam Trains, &c.

Sole Assignees and Manufacturers in the United States of

Weston's Patent Self-centering Self-balancing Centrifugal Sugar-Draining Machine.

Glass & Bartol's improvement on Aspinwall & Woolsey's Centrifugal Sugar-Draining Machines.

N. Rillieux's Patent Sugar-Boiling Apparatus, applicable to Beet-Root and Cane Sugar.

Having had twenty years' experience in the manufacture of Sugar Machinery for Cuba, South America, and the United States, they are prepared to contract for the design and erection of apparatus for making Sugar from Beet-Root or Cane, and for Refineries for either Sugar or Molasses.

They are also in possession of plans of the most recent improvements in machinery used in France and Germany in the manufacture of Beet-Root Sugar.

ENGINEERING WORKS.

ENGINEER'S FIELD BOOK,
By C. S. CROSS, Civil Engineer.
THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—
1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.
It is a plain, clear and most valuable book for practical Railroad Engineers. Sent **free by mail,** upon receipt of the price. For sale at this office. Price **$1.50.**

LYONS' TABLES.
To Civil Engineers and Contractors.
FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.			SHEET No		
1.	General Table for all Bases and all Slopes.		13.	for Base 18 ft. Slop.	1½ to 1
2.	For Side Hill Cuts and Fills.		14.	" 20 "	1½ to 1
3.	Base 12 ft. Slopes	1½ to 1	15.	" 24 "	¼ to 1
4.	" 14 "	1½ to 1	16.	" 24 "	1½ to 1
5.	" 15 "	¼ to 1	17.	" 25 "	1½ to 1
6.	" 15 "	1 to 1	18.	" 26 "	1½ to 1
7.	" 14 "	1½ to 1	19.	" 25 "	¼ to 1
8.	" 16 "	¼ to 1	20.	" 30 "	1 to 1
9	" 16 "	1 to 1	21.	" 30 "	1½ to 1
10.	" 18 "	¼ to 1	22.	" 30 "	1½ to 1
11.	" 18 "	¼ to 1	23.	" 32 "	1 to 1
12.	" 18 "	1 to 1	24.	" 32 "	1½ to 1

The Tables are printed in clear, bold type on tinted paper, sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.
Sent, **free by mail,** in separate sheets, at **25c. each.**

American Railroad Journal.

New York, Saturday, March 7, 1868.

New-York, Housatonic and Northern R.R.

This company was organized under the General Railroad Law of New York in 1863, and all the requirements of the law in the matter of subscription and cash payments having been made, the articles of association were filed in the office of the Secretary of State on the 6th of October, of that year. The amount of the capital stock is $1,000,000, in 10,000 shares of $100 each, and has been largely subscribed for by people residing along the proposed route, although, in addition to them, some capitalists have a moneyed interest in the road. The length of the road is 39¼ miles, and the gauge will be the usual one of 4 feet 8½ inches. The route, as located is as follows: It leaves the line of the Harlem Railroad a little south of White Plains, runs northward, passing through, or in the immediate vicinity of Purchase, at Rye Lake, North Castle, Bedford, and Cross River; thence through North Salem, Ridgebury, the borough of Danbury, and finally reaches the northern terminus, Brookfield, which is situated on the line of the Housatonic Railroad. It should, perhaps, be remarked that the road under notice is entirely distinct from the Housatonic Railroad which runs from Bridgeport, a station on the New York and New Haven Railroad, northward, 110 miles, to Pittsfield, Mass., where it connects with the Pittsfield and North Adams and Hudson and Boston Railroads. According to the report of the engineer, Mr. Avery, the topography of the country traversed by this line is very favorable for the construction of a railroad, 70 per cent. of route being a straight line, the maximum grade only 60 feet, and the minimum curvature 1,432.5 feet radius. Of the principal obstacles to be overcome the following may be enumerated: About three miles from White Plains there will be necessary a deep earth and rock cutting; the grade thence to the State line of Connecticut is easy; the line then passes across the corner of the town of Greenwich into New York again, thence to the village of Bedford with light work and easy grades; but after passing through the village there will be an earth cutting of 45 feet; at Palmer's Summit, 2½ miles north, a gravel cutting will be necessaay averaging 20 feet in depth for 2,000 feet; from that point to the Connecticut line again the road is a very easy one, with the exception of a 50 ft. embankment a little to the south of Cross River, and a cutting of 20 feet in depth half a mile west of Lake Waccabuc. On re-entering Connecticut there will be some heavy work, but the route, considered in all things, is a comparatively easy one. The estimates of the cost of the road have been made from the following data: Maximum grade, 60 feet; minimum curve, 1,432.5 feet; earth excavation, 20 feet; rock excavation, 16 feet; embankment, 14 feet; and all materials, engines, cars, and fixtures to be of the first class. From these premises it is calculated that the total cost of the road in running order will be $2,000,000, at an average of about $50,000 a mile. In the business estimates it is computed that from passengers the yearly receipts will be $159,000; from general freights, $105,000; and from the milk freight, $211,000. These figures would allow at least 10 per cent. for dividends. But there is also to be taken into account the additional business which would pass from the Housatonic Railroad over this road to and from New York. This, it is estimated, would be equal to one-third of the regular way business of the road, and would make the net annual earnings 12 to 14 per cent. of the cost; and yet in addition must be calculated the business which would be received from the Boston, Hartford and Erie, which, though the data are not definite, would be very considerable in the course of a year. Of the various advantages of this road to travelers, shippers, and people resident upon its line, the saving in distance, and consequently in time, is first to be noticed. It is claimed that the New York, Housatonic, and Northern Railroad and connections will save over all other roads existing, from New York to Danbury, 10 miles; to stations on the Housatonic Road above the Junction 23 miles; and to Boston, by the Boston, Hartford and Erie connection the saving in time will be about one hour. Next to the gain in time is the increase in the value of property on each side of the route of the road when it shall be completed and opened for public use—based upon past experience. This increase in value is estimated at more than the entire cost of the road. A further advantage arising from the construction of this road is the amount saved in cash to passengers and freight between Danbury and Brookfield on the Housatonic Railroad and New York city; this is estimated to be more than $150,000 annually. In regard to the nature of the country which will be opened by this road it can be safely presumed that thousands of the citizens of New York have but a faint idea of the pleasant lakes, streams, beautiful scenery, and unrivaled sites for Summer residences, notwithstanding its nearness. When they become aware of the great superiority of this section of Westchester county, numerous country seats will be built, new villages will spring up, and old ones that have remained stationary without improvement for nearly a century will acquire new life and growth. These villages will not only furnish a large passsenger business, but, of necessity, a large amount of general freight. Some of the places have already manufactures of considerable importance, as Danbury and Bethel, where the hatting interest predominates, while others produce shoes, paper, flour, &c. But without doubt the most profitable local freight will be milk. Of the great amount of milk consumed in New York the largest proportion comes from Westchester, Putnam, and Dutchess Counties;

but other sections of the country are being opened by new railroads—such as the Walkill Valley Railroad—for the production of this commodity. In the present case the rich grazing lands lying on either side of the New York, Housatonic, and Northern Railroad are unsurpassed by any others in the State for their adaptability to dairy purposes. Considered as freight, milk, as is well known, is among the best paying of any freight transported by the railroads entering New York, and as an element in the value of these railroads one which adds greatly to their intrinsic worth. It is confidently expected that this road will open to the milk producing business a strip of country from four to ten miles wide and more than 30 miles long. A glance at the map will show the advantages to passengers from New York to Hartford and Boston in going over this road. The importance of its connections with the Erie and New England, and Boston, Hartford and Erie Railroads can readily be understood by all persons who have ever been so unfortunate as to be obliged to make a roundabout journey of miles to reach a point not more than half that distance in a straight line. The link from Danbury to Brookfield, five miles in length, connecting the Housatonic Railroad with the Danbury and Norwalk Railroad, is completed, and will soon be running, and of the remainder the grading is begun; a force of men are at work near Rye Lake, and at that point there is a steam excavator. However, the weather has been unfavorable and the progress has not been been as great as would otherwise have been the case; but it is intended early in the Spring to employ a large force of laborers and to push the construction of the road as energetically as possible. The whole road will probably be in running order before the 1st of June, 1869, when it is proposed to run all trains through from New York to Brookfield without change. The officers are: George W. Mead, President; Sewall Sergeant, Secretary and Treasurer; G. S. Avery, Chief Engineer. The office of the company is at 187 Broadway, New York.

Lehigh and Susquehanna Railroad.

The remaining portion of this road was opened from Mauch Chunk to Easton on the 3d day of February, and regular trains now run through to Philadelphia from Scranton, making close connections with the North Pennsylvania Railroad at Bethlehem. They have made all the arrangements to run trains through to New York over the Morris and Essex Railroad. Passengers will be ticketed through to New York and Philadelphia, and to avoid delay at Easton, omnibuses will carry passengers across the Lehigh River to the Morris and Essex train. After the completion of the bridge at Easton, trains will connect direct with the Morris and Essex and Central Railroad of New Jersey through to New York. This road is owned and worked by the old Lehigh Coal and Navigation Company, the great pioneer in coal development in Pennsylvania. The main line extends from Union Junction, four miles east of Wilkesbarre, to Easton, a distance of 106 miles, and in connection therewith this company have a lease of the Union Company's Railroad to Green Ridge, two miles east of Scranton, a distance of fifteen miles, making a continuous line of road 122 miles in length, from Green Ridge to Easton.

They also own the Nanticoke Railroad and its branches, which comprises upwards of twenty-five miles of road running through Wyoming Valley, on the east side of the Susquehanna River, connecting the main line with the principal collieries of this region.—*Scranton Republican.*

Portland and Kennebec Railroad.

The receipts from operations of this road for the years ending December 31, 1866 and 1867, have been as follows:

	1866.	1867.

Total, as above	$100,684 43

The whole number of passengers transported during the year was 283,796, equal to 6,630,284 carried one mile. Tons of freight carried, 137,602. The trains have run 307,443 miles. There have been laid during the year 700 tons of new and 150 tons of repaired rail, and 36,500 sleepers. The President in his report says:

A pervading interest seems to have been awakened in our State in favor of railroads. New enterprises are being projected and entered upon, the completion of which will contribute largely to the development of the material resources of the State. Maine occupies a commanding position on the map of the continent. Situated in the direct line of communication between the commercial cities of Western Europe and Eastern Asia; on a line where the configuration of the land, and the existence of great rivers and lakes present remarkable facilities for the construction of railroads, and internal water communication, her territory is destined to be the location of one of the great thoroughfares for the commerce of the world. This will be the shortest line between the great marts of commerce in Europe and Asia and present facilities for both rapid and cheap transportation unequalled by any other.

Portland by the road already chartered between that city and Ogdensburg, will be in nearer proximity to the navigable waters of the Great Lakes than any other city on the Atlantic coast; and nearer New York by the Portland and Rochester road than by any other line of road. These enterprises, which will open increased facilities for business of vast extent to Portland, and for the benefit of that city and the State, should be fostered and encouraged by all legitimate means.

The European and North American Railroad, which has long struggled for existence, but which we are happy to perceive is now in process of construction, with a prospect of early completion, will form an important link in the great chain of railroads, which is, at no distant day to span the continent. Connected as it will be at the West by other roads now in existence, and by the shore line from Bangor by way of Belfast and Rockland, which is destined soon to be constructed, and on which there are elements for business and inducements for travel unsurpassed, if not unequalled by any other line in our State, and with the completion of the roads contemplated for the accommodation of local business, our people will enjoy facilities for travel and commerce unsurpassed by those of any other State.

President.—RICHARD D. RICE.

Directors.—Richard D. Rice, Darius Alden, John B. Brown, William D. Sewall, Geo. F. Shepley, H. N. Jose, Geo. F. Patten, N. M. Whitmore, Philander Coburn.

Superintendent.—WALTER HATCH.
Treasurer.—JOHN S. CUSHING.

Missouri State Interest.

The National Bank of Commerce in New York, acting as agent for the State of Missouri, is prepared to issue for said State, in accordance with the act of the General Assembly thereof, approved March 12, 1867, the new six per cent. bonds of the State, of the denomination of one thousand dollars, in exchange for the overdue coupons which matured from January, 1864, to January, 1867, both inclusive, on bonds issued or guaranteed by the State in aid of railroads, (the Hannibal and St. Joseph Railroad excepted,) being seven coupons from each bond.

Coupons should in all cases be accompanied by full schedules, and presented in sums of one thousand dollars, or in multiples of this sum, or within the fractional part of one coupon thereof. The excess of such fraction will be paid in cash.

The coupons, with schedules, must be left for examination, when a receipt will be given entitling the holder to receive the new bonds after

such examination, and no bonds will be delivered except upon the return of the receipt. Blank schedules will be furnished by the bank.

Union (Maryland) Railroad.

The main object in view in the construction of this road is to form an outlet for the Western Maryland and Northern Central Railroads at tide water, by continuing the former road by way of Wetheredsville, down the valley of Gwynn's Falls, thence to the northern boundary of the city and continuing east, connecting with the Northern Central road near Mount Vernon Mills, or at such point as may be most convenient, and thence to deep water at Canton. On the 22d ult., representatives of the roads above named had a conference with the Mayor of Baltimore, and other city authorities in relation to the objects contemplated in the charter of the Union Railroad Company, and a plan to meet the wishes of all concerned was agreed upon, by propositions made by the directors of the Union Railroad Company. The plan adopted, it is understood, settles numerous difficulties which have heretofore existed, and it is now believed that the work will progress harmoniously, and be completed speedily. Horace L. Brooks, President of the Union Railroad Company, the Mayor, and the President of the Northern Central Railway Company were present at the conference referred to.

Central Railroad and Banking Company of Georgia.

The earnings of this road for the years ending November 30, 1866 and 1867, have been as follows:

	1866.	1867.
From up freights....	$661,125 63	$800,718 08

The road was re-opened for business between Savannah and Augusta on the 1st of February, 1866; but the connection by rail with Macon was not effected until the 12th of June. From the above dates trains have been run regularly between the three cities. The following statement will show the total earnings of the road, from the commencement of operations, since the surrender, to November 30, 1867:

Year ending November 30, 1865....		$106,683 17
" " 1866....		1,628,066 09
" " 1867....		2,220,947 88
Total.....		$3,955,697 14
Expended in 1865....	$190,986 00	
" 1866....	1,908,596 14	
" 1867....	1,357,140 41	
		3,456,722 55
Leaving a balance of.....		$498,974 59

The total cost of reconstructing the road to the close of the last fiscal year, has been $1,090,591 23; of which $93,285 95 were expended in 1865, $993,346 87, in 1866, and $3,958 41 in 1867. Deducting this amount from the gross expenditures, will reduce that sum to $2,366,131 32, and leave a balance of earnings, less expenses of operating the road, of $1,589,565 82.

The gross earnings of the road, as above		$2,220,947 88
The bank earnings.....		65,119 97
Total road and bank.....		$2,286,067 85
From this deduct—		
Road exp's, as above.	$1,357,140 41	
Bank expenses	18,240 98	
		1,375,381 39
Leaving.....		$910,686 46
This sum is chargeable with—		
Interest on bonds	$54,948 00	
Dividends June and December, 1867, 5 per cent. each and U.S.tax	590,014 00	
Rent of A. & S. R. R...	73,000 00	
Rent of Eatonton Br...	14,000 00	
Paid for "Bank in Liquidation".....	118,035 26	
Appropriated for iron..	160,000 00	
		909,997 26
Leaving a balance of.....		$689 20

The cost of operating the road has been 60.57 per cent. on its gross earnings. The increase of earnings from all sources over those of the previous year is $592,881 79. The up-freights, merchandize from northern ports, principally New York, to the interior, as contrasted with those of 1866, show an increase of $139,592 45, while the down freights, principally cotton, shows an increase of $374,600 76, and passage, mails, etc., an increase of $78,688 58.

The quantity of cotton transported during the year to Savannah was 268,074 bales, against 147,933 bales in 1866—an increase of 120,141. The quantity transported to Angusta in 1867 was 4,353 bales. Total in 1867, 272,427; total in 1866, 148,803.

The quantity of fertilizers carried during the years 1866 and 1867 was as follows:

	1867.	1866.
Guano, pounds	18,714,137	4,271,298
Lime "	1,265,720	1,625,855
Salt "	5,616,491	9,259,974
Totals.....	25,596,348	15,157,127

—showing an increase for guano of 14,428,839 lbs., while lime and salt show a decrease of 360,135 lbs. for the one, and 3,643,483 lbs. for the other.

Since the last annual report, the survey of the entire road and branches has been finished, the result of which is as follows: Length of main line from Savannah to Macon, 190 miles 2,428 feet; the Augusta branch, 53 miles 1,315 feet; and that from Gordon to Eatonton, 38 miles 1,666 feet, making 282 miles 229 feet; and in tracks in Savannah, Augusta and Macon yards, including turnouts on the main line and branches, including also 2 miles 3,261 feet of the latter laid the past year, 25 miles 4,583 feet—making the total length of tracks now in use 307 miles 4,812 feet.

The company have 50 locomotives, (2 of which are being rebuilt); 20 first-class and 10 second-class passenger, 9 mail, 29 baggage and package, 3 express, 22 conductors, 427 box, 172 platform, 15 stock, and 3 provision cars. Number of miles run by all cars, 8,172,610 miles. Total number of passengers carried, 126,258, an increase over the previous year of 41,289.

President.—WM. M. WADLEY.

Directors.—A. Low, Wm. B. Johnston, J. F. Gilmer, J. R. Wilder, E. Padelford, G. W. Anderson, J. Cunningham, G. W. Wylly.

Master of Transportation.—J. M. SELKIRK.

Treasurer.—J. F. WARING.

Maine Central Railroad.

The annual meeting of this company was held at Waterville, Me., on the 26th ult. The official reports show that for the year 1867 the receipts were $531,105, and the expenses $350,668—net earnings $180,437. There was a falling off in the earnings of $21,428 11 as compared with the previous year, and an increase of $34,431 77 in the expenses, over the previous year. The expenses have been increased in renewals and repairs of the track, engines and cars, which have been larger this year than usual. A loan of $20,000 was made to the European and North American Company in order that the construction of that road from Bangor might be commenced. An agreement has been made with the Newport and Dexter Railroad Company to lease that road (14 miles in length) when completed. It was voted to take a lease of the Somerset road, when completed, at $1,200 per mile. The funded debt of the company is $2,534,120. Several plans for the payment, extension or renewal of the bonds, soon to become due, were presented and referred to the Directors. A vote was passed authorizing the Directors to extend the road from Danville Junction, its present terminus, to Portland. Reuben B. Dunn of Waterville, Francis A. Hill of Exeter, and Josiah H. Drummond of Portland, of the old Board, and George L. Ward of Lewiston, Lewis Pierce of Portland, and Joel Gray of Boston were unanimously elected Directors.

☞ Both branches of the City Council of Baltimore have passed resolutions authorizing the endorsement by the city of $50,000 worth of the stock of the Western Maryland Railroad.

Railroads of Massachusetts.

A tabular Statement of the Railroads of the State, their Capital and Cost, Length, Earnings and Expenses, Dividends, &c., for the year ending 30th November, 1867.

(Prepared from the Annual Report of the Secretary of the Commonwealth.)

Add entered for consump.	11,961,637	8,835,859
Total entered at the port.	$21,715,487	$13,694,129

☞ A meeting of persons interested in the construction of the Wicomico and Nanticoke Railroad was held in Salisbury, Md., on the 8th ult., and a committee appointed to ascertain as far as possible the sentiment of the people with regard to the location of the route, and to draft a charter bill for the proposed railroad.

Railroads in California.

The Central Pacific Railroad Company intend, and are prepared, to push the line of their road 300 miles east of the summit during the next twelve months, making the aggregate length of the track by next January, about 405 miles. The company have organized for this work a force of 10,000 laborers, and will use 1,000 mules and horses. If the promise made is realized, there will remain about 370 miles more to reach Salt Lake. In considering this statement, it should be remembered that 25 or 30 miles of the track are already laid east of the summit, and that a large amount of grading has been done beyond that, taking the company to the Nevada plateau, across which grading and track laying can be done almost, if not quite, as rapidly as on the plains between Omaha and the Black Hills, where the Union Pacific Company constructed at the rate of from one to two miles per day. At a distance of 311 miles from Sacramento, the Central Pacific will reach the Big Bend of the Truckee; 41 miles further it will reach Humboldt Lake, and 65 miles further, making 417 in all, it will touch Mill City. The final objective of the Central Pacific, Fort Bridger, is nearly 500 miles still further east. It is said, further, to be the intention of the successors of the Western Pacific Railroad Company to resume work on the railway from San Jose to Sacramento *via* Stockton, at an early day. The prosecution of this second enterprise by the same parties who have the Central Pacific in hand, will be a bold work. Connecting with it at San Jose there is to be 30 miles of rail laid to Gilroy, southward, forming the first section of a line destined ultimately to reach as far as Los Angeles or San Diego, and to be a link in a southern trans continental road. Then positive promise is made that the California Pacific, or Vallejo and Sacramento Railroad, 62 miles long, shall be completed and in operation by next Fall. With that will connect the Suscol, Napa and Calistoga Railroad, 12 miles of which are already in operation; and the Healdsburgh and Sonoma Valley Railroad, whose commencement is proposed for the ensuing Summer. Some signs of vitality are given by the company which secured from Congress a grant of lands to aid in the construction of a railroad from Marysville to Oregon. It has consolidated with the road from Marysville to Roseville, looking to direct connection with the Central Pacific.

☞ The effort to consolidate the Portland and Kennebec Railroad and Somerset and Kennebec Railroad has failed. The capital stock of the Portland, Saco and Portsmouth Railroad Company has been increased to $500,000. A bill has passed the Maine Legislature, incorporating the International Railway Company, with a capital of $100,000. This bill contemplates the construction of a road from Milford to Princeton.

☞ At the meeting of the stockholders of the Rockport Railroad Company on the 24th ult., it was voted unanimously to approve of the sale of the railroad to the Eastern Railroad Company, as proposed by the directors, at cost. It is considered a good road and is in good condition. It has always been successfully managed, having yielded a profit to the stockholders of more than 7 per cent. per annum from the commencement.

American Railroad Journal.

Saturday, March 7, 1868.

Stock Exchange and Money Market.

There has been more activity in the Money line, since our last. The calls from speculative, as well as from mercantile borrowers, have been more numerous and urgent, because of the augmentation of business at the Stock Boards, as also in produce and merchandise. There has been an unusually spirited movement in the railway share list, especially since Monday, which has led to a livelier negotiation of call loans, and these have been quoted up to 6 per cent. as the ruling figures, though exceptional advances are yet made at 5 per cent. to the more prominent dealers in the public funds. The gold speculation has been comparatively tame, and the requirements of operators, in the way of pecuniary aid, have been on a reduced scale. The spring traffic is opening with considerable vigor in the line of domestic produce, and a more animated mercantile demand for money is noted, the best business paper being marketable at the full legal rate of 7 per cent. per annum. The U. S. Sub-Treasury made some very heavy disbursements and transfers about the 1st inst., reducing its cash balances materially. It closed the month of February with a cash reserve of 99¼ millions, against 97½ millions on the 31st of January. It is now gaining a little again, in the currency form. The city banks reported, in their last weekly statement, a general decrease in their averages, the most important having been a loss of nearly 2⅜ millions of legal tender reserve. A falling off of less than half a million of specie and deposits, respectively, was also indicated, and over half a million of a contraction in the loan and discount item noted. The specie reserve of the city banks is now $22,091,641, against $11,579,881 same time last year. The city bank deposits are now $208,651,578, against $198,018,914 week ending March 2, 1867. The legal tender reserve amounts to $58,553,607, against $63,014,195 same time last year. The circulation now stands at $34,086,223, against $33,294,433 same time last year. The loans are now $267,240,678, against $260,166,436 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $141,022,000 a day, against a daily average of $90,484,320 the preceding week, and $91,753,531 the week ending with Feb. 15, 1868. The current week's exchanges average about $106,400,000 a day, the clearances of the Gold Exchange Bank being now included. The city banks, last week, lost $2,315,328 of legal tender, $453,772 in the deposit line, and $422,339 of their specie reserve. They reduced their loans, $225,965; and their circulation, $13,800.

The Philadelphia Bank movement the past week shows an increase in loans, of $39,591; an increase of $6,435 in specie; an increase in legal tenders of $304,728; a decrease of $655,150 in deposits; and an increase of $1,989 in circulation. The Bank Clearings show an increase of $6,289,479, and the balances, an increase of $631,055.

National Bank notes to the amount of $82,480 were issued last week, making the total issue to 1,673 banks thus far, $306,486,981, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $6,806,275, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,845,790.) an actual circulation at this date, of $299,680,706. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,606,550; and for the public deposits, $37,877,950—making a total of $379,484,500. The Treasury Department last week redeemed and destroyed $527,000 of worn and mutilated fractional currency, and issued $520,540 of new.

The U. S. Sub-Treasury receipts, week ending with Feb. 29, were $12,970,421, including $2,324,472 from customs duties; payments, $23,274,464, including $129,086 of coin interest; balance at the close of the week, $99,239,619, against $109,543,661, at the close of the preceding week, showing a decrease of $10,304,042. The business of the Office during the first two days of the cur-

rent week, was as follows: Receipts on Monday, $2,295,082 including $477,000 from customs; and payments, $2,090,802; on Tuesday, receipts, $1,869,843 including $457,494 from customs, and payments, $1,879,751. The balance at the close of business on Tuesday stood at $99,427,943, against $109,082,086 a week previous; and $105,187,429 on Feb. 18, 1868.

The Sub-Treasury receipts in all February were $48,488,155, including $9,735,128 from customs; payments, $46,741,243, including $1,880,087 of coin interest; balance at close $99,239,619, against $97,492,707 on February 1st.

The aggregate issue of coin certificates by the U. S. Sub-Treasury, in this city, up to date of latest local report was $245,369,740; aggregate redemptions, $209,565,000; leaving outstanding certificates to the amount of $35,804,740. The latest report from the national capital made the outstanding amount of coin certificates on the 18th of Feb., $28,700,000, against $20,104,580 on the 1st of January.

A fair average revenue, for the closing week of the winter season, has been reported, since our last, by the National Treasury. The excises, last week, yielded over 8½ millions, against less than two millions the preceding week; customs at the port of New York (five business days,) $2,324,472 and at the outports, about $725,000 (in coin) more, making the grand total income for the week equal to about $7,921,000 in currency. The total receipts of the National Treasury, from excises, thus far in the new fiscal year, which began on the 1st of July, have been about $130,000,000.

Government received from customs, through the port of San Francisco, from Jan. 1, to Feb. 7, 1868, $797,664, against $541,000 same time last year.

The Gold market has been measurably free from excitement, and even activity, during the past week. The speculative demand has been quite moderate, while the customs and export calls have been less pressing. The offerings of Gold have been on a more liberal scale, partly in the form of the March 1st coin coupons on the Ten-forty loan, which have been rather freely marketed by the bondholders. The receipts of treasure both from California and from foreign sources of supply, have been more extensive. The export drain was less than three-fourths of a million last week. On Wednesday of this week, the *Cuba* for Liverpool, carried off only $191,320. The range of the price within the week, has been from 140⅝@141⅞, showing an extreme fluctuation of only 1¼ per cent. The latest figures on Wednesday were 140¾, on a dull and yielding market.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $691,837, against $262,603 same time last year. The customs demand for Gold last week, averaged $464,894 a day; thus far, this week, it has been equal to $467,250 a day, or equal to a weekly aggregate of $2,803,500. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $261,600 and from California, $1,551,270. The total customs revenue of the Government, in coin, at this port, thus far, in the current fiscal year, commencing with July 1, 1867, has been $73,631,248, against $84,024,093 same time in the preceding fiscal year. The total receipts of California gold at this port, thus far, in the current fiscal year, commencing with July 1, 1867, have been $23,096,863 against $29,384,811 same time in the preceding fiscal year, showing a decrease of $6,287,948 in 1867–'68. The exports of specie from this port, last week, were $659,901, against $759,182 same week last year. The exports of specie, hence, since July 1, 1867, have been $38,562,730, against $22,254,325 same time in 1866–'7. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $129,086, and since July 1, 1867, $51,166,606, against $35,139,640 same time in 1866–'7. The specie exports from San Francisco, from Jan. 1, to Feb. 7, 1868, were $3,825,963, against $4,502,400 same time last year.

Less activity has been noted in the line of foreign exchange, and decidedly less firmness has been discernable in the market for sterling drafts. The offerings of produce bills have been heavier, and not easily disposed of, at even the modified ruling figures.

Bankers' prime sixty day bills on London closed on Wednesday at 109⅛@109¾, and on Paris to 5.18¾c.@5.13¾; sight bills on London to 109⅞@110⅛, and on Paris to 5.12½c.@5.11¼. The offering of produce bills have been on a more liberal scale this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,980,200, against $4,492,564 same week last year; total, since July 1, 1867, $121,035,214, against $126,929,655 same time in 1866–'67.

The dealings in the public funds have been a little more spirited, through the past week. The demand from some of the street houses, stimulated by the reduced prices current early in the week, has been more animated, particularly for the later issues of the national obligations, in the funded, as well as in the currency forms. The offerings of both bonds and notes have been less extensive, and the leading local holders have evinced much less eagerness to realize. Washington advices have been of a more assuring and inspiriting tenor, and less uneasiness and anxiety have been exhibited, in relation to the immediate future, in the political, as well as the financial line. The administration of the national finances is meeting with more general and hearty endorsement from the press, as well as from the public, at large; and no legislative action is apprehended that will not harmonize with the policy of Secretary McCulloch, who, in less than three years of almost unexampled dullness and prostration in the business of the country, has succeeded in funding safely and economically over 800 millions of embarrassing national obligations, besides liquidating even more perplexing floating claims against the Department of over 200 millions.

U. S. sixes of 1881 closed here on Wednesday at 111⅛@111⅜; U. S. Five-twenties of 1862, 110½@110⅝; U. S. Five twenties of 1864 at 108@108¼; U. S. Five-twenties of 1865 at 108⅞@109⅜; U. S. Five-twenties of 1865, consolidated, 107@107¼; U. S. Five-twenties of 1867, 107⅛@107⅜; U. S. Ten-forties at 104¼@101⅜, and U. S. Seven-thirties at 106⅛@106⅜. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

May, 1865	118	September, 1865	116¼
August, 1865	117	October, 1865	116

U. S. three per cent. certificates 100¾

Government through the Sub-Treasury in this city, has paid off $4,807,800 of the matured loan of 1847–'67, since Jan. 1, 1868.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 19.	Feb. 26.	Mar. 4.
Consols	92¾	93⅛	93⅛
U. S. 5-20's of 1862	72	71⅝	71½
Erie	43⅜	44¼	47½
Ill. Central	88¾	88	89½

The railway and miscellaneous stock market has been very brisk, chiefly in the line of the leading railway shares. Erie stock has been dealt in with unusual freedom, prices advanced very sharply on Tuesday evening, followed by a partial reaction on Wednesday. The whole market moved in more or less intimate sympathy with the course of Erie, and higher prices were marked on most of the list.

A livelier trade has been reported in the principal kinds of domestic produce, especially toward the close, breadstuffs, provisions and cotton leaving off buoyantly. Middling upland cotton closed at 25 cts., per lb. The stock of cotton now here is estimated at about 53,000 bales. The receipts at the port this week, have averaged about 6,500 bales a day. The receipts at all the ports, since Sept. 1, 1867, have been 1,595,000 bales, against 1,341,000 bales same time last year; exports, same time, 1,007,000 bales, against 720,000 bales same time last year; stock on hand at latest dates, 871,000 bales, against 623,000 bales same date last year. At the Live Stock Markets, this week, beeves have been moderately sought after at less firm prices, ranging from 8@20c.; week's receipts, 5,012. Veal calves, have been in good request at from 10@14c.; receipts, 631. Sheep and lambs have been in fair demand at from 5@9½c.; receipts, 21,959. Swine, dull at from 8¾@9½c. per lb., all live weight; receipts, 11,979. There has been also more doing in foreign merchandise, particularly in groceries and dry goods. There has been a very fair degree of activity the line of domestic cotton goods and of desirable styles of foreign fabrics, chiefly dress goods, which have been rather more firmly held, on comparatively moderate offerings. The total imports of foreign dry goods, last week, were $2,037,327, and the total amount marketed $2,045,959. The value of foreign merchandise imported last week, was $3,073,771—making the grand total specie value of last week's imports of dry goods and merchandise, $5,111,098, against $5,735,486, same week last year; total since July 1, 1867, $150,135,154, against $179,601,759 same time in 1866–'67. The ocean freight market has been rather dull since our last, rates closing in favor of shippers. For Liverpool we quote flour at 2s. by sail, and 2s. 9d. by steamer, per bbl.; grain at 8⅛d.@8¾d. by sail, and 9½d.@10d. by steamer, per bushel; cotton at $\frac{5}{16}$d.@$\frac{7}{16}$d. by sail, and ½@$\frac{9}{16}$d. by steamer, per lb.; and heavy goods at 25s.@35s. by sail, and 35s.@60s. by steamer, per ton. Total number of vessels in port on Wednesday 498.

The balance in the Sub-Treasury on Wednesday was $100,242,233 92.

The New York exports, exclusive of specie, for

the week ending Feb. 25, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week.....	$4,492,574	$5,980,200
Prev. reported.....	27,745,454	25,912,129
Since January 1.....$32,238,018		$29,892,329

The New York imports for the week compare as follows:

	1867.	1868.
Dry goods $3,315,373		$2,037,327
Gen. merchandise..... ..	2,583,217	3,073,771
Total for the week.....	$5,898,954	$5,111,098
Previously reported....	37,237,544	28,325,928
Since January 1.....$43,136,498		$33,437,021

Winchester and Strasburg Railroad.

This road, which was incorporated by the Virginia Legislature less than a year since, is a link in the line of roads leading from Harper's Ferry, through Winchester to Strasburg, and thence to Harrisonburg. With this link built it is expected that the Valley road of Virginia will proceed at an early day to organize for the construction of a line from Harrisonburg, through Staunton and Lexington, to Salem. At the latter point the road through the Valley of Virginia will strike the Virginia and Tennessee road, and thus be connected with the entire system of railways extending through the intermediate States to Louisiana.

The line of road between Harper's Ferry and Winchester is in full operation. The length of road to be built between Winchester and Strasburg is but nineteen miles, and the country affords peculiar advantages for its economical construction. From Strasburg to Harrisonburg (50 miles) the road will be completed by August 1st of the present year, so that, by the completion of that link, a line penetrating the rich valley of Virginia for more than one hundred miles from Harper's Ferry will be promptly secured.

At a recent meeting of commissioners appointed by the Winchester and Strasburg Railroad Company for the purpose of obtaining subscriptions in Baltimore, the sum of $150,000 was subscribed. As subscriptions to the extent of $500,000 only are required, it is taken for granted that the subscription list will be immediately filled, for in addition to the advantage of the investment, there is an agreement on the part of the Winchester and Strasburg Railroad Company to allow interest at the rate of six per cent. on the installments, as called for, until the completion of the road, which will take place within the year.

It is understood that the Baltimore and Ohio Railroad Company will be prepared to lease the Winchester and Strasburg road as soon as completed.

Railroad Earnings.--Weekly.

The earnings of the Chicago and Northwest ern Railroad for 4th week in Feb., 1868..$237,762 09
Corresponding week previous year .. 161,528 88

Increase $76,233 71

The earnings of the Atlantic and Great Western Railway for the third week in Feb., 1868, were.....$103,928 00
Corresponding week previous year....110,870 00

Decrease $6,947 00

The earnings of the Michigan Central Railroad for the 3d week in Feb., 1868, were...$71,773 29
Corresponding week of previous year.. 70,642 34

Increase $1,130 95

Liability of Express Companies.

In the case of Belger *vs.* Adams Express Company decided during the past week by the General Term of the Supreme Court of the State of New York, the plaintiff sought to recover the sum of $467, the value of a trunk and contents entrusted to defendants for conveyance, and which were lost or destroyed before reaching their destination. On the trial at the Circuit it appeared there were six trunks and three boxes delivered to defendants by the plaintiff, only one trunk, however, was lost. When the plaintiff rested his case, the defence introduced a receipt, having no stamp upon it, upon which were printed certain words, of which the following is the substance of all that is important: "Nor in any event shall the holder hereof demand anything beyond the sum of $50, at which sum the article forwarded is hereby valued, unless otherwise herein expressed, or unless specially agreed by them, and so specified in this receipt, and shall constitute the limit of liability of the Adams Express Company."

When the receipt was introduced, plaintiff made two objections to it: first, that it was not stamped; and second, that there was no evidence that the contents were ever brought to the knowledge of the plaintiff, and hence that it was no contract as to him. The Judge at Circuit overruled both objections, and decided in favor of the defendants. A stamp was put on the receipt in Court, however, and as to that objection the General Term say, the case of De Barre *et al vs.* The Hope Express Company is decisive. It was then held that a stamp is not required in such cases, that the exception in the act of 1865 includes such cases. On the second point, the Court decides against the defendants. In brief, it decides that Adams Express Company, as common carriers, may limit their liability by express contract. But, in order to make an express contract, the company must not only call the attention of the other contracting party to the terms made by them, but there must be an assent to those terms by that other party. The plaintiff in this case should have assented to the conditions in the receipt, before it could become a contract. "The Judge below not only refused to submit to the jury the question whether there was any evidence of a contract between the parties, but expressly held that the contents of the receipt were a binding contract between the parties, and limited the defendants' liability to $50, for which sum a verdict was directed. For this error of the learned Judge there must be a new trial."

Journal of Railroad Law.

PROPERTY DELIVERED TO COMMON CARRIER TAKEN FROM HIM BY LEGAL PROCESS.

The facts in Bliven & Mead, Appellants *vs.* Hudson River R. R. Co., Respondents (36 N. Y. 403) lately decided by the Court of Appeals, are fully set forth in the following opinion.

PARKER J. On the 2nd day of September 1859, the plaintiffs delivered to the defendants at their depot, in the village of Sing Sing, Westchester County, 29 cases of saw plates and handles, of the value of $4,338 82, for transportation to the city of New York, which were on that day placed by the defendants in their freight cars for that purpose.

Before the regular hour for the departure of the train in which they were to go, a complaint was made on oath by one Cheeseman to a justice of the peace at Sing Sing, to the effect that the said merchandise had been stolen or smuggled from the Eagle Saw Manufacturing Co., at Sing Sing, (of which company Cheeseman claimed to be the Secretary) and that he suspected that the said property was concealed in a railroad car at the Sing Sing depot. The magistrate thereupon issued a warrant to search for the property, and delivered it to a constable of the town, who, in proceeding under it, on the morning of the 3d of Sept., forcibly opened the car in which the merchandise was locked, and seized and took the same before the Justice, who thereupon sent the same to the place of business of the said manufacturing company, and there delivered the same to said Cheeseman, for said company. The plaintiff, Bliven, was at such place of business on the morning of the day on which the merchandise was so delivered, and was then made acquainted with, and fully knew, all the circumstances attending the taking of said merchandise out of the possession of the defendants, as before stated.

It further appears, by the findings of the Referee, before whom the cause was tried, that the certificate, by the filing of which on the 28th of November, 1858, the company became incorporated, provided for the mangement of its affairs by five Trustees, of whom plaintiff Bliven was one, and Cheeseman one; and that by the bye-laws three Trustees constituted a quorum; that on the organization of the company a President, Treasurer and Secretary were chosen from the five Trustees, Bliven being the Treasurer. The manufacturing carried on by the company was done in the Sing Sing prison, by the hired labor of convicts, in shops provided for the company and under a Superintendent employed by the company. Immediately upon the organization, a contract was made by the company with the plaintiffs, by which plaintiffs were to have the sale of all the articles made by the company, on a commission, and were to make advances to the company, and hold all the articles consigned to them as security for such advances. And subsequently, on the 30th June, 1859, the company gave the plaintiff's a chattel mortgage on all their fixtures and stock, manufactured and unmanufactured, and all their other goods and chattels then or thereafter to be at the works in Sing Sing prison, as security for the payment to the plaintiffs on demand of all advances made, or to be made by them to the company

On the 31st Aug. 1859, at an adjourned meeting of the Trustees, the said Cheeseman and one other trustee, in the absence of the others, assumed to remove the president and declare his office as trustee, vacant and to elect one Francis trustee in his place; and at a subsequent time in New York, to which they adjourned, assumed, in conjunction with said Francis to remove the secretary from his office, as such, and to appoint Cheeseman in his place. Cheeseman thereupon proceeded to Sing Sing, to the works of the company in the prison, and took possession as secretary, notifying Hawley, the secretary, of his removal.

On the 2d Sept., in the absence of Cheeseman and the superintendent, Hawley still claiming to be secretary, went with Bliven to the premises, and caused the articles of merchandise in question, which were not in a state of completeness for the market, to be boxed up and delivered to Bliven for the plaintiffs, and he thereupon delivered them, as before stated, to the defendants for transportation to New York, where was the plaintiffs' place of business for selling the merchandise received by them for sale. It does not appear from the findings of the Referee, that the plaintiffs had made any advances to the company, or that the company was at that time indebted to the plaintiffs.

There is no dispute that the ownership of the goods was in the manufacturing company, and the facts found fall short of showing that the plaintiffs' had any lien upon them. The taking of them by Bliven, on the 2d Sept., was not warranted by the original contract, for that contemplated only the consignment to the plaintiffs' of articles fitted for the market. Neither was it warranted by the subsequent mortgage, for there was no indebtedness so far as appears, on which to rest a lien, by virtue of it. The description of the mortgage, given by the Referee, is that it was upon "all the engines, shafts, tools, anvils, and fixtures, stock manufactured and unmanufactured, or in course of manufacture and all other goods and chattels of the company, now or hereafter to be made at the works in Sing Sing prison, as security for the payment to the plaintiffs, on demand of all advances made, *or to be made*, by them to the company." The fact of the existence of such a mortgage does not carry with it the presumption of an existing indebtedness, as between the plaintiffs and the company; therefore, so far as appears, not only the ownership, but the right of possession belonged to the company.

The goods, then, belonging in fact to the company, without any right of possession in the plaintiffs, the delivery of them by the justice at the company's shop, from which they had been taken, to a person having the actual possession of it, for the company, was a delivery to the company.

The defendants, then, are entitled to take the ground that the goods were taken from them by valid legal process, and under such process, delivered to the true owner.

It is said, that the evidence shows an indebtedness from the company to the plaintiffs; we are not at liberty to go into the evidence for the facts, but must take them from the findings of the Referee. If we were at liberty to examine the evidence, and form our own conclusions of fact, we should see Bliven present at, or immediately after the delivering up of the goods at the company's

rooms, claiming them under plaintiffs' mortgage, and as agent of the company, and directing Rooney, the superintendent, who was in charge of the establishment for the company, to keep them, and let no one take them without his (Bliven's) consent, and that Rooney thereupon put them back where they belonged and where they had been the day before, and that they remained there about a month. This I think, we should have to consider, either as a taking of them into his own possession, or as consenting to the possession of the company, either of which would exonerate the defendants.

But as the case stands upon the findings of the Referee, I think it may well be considered a case of delivery to the true owners, through the regular process of the law; so that, even if the mere taking of them out of the defendants' possession by valid legal process would not alone be a defense, there can be no doubt that, on this ground, a good defense was made to the action. It is well settled that the right of the true owner may be set up by the carrier as a defense against the shipper or bailor, in all cases where the property has been delivered up to him by the carrier, whether voluntarily on demand, as in Bates *vs.* Stanton (1 Duer. 79) or taken by process in a suit instituted for that purpose. (Van Winkle *vs.* U. S. Steamship Co., 37 Barb., 122; Barton *vs.* Wilkinson, 18 Vern., 186.)

But my associates, not passing upon the question, whether the property was delivered to the true owners, desire to put this case upon the doctrine that the common carrier is exonerated from his obligation to his bailor, where the property of the latter is taken from him by due legal process, provided the bailor is promptly notified of such taking.

It is to be remembered that the plaintiff Bliven had notice of the taking of the merchandise from the defendants, with all the circumstances attending it, on the morning when it occurred; so that the case is fully within the doctrine just referred to.

The judgment of the Superior Court should therefore be affirmed.

All affirm, on the ground that the property is taken from the carrier by legal process, and he gives notice thereof, he is discharged.

Pacific Railroad.

Of the progress of the Kansas Pacific Railroad the Lawrence *Republican* says: "If we may judge by the preparations now making by this company, they calculate on extending the road very far westward the coming season. Long trains of ties and iron are constantly shipped to that point, and immense piles of the former are brought by the farmers all along the line of the road. The Union Pacific Railroad is the main life-artery to the prosperity of Kansas. And especially will this fact be seen when we are brought nearer to Colorado and New Mexico—those two great natural mines of wealth."

☞ A delegation of thirteen gentlemen from towns in Western New Hampshire, visited Portland to advocate the construction of the proposed Portland and Rutland Railroad through that section of New Hampshire from Alton along the south shore of Lake Winnipisaukee, through Meredith Centre and Bristol to Danbury, on the Northern road.

Philadelphia Horse Railroads.

The fares collected by the City Passenger Railway Companies of Philadelphia in 1867, were as follows:

Union Passenger (7th and 9th sts.)	$356,698 00
Second and Third streets	369,381 00
Frankford and Southwark (5th & 6th streets)	285,761 00
Germantown (4th and 8th streets)	280,952 00
West Philadelphia (Market street)	276,067 00
Phila. City (Chestnut & Walnut sts.)	222,284 00
Green and Coates streets	170,757 00
Citizens' (10th and 11th streets)	203.703 57
Hestonville, Mantua and Fairmount.*	220,304 00
Thirteenth and Fifteenth streets	122.260 00
Girard College	111,573 00
Phila. & Gray's Ferry (Spruce & Pine)	85,152 13
Lombard and South streets	62,789 62

Car Works, Trenton, N. J.

WATCHES.
TIFFANY & CO.,
550 and 552 Broadway,
Solicit attention to their Timing Watches, known as the "TIFFANY & Co., TIMERS."

These watches, for Railroad, Engineering, Racing, Gunnery, and Scientific purposes, are superior to any yet offered, as the arrangement of the stop is such as to note time to the nicety of one-fourth or one-fifth of a second, in such manner as to prevent the possibility of error in the calculation.

The following named gentlemen, having bought "Timers" and found them to be perfectly satisfactory, have kindly allowed Tiffany & Co. to refer to them:

Amasa Sprague,	Joseph McPherson,	August Belmont,
Frank Squire,	Geo. G. Haven,	B. W. Gibbs,
J. C. Griswold,	B. H. Bixby,	O. N. Cutler,
Leon. W. Jerome,	George Osgood,	S. D. Bradford,
Wm. M. Rysdyk,	W. M. Tilden,	J. V. Brokaw,
Wm. F. Sherley,	A. P. Spencer,	C. A. Grymes,

and others.

Tiffany & Co., have also a full assortment of watches of all desirable sizes and styles, of the same quality and finish as the first mentioned, in addition to their usual stock of Frodsham's and Jurgensen's.

Particular care and attention given to the repairing and adjusting of fine watches.

TIFFANY & Co., 550 and 552 Broadway. House in Paris, TIFFANY, REED & Co.

NOTICE TO RAILROAD CONTRACTORS.

OFFICE OF THE NEW YORK AND OSWEGO MIDLAND RAILROAD COMPANY, ONEIDA, N. Y., Feb. 10, 1868.

SEALED PROPOSALS WILL BE RECEIVED AT the Office of the Company, until the 15th day of April, 1868, at noon, for the GRADING, MASONRY, and BRIDGING of that portion of the NEW YORK AND OSWEGO MIDLAND RAILROAD, extending from the City of Oswego to the Village of Sidney Plains, a distance of ONE HUNDRED AND TWENTY MILES, and passing through the Towns of Volney, Hastings, West Monroe, Constantia, Vienna, Lenox, Stockbridge, Eaton, Lebanon, Smyrna, North Norwich, Norwich, Oxford and Guilford, and that portion known as the Branch, from at or near East Guilford, in the town of Guilford, to Mt. Upton, in the same town.

The line will be divided into Sections of about One Mile each, and proposals may be made for separate Sections or for the Entire Work. The Company will entertain separate proposals for BRIDGING only.

The line passes through a desirable section of country of Central New York, and the work will be worthy of the attention of Contractors.

Plans, Profiles and Specifications will be ready for examination at the Office of the Chief Engineer, in Oneida, N. Y., where all necessary information may be obtained, on and after the 6th day of April.

D. C. LITTLEJOHN, President.
W. B. GILBERT, Chief Engineer.

To Bridge Contractors.

ENGINEER'S OFFICE LOUISVILLE BRIDGE COMPANY, *Louisville, Ky., February* 17, 1868.

PROPOSALS will be received by the undersigned until March 10th, 1868, for the construction of a portion of the superstructure of the OHIO RIVER BRIDGE AT LOUISVILLE, consisting of ten (10) spans of FINK'S IRON SUSPENSION TRUSS of the following lengths, from centre to centre of piers; four spans of 149.6 feet, two spans of 190 feet, two spans of 210 feet, and two spans of 227 feet.

Plans and specifications can be seen at this office.

MANUFACTURERS OF MONTIGNANI'S PATENT

RAILROAD SCREW SPIKE.

HENRY YOUNG, President.

G. B. HUBBELL, Secretary.

Works at
OSSINING,
Westchester Co., N. Y.

We respectfully call the attention of all persons engaged in the construction and management of railroads, to the double hook headed Screw Spike, for fastening rails and chairs to ties. The above cut represents the size and shape of the Screw, which weighs eight ounces. It has been thoroughly tested on the Erie, New York Central, and other Railways, from one to three years, and in every case it has stood the test satisfactorily, having performed its work perfectly.

The Screw Spike possesses the following important advantages over the common spike:

First.—They are made of the best refined Iron, and the thread, being forged (not cut), imparts additional strength and stiffness to them.

Second.—INCREASED SECURITY. The holding power of the screw is many times greater than that of the spike, and it is not liable to break nor become loosened by the jar of the cars, nor by the upward or lateral strain even on the steepest grades and sharpest curves—the holding capacity of each screw being from four to five tons, and the side pressure from three to four tons.

In three years' experience no screw has removed from its place, and the rails in every case have been held as firmly to the ties as when first put down. By its use, therefore, the numerous accidents constantly occurring from loose and broken spikes, and consequent loose and broken rails, shaky roads, and the spreading of the rails, will be obviated.

Third.—GREATER ECONOMY. In order to remove the rail it will only be necessary to reverse the screw one-quarter; and when replacing it, turn the screw back to its original position, when the rail will be held as firmly as before. The ties will thus be saved from the injury of splits, checks, and the numerous holes made in them by repeatedly drawing and replacing spikes, in which water will collect, causing their rapid decay. By the use of the screws, therefore, the durability of the ties will be greatly increased and equalized.

Besides, when the rails are loose the ties are cut by the repeated blows made on them by the rails, and are thereby materially damaged; on the contrary, where the screw is used, the rails are held so firmly in their place, that this injury is prevented. The saving to railway companies in ties alone, it is estimated will more than pay the whole cost of the screws. Where none but soft wood can be obtained for ties, the screw manifestly possesses a still greater advantage over the spike.

It is also calculated, that in consequence of the screws holding the rails to the ties so firmly, a less number will be required than of ordinary spikes, also a very great saving will be realized in the wear of the rolling stock and rails. The considerable loss arising from loose, bent, broken and missing spikes, will be almost entirely prevented. Besides, where the screw is in use, in addition to the saving of time in relaying rails, a much less number of men are required to watch the track and keep it in repair, thereby causing a great saving.

While the first cost of the screw is somewhat higher than the spike, *in the end they will be very much cheaper.* The screw therefore being *more economical*, and by its use in place of the spike, *making the roads more secure*, besides "giving to the track an easy and connected spring so much desired," it must entirely supersede the common spike.

In corroboration of the foregoing, we present the testimony of several of the most experienced Track Masters in this country.

Mr. JAMES R. HILLIARD, Track Master on the Erie Railway, (Union Division), who has had twenty-four years' experience as Master of Track-Repairs, after testing the screws makes the following report:

"When I first saw your Screw Spike I pronounced it just the article wanted, and since I have seen it in use I still hold the same opinion.

Mr. P. Featherly, Track Master on the New York Central Railroad, (Albany and Schenectady Division,) says, January 9th, 1866:—

"I put down your Screw Spikes sixteen months ago, on a section of our road where our heaviest work is done, viz., a steep grade on the main track, three miles from Albany, one-quarter of a mile above West Albany, and they are there to-day, firm and as secure as when first put down, while the adjacent track, fastened with common spikes, has been respiked several times during that time."

Mr. E. T. MARBLE, Track Master on the Albany and Saratoga Railroad, says:

"On examining the Screw Spikes put down by me September 16th, 1863, I find they have not started either upward or sideways, that they still hold the rail to the ties as securely as when first put down; while great numbers of common spikes are loose and out of place. And on examination I find the threads are bright and clean."

Mr. E. H. DE VERGNE, Track Master on the Shore Line Railroad, writes:—

"Having examined and tested your Screw Spikes on our road, I feel satisfied that they are more durable, safer and more reliable than common spikes. By their use our Railroads would be perfectly safe so far as the track is concerned. Although it requires somewhat more time to drive them than it does the common spike, yet it is more than counterbalanced by their greater durability and safety, and saving of time in relaying rails. With practice and the use of proper tools, even that objection can be overcome."

Mr. A. F. SNYDER, Track Master, Albany, January, 1867, writes as follows:

"This is to certify that the screw Spikes put down on the bridge over the Hudson River at Albany, N. Y., by the U. S. R. R. Screw Spike Co., February, 1866, have done their work perfectly—holding the rails securely and firmly to the ties—not having started in the least, while the ordinary spikes, which were put down on the bridge at the same time, have, many of them, started up, and are quite loose and useless."

Mr. J. W. POTTER, Superintendent of the Cincinnati, Dayton, and Eastern Rail Road, says, January 9th, 1867:—

"The Screw Spikes manufactured by your Company have thus far given entire satisfaction, more than equaling our expectations. We have had them tested at our crossings for the past six months, and find them solid in the tie as the day they were put in. I consider them invaluable for c[illegible]ssings and bridges."

MERRICK & SONS,

SOUTHWARK FOUNDRY,

430 WASHINGTON AV.,

PHILADELPHIA,

MANUFACTURE

Steam Engines—High and low pressure, for land, river, and marine service; Horizontal, Beam, and Vertical. Patterns on hand for 8x10, 14x12, 18x12, Oscillating; compact and cheap.

SOLE MANUFACTURERS IN PHILADELPHIA AND CHESTER OF WILLIAM WRIGHT'S PATENT VARIABLE CUT-OFF STEAM-ENGINES.

Boilers—Plain cylinder, flue, and tubular.

Steam-Hammers, of Nasmyth & Davy patterns, with all the recent improvements.

Strahan's Drill Grinding Rest and Twist Drill-Holder.

Castings—Loam, dry, and green sand, brass, &c.

Roofs—Iron frames for covering with slate or iron—neat, durable, and economical.

Gas-Holders of every description. *Builders of Holders for the Philadelphia Gas-Works of 100 and 160 feet diameter.*

Tanks of every form, for sugar estates, refineries, oil, &c.

Gas Machinery of every description, including Retorts, Bench-castings, Holders and Frames, Purifiers, Coke and Charcoal Barrows, Gas-Valves, Governors, Hoisting Machines, &c.

Manufacturers for the American Meter Company of their Patent Dry Center Valve for changing Purifiers.

Bartol's Patent Wrought Iron Retort-lid, durable, light and cheap.

Sugar Machinery, such as Vacuum Pans and Pumps, Defecators, Bone-Black and Bag Filters, Bone-Black Burners, Washers, and Elevators, Hydraulic Elevators, Sugar and Bone-black Cars, Strike Heaters, Open Steam Trains, &c.

Sole Assignees and Manufacturers in the United States of

Weston's Patent Self-centering Self-balancing Centrifugal Sugar-Draining Machine.

Glass & Bartol's improvement on Aspinwall & Woolsey's Centrifugal Sugar-Draining Machines.

N. Rillieux's Patent Sugar-Boiling Apparatus, applicable to Beet-Root and Cane Sugar.

Having had twenty years' experience in the manufacture of Sugar Machinery for Cuba, South America, and the United States, they are prepared to contract for the design and erection of apparatus for making Sugar from Beet-Root or Cane, and for Refineries for either Sugar or Molasses.

They are also in possession of plans of the most recent improvements in machinery used in France and Germany in the manufacture of Beet-Root Sugar.

Safety Railroad Switch.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the ***MAIN TRACK IS NEVER BROKEN,*** and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns ***The Life and Limb of all Travelers upon Railroads.***

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

ENGINEERING WORKS.

ENGINEER'S FIELD BOOK,

By C. S. CROSS, Civil Engineer.

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. **Sent free by mail,** upon receipt of the price. For sale at this office. Price **$1.50.**

LYONS' TABLES.

To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.		SHEET No	
1.	General Table for all Bases and all Slopes.	13.	for Base 18 ft. Slop. 1½ to 1
2.	For Side Hill Cuts and Fills.	14.	" " 20 " 1½ to 1

Erie Railway.

REPORT OF THE EXECUTIVE COMMITTEE OF THE BOARD OF DIRECTORS TO THE STOCKHOLDERS.

The directors of the Erie Railway Company herewith submit to the stockholders the report of the Executive Committee made to the Board March 9, 1868. The Executive Committee beg to submit to the Board of Directors a separate report of their doings under the powers conferred upon them by the Board on the 19th day of February last, by the following vote:

It being necessary for the finishing, completing and operating the road of the company to borrow money.

Resolved, That under the provisions of the statute authorizing the loan of money for such purposes, the Executive Committee be authorized to borrow such sum as may be necessary, and to issue therefor such security as is provided for in such cases by the laws of this State, and that the President and Secretary be authorized, under the seal of the company, to execute all needful and proper agreements and undertakings for such purpose.

Early in the winter the President called the attention of the committee to the condition of the road and to the probable wants of the company during the coming summer. At several sessions of the committee the subject was informally considered, and it was discussed, as well between the members of the committee as with Mr. Riddle and the Vice President, and it was substantially agreed to by all, that the best interests of the company called upon us, so far as we might be able to do so, to replace iron with steel rails whenever renewals were made, and to double track the Delaware Division also with steel rails. It was also supposed that the new storehouses now being constructed for the Central and Hudson River Railroads in St. John's Park would give them such an advantage over us in the transportation from storehouses of heavy freight destined for competing points in the West, that we should be forced to construct equally good accommodations at Long Dock. Several private parties were in negotiation with us for the privilege of erecting such storehouses, as well as of erecting grain storehouses and elevators, but we thought it the best policy for the company to own the buildings if possible. The Superintendent had also informed us that the new equipment was needed for the increasing business of the company, and we had informally determined that when these things should so take shape that we could make a definite report thereon to the Board we would advise that the necessary capital be raised by the sale of the convertible bonds of the company, under the powers conferred upon the company by the General Railroad Law. Of the power to issue such bonds, and of the right to comply with the terms of such a contract by authorizing the conversion of such a bond into stock, we did not entertain a doubt. Our predecessors had claimed and exercised the right of increasing the capital stock of the company by conversion of bonds as early as 1863, and had reported the same to the Legislature, and had continued to exercise the right and to report their actions to the Legislature without criticism. The New York Central Railroad Company had exercised the same right also to the amount of over $3,000,000, and had from time to time reported their doings to the Legislature without criticism, and the holders of the stock created by such conversions in each company had exercised their right of voting, as stockholders, without challenge. The same may be said of the Hudson River Railroad Company and of most of the railroad companies in this State. The construction of the law was universal in favor of the right to issue convertible bonds, and to convert those bonds into stock if called upon, even though the amount of capital stock should be increased thereby beyond the amount named in the charter, and it never entered into our heads to doubt a right so universally claimed and exercised.

While we were maturing these schemes for increasing the efficiency of your road and its equipment we were also, under the authority conferred upon us by you, negotiating for the extension of its business connections, so as to reap the full advantage of the new capital to be put in the property. We contracted with the Michigan Southern and Northern Indiana Railroad Company to have them put down a third rail on their road so soon as other parties should take the broad gauge to Toledo. It is needless for us to point out to you the immense value of this connection to the Erie Railway Company. We also consented to the deposit of the bonds of the Boston, Hartford and Erie Railroad Company, issued under the agreement between that company and this company, as collateral with several parties who loaned their property to aid in the construction of that valuable connection. And just as we had so far completed these several important matters as to be ready to report them to you, we received reliable information that an attack in the Courts was immediately to be made upon the Erie Railway Company in the interest of the New York Central Railway Company, to restrain us from extending our connections and to localize our road—in fact, to destroy its value as a competitor with that powerful company. The first blow struck was a suit discrediting this company, by charging a former Board as having been in collusion with Mr. Drew in certain alleged frauds in his contracts with the company, and the present Board as guilty in permitting the conversion of the stock of the Buffalo, Bradford and Pittsburg Railroad Company. The second blow followed soon after in the summary removal of Mr. Drew from his office as director and a prayer for his removal from his office as treasurer. One of these suits was in the name of Mr. Frank Work, then a director in this board, and the other was instigated by him, notwithstanding the fact that he voted to make Mr. Drew a director and the treasurer of this company, with a full knowledge of all the facts which he charges to be fraudulent, and the further fact that he voted for the conversion of all the leases of the company, including the Buffalo, Bradford and Pittsburg road. The motive for this otherwise unaccountable change of front on Mr. Work's part is to be found in the well-known fact that he was put into this board in the interest of the Hudson River and Central Railroads; and that when we refused to become parties to the schemes of Mr. Vanderbilt and his friends to create a gigantic monopoly for the benefit of the Central line Mr. Work's interests were exposed.

It was under these circumstances that you gave us authority to issue and sell convertible bonds for the purpose of completing, finishing and operating our road; and although, owing to the hostile presence of Mr. Work, we could not discuss this matter as freely as we would have wished, yet you reposed a generous confidence in us, and, we believe, anticipated in advance what our course would be.

There was but one course open to us as pru-

dent men charged with the protection of the interests of the Erie Railway Company as distinguished from those of rival lines—namely, to secure, before it was too late, the means to meet the necessary expenditures we have alluded to; and after full discussion of the matter we authorized the creation, issue and sale of $10,000,000 of convertible bonds, the entire proceeds of which would not be more than enough for the contemplated improvements.

Notwithstanding the unwarranted attacks upon us we took no steps to defend ourselves. We continued our negotiations with the New York Central, Hudson River and Harlem Companies for the consolidation of rates. Some of us were slow to believe that they could be implicated in such proceedings; and all of us thought that we ought to continue to maintain amicable relations with them so long as we could do so without a sacrifice of our self-respect. The next of these suits, however, made it our imperative duty to take steps to protect the Erie Railway Company; for we were now enjoined—and still at the suit of Mr. Work—from carrying out our agreement to convert our convertible bonds into stock. When you remember that, independently of the ten millions of bonds which we authorized as above to be issued and sold, there are outstanding some nine millions more of bonds which are convertible into the common stock of the company, you will see how disastrous it may be to our credit to have a Court assume to compel us to repudiate our contracts. We were further enjoined from making certain transfers of stock—from carrying out our contracts with the Michigan Southern Company, and with the Boston, Hartford and Erie Company; and the injunction further contained the usual shots against Mr. Drew. There was no mistaking the purpose of this suit. It meant destruction to the credit of the Erie Railway Company, the localization of its traffic, the severance of its terminal connections, denial of the means necessary to give it a proper, suitable or safe equipment, its prostration to the interests of the New York Central Railroad Company and its final administration in their interest—and all this was done at the instigation of one of our own directors. We accepted the issue and authorized the commencement of a suit, in which Mr. Work is enjoined from serving as a director in this board and from proceeding with his suits. Copies of these proceedings will be furnished to each director, and we hope you will carefully read them.

The Senate has taken this matter up, and a committee has been appointed to examine into the condition of the company and into the charges made against it in the newspapers and in the Supreme Court, and the hearing is to commence on the 10th inst. To this tribunal we confidently appeal. If it be true that, in converting $3,000,000 of bonded debt, and in contracting to convert $9,000,000 more (irrespective of our late proceedings) the Erie Railway Company has exceeded its corporate powers, it is equally true that the New York Central Railroad Company has exceeded its powers in converting $3,200,000 of its bonded debt. And it is in the power of the Legislature to afford both companies, by ratifying acts, the fullest protection. And on the other hand, if it be true, as we believe it to be, that the Legislature intended to confer upon railroad companies the wise, just and most reasonable power of shifting its debt into capital stock whenever it can be done, and if, in consequence of the exercise of that power in good faith and in the best interests of this company, speculators and rival lines have assailed us and cast a cloud upon our issues of stock, we feel ourselves equally justified in asking the Legislature to remove that cloud; and the summons to go to Albany has only anticipated by a few days our request for a hearing and for a remedy to allay the doubts and disquietudes of those who hold the stock of this company.

It only remains to state the wants of the company, to meet which the late issue of bonds was made. More detailed statements thereof are to be found in the reports of the General Superintendent herewith submitted:

STATEMENT.

17,000 tons of new iron, at $75	$1,275,000
8,000 tons of steel rails, at $145	1,160,000
50 locomotives, at $15,000	750,000
300 box cars, at $800	240,000
200 box cattle cars, at $900	180,000
100 coal dumps, at $625	62,500
200 coal dumps (for bituminous coal)	125,000
Double track on Delaware Division	2,790,000
Passenger stations at Long Dock, Buffalo and Rochester	400,000
Storehouses for teas, sugar, grain, cotton, &c., at Long Dock	1,000,000
Elevator at Long Dock	300,000
Elevator at Buffalo	150,000
New depot lands and river front at Newburg	225,000
Ferry slips at Twenty-third street	25,000
New ferryboat for Twenty-third street service	75,000
Total	$8,757,500

All of which is respectfully submitted.

JOHN S. ELDRIDGE, President.

New York, March 9, 1867.

Chicago and Alton Railroad.

The earnings of this road for the years ending December 31, 1866 and 1867, have been as follows:

	1866.	1867.
From passengers	$1,246,295 88	$1,209,706 96
" freight	2,309,498 59	2,430,008 86
" express Co.'s	79,516 93	154,036 52
" U. S. mail	85,475 00	85,362 50
" miscellaneous	24,366 46	63,747 14
	$3,695,152 86	$3,892,861 48
Expenses, viz.:		
Conducting transp	$429,187 92	$477,288 85
Motive power	626,938 12	658,942 27
Maintenance of way	697,983 58	610,225 35
" cars	232,265 78	196,206 61
Taxes	140,727 30	113,108 98
General expenses	83,483 53	93,356 00
	$2,210,586 23	$2,149,128 06
Net earnings	$1,484,616 63	$1,743,733 42

Compared with 1866 the gross earnings of 1867 show an increase $197,708 62; with a decrease in expenses of $61,408 17—making the increase in net earnings $259,116 79. The President in his report says:

When the Chicago and Alton Railway was surrendered into your hands, on the 15th of October, 1862, it was still in an imperfect condition, although many improvements had been made in the property while in the care of James Robb, Esq., Receiver.

From that day to the present, it has been the policy of those to whom you have entrusted its management to make what they have deemed judicious, but liberal, expenditures, not only to increase its capacity for traffic, so as to keep pace with the rapid growth of the country, but to improve its condition, so as to secure, as early as practicable, the utmost degree of economy in maintenance and transportation expenses.

The wisdom of this policy has never been questioned, and its fruits are apparent.

During the past year, operating expenses amounted to 55.2 per cent. of gross earnings; while, in the preceding year, the amount was 59.8 per cent. This reduction of 4.6 per cent., is mainly due to the reduced cost of maintaining the permanent way and rolling stock, by reason of expenditures heretofore made.

The income account, for the year 1867, may be stated as follows:

INCOME.

Balance to credit of this account, Jan. 1, 1867	$1,497,955 12
Net receipts during the year	1,743,733 42
Total	$3,241,688 54

DISBURSEMENTS.

Interest on bonds	$277,095 00
Paid on sinking funds	55,000 00
Rent Joliet and Chicago road, exclusive of sinking fund	152,927 23
Rent Alton and St. Louis R.R. being dividends and tax on stocks not owned by this company	10,710 52
Dividends No. 8 and No. 9, and Government Tax	664,173 68
Government Tax on sinking fund in 1867	1,942 75
Cost of improvements charged in this account	355,407 92
Premium on scrip redeemed	79 16
Alton and St. Louis stock charged out of this account	800,000 00
Balance	924,352 28
Total, as above	$3,241,688 54

For the information of those persons who have become stockholders since the 15th of February, 1866, an explanation of the item of $800,000, in the foregoing account, may be required. At that date the Chicago and Alton Railroad Company were the owners in fee of the line from Joliet to Alton. The Joliet and Chicago and Alton and St. Louis lines, were held under perpetual lease. The construction of the Alton and St. Louis road having been completed by the Chicago and Alton Company, they had thereby acquired a portion of the stock representing that road, and it was deemed for the best interest of your company to become the sole owner of that stock (and consequently of the entire property, that company having no indebtedness,) as soon as the same could be purchased at a fair price.

To provide the means for purchasing the remainder of the Alton and St. Louis stock, and for other purposes, on the 15th of February, 1866, an increased issue of Chicago and Alton stock was sold to stockholders *pro rata*, with the understanding that if the Alton and St. Louis Road should become the property of your company in the manner indicated, it should be merged with the other property of the company, and represented by Chicago and Alton stock then issued. Purchases of the Alton and St. Louis stock were made from time to time, as opportunity offered, but the entire stock had not been acquired until the close of the year 1867. In the meantime, the stock of that company and the fund set apart for its purchase, have appeared in our income account as part of assets on hand.

The object having now been accomplished, the cost of that road is charged out of that account.

The gross earnings exceed those of the preceding year by $197,708 62, or about 5½ per cent. The receipts from passenger traffic being $36,588 92 less, and from freight traffic $234,297 52 more than in 1866.

The increased amount of earnings from freight traffic is mainly due to the accession of business from the St. Louis, Jacksonville and Chicago road since its connection with your line at Bloomington, on the 23d of September last. Although the two lines were connected at that date, the remaining three months of the year were occupied by the St. Louis, Jacksonville and Chicago Company in constructing sidings and station buildings, and in procuring rolling stock necessary for the transaction of its business. The amount of traffic contributed to your line was, therefore, much less than it would have been, had that company been fully prepared for business when the connection was made.

The amount of your earnings on joint business with that line, received mainly during the last rthee months of the year, was, exclusive of the 10 per cent. bonus paid to them as per contracts dated January 25th, 1864, as follows: On passenger traffic, $40,950 08; on freight traffic, $214,514 05; making an aggregate of $255,464 13.

While the cash receipts from passenger traffic on your line are less, the number of passengers carried exceeds that of the preceding year by 14,674; the number in 1866 being 516,543, and in

1867, 531,217; the increase being in local traffic.

The number of local or way passengers carried in 1866 being 477,578, and in 1867, 494,601, showing an increase of 17,023, or about 3½ per cent. The proportion between the number of way and through passengers being 93 per cent. of the former to 7 per cent. of the latter.

The average amount of fare paid by way passengers during the year, is found to be one dollar and seventy-one cents.

The increased tonnage of freight in 1867 over 1866, is equal to nearly 18 per cent. The proportion between through and local freight being 12.4 per cent. of the former, to 87.6 per cent. of the latter.

On the 14th of February, the bridge on your line over the Kankakee River—550 feet in length—was destroyed by a freshet of unparalleled magnitude. At that point the river runs with great rapidity over a bed of rocks, and by reason of the continued high stage of water, accompanied by masses of ice, it was found to be impossible to construct a temporary bridge for the passage of trains earlier than the 8th of March. During the time when your railway was thus practically severed in twain, your company suffered a loss in traffic which has been estimated at $150,000.

The coal traffic of your line is yet in its infancy. Beginning in 1865 with 6,000 tons, it increased in 1866 to 71,090 tons, and in 1867 to 146,050 tons. A large number of new mines are being opened, from which an increased amount of coal will be taken the present year.

This branch of our traffic is one that must be specially cared for. The coal upon your line, when mined extensively and cheaply, as it soon will be, if proper encouragement is afforded, will contribute largely to your future income, and diminish operating expenses, by reducing the cost of fuel burned upon your locomotives.

It will not only contribute to enhance the value of your property as already stated, but an All-Wise Providence has placed an almost continuous deposit of coal below a soil unsurpassed in fertility, for a distance of two hundred and thirty miles, traversed by your railway. Cheap fuel has heretofore appeared to be the only essential element lacking to ensure a continued and rapid development of the country, and that has now been discovered in inexhaustible quantities.

The northern portion of this immense coal field is much nearer to Chicago than any other, (being only 55 miles), and your railway will, at no distant day, be the means of transporting nearly all the coal consumed in that city.

The foregoing statements, indicating the character of the present and prospective traffic of your line, are made that you may see how largely the value of your property is based upon local traffic, which is subject to few contingencies of an adverse character as compared with through traffic, which is liable to be diverted upon other lines. It may also be observed that the traffic of the St. Louis, Jacksonville and Chicago line is derived wholly from local sources. That road runs through the oldest settled portion of the State, traversing a country as rich and fertile as that of any part of your line. It is therefore but reasonable to assume that it will, in years to come, contribute to your line a much larger amount of traffic than the earnings heretofore, under adverse circumstances would indicate, and that the character of that traffic—being local—will be as reliable as that of your own line.

It will be observed that while the general business of the country from which your earnings are derived, is gradually approaching its normal condition—involving a reduction of rates in some cases—it is increasing in amount, so as to more than compensate for the reduction.

While the business of your line is, perhaps, more equal in amount throughout the year than that of any other Western line, all roads which are largely dependent upon the products of the soil for traffic, have much larger demands upon them for transportation during certain seasons of the year than at others. This fluctuating demand must be met in some degree, or great loss is occasioned to the company and patrons.

Your traffic requires an additional number of locomotives and cars, which it is the intention of the directors to obtain as early as practicable.

On the night of November 1st, the main machine and car shops of the company, located at Bloomington, were destroyed by fire, involving a loss estimated at $124,634 59, of which $97,000 was covered by insurance. The loss has occasioned great inconvenience, and has interfered with our plans for the construction of cars during the present winter.

It is the intention of the directors to build fireproof buildings on an enlarged and better arranged plan than before, to take the place of those destroyed. Additional grounds are being obtained for this purpose, under an arrangement with the city of Bloomington, which provides that the cost of the same shall be refunded to your company within two years, with ten per cent. interest.

The bridge before referred to as having been destroyed at the crossing of the Kankakee River, and the bridge over Hickory Creek (near Joliet), 104 feet span, have each been replaced with iron structures of the most substantial and durable character. In the former case, the grade of the railway has been raised to an elevation which it is believed must place the bridge out of all danger from future freshets.

Four thousand five hundred and sixty tons of re-rolled rails, 3,260 tons of repaired rails, and 104 tons of steel rails, together with 135,757 new cross-ties have been placed in the track during the past year, and the condition of the permanent way and rolling stock improved.

The investment of your company ($50,000) in the Union Stock Depot at Chicago yields a direct return of ten per cent. per annum, and incidental advantages to your line, in common with others, of much greater importance, in promoting your traffic in the transportation of live stock.

The company have 72 locomotives, (5 of which were added during the year); 28 first-class, and 6 second class passenger cars, 8 baggage, 7 express, 773 house, 238 stock, 244 platform, and 2 wrecking and tool cars.

The performance of locomotives has been as follows: Miles run on passenger trains, 419,723; on freight trains, 908,285; on wood trains, 30,646; on construction trains, 103,946; on switching, 210,365—total, 1,672,965.

The number of passengers carried during the year was 531,217, of which 494,601 were local or way passengers, and 36,616 through passengers. Of the whole number, 263,962 went south, and 267,255 north.

The number of tons of freight carried north was 388,666; do., south, 381,850--total tons of 2,000 lbs., 750,516.

During the past year there have been expended in the Engineer department for improvements, $338,835 40; and for maintenance of way and general repairs, $610,225 35. Some 68 miles of original iron still remain in the track, which should be taken out the coming season. Most of the iron used the past year was of English manufacture, and appears to be more durable than the average of re-rolled iron in the track. The steel rails put in Chicago yard more than two years ago have already outworn more than four iron rails, and show no signs of failure. About 5,500 tons of iron rails will be required the coming year.

The cost for repairs of locomotives during the past year has been $184,954 42, or 11.05 cents per mile run.

The company are now using steel for tires, and intend to enter more largely into the use of steel for axles, guide bars, crank pins, and various other parts of locomotives, trusting to find it economy so to do. The superintendent of machinery thinks the time is not far distant when steel wheels will be profitably used, so far as economy and safety are concerned.

GENERAL BALANCES, DECEMBER 31, 1867.

Cost of road and equipment		$10,276,604 50
L. H. Meyer and S. J. Tilden, Trustees, bonds, etc., in their hands.		37,813 39
Bonds held by Trustees on renewal account		50,000 00
Chicago and Mississippi R. R. Co. bonds owned by this company		2,500 00

Pres't and Sup't.—T. B. BLACKSTONE.

Directors.—T. B. Blackstone, A. Havemeyer, John B. Drake, Wm. F. Weld, John A. Stewart, Peyton R. Chandler, John Crerar, Lorenzo Blackstone, John J. Mitchell.

Secretary and Treasurer.—W. M. LARRABEE.

☞ Subscriptions to the St. Louis and Cairo Railroad Co., now amount to $475,000.

Philadelphia and Reading Railroad.

In the AMERICAN RAILROAD JOURNAL, of January 18th, we gave the President's Report in full. In the present instance we select several important tables referring to the years ending Nov. 30, 1866, and 1867 respectively, and append a general statement of the cost, earnings and dividends since the completion of the road in 1842–'43.

ROADWAY.

Extent of road operated by the company in the years 1866 and 1867:

	Miles of Track.		M. of Sidings.		—Total.—

☞ The following graduates of the Pennsylvania Polytechnic College have been added to the engineer corps of the Union Pacific Railroad, and ordered to report at Omaha without delay, with the view to a speedy location and construction of a difficult section of road between Cheyenne and Salt Lake City: James R. Maxwell, of Delaware; W. T. Schneider, of New York; Wm. H. Harris, of New Jersey; James F. McCabe, of Maryland; Dovung Garcia, of Cuba, and John B. Wilson, of Pennsylvania.

The Public Debt.

The following is a comparative statement of the Public Debt of the United States February 1, and March 1, 1868:

	Feb. 1, 1868.	March 1, 1868.
DEBT BEARING COIN INTEREST.		
Five per cent. bonds	$207,739,200.00	$212,764,400.00
Six per cent. bonds of 1867 and 1868	9,458,391.80	9,378,191.80
Six per cent. bonds of 1881	283,676,600.00	283,676,600.00
Six per cent. Five-twenty bonds	1,398,488,850.00	1,407,321,800.00
Navy pension fund	13,000,000.00	13,000,000.00
Total	$1,912,363,041.80	$1,926,160,991.80
DEBT BEARING CURRENCY INTEREST.		
Six per cent. bonds	$22,470,000.00	$22,470,000.00
Three-year compound interest notes	46,244,780.00	46,244,780.00
Three-year seven-thirty notes	214,953,850.00	202,951,100.00
Three per cent. certificates	25,040,000.00	25,585,000.00
Total	$308,708,630.00	$297,250,880.00
MATURED DEBT NOT PRESENTED FOR PAYMENT.		
Three years Seven-thirty notes, due Aug. 15, 1867	$1,742,650.00	$1,519,600.00
Compound interest notes matured June 10th, July 15, Aug. 15, Oct. 15, and Dec. 15, 1867	6,900,390.00	6,163,000.00
Bonds of Texas indemnity	256,000.00	256,000.00
Treasury notes, acts July 17, 1861, and prior thereto	162,311.64	159,661.64
Bonds, April 15, 1842	6,000.00	6,000.00
Treasury notes, March 3, 1863	716,192.00	616,192.00
Temporary loan	2,474,625.55	1,890,700.00
Certificates of indebtedness	30,000.00	19,000.00
Total	$12,288,169.19	$10,630,153.64
DEBT BEARING NO INTEREST.		
United States notes	$356,159,127.00	$353,157,747.00
Fractional currency	32,246,438.51	32,307,947.51
Gold certificates of deposit	29,619,280.00	25,699,360.00
Total	$418,024,845.51	$414,165,054.51
Total debt	$2,651,394,686.50	$2,648,207,079.95
AMOUNT IN THE TREASURY.		
Coin	$98,491,162.70	$106,623,374.75
Currency	25,578,150.61	21,754,082.36
Total	$124,069,313.31	$128,377,457.11
Amount of debt less cash in the Treasury	$2,527,315,373.19	$2,519,829,622.89

By comparing this with the statement of February 1, it is shown that the debt bearing coin interest has increased $13,797,950; the debt bearing currency interest has decreased $11,457,750; the matured debt not presented for payment has decreased $1,658,015 55; and the debt bearing no interest has decreased $3,859,791—making the decrease in the total debt since February 1, 1868, $3,177,606 55. The amount of coin in the Treasury during the same period has increased $8,132,212 05, and the amount of currency has decreased $3,824,078 25—leaving the amount of debt less cash in the Treasury February 1, $7,485,750 30 less than on February 1st.

Russian Railways.

Russian railways are rapidly on the increase. The Ryasan-Morschansk line, a portion of the Moscow-Volga line, has just been opened. It is one hundred and fifty miles long, and has taken only a year and three months to construct. The Koslow-Woronesh Railway, a link in the long line to be laid down between Moscow and the Sea of Azof, will be completed in a few weeks; the Moscow-Odessa Railway is progressing so fast that it will, perhaps, be finished this year; and the works between Poti and Tiflis, a line which, after its extension to the Caspian harbor of Baku, will monopolize a considerable portion of the Persian trade, have just begun. For these extensive enterprises the funds are supplied by the Russian Treasury and the German and Dutch money markets.

Chapin & Wells.

We invite attention to the advertisement in another column, of Messrs. CHAPIN & WELLS, Bridge, Turn-table and Depot Builders, Chicago, Illinois. This firm have had *fifteen years* experience in the business, and claim that they can do as good work and as promptly as any other firm. Since July, 1866, they have constructed over 8,600 feet of bridging. They have built during the period named: the railroad bridge over the Des Moines River at Ottumwa, Iowa, on the Burlington and Missouri River Railroad, six spans, total length 715 feet. Three draw bridges and two fixed spans in Milwaukee, Wis. For the Chicago and Northwestern Railway Co. over Cedar River at Cedar Rapids, Iowa, their bridge 900 feet in length, without hindrance to the passage of trains during the erection of the same. For the same company, four bridges a short distance from Omaha. For the Illinois and Michigan Canal Co., aqueducts over the Fox, Vermillion and Aux Sable Rivers at Ottawa, Morris and La Salle, Ill., 800 feet in length. For Michigan Southern and Northern Indiana Railroad Co., at Monroe, Mich., 360 feet. Five spans on Kansas City and Cameron Branch of Hannibal and St. Joseph Railroad. Five spans on line of Leavenworth, Lawrence and Galveston Branch Railroad, Kansas. One 220 feet span at Fort Riley, Kansas, and they are now building for the Dubuque and Sioux City Railroad over the Iowa and Boone Rivers about 600 feet.

They also furnish Bridge Materials, Dimension Timber, Dock and Bridge Bolts. Address Messrs. CHAPIN & WELLS, 86 Dearborn street, Chicago, Ills.

Pennsylvania Railroad.

At the recent annual election for directors and officers of this company, the following gentlemen were chosen: *Directors.*—By the Stockholders—J. Edgar Thomson, Josiah Brown, Alexander Nimick, of Pittsburg, Joseph B. Myers, John M. Kennedy, Wister Morris, Washington Butcher, Samuel T. Bodine, Edward C. Knight and John Rice. By the City—Lewis Elkin, Wm. Aspach, and G. Morrison Coates. By the Board—Thomas A. Scott and Herman J. Lombaert.

President.—J. Edgar Thomson.

Vice Presidents.—Thomas A. Scott and Herman J. Lombaert.

Treasurer.—Thomas T. Firth.

Secretary.—Edmund Smith.

☞ The Detroit *Tribune* says that arrangements are completed by which the Michigan Central Railroad Company substantially guarantee the bonds of the Grand River Valley Railroad Company, whose road will extend from Jackson to Grand Rapids, and through the center of the counties of Eaton and Barry, about midway between the Detroit and Milwaukee and Central Roads. The road will probably be completed to Grand Rapids this year.

American Railroad Journal.

Saturday, March 14, 1868.

Stock Exchange and Money Market.

A very brisk inquiry has been experienced for Money, especially toward the close of the week, chiefly from speculative borrowers, whose wants have been very much augmented, and have been unusually urgent, in view of the extraordinary activity, excitement and irregularity in the Stock Market. The transactions in the Stock line, particularly in Erie shares, have been on the most extensive scale, and the fluctuations in values have been remarkably frequent and violent. As a necessary result, call loans have been in very lively request, and have advanced to full 7 per cent. as the minimum price, the rate in gold having been excited in several instances. On Wednesday the pressure for accommodation was most severe. Much of the stringency in the market was ascribed to artificial influences, brought into operation, in aid of the *bear* element at the Stock boards. The mercantile demand has been on the increase, and very choice to prime business paper has been quoted at 7@8 per cent. per annum, as the ruling figures. There has been a considerable outflow of currency to the interior, in preparation for the resumption of trade movements with the opening of Spring; and the city banks have again exhibited, in their latest weekly statement, a further diminution in the available cash reserves, the legal tender average having fallen off over 1½ millions, and the specie hoard having been reduced nearly 1½ millions. A little less than a million has been taken from the deposit line. Nearly two millions have been added to the loan averages. The Sub-Treasury gained nearly 3½ millions in the form of cash balances, last week. According to the last public debt statement, for the current month of March, the coin reserve of the Treasury Department was augmented full $8,132,212; while the currency balance of the Department was diminished $3,824,068. The aggregate cash reserves of the Treasury on the 1st inst. were $128,377,457, including $106,623,375 of coin, and $21,754,082 of currency.

The specie reserve of the city banks is now $20,714,233, against $10,868,182 same time last year. The city bank deposits are now $207,737,080, against $200,283,527 week ending March 9, 1867. The legal tender reserve amounts to $57,017,044, against $64,523,440 same time last year. The circulation now stands at $34,153,957, against $33,409,811 same time last year. The loans are now $269,156,636, against $262,141,458 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $108,203,266 a day, against a daily average of $141,022,000 the preceding week, and $90,484,320 the week ending with Feb. 22, 1868. The current week's exchanges average about $116,947,417 a day, the clearances of the Gold Exchange Bank being now included. The city banks, last week, lost $1,536,563 of legal tender, $914,498 in the deposit line, and $1,877,409 of their specie reserve. They increased their loans, $1,915,958; and their circulation, $67,784.

The Philadelphia Bank movement the past week shows an increase in loans, of $621,908; an increase of $20,815 in specie; a decrease in legal tenders of $719,923; a decrease of $971,458 in deposits; and a decrease of $771 in circulation. The Bank Clearings show a decrease of $376,456, and the balances, an increase of $149,309.

National Bank notes to the amount of $112,360 were issued last week, making the total issue to 1,673 banks thus far, $306,599,331, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $6,849,566, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,845,790,) an actual circulation at this date, of $299,749,765. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,652,450; and for the public deposits, $38,127,950—making a total of $379,780,400. The Treasury Department last week redeemed and destroyed $327,000 of worn and mutilated fractional currency, and issued $1,092,331 of new. The outstanding amount of fractional currency on the 1st

inst. was $32,807,948, against $32,246,439 on the 1st of Feb. 1868.

The U. S. Sub-Treasury receipts, week ending with Mar. 7, were $18,880,908, including $2,494,933 from customs duties; payments, $15,532,629, including $2,353,000 of coin interest; balance at the close of the week, $102,587,898, against $99,239,619, at the close of the preceding week, showing a decrease of $3,348,279. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $3,206,029 including $444,282 from customs; and payments, $3,751,574; on Tuesday, receipts, $1,473,721 including $420,000 from customs, and payments, $1,504,582. The balance at the close of business on Tuesday stood at $102,011,491, against $99,427,943 a week previous; and $109,082,086 on Feb. 25, 1868.

The aggregate issue of coin certificates by the U. S. Sub-Treasury, in this city, up to date of latest local report was $245,369,740; aggregate redemptions, $209,565,000; leaving outstanding certificates to the amount of $35,804,740. The latest report from the national capital made the outstanding amount of coin certificates on the 1st of Mar., $25,699,360, against $29,619,280 on the 1st of February, 1868.

Government revenues yielded quite handsomely last week, in the form of both customs and excises. The excises, last week, yielded $5,458,629, against $3,586,000 the preceding week; customs at the port of New York (five business days,) $2,494,933 and at the outports, about $800,000 (in coin) more, making the grand total income for the week equal to about $10,105,600 in currency. The total receipts of the National Treasury, from excises, thus far in the new fiscal year, which began on the 1st of July, have been about $135,500,000.

Government received from customs, through the port of San Francisco, from Jan. 1, to Feb. 15, 1868, $988,784.

The Gold speculation has been comparatively uninteresting, during the week. The offerings of gold have been in excess of the general demand, and the price has been depressed to 139⅜, as against 141⅜ at the beginning of the week under review, showing a decline of full two per cent. The stringency in money toward the close worked very sharply against the more sanguine speculative operators. The customs call was moderate and the export inquiry light. There were rumors in circulation to the effect that gold was being marketed on account of the Government, but these rumors were wholly unfounded. The coin balance in the National Treasury on the 1st inst., was up to $106,623,375, against $98,491,163 on the 1st of February. Of the coin reserve last reported as under the control of the Department, $25,699,360 belonged to private depositors, as represented by outstanding coin certificates, the aggregate of which was reduced full $3,919,920 in February.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $749,179, against $292,439 same time last year. The customs demand for Gold last week, averaged $415,822 a day; thus far, this week, it has been equal to $432,141 a day, or equal to a weekly aggregate of $2,592,846. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $57,000 and from California, $476,147. The total customs revenue of the Government, in coin, at this port, thus far, in the current fiscal year, commencing with July 1, 1867, has been $76,141,248, against $87,985,093 same time in the preceding fiscal year. The total receipts of California gold at this port, thus far, in the current fiscal year, commencing with July 1, 1867, have been $23,573,010 against $30,218,325 same time in the preceding fiscal year, showing a decrease of $6,640,315 in 1867–'68. The exports of specie from this port, last week, were $1,543,290, against $478,618 same week last year. The exports of specie, hence, since July 1, 1867, have been $40,106,020, against $22,732,938 same time in 1866–'7. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $2,353,000, and since July 1, 1867, $53,519,606, against $35,955,640 same time in 1866–'7. The specie exports from San Francisco, from Jan. 1, to Feb. 15, 1868, were $4,909,745, against $6,268,078 same time last year.

A very moderate movement has been reported, since our last, in foreign exchange, the supply of which has been on the increase, especially in the form of commercial bills. Prices have been depressed, closing in favor of purchasers.

Bankers' prime sixty day bills on London closed on Wednesday at 109⅜@109⅝, and on Paris to 5.17½c.@5.15⅝; sight bills on London to 109⅝@109⅞, and on Paris to 5.12½c.@5.11¼. The offering of produce bills have been moderate this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $2,574,845, against $5,041,946 same week last year; total, since July 1, 1867, $123,610,059, against $131,971,601 same time in 1866–'67.

Government securities have been more freely offered for sale, on both home and foreign account. Some of the local banks, short of funds, have been realizing on their investments in the National interest bearing obligations. The various rumors of a political and financial nature and tenor received from the capital, and generally adverse to the public credit, have tended to weaken the confidence of many private holders, who have been marketing their hoards of the public funds. These circumstances in the absence of anything like an active demand for either the bonds or notes, from any source, have had the effect of depressing prices full 1@1½ per cent. The decline in gold, and the notable activity in money, have likewise worked against the stability of values. The Treasury Department retired $12,002,750 of Seven-thirties; and issued $8,832,950 of Five-twenties, and $5,045,200 of Ten-forties during the month of February, in which month it also reduced the public indebtedness fully $7,485,750. Some four millions of coin certificates were redeemed, and $545,000 of new three per cent. currency certificates were issued in the same time.

U. S. sixes of 1881 closed here on Wednesday at 110⅜@110⅝; U. S. Five-twenties of 1862, 109¾@109⅞; U. S. Five-twenties of 1864 at 107¼@107⅜; U. S. Five-twenties of 1865 at 107¾@108; U. S. Five-twenties of 1865, consolidated, 106¼@106⅜; U. S. Five-twenties of 1867, 106⅜@106⅝; U. S. Ten-forties at 101⅛@101¼, and U. S. Seven-thirties at 105¼@105⅜. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

May, 1865	118	September, 1865	116½
August, 1865	117	October, 1865	116

U. S. three per cent. certificates 100¼

Government paid off $80,202 of the matured loan of 1847–'67, in February.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 26.	Mar. 4.	Mar. 11.
Consols	93⅛	93⅛	93¼
U. S. 5-20's of 1862	71⅝	71½	71¾
Erie	44¼	47½	48½
Ill. Central	88	89½	89¼

The week has been one of almost unprecedented activity in the general stock market. The fight, between two powerful interests, for the control of the Erie Railway, has been prosecuted with unparalleled vigor and fierceness at the Stock Boards, and enormous blocks of the Erie shares have been changing hands momentarily through all the business hours of each day at violently fluctuating prices, the extremes on one day having shown a difference of nearly twelve per cent., other days full 6 and 8, and on Wednesday, 3@4 per cent. Most of the active stocks on the list sympathized with Erie, and varied frequently in price, on a brisk speculative business. On the whole, the closing operations indicated a very feverish and treacherous market. The severe twist in money was attributed in part to the manipulations of the *bear* operators, and was certainly very advantageous to their interest.

General business has been somewhat fitful, since our last. There has been less activity in breadstuffs, provisions, wool and cotton. Flour, grain and hog products closed in favor of buyers. Middling upland cotton closed rather buoyantly at 25½ cts., per lb. The stock of cotton now here is estimated at about 58,000 bales. The receipts at the port this week, have averaged about 5,500 bales a day. The receipts at all the ports, since Sept. 1, 1867, have been 1,681,000 bales, against 1,405,000 bales same time last year; exports, same time, 1,076,000 bales, against 775,000 bales same time last year; stock on hand at latest dates, 860,000 bales, against 620,000 bales same date last year. At the Live Stock Markets, this week, beeves have been in better supply and less request at a shade lower prices, ranging from 12@19c. per lb.; week's receipts, 5,491. Veal calves have been in good request and steady, at from 10½@14c. per lb.; receipts, 603. Sheep and lambs closed less briskly and less firmly at from 5¾@9¾c. per lb.; receipts, 21,730. Swine less active and depressed at 9@9¾c., per lb., all live weight, receipts, 12,240. Merchandise has been in comparatively fair demand, especially groceries, and dry goods. Sugars have been less firm in price. Continued activity is noted in domestic cottons, especially in brown sheetings and shirtings, which are less plenty and are buoyant in price. Domestic woolens are in rather more request, and held with more confidence. Foreign goods are moving more freely, and desirable fabrics are bringing fair prices. The total imports of foreign dry goods, last week, were $2,024,344, and the total amount marketed $2,447,718. The value of foreign merchandise imported last week, was $2,729,189—making the grand total specie value of last week's imports of dry goods and merchandise,

$4,753,533, against $5,111,098, same week last year; total since July 1, 1867, $154,888,678, against $184,335,862 same time in 1866–'67. The ocean freight market has been less active, since our last, rates closing with a downward tendency. For Liverpool we quote flour at 2s. 3d.@2s. 6d. by sail, and 2s. 6d. by steamer, per bbl.; grain at 6d. by sail, and 8d. by steamer, per bushel; cotton at $\frac{3}{32}$ by sail, and ½ by steamer, per lb.; and heavy goods at 25s.@32s. 6d. by sail, and 35s.@45s. by steamer, per ton. Total number of vessels in port on Wednes-day 515.

The New York exports, exclusive of specie, for the week ending Mar. 10, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week.....	$5,041,946	$2,574,845
Prev. reported.....	32,238,018	29,892,329
Since January 1.....	$37,279,964	$32,467,194

The New York imports for the week compare as follows:

	1867.	1868.
Dry goods	$2,507,131	$2,024,844
Gen. merchandise.....	2,299,972	2,729,189
Total for the week.....	$4,806,103	$4,753,533
Previously reported.....	43,136,498	33,437,021
Since January 1.....	$47,942,601	$38,190,554

The balance in the Sub-Treasury on Wednesday was $102,910,132 67.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Pacific Railway Lands.

The President has approved and signed the bill that nothing in the act approved July 1, 1862, entitled an act to aid in the construction of a railroad and telegraph line from the Missouri River to the Pacific ocean, and to secure to the government the use of the same for postal, military and other purposes, and the act amendatory thereof, shall be held to authorize the withdrawal or exclusion from settlement and entry under the privileges of the pre-emption or homestead laws, the even numbered sections along the routes of the several roads therein mentioned which has been or may be hereafter located; provided that such sections shall be rated at two dollars and fifty cents per acre, and subject only to entry under these laws; and the Secretary of the Interior is hereby authorized and directed to restore to homestead settlers, pre emption or entry according to the existing laws, on all the even numbered sections of land belonging to the government, and now withdrawn from market, on both sides of the Pacific Railroad and its branches, whenever said road and its branches have been definitely located.

☞ The foundation stone of the Bridge to cross the Mississippi River at St. Louis, was laid on the 25th ult., in presence of a large number of citizens.

☞ The extension of the Canal Railroad from Northampton to Leeds, (Mass.,) is completed.

Railroad Earnings.—Weekly.

The earnings of the Chicago and Alton Railroad for the first week in March, 1868, were..... $55,427 00
Corresponding period previous year .. 40,360 00

Increase $15,067 00

The earnings of the Detroit and Milwaukee Railroad for the first week in March, 1868, were $17,757 86
Corresponding week of 1867 ..... 27,547 14

Decrease $9,789 28

The earnings of the Chicago and Northwestern Railroad for 1st week in Mar., 1868.. $168,533 96
Corresponding week previous year .. 159,873 30

Increase $8,660 66

The earnings of the Michigan Southern and Northern Indiana Road for the 1st week in Mar., 1868, were $63,848 00
Corresponding week of 1867 ..... 85,884 00

Decrease $22,036 00

The earnings of the Chicago and Rock Island Railroad for the first week in March, 1868, were..... $59,200 00
Corresponding week of previous year.. 64,719 00

Decrease $5,519 00

Illinois Central Railroad.

The statement of this Company for the month ending February 29, 1868, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	13,884.31 for	$139,274 03
Acres Int. Fund Lands sold	920.00 for	12,489 20
Acres Free Lands sold..	2,761.77 for	38,025 98
Total sales during month of February, 1868	17,566.08 for	$189,789 21
To which add Town Lot Sales		495 00
Total of all	17,566.08 for	$190,284 21
Cash collected in February		$235,603 30

TRAFFIC DEPARTMENT.

Receipts from Freight		$300,178 00
do. Passengers		107,557 45
do. Mails		6,358 33
do. Rent of Road		4,000 00
do. Other Sources		70,000 00
Total Receipts in February, 1868		$488,088 78
Total Receipts in February, 1867		$554,201 39
Estimated earnings in the month of February on the D. & S. C. R.R., not included above		$43,134 87

☞ A meeting of the stockholders of the Cape Cod Railroad Company will be held at Sandwich, Mass., on the 14th inst., for the purpose of ratifying the agreement made by a committee of the Directors for the purchase of the franchise and property of the Cape Cod Central Railroad Company, and to provide the means therefor by increasing the capital stock and otherwise, and to act fully on the subject and upon any matters which the Directors may report to said meeting for action.

☞ At a meeting of the stockholders of the Sussex County Railroad, recently held at Deckertown, N. J., a board of directors was chosen favorable to the construction of a road from Deckertown to Unionville, there connecting with the Middletwn, Unionville and Water Gap Railroad, instead of building one to Goshen as was proposed.

Pittsburg and Connellsville Railroad.

The following is a copy of the ordinance recently passed by both branches of the Baltimore City Council in aid this road:

Whereas it is represented that the completion of the Pittsburg and Connellsville railroad, from Connellsville to Cumberland, will require four million dollars, which it is further represented can be obtained provided the city of Baltimore will consent to postpone the mortgage that she now holds in favor of those parties who may be willing to lend the said sum; and whereas the said city has already issued her bonds for one million of dollars in and of the said Pittsburg and Connellsville Railroad Company, on which large arrears of interest have accumulated, the payment of which bonds, as well as of the interest, both accumulated and current, thereon, can best be secured by facilitating, in the way proposed, the obtaining of the loan for the four million dollars aforesaid and by funding the arrears of interest up to the time when it is probable the said railroad will be completed, so as to enable the said company to use the said four million for the purposes of construction exclusively; therefore,

SECTION 1. Be it enacted and ordained by the Mayor and City Council of Baltimore, That upon the acceptance by the Pittsburg and Connellsville Railroad Company of the provisions of this ordinance, Benjamin T. Newcomer, John W. Garrett and Robert T. Banks be, and they are hereby appointed trustees to receive from the Pittsburg and Connellsville Railroad Company a deed of all the property of said company, of every description, whether real or personal, to be held by them in trust to secure the payment of the bonds of said company, not exceeding in all four million dollars, and the interest thereon, said bonds to be issued on such terms, for such times and in such manner as may be agreed upon by the said company and the said trustees, with the express understanding that the use of the said bonds or the proceeds thereof shall be confined to the construction of the Pittsburg and Connellsville Railroad, between Connellsville and Cumberland exclusively.

SEC. 2. And be it further enacted, That upon the execution of the said deed of trust it shall have precedence and priority over a deed or mortgage from the Pittsburg and Connellsville Railroad Company to Charles M. Keyser and Robert Clinton Wright, dated August 4th, 1856, in trust to save the said city of Baltimore harmless, as specified in said deed, from all loss or damage consequent upon the issue by the said city of the bonds for one million dollars in said deed mentioned; so that the deed or trust authorized by this ordinance shall, to all intents and purposes, be as effective, as regards the city of Baltimore, as if it had been, in fact, executed and acknowledged and recorded before the deed of the 5th August 1856, aforesaid.

SEC. 3. And be it enacted and ordained, That the arrears of interest, together with the interest thereon, now due by the Pittsburg and Connellsville Railroad Company, as well as the interest and the interest thereon that may accrue and remain unpaid from this time to the 1st day of January, 1871, on the bonds of the city of Baltimore, issued in pursuance of an ordinance approved June 10th, 1856, entitled "a supplement to an ordinance entitled an ordinance guaranteeing the bonds of the Pittsburg and Connellsville Railroad Company, approved June 24th 1853," be and the same are hereby directed to be funded, and that upon the payment of the principal of the said bonds, with the interest hereby directed as aforesaid, to be added to said principal, together with the interest that may fall due at the dates stipulated on the said bonds on both principal and funded arrears, from and after the 1st day of January, 1871, the said Pittsburg and Connellsville Railroad Company shall be discharged from all obligations in connection with said bonds under the mortgage of August 4th 1856, aforesaid.

SEC. 4. And be it enacted and ordained, That on the 1st of January, 1871, or sooner, the said company shall sooner declare its readiness to commence the payment of interest on the said bonds and funded arrears, the register of the city be directed to adjust the arrears of interest up to that time, when the Pittsburg and Connellsville Railroad Company shall execute and deliver to the said register such acknowledgment or agreement as the counsellor of the said city shall approve, as evidence of the amount on which, in addition to the million dollars aforesaid, interest is to be regularly paid thereafter by the said company.

SEC. 5. And be it enacted and ordained, That the proceedings heretofore instituted against the Pittsburg and Connellsville Railroad Company, on account of the interest hereby directed to be funded, be dismissed.

SEC. 6. And be it enacted and ordained, That this ordinance is upon the express condition that all taxes and assessments and other charges and expenses, togther with all public dues now levied or which may hereafter be levied upon said debts due to the city of Baltimore, aforesaid, or on account of the mortgage or deed from said Pittsburg and Connellsville Railroad Company to Charles M. Keyser and Robert C. Wright, or the bonds which said deed or mortgage was intended to secure, and for or on account of the deed of trust mentioned in section first of this ordinance, and the debt intended thereby to be secured to the city of Baltimore, shall be repaid by the Pittsburg and Connellsville Railroad Company to the city of Baltimore as the same shall become respectively due and demandable, and shall be deemed and taken to be secured to said city by the deed of trust mentioned in section first of this ordinance.

SEC. 7. And be it enacted and ordained, That this ordinance shall go into effect and operation when the commissioners of finance shall be satisfied that an amount of two millions of said bonds shall have been subscribed for, in good faith, by such parties as may in their judgment be deemed responsible; provided, however, that no sales of bonds shall be made at less than ninety cents in the dollar.

European and North American Railway.

The St. John *Globe* gives the following statement of the progress of "Western Extension" from St. John to the Boundary Line:

We have heard very little lately of Western Extension, but notwithstanding the absence of newspaper reference to it, the work is work is being pushed on with great vigor. There is somewhere between twelve or fifteen hundred men at work along the line; and those best qualified to judge are sanguine that by midsummer the locomotive will be able to run over a large portion of the line.

Of the section of 46 miles between St. John and Tracey's Mills, the entire clearing and grubbing has been completed and the forward condition of things may be inferred from the annexed statement, which shows the work done and still to be done:

	Cubic Yards Done.	Still to be done.
Embankments made	519,994	457,865
Bank excavations	704,944	33,750
First class masonry	....	2,600
Second "	524	5,000
Third "	4,075	2,040
Fourth "	2,350	3,300
Wharf at Nerepis, equal to rip rap	3,750	.....
Sleepers on line, No	16,000	50,000
Furnished, but not delivered	35,009	.....

All the sleepers have been sublet for delivery by 1st of April, not only upon that section, but on the whole line. On the next section of seventeen miles the work is also in a forward condition; and that section can also be made ready for the locomotive by the month of August.

There is nothing to prevent the locomotive running to Woodstock by the close of navigation next fall.

French Railway Receipts.

The aggregate traffic receipts on the six principal railway systems in France, including old and new lines from the 1st of January to the 30th of December, 1867, both dates inclusive, amounted, on 9,065 miles, to £25,593,397, and for the same period in 1866, on 8,632 miles, to £23,713,167, showing an increase of £1,880,230, and of 433 miles. The traffic receipts on the Paris and Mediterranean Railway amounted, on 2,331 miles, to £8,338,386, against £7,736,188, on 2,183 miles, showing an increase of £602,203; the traffic receipts on the Paris and Orleans Railway, amounted, on 1,851 miles, to £4,213,372, against £4,062,049, on 1,812 miles, showing an increase of £151,323; on the Eastern of France Railway the traffic receipts amounted, on 1,650 miles, to £4,182,782, against £3,923,443, on 1,594 miles, showing an increase of £259,339; on the Northern of France the traffic receipts amounted, on 870 miles, to £3,721,951, against £3,297,496, on 788 miles, showing an increase of £444,555; on the Western of France the traffic receipts amounted, on 1,301 miles, to £3,370,372, against £2,986,093, on 1,245 miles, showing an increase of £384,179; and on the Southern of France the traffic receipts amounted, on 1,062 miles, to £1,766,684, against £1,707,903, on 1,010 miles, showing an increase of £58,731, making the aggregate receipts, as above, £25,593,397, against £23,713,167, showing an increase of £1,880,230.

Iowa Central Railroad.

The President and Vice-President of this road have been instructed to make all necessary arrangements for the location of the road in Powesheik County. Three routes are under consideration, called the Montezuma, Grinnell and the middle route. Two bids for the location of the road have been made, one of $50,000, and the other of $60,000.

The contracts for the grading of the road from Oskaloosa north to Toledo, will be let immediately and that will form one division of the road.

Arrangements are also being made for the prosecution of the work in Tama county, and in Black Hawk the road will be made ready for the iron at an early day, the most of the work being now completed. The road is going forward as rapidly as can be reasonably expected when the length of the line is taken into consideration.—*Cedar Valley Times.*

Iron Cotton Ties.

The Treasury Department has decided that iron cotton ties are subject to a duty of ½ per cent., being classified as hoop-iron, in accordance with the department's decision of August 24th, 1867, and a buckle annexed by welting or otherwise, and which can be detached by hand, or iron cut off, whereby the balance of the tie, so styled, may be used as hoop-iron, will not class it as a manufacture of iron, not otherwise provided for, because it may still be used as hoop-iron with but little loss.

The only iron tie at present classified as a manufacture of iron not otherwise provided for, is the tie known as Beard's patent lock tie, which was recognized as such for reasons stated in the department's decision of Nov. 30, 1867.

Magnetic iron, sand or ore, is to be subject to a duty of 20 per cent. *ad valorem;* that magnetic iron, sand or ore imported from Canada is to be classified on the basis of the department decision of Sept. 25, 1867, as a mineral and bituminous substance in a crude state not otherwise provided for, and was subject to a duty of 20 per cent. *ad valorem.*

Chamber of Commerce.

At the regular monthly meeting of the Chamber of Commerce on the 5th inst., Mr. A. A. Low, from the special committee to whom the matter of a centennial celebration had been referred, presented a lengthy report, reciting the proceedings held April 5, 1768, which resulted in the formation of the Chamber of Commerce, alluding briefly to the growth and work of the Chamber from that time to the present, deprecating the passing of the commerce of the country from American to foreign ships, and stating that, "Not only is our commerce with foreign countries passing from American bottoms to those of other nations, but in consequence of the depreciated state of our currency and the pressure of taxation on the products of our industry, the United States are ceasing to be a nation of supply to the less favored peoples of the world. Worse than all, at home and abroad, the credit of the country is suffering from a tone of demoralization which penetrates the very halls of Congress, threatening to subject our young, vigorous and wealthy republic to the costly sacrifice of its good name among the civilized nations of the earth. Instead of expecting wise and honorable legislation, leading to judicious measures of revenue and finance, the sagacious and thoughtful live in perpetual fear of political combinations that will pander to a sentiment said to be as wide spread as it is depraved, which demands an indirect repudiation of the public debt, even though it cast a stigma upon the nation which generations cannot outlive."

Canadian Portage.

Under a new arrangement just concluded between the Post Office Department of the United States and of the Dominion of Canada, the single rate of postage on international letters will be reduced on and after the first day of April, 1868, from ten to six cents if prepaid in the office of mailing in either country but if posted unpaid or insufficiently prepaid they will be subject to a postage charge of ten cents per single rate in the country of destination. The authorized weight of a single letter will be fifteen grammes by the metrical scale, and half an ounce in the Dominion of Canada. Postmasters will levy postage accordingly on and after the 1st of April, 1868.

CHAPIN & WELLS,

BRIDGE BUILDERS,

WATCHES.

TIFFANY & CO.,

550 and 552 Broadway,

Solicit attention to their Timing Watches, known as the "TIFFANY & Co., TIMERS."

These watches, for Railroad, Engineering, Racing, Gunnery, and Scientific purposes, are superior to any yet offered, as the arrangement of the stop is such as to note time to the nicety of one-fourth or one-fifth of a second, in such manner as to prevent the possibility of error in the calculation.

The following named gentlemen, having bought "Timers" and found them to be perfectly satisfactory, have kindly allowed Tiffany & Co. to refer to them:

Amasa Sprague,	Joseph McPherson,	August Belmont,
Frank Squire,	Geo. G. Haven,	B. W. Gibbs,
J. C. Griswold,	B. H. Bixby,	O. N. Cutler,
Leon. W. Jerome,	George Osgood,	S. D. Bradford,
Wm. M. Rysdyk,	W. M. Tilden,	J. V. Brokaw,
Wm. F. Shorley,	A. P. Spencer,	C. A. Grymes,
	and others.	

Tiffany & Co., have also a full assortment of watches of all desirable sizes and styles, of the same quality and finish as the first mentioned, in addition to their usual stock of Frodsham's and Jurgensen's.

Particular care and attention given to the repairing and adjusting of fine watches.

TIFFANY & Co., 550 and 552 Broadway. House in Paris, TIFFANY, REED & Co.

NOTICE TO RAILROAD CONTRACTORS.

OFFICE OF THE NEW YORK AND OSWEGO MIDLAND RAILROAD COMPANY,
ONEIDA, N. Y., Feb. 10, 1868.

SEALED PROPOSALS WILL BE RECEIVED AT the Office of the Company, until the 15th day of April, 1868, at noon, for the GRADING, MASONRY, and BRIDGING of that portion of the NEW YORK AND OSWEGO MIDLAND RAILROAD, extending from the City of Oswego to the Village of Sidney Plains, a distance of ONE HUNDRED AND TWENTY MILES, and passing through the Towns of Volney, Hastings, West Monroe, Constantia, Vienna, Lenox, Stockbridge, Eaton, Lebanon, Smyrna, North Norwich, Norwich, Oxford and Guilford, and that portion known as the Branch, from at or near East Guilford, in the town of Guilford, to Mt. Upton, in the same town.

The line will be divided into Sections of about One Mile each, and proposals may be made for separate Sections or for the Entire Work. The Company will entertain separate proposals for BRIDGING only.

The line passes through a desirable section of country of Central New York, and the work will be worthy of the attention of Contractors.

Plans, Profiles and Specifications will be ready for examination at the Office of the Chief Engineer, in Oneida, N. Y., where all necessary information may be obtained, on and after the 6th day of April.

MANUFACTURERS OF MONTIGNANI'S PATENT

RAILROAD SCREW SPIKE.

HENRY YOUNG, President.

G. B. HUBBELL, Secretary.

Works at

OSSINING,

Westchester Co., N. Y.

We respectfully call the attention of all persons engaged in the construction and management of railroads, to the double hook headed Screw Spike, for fastening rails and chairs to ties. The above cut represents the size and shape of the Screw, which weighs eight ounces. It has been thoroughly tested on the Erie, New York Central, and other Railways, from one to three years, and in every case it has stood the test satisfactorily, having performed its work perfectly.

The Screw Spike possesses the following important advantages over the common spike:

First.—They are made of the best refined Iron, and the thread, being forged (not cut), imparts additional strength and stiffness to them.

Second.—INCREASED SECURITY. The holding power of the screw is many times greater than that of the spike, and it is not liable to break nor become loosened by the jar of the cars, nor by the upward or lateral strain even on the steepest grades and sharpest curves—the holding capacity of each screw being from four to five tons, and the side pressure from three to four tons.

In three years' experience no screw has removed from its place, and the rails in every case have been held as firmly to the ties as when first put down. By its use, therefore, the numerous accidents constantly occurring from loose and broken spikes, and consequent loose and broken rails, shaky roads, and the spreading of the rails, will be obviated.

Third.—GREATER ECONOMY. In order to remove the rail it will only be necessary to reverse the screw one-quarter; and when replacing it, turn the screw back to its original position, when the rail will be held as firmly as before. The ties will thus be saved from the injury of splits, checks, and the numerous holes made in them by repeatedly drawing and replacing spikes, in which water will collect, causing their rapid decay. By the use of the screws, therefore, the durability of the ties will be greatly increased and equalized.

Besides, when the rails are loose the ties are cut by the repeated blows made on them by the rails, and are thereby materially damaged; on the contrary, where the screw is used, the rails are held so firmly in their place, that this injury is prevented. The saving to railway companies in ties alone, it is estimated will more than pay the whole cost of the screws. Where none but soft wood can be obtained for ties, the screw manifestly possesses a still greater advantage over the spike.

It is also calculated, that in consequence of the screws holding the rails to the ties so firmly, a less number will be required than of ordinary spikes, also a very great saving will be realized in the wear of the rolling stock and rails. The considerable loss arising from loose, bent, broken and missing spikes, will be almost entirely prevented. Besides, where the screw is in use, in addition to the saving of time in relaying rails, a much less number of men are required to watch the track and keep it in repair, thereby causing a great saving.

While the first cost of the screw is somewhat higher than the spike, *in the end they will be very much cheaper.* The screw therefore being *more economical*, and by its use in place of the spike, *making the roads more secure*, besides "giving to the track an easy and connected spring so much desired," it must entirely supersede the common spike.

In corroboration of the foregoing, we present the testimony of several of the most experienced Track Masters in this country.

Mr. JAMES R. HILLIARD, Track Master on the Erie Railway, (Union Division), who has had twenty-four years' experience as Master of Track-Repairs, after testing the screws makes the following report:

"When I first saw your Screw Spike I pronounced it just the article wanted, and since I have seen it in use I still hold the same opinion.

Mr. P. Featherly, Track Master on the New York Central Railroad, (Albany and Schenectady Division,) says, January 9th, 1866:—

"I put down your Screw Spikes sixteen months ago, on a section of our road where our heaviest work is done, viz., a steep grade on the main track, three miles from Albany, one-quarter of a mile above West Albany, and they are there to-day, firm and as secure as when first put down, while the adjacent track, fastened with common spikes, has been respiked several times during that time."

Mr. E. T. MARBLE, Track Master on the Albany and Saratoga Railroad, says:

"On examining the Screw Spikes put down by me September 16th, 1863, I find they have not started either upward or sideways, that they still hold the rail to the ties as securely as when first put down; while great numbers of common spikes are loose and out of place. And on examination I find the threads are bright and clean."

Mr. E. H. DE VERONE, Track Master on the Shore Line Railroad, writes:—

"Having examined and tested your Screw Spikes on our road, I feel satisfied that they are more durable, safer and more reliable than common spikes. By their use our Railroads would be perfectly safe so far as the track is concerned. Although it requires somewhat more time to drive them than it does the common spike, yet it is more than counterbalanced by their greater durability and safety, and saving of time in relaying rails. With practice and the use of proper tools, even that objection can be overcome."

Mr. A. F. SNYDER, Track Master, Albany, January, 1867, writes as follows:

"This is to certify that the screw Spikes put down on the bridge over the Hudson River at Albany, N. Y., by the U. S. R. R. Screw Spike Co., February, 1866, have done their work perfectly—holding the rails securely and firmly to the ties—not having started in the least, while the ordinary spikes, which were put down on the bridge at the same time, have, many of them, started up, and are quite loose and useless."

Mr. J. W. POTTER, Superintendent of the Cincinnati, Dayton, and Eastern Rail Road, says, January 9th, 1867:—

"The Screw Spikes manufactured by your Company have thus far given entire satisfaction, more than equaling our expectations. We have had them tested at our crossings for the past six months, and find them solid in the tie as the day they were put in. I consider them invaluable for crossings and bridges."

Steam Engines—High and low pressure, for land, river, and marine service; Horizontal, Beam, and Vertical. Patterns on hand for 8x10, 14x12, 18x12, Oscillating; compact and cheap.

SOLE MANUFACTURERS IN PHILADELPHIA AND CHESTER OF WILLIAM WRIGHT'S PATENT VARIABLE CUT-OFF STEAM-ENGINES.

Boilers—Plain cylinder, flue, and tubular.

Steam-Hammers, of Nasmyth & Davy patterns, with all the recent improvements.

Strahan's Drill Grinding Rest and Twist Drill-Holder.

Castings—Loam, dry, and green sand, brass, &c.

Roofs—Iron frames for covering with slate or iron—neat, durable, and economical.

Gas-Holders of every description. *Builders of Holders for the Philadelphia Gas-Works of* 100 *and* 160 *feet diameter.*

Tanks of every form, for sugar estates, refineries, oil, &c.

Gas Machinery of every description, including Retorts, Bench-castings, Holders and Frames, Purifiers, Coke and Charcoal Barrows, Gas-Valves, Governors, Hoisting Machines, &c.

Manufacturers for the American Meter Company of their Patent Dry Center Valve for changing Purifiers.

Bartol's Patent Wrought Iron Retort-lid, durable, light and cheap.

Sugar Machinery, such as Vacuum Pans and Pumps, Defecators, Bone-Black and Bag Filters, Bone-Black Burners, Washers, and Elevators, Hydraulic Elevators, Sugar and Bone-black Cars, Strike Heaters, Open Steam Trains, &c.

Sole Assignees and Manufacturers in the United States of

Weston's Patent Self-centering Self-balancing Centrifugal Sugar-Draining Machine.

Glass & Bartol's improvement on Aspinwall & Woolsey's Centrifugal Sugar-Draining Machines.

N. Rillieux's Patent Sugar-Boiling Apparatus, applicable to Beet-Root and Cane Sugar.

Having had twenty years' experience in the manufacture of Sugar Machinery for Cuba, South America, and the United States, they are prepared to contract for the design and erection of apparatus for making Sugar from Beet-Root or Cane, and for Refineries for either Sugar or Molasses.

They are also in possession of plans of the most recent improvements in machinery used in France and Germany in the manufacture of Beet-Root Sugar.

Safety Railroad Switch.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the ***MAIN TRACK IS NEVER BROKEN,*** and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns ***The Life and Limb of all Travelers upon Railroads.***

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

ENGINEERING WORKS.

ENGINEER'S FIELD BOOK,

By C. S. CROSS, Civil Engineer.

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. **Sent free by mail,** upon receipt of the price. For sale at this office. Price **$1.50.**

LYONS' TABLES.

To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.				SHEET No			
1.	General Table for all Bases and all Slopes.			13.	for Base 18 ft.	Slop.	1½ to 1

Erie Railway.

We give below the Reports of Hugh Riddle, Esq., General Superintendent, alluded to in the Report of the Executive Committee of the Board of Directors made to the stockholders on the 9th inst., and which was published by us in our last issue:

OFFICE GENERAL SUPERINTENDENT,
NEW YORK, March 3, 1868.

Hon. JOHN S. ELDRIDGE, President:

SIR—On the 3d of December I addressed a communication to the Vice President recommending the purchase of 5,000 tons of steel rails, and at an interview with you I expressed the opinion that 15,000 to 18,000 tons of rails would be required for the repairs of track during the year 1868.

Since that opinion was given we have passed through three months of unusually severe winter weather and moved more than an average winter tonnage, with the road bed frozen solid as a rock, the rails encased in snow and ice, so that it has been impossible to do much in the way of repairs; the iron rails have broken, laminated and worn out beyond all precedent, until there is scarce a mile of your road, except that laid with steel rails, between Jersey City and Salamanca or Buffalo, where it is safe to run a train at the ordinary passenger train speed, and many portions of the road can only be traversed safely by reducing the speed of all trains to twelve or fifteen minutes an hour, solely on account of the wornout and rotten condition of the rails. Broken wheels, axles, engines and trains off the track have been of daily, almost hourly, occurrence for the last two months, caused mostly by defective rails. Fully one thousand broken rails were taken from the track in the month of January, while the number removed on account of lamination, crushing or wearing out was much greater. February will will show a still worse record than January.

The failure of rails is confined to no particular make, although there is a difference easily observed between those made at Scranton and those re-rolled at Elmira. The former break readily into many pieces, and by so doing are pretty sure to throw a train from the track; a large number of these rails have broken with less than six months' service, some with scarce one month's wear.

The Elmira re-rolled iron seldom breaks until very much worn, but it does not possess the hardness and durability found in the Scranton iron, when the latter has strength to resist breaking strains.

With the ten miles of track laid with the John Brown Bessemer steel no fault need be found. But one rail has broken during the winter, and no lamination and very little wear is perceptible. Twenty steel rails were laid in Jersey City yard last March, the iron rails adjoining subject to the same wear have been renewed four times since the steel was put down, and I have no doubt the steel rails will outlast three times as many more iron rails.

This winter's experience has satisfied me that the quality and weight of the iron rails in use cannot be depended upon to sustain the traffic of the Erie Railway. Forty two ton locomotives hauling trains of fifty and sixty loaded cars, and passenger engines weighing thirty-seven tons, running at a speed of thirty to forty miles per hour, literally crush and grind out the iron rails beneath them. Instances have been reported to me of rails removed from the track too much worn for safety, when the first imperfection was visible but the day before.

In view of this state of things what is the remedy? Manifestly the adoption of steel rails as far as practicable, and iron rails of superior quality and heavier section, to be followed by the gradual reduction of the weight of engines and cars as new equipment becomes necessary. The tendency of late years has been to larger and more powerful locomotives and heavier, stronger cars, and this has been carried to such an extent as to render them out of all proportion to the strength and durability of track. Especially has this been the fact upon the Erie Railway.

The condition of the iron at the present date is such as to give me much anxiety and apprehension for the safety of trains. We cannot and do not attempt to make the schedule time with our trains; nearly all lose from two to five hours in passing over the road, and it has been only by the exercise of extreme caution we have been able thus far to escape serious accident.

A very large quantity of rails must be laid as soon as the weather will permit and they can be furnished.

In conclusion I desire to modify my estimate of the quantity of rails required for the current year. After a careful observation of the whole road, assisted by information obtained from division superintendents and track masters, I have come to the conclusion that twenty-five thousand tons of rails will be needed to keep up your track in 1868, and I would earnestly recommend that as large a proportion as possible shall be of steel.

Very respectfully, your obedient servant,
H. RIDDLE, General Superintendent.

OFFICE GENERAL SUPERINTENDENT,
NEW YORK, March 3, 1868.

Hon. J. S. ELDRIDGE, President:

SIR—A careful review of the present condition of the motive power of the Erie Railway Company enables me to present the following statement for your consideration:

The company own 371 locomotives, of this number about thirty are condemned as entirely useless, and some forty more are of but little value, owing to their long service and general infirmity, being considered unsafe to carry even moderate steam pressure, and sure to break down if run long distances. Two hundred and twenty engines have performed over ten years' service, and 143 of that number over fifteen years' service. The master mechanics report 128 of these locomotives as requiring new boilers, and recommend the complete reconstruction of 107 of the number whenever the boilers shall be renewed, or in other words, instead of giving the old engine a new boiler, it is deemed more to the interest of the company to construct a complete new engine, for the following reasons: Most of these engines are of the kind known as half crank engines, an expensive and troublesome class to keep in repair. The engines having been so long in service no dependence can be placed upon the strength and durability of any of their parts. They are of a great variety of patterns, and make it necessary to keep a very large stock of material on hand to provide against breakages, there being something over sixty different kinds of engines on the Erie road.

It will be seen by the foregoing that the company have only three hundred serviceable engines, considerably less than that of really efficient ones.

From fifteen to twenty-five per cent. are in shops undergoing repairs, ordinarily at this season often a larger proportion. Our mechanics estimate the life of an engine at fifteen years. Assuming that to be true we should build twenty every year to keep our three hundred good, to say nothing of the seventy now idle and worthless; but as we have added by purchase and construction only twelve new engines to our stock during the last two years we are at the present moment some twenty-eight engines short of what we should have to make good the depreciation. In view, therefore, of the certain increase of the coal tonnage and probable increase of both through and way traffic I feel justified in saying there should be fifty new locomotives added to the equipment of the road during the next twelve months. In the company's shops at Susquehanna and Dunkirk, if worked to their capacity, with a slight increase of machinery, it is estimated thirty engines per annum can be built, at present we are working only force sufficient to build about one-third that number. The engines built in the company's shops, in point of strength, durabilty and perfection of workmanship far excel those procured from locomotive builders, and while their cost may fully equal, perhaps exceed the price for which similar engines may be contracted for, I yet deem it good policy to fully employ our own facilities for the construction of engines.

To fill out the number I have ventured to suggest as needed, twenty will be required outside of the company's ability to construct. These I would contract for to be built after specifications and plans to be furnished by the company's officers, and under the inspection of a good mechanic to be selected and paid by the railway company. In this way I think we could obtain satisfactory machines.

I also deem it my duty to recommend an increase of freight and coal cars. Say 300 box freight cars and 100 coal cars in addition to those heretofore ordered.

The coal cars are sure to be needed, and the box freight cars unless the freight traffic should fall off contrary to all expectations. Respectfully your obedient servant,

H. RIDDLE, General Superintendent.

P. S.—Since writing the foregoing report I have learned from General Potter that he is desirous of establishing stock yards at Urbana and Cincinnati, on the line of the Atlantic and Great Western Railway, and taking stock for the New York market that has hitherto gone *via* Pittsburg, provided the Erie will furnish her full proportion of stock cars. This we cannot do without adding say 200 stock cars to our present number, and to meet this and other demands I would respectfully submit the following estimate for new cars:

300 box cars, at $800	$240,000
200 box cattle cars, at $900	180,000
100 coal dumps, at $625	62,500
Total	$482,500

Sioux City and Pacific Railroad.

The Interior Department has recently received the report of the United States Commissioners on the first section of forty-nine and a half miles of the Sioux City and Pacific Railroad, extending from the twentieth mile post south from the initial point in Sioux City to the sixty-ninth and one-half mile post. Forty-seven miles of this section are in a straight line, and the whole section contains thirty-six trestle bridges, with an aggregate length of 6,974 feet, and two Howe truss bridges, one of 160 feet span and the other of 100 feet. There are three water stations and sidings and one culvert. At Sloan, on the twenty-first mile, there are a temporary office and engine house; at Onawa, on the thirty-eighth mile, a depot, freight room, engine house and turn table; and at River Sioux, on the fifty-second mile, there is a good station. The following rolling stock is now in use: Three locomotives, one express, one way, one office, sixteen box, four stock, five coal, four boarding, twenty flat, nine hand and four dump cars. The telegraph is completed and in operation from Sioux City to the end of the sixty-ninth mile and from there to Missouri Valley Junction. The Commissioners recommend that the section be accepted, and the President has accepted it and ordered the issue of the bonds and patents due to the company.

Great Western Railway of Canada.

The Indian Government guarantees 5 per cent. dividend on capital embarked in the Indian railways. The Canadian Government merely loaned their own debentures to the railway companies in that country, and expected them to provide the annual interest on such debentures out of the railway earnings. In 1857, however, the Grand Trunk Company obtained an act to put back the Government interest until the shareholders had received ordinary dividend up to a certain amount. The Great Western are now endeavoring to obtain a similar privilege. It would not be a very great concession on the part of the Canadian Government to make, seeing the extensive benefits Canada as a country has derived from her railways, while to the Great Western it would be a great advantage, for it would relieve the revenue past and present of the burden of £35,000 per annum. Whatever the result the position of the company must be improved.—*Herapath.*

Sussex (N. J.) Railroad.

In the suit between this company and the Morris and Essex Railroad Company, the Chancellor has decided that the latter company must pay the drawback or per centage of twenty-five per cent. on the passengers and thirty per cent. on freight of the gross receipts of the Morris and Essex Company for their proportion of the joint business. The Chancellor ruled that the contract applied as well to the extensions between Newark and Hoboken, and between Hackettstown and Phillipsburg, as to the original road.

Northern Central Railway.

The earnings of this Railway, Main Line, for the year ending December 31st, 1867, were:

From freights		$1,795,312 29
" passengers		651,297 81
" express		73,144 00
" U. S. mails		25,450 01
" sundry sources		130,880 50
Total Main Line		$2,676,084 61
" Wrightsville Branch		31,227 92
" Shamokin Division		280,452 08
" Elmira Division		395,149 48
" Chemung Division		127,537 35
" Canandaigua Division		180,416 72
Total gross receipts		$3,690,868 16
The operating expenses were:		
Main Line	$1,556,538 71	
Wrightsville Branch	24,890 03	
Shamokin Division	172,640 74	
Elmira "	390,811 60	
Chemung "	117,259 41	
Canandaigua "	216,568 96	
		2,478,709 45
Net revenue		$1,212,158 71
Which has been applied to the payment of		
Interest on funded debt		$443,863 04
Dividends to stockholders		366,475 00
Tax on capital stock and dividends		85,239 35
Rent of leased roads		295,143 28
Appropriation to sinking fund		53,000 00
Total payments		$1,193,720 67

The working expenses of the Main Line were 58.16 per cent. of the receipts, being 7.2 per cent. less than the preceding year; and the working expenses of the Main Line and Branches were 67.1 per cent. of the receipts.

The average rate received for the transportation of freight was 2.4 cents per ton per mile; a reduction of 0.9 of a cent per ton from the rates received for the previous year. For each mile run, the average cost for repairs, fuel, and stores for locomotives, was 23.45 cents; for the previous year the cost for the same items was 32.69 cents for each mile run. Showing a reduction in this year of 9.24 cents in this item of expenditure.

The usual payments have been made to the sinking fund during the year. In the fund for the redemption of the loan of $2,500,000, due in 1885, there is now invested $375,000 in that loan. In the general sinking fund, which was established in 1865, there is now invested $207,500, a sum more than sufficient to pay off the loans due in 1870 and 1871.

During the past year we have purchased the Jackson wharf property in Baltimore, and have erected upon it an extensive warehouse. This was rendered imperatively necessary by the increase of business to the West and North. We find that it adds very much to the convenience of shippers, and will tend to increase our receipts.

The track has been maintained in good condition: additions have been made to the capacity of the road by increasing the sidings; there has been erected a freight depot at Selin's Grove; a freight and passenger station has also been built at Liverpool; we have expended $43,752 95 in completing the Dauphin Bridge; and extensive trestles have been erected at Sunbury for the transfer of coal from cars of the Shamokin Branch to return cars for the Elmira Division. We intend to transport the coal going north in box cars, (which would otherwise be hauled back empty,) so far as they will meet the demand. This will enable us to transport the coal at a less cost than heretofore, and must be largely advantageous to us in the future of this growing trade.

Our business has grown so rapidly within a short space of time, and so much expenditure has been necessary to perfect the track, extend sidings, and furnish equipment, that we have delayed, as far as we could, the building of shops for the repair of engines and cars. Additional shops have now become an urgent necessity, and we propose during the present year to erect suitable buildings for that purpose at Sunbury.

During this year we have added to the equipment: 7 locomotives, 2 passenger cars, 2 baggage cars, 25 box cars, 29 gondola cars, 34 lime cars, and 377 coal cars, at a cost of $265,134 41. And we have already contracted to have delivered in the early part of this year: 10 locomotives, 100 stock cars, and 500 coal cars.

We have purchased and put into the track some additional steel rails. Our experience, so far, with steel rails has been satisfactory, and we regret that we have not the ability to use them exclusively in the renewal of the track. As the tires on the locomotives have worn out they have been replaced by steel tires, and the change has been found to be an economical one.

The operations of the leased roads have been much more satisfactory than during the preceding year. The increase of tonnage from them has added materially to the business of the Main Line, and the arrangements lately consummated for securing additional trade from the West and Northwest, are such, that we feel that the time is not far distant when we will be benefitted, not only by the trade which they add to the Main Line, but that the increase will make them self-sustaining, and they will become a source of direct profit, as the Shamokin Division has been since the commencement of its lease by this company.

The increase in the coal trade for the past year over that of the preceding year has been large, the coal transported in 1867, amounting to 453,919 tons, against 303,189 tons in 1866, an increase of 150,730 tons. Of this increase, 49,166 was carried to Baltimore, and 101,564 tons to local stations. The remaining increase of tonnage, amounting to 147,641 tons, has been mainly from points on the line of the Elmira and Canandaigua Divisions and from points on the Lakes. We have been making every effort to increase the tonnage, and have done so by reducing the rates of freight to the lowest point consistent with your interests. If this policy meets with your approval we shall continue it, feeling assured it is the best possible policy to pursue to enhance the value of your property.

As the receipts incident to the inflation of trade produced by the war are no longer perceptible in our business, a comparison of the business of this road for the year just closed with that of the year immediately preceding the war will be interesting.

In the year 1860 the entire receipts of the road were		$964,621 30
The expenses were		717,265 64
And the net revenue was		$247,355 66
In 1867 the gross receipts were	$2,676,084 61	
Expenses	1,556,538 71	
Showing net earnings amounting to		$1,119,545 90

The net earnings of 1867 are $154,924 60 in excess of the entire earnings in 1860; and the comparison shows an increase of 177 per cent. in the gross earnings and of 452 per cent. in the profits. The number of passengers carried in 1860, was 287,630, while in 1867 we carried 655,651.

The system of keeping our accounts having been entirely changed in 1863, an accurate comparison of the freight tonnage cannot be made between the two years of 1860 and 1867, but we give the number of tons of freight moved annually—beginning with 1863, to the present time.

Tons moved in 1863	552,682
" in 1864	746,674
" in 1865	746,043

The number of miles of the roads now leased and operated by this company is greater than that of the Main Line. The different charters under which those roads exist, and the necessity for keeping the accounts of each separately so long as they are but leased roads, makes the management of them by the officers of the company much more laborious, and involves the employment of a much greater clerical force than there should be any necessity for. The management of the line could be greatly simplified if all the companies were consolidated; and we suggest the appointment of a committee of stockholders to take the subject into consideration and report such a plan as they may deem best for all the parties interested for carrying this project into effect. Could such a project be carried to a successful conclusion, this company would then possess a continuous trunk line 325 miles in length, with 41 miles of branch roads.

It has required a large outlay of capital to furnish the equipment necessary to meet the demands of the increased tonnage. So far we have met the demands of the trade, with perhaps the exception of that of coal. This business, by giving the proper facilities can be largely increased; and it is our intention this year to make an effort to furnish it every facility.

This we can do in the local trade, but we will be unable to add very much to the through trade to Baltimore, unless the means for reaching the manufacturing portions of the city are improved. It is not in coal alone that our trade would increase, but, if we could get into and through the city, instead of being confined to a limited portion of it, we could add largely to our shipments of grain, coal, oil and lumber; and by so increasing the amounts of our shipments we could afford to cheapen the transportation of these articles, and consequently cheapen them to the consumers.

To attain this end, so desirable in every view, we need but the co-operation of the city authorities, and we are led to hope from the character of the gentlemen now controlling the affairs of the city, that they will be actuated by a desire to add to her prosperity; and their wisdom will enable them to see that, by granting facilities to the railroads terminating within its limits, they will secure this result. Baltimore possesses all the natural advantages required to make it a very large city, and this railway has a location second to none other. And, reaching as it does the best coal fields in the world; by its connections commanding a full proportion of the traffic of the West and the lakes; with its road in excellent condition and fully equipped; it wants but fair treatment at the hands of the municipal authorities to enable it to treble its business, and thus do its full share towards the growth and commercial prosperity of its terminal city.

Receipts and expenditures for the year ending December 31, 1867.

Receipts, as above		$3,690,868 16
Interest on investments		4,258 82
Interest on sinking fund		20,779 85
Capital stock		130,000 00
Bonds		340,000 00

President.—J. D. CAMERON.

Directors.—Wm. Colder, A. E. Kapp, George Small, Edward C. Biddle, John M. Kennedy, B. F. Newcomer, Henry Welsh, Thomas A. Scott, Jacob P. Jones, Wistar Morris, John A. Wright, S. M. Shoemaker.

Vice President.—C. G. MILLER.

Secretary.—ROBERT S. HOLLINS.

Treasurer.—JOHN S. LEIB.

Auditor.—STEPHEN LITTLE.

Gen'l Superintendent.—J. N. DUBARRY.

Union Pacific Railroad.

At the annual meeting of the stockholders of the Union Pacific Railroad Company, held at their offices, No. 20 Nassau street, March 11, the old Board of Directors was unanimously re-elected, as follows:

Oliver Ames,	T. C. Durant,
John J. Cisco,	H. S. McComb,
Chas. A. Lambard,	Sidney Dillon,
John F. Tracy,	Benj. E. Bates,
John Duff,	C. S. Bushnell,
Josiah Bardwell,	Wm. H. Macy,
F. G. Dexter,	John B. Alley,
Ebenezer Cook.	

The Directors on the part of the Government are:

Geo. Ashmun,	Samuel McKee,
Jesse L. Williams.	James S. Rollins,

At a subsequent meeting of the Directors, Oliver Ames was re-elected President, T. C. Durant, Vice-President, and John J. Cisco Treasurer.

Central Ohio Railroad.

At a meeting of the stocholders of the Central Ohio Railroad Company, held at Zanesville, on the 4th of March, the following gentlemen were elected directors for the ensuing year, viz: Hugh J. Jewett and Daniel Applegate, of Zanesville, Wm. Dennison and Joseph R. Swan, of Columbus, Simon Gephart, of Dayton; Wm. H. Clement, of Cincinnati; J. H. Heaton, of St. Clairsville; John King, Jr., Joseph W. Jenkins, Joseph H. Rieman, Walter B. Brooks and James Harey, of Baltimore. The new board re-elected Hon. H. J. Jewett President of the company.

Lake Superior Copper Mines.

The products of the Lake Superior Copper Mines in 1867, were as follows:

Portage Lake District.—Pewabic, 1,173 tons, 1,434 lbs.; Quincy, 1,119, 1,124; Franklin, 962, 1,408; Calumet, 590, 1,484; Huron, 562, 1,067; Isle Royale, 508, 002; Hancock, 350, 439; Hecla, 332, 1,138; Shelden Columbian, 315, 1,375; Grand Portage, 310, 1,269; Albany and Boston (four months) 65, 1,724; Concord (six months) 47, 008; Douglass (five months) 46, 468; South Pewabic (one month) 38,1,625. Total, 6,424, 565, against 5,650, 1,746 in 1866—a gain of 773 tons, 818 pounds.

Keewcenaw District.—Copper Falls, 1,080 tons, 1,077 lbs.; Pittsburg and Boston, 938, 1,479; Central, 783, 1,714; Pennsylvania, 311, 877; Phœnix, 225, 517; Bay State, 174, 011; St. Clair, 116, 1,055; Amygdaloid, 107, 1,620; Etna, 58, 1,623; Madison, 15, 000; Eagle River, 5, 1,501; Clark, 5, 1,303; Mendota, 2, 000. Total, 3,801, 777, against 3,023, 691, in 1866—a gain of 778 tons, 086 lbs.

Ontonagon District—Evergreen Bluff, 329 tons, 832 lbs.; National, 324, 364; Minesota, 287, 807; Knowlton, 189, 1,267; Ridge, 128, 1,669; Rockland, 84, 1,613; Ogima, 59, 678; Caledonia, 49, 1,697; Superior, 32, 169; Flint Steel River, 14, 114; total, 1,569 tons, 1,210 lbs., against 1,701, 1,250, in 1866—a loss of 192 tons, 40 lbs.

Baltimore and Ohio Railroad.

The regular monthly meeting of the directors of this company was held in Baltimore on the 11th inst., J. W. Garrett, Esq., President, in the chair. The committee on transportation recommended a material reduction in the tariff on coal, to take effect on the 16th of March instant. The reductions embraced in the resolution of the committee on transportation were as follows:

Forty cents per ton of 2,000 pounds from Cumberland and Piedmont to Baltimore, and fifty cents per ton of 2,000 pounds on gas coals from Newburg, Fairmont and Clarksburg, with corresponding reductions of way rates upon the main stem and the branches.

The President stated that looking at the great advantages which it was hoped this important change in the tariff would accomplish, he was prepared to recommend the adoption by the board of the resolution of the committee. Forty cents per 2,000 pounds amounted to a deduction of about 45 cents per long ton, and on gas coals the deduction of 50 cents per 2,000 pounds was equal to 60 cents per long ton. Upon the quantity of coal now being transported upon the road these reductions would amount to a difference in the net earnings of the company of fully $600 per day.

Up to this period the company has not reduced the high prices paid for a length of time for labor, and has been unable to economise to any material extent in the cost of materials and the general expenses of working the road. The board must, therefore, anticipate a material increase in the ratio of working expenses, and such reduction of the gross rate, with the limited decrease of expenses, must, of course, result in a large decrease of net earnings. The board, however, had uniformly made every effort to increase and develop this important interest, and to aid supplying coal to those using it at the lowest possible price, including the manufactories of large capacity, which were becoming much more numerous in Baltimore, as well as the steamship and other varied and important interests that would be largely benefitted by the reduction. The expectation might be justly entertained that a large increase to the trade of the company, as well as the better results for the numerous enterprises affected by the reduction, would ultimately justify the action taken.

It is understood that the eastern markets generally are bare of both semi-bituminous and gas coals, and although the decrease of charge proposed is larger than has been anticipated by the trade, and presents a very low figure, viz: but $2 30 per ton from Cumberland to the shipping wharves at Locust Point, yet these facts strengthen the hope that so large a business may follow as to measurably remunerate for the heavy reduction in the rates for transportation. The company can use effectively its entire line of double track for the traffic of the present season, and has a very large equipment of both locomotive and coal cars. The President, therefore, trusted that such an extent of business would be commanded as, when taken in connection with the general benefits that would be diffused by the reduction, would prove the action proposed to be judicious.

Subsequent to the remarks of the President the vote was taken upon the resolutions proposed by the committee on transportation, and the tariff, as recommended, adopted, to take effect as stated.

After the transaction of the regular and all other business presented, the board adjourned.

Alexandria the Shipping Point for Cumberland Coal.

The completion of the "Aqueduct" of the Alexandria Canal crossing the Potomac River at Georgetown, connecting the Chesapeake and Ohio Canal with a direct channel to the port of Alexandria, will relieve the coal trade of the annoying delays which have at times so seriously hampered it, growing out of the insufficiency of facilities for transhipment at Georgetown, and no doubt increase the canal traffic to a very considerable extent beyond what has already been developed; and the commercial interests connected with it will participate in the benefits that must flow from the increase of disbursements required to move the products of the mines to tide water.

The Aqueduct referred to has been rebuilt in so substantial a manner, and with such perfectness of symmetry, combining in the Howe Truss all that is necessary for the purposes, that it commands the admiration of all who have seen it, comparing very favorable with any like structure in this country.

The Contractors, Messrs. A. B. Burton & Co., of Philadelphia, may well be satisfied with their labor, as it stands to-day a monument to their skill and genius. Growing out of a controversy with some riparian owners in Georgetown, as to the legality of the structure in its present position and elevation over the River Potomac, Judge Carter, in the United States District Court, has just decided that it is a legal structure, fortified by more legislative sanctions than any other corporative structure of which he has knowledge. This will interest all large coal dealers in Northern ports.

The effect of it will be to make Alexandria the shipping point for Cumberland Coal hereafter, as it was before the war.

The Steen Locomotive.

A locomotive, built on a new plan, with very important improvements, intended for the Girard Coal and Iron Company, of Ohio, is just being finished at Mr. R. H. Leeky's shop. The engine weighs only five and a half tons, has no pitman nor connecting rods, but the power is transmitted direct from the piston to the driving wheels, obviating dead points. A further advantage is, that the gearing can be so set as to give, with a velocity of even ninety strokes a minute, a speed of only three miles an hour.—*Pittsburg Chronicle.*

Rapid Bridge Construction.

Under this heading, Mr. T. C. Clarke, Assistant Engineer Quincy Bridge, has replied through the columns of the *American Railway Times*, to an article which appeared in the American Railroad Journal, of February 22d, in reference to the rapid construction of the Bridge over the Great Miami, in which he says:

You give in your paper of February 29 an example of what you justly call a rapid feat in railway construction, in building a bridge across the Miami, of three spans of iron of 210 feet each, and four piers, in 120 days. Although I am opposed on principle to extolling rapidity of construction, believing that thoroughness is often sacrificed to it by our fast people, yet I cannot refrain from telling you what progress we have made with our bridge across the Mississippi at this point. The bridge is, as you are aware, of iron on stone piers; the total length is about 3,870 feet; and there is besides more than a mile of heavy embankment and trestling connected with the work. Since the first of September last (at which time the extraordinary flood of 1867 had sufficiently subsided to allow of submarine construction,) we have completed two abutments and six piers, have put in foundations, and have carried the masonry to a height of from twelve to fifteen feet above water of twelve piers, and have put in foundations ready for masonry of five piers. We have also sunk the foundation of one pivot pier in mid-channel, consisting of four iron tubes, to the bed rock, forty feet below water. Thus we have put in twenty-six foundations, completed eight and partly built twelve piers during 163 working days. We have also raised one span of 200 feet, and built considerable embankment and trestle work. If we are as much favored by weather and absence from disaster as we have been, we shall run trains across the river before September 1 of the present year. Everything is being done in the most substantial manner, and the structure when completed will be one of the strongest bridges in the world.

Under the old fashioned system of construction by coffer-dams, the work above described could not have been done in less than three years. The rapidity of modern construction can be explained by one word—India-rubber. It is to the use of this versatile gum in the shape of the tube which supplies air to the divers, and forms their dresses, that we are able to work under with as much accuracy, and nearly as fast, as above it.

New Railroad from St. Louis to Indianapolis.

St. Louis, Mo., March 13.—A delegation of Eastern Railroad men, including Ex-Governor Dennison, of Ohio; J. L. Jewett, of the Pittsburg, Columbus and Cincinnati road; Thomas A. Scott, and G. B. Roberts, of the Pennsylvania Central; B. E. Smith, President of the Chicago, Columbus and Indianapolis road; R. W. Thompson, M. K. Edwards, W. R. McKeon, of Indiana; John A. Schofield, of Illinois; and W. D. Wood of Pittsburg, are in the city on business connected with the construction of a new road from St. Louis to Indianapolis *via* Vandalia, Illinois. They will open an office in this city, and put into effect vigorous measures for the speedy completion of a great through route to the East.

☞ Mr. William W. Longstreth, for the last three years President of the Lehigh Valley Railroad Company, and for several years previously President of the Beaver Meadow Railroad Company before its consolidation with the Lehigh Valley Company, has resigned his office. He is succeeded in office by the Hon. Asa Packer, assisted by the Hon. Charles Hartshorne as Vice President.

Pig Iron Product of the United States in 1867.

The following statement exhibits the quantity of anthracite pig iron made in the United States during the years 1866–'67, in tons of 2,000 pounds:

	1866.	1867.
Massachusetts	3,606	3,500
New York	118,274	145,417
New Jersey	40,680	36,919
Pennsylvania	573,759	586,584
Maryland	13,048	12,363
	749,367	784,783

The production of raw coal and coke pig during the same period has been as follows: In 1866, 268,996 tons; in 1867, 318,647 tons.

Of charcoal pig iron the production was, in 1866, 332,780 tons; and in 1867, 344,341 tons—making the total of pig iron as follows:

	1866.	1867.
Anthracite pig iron	749,367	784,783
Run coal and coke iron	268,996	318,647
Charcoal iron	332,780	344,341
Total	1,351 143	1,447,771

Of rails, there were manufactured in 1866, 430,778 tons, and in 1867, 461,420 tons.

The product, other than rails for 1866, was

	Tons.
Merchant bar and rod	276,192
Sheet	34,069
Plate	71,507
Hoop	16,459
Nails and spikes	147,625
Axles and other	49,559
Total	595,411

The product of the forges was as follows: for 1866, 73,555 tons; for 1867, 73,073 tons. As near as we are able to estimate, the proportion of the above made direct from the ore was in 1866, 36,500 tons, and in 1867, 35,800 tons, making the grand total production of iron from the ore in 1866, 1,387,643 tons; in 1867, 1,483,571 tons.

Returns to be received will no doubt slightly modify the figures for 1867—those for 1866 are substantially correct.—*Bulletin of the American Iron and Steel Association, March 4.*

U. S. Internal Revenue.

The following is a brief statement of the entire receipts from internal revenue in the United States in each of the last fiscal years:

	1866.	1867.
Manufactures & products	$178,356,661 37	$146,223,673 66
Gross receipts	11,262,429 82	7,444,719 00
Sales	4.002,282 91	4.114,075 47
Special taxes	18,038,097 71	18,186,446 50
Income	72,982,159 03	66,014,429 34
Legacies	924,823 97	1,228,744 96
Successions	246,154 88	636,570 19
Schedule A	1,693,122 73	2,116,674 37
Bank circulation and deposits	3,464,038 05	2,046,562 46
Passports, &c	31,759 00	28,217 00
Slaughtered animals	1,291,570 51	262,210 75
Special income tax	452,550 09	.....
Fines, penalties, &c	1,142,853 20	1,459,170 80
Stamps	15,044,373 18	16,094,718 00
Special Treasury agents	1,974,107 72	64,262 15
Total	$310,906,984 17	$265,920,474 65

☞ F. C. Armes, Esq., recently Chief Engineer on the Northern Central Railway, has been appointed Chief Engineer in the construction of the railroad between Columbia and Port Deposit. Residence at Columbia.

New Railroad Line from New Orleans to New York.

The New Orleans correspondent of the Chicago *Tribune* says that "the Wills Valley Railroad, forming a part of the line of the projected New Orleans, Mobile and Chattanooga Railroad, will be pushed forward into Alabama, between this and the first of July next. New York as well as New Orleans capital is embarked in the enterprise. Another railroad project is an air line railroad from New York to New Orleans. The gap betwixt Selma, Alabama and Dalton, Ga., is nearly finished, and looking to this end the President of the New Orleans and Selma road, Colonel R. M. Robertson, is having a survey pushed through to this point, and is here now just from a canvass of the route for donations of land. He reports a lively interest, and thinks as much as a million or eleven hundred thousand acres will be obtained to form a basis of operations. This line will bring us one hundred and seventy miles nearer New York than any other, and is looked upon by some of the most prominent New York capitalists as the line to force its way at an early day to Mazatlan, on the Gulf of California. This line is strongly backed by those interested in all the roads from Selma, Ala., to New York."

Pork and Beef Packing.

The following table shows the number of hogs packed in Chicago and Cincinnati for sixteen seasons:

Hogs Packed in Chicago and Cincinnati.

Season.	Chicago.	Cincinnati.
1852–'3	48,157	361,000
1853–'4	52,840	421,000
1854–'5	73,694	355,786
1855–'6	80,380	405,396
1856–'7	74,000	344,512
1857–'8	99,262	446,677
1858–'9	185,000	382,826
1859–'60	167,918	434,460
1860–'1	231,335	433,799
1861–'2	544,118	474,167
1862–'3	970,264	608,458
1863–'4	904,658	370,600
1864–'5	750,147	350,600
1865–'6	501,462	354,079
1866–'7	635,732	462,610
1867–'8	801,299	355,831

Beeves Packed in Chicago.

Season.	No.	Season.	No.
1852–'3	21,663	1860–'1	25,209
1853–'4	25,431	1861–'2	55,212
1854–'5	22,691	1862–'3	42,163
1855–'6	28,972	1863–'4	70,086
1856–'7	14,938	1864–'5	92,495
1857–'8	34,675	1865–'6	23,728

1859–'60	51,899	1867–'8	33,352

Winchester and Potomac Railroad.

At the recently monthly meeting of the Baltimore Board of Trade, the following resolution was unanimously adopted:

"*Resolved*, That the board of trade regard the early construction of the proposed railroad between Winchester and Strasburg as of paramount importance to the city of Baltimore, and they confidently recommend and urge upon the part of their citizens the subscriptions necessary to build it."

This road is a link of only nineteen miles, and will cost $400,000, of which subscriptions amounting to $150,000 are already made. When finished, it will present an unbroken line of rail, connecting with the Baltimore and Ohio Railroad at Harper's Ferry, through the Valley of Virginia to Harrisonburg, affording to that rich and highly cultivated section a cheap and expeditious route to Baltimore.

Lima and Logansport Railroad.

Articles of association of this corporation were filed in the office of the Secretary of State of the State of Indiana on the 3d of February. This company has a capital of $2,000,000. The proposed line will run from Lima, Ohio, through the counties of Adams, Wells, Huntington, Wabash, Miami and Cass, to Logansport, Indiana, a distance of eighty miles.

Cedar Falls and Minnesota Railroad.

It is confidently expected that this road will be in running order from Cedar Falls to Charles City on the first of September next. All the grading is done to Nashua, and the balance, between Nashua and Charles City, is now being finished. Bridges, ties, and everything necessary to prepare for laying the iron is now being furnished.

Southwest Pacific Railroad.

St. Louis, March 14.—The lower House of the Missouri Legislature yesterday passed what is known as the Fox-Baker bill, which gives the Southwest Pacific Railroad, in this State, to a number of Eastern capitalists, including some of the Fremont bondholders and several St. Louis gentlemen, who are to give all the rights and franchises of the road, including the lands, and are to complete it to the State line within a specified time.

Toledo, Akron and Atlantic Railroad.

This company was incorporated on the 28th of February last under the laws of the State of Ohio, with a capital of $2,000,000 in shares of $50 each, for the purpose constructing a railroad from Toledo to Akron, passing through the counties of Lucas, Wood, Sandusky, Seneca, Huron, Lorain, Medina and Summit. The corporators are: George W. Davis, Matthew Brown, J. K. Secor, Charles A. King, John R. Osborne, David L. King and Geo. T. Perkins.

Atlantic and Toledo Railroad.

This company was incorporated, under the laws of Ohio, on the 28th of February, for the purpose of building a railroad from Toledo to West Salem, passing through the counties of Lucas, Ottawa, Sandusky, Huron, Ashland, Medina and Wayne; capital stock, $2,000,000, in shares of $50 each, George W. Davis, Matthew Brown, Chas. A. King, J. K. Secor and John R. Osborne are the corporators.

☞ The line of the American Central Railway from Fort Wayne to Kankaee, is now being surveyed by the engineers of the Pittsburg, Fort Wayne and Chicago Railway Co., which company will construct and equip the first 50 miles westward at their own expense, and break ground on the 1st of next May.

☞ We learn from St. Louis that the St. Louis and Illinois and Illinois and St. Louis Bridge Companies have been consolidated, and that the work of bridging the Mississippi at that point will be pushed to a speedy completion. A new Board of Directors has been formed from the two old Boards, with C. Dickson, as President, Robert P. Tansey Secretary, *pro tem.*, and Capt. James B. Eads, Chief Engineer. Capt. Eads plan has been adopted.

RAILROAD AND CANAL DIVIDEND STATEMENT.

American Railroad Journal.

Saturday, March 21, 1868.

Stock Exchange and Money Market.

Money has been decidedly active, all the week, especially since Monday. The wants of speculative borrowers have been unusually urgent, while lenders have been less disposed to make advances on railway and miscellaneous share collaterals, in view of the disturbance of values at the Stock Boards, resulting from the energetic prosecution of the fierce war of the bulls and bears in the Erie property. The available offerings of capital have been much less extensive. The Sub-Treasury has been adding to its cash balances, while the banks have been losing legal tender, specie and deposits, in considerable amounts. It is believed, however, that the Government office will largely reduce its lawful money reserve, in a day or two, by free disbursements partly on account of purchases of Seven-thirties, which the Department is retiring as rapidly as practicable. It has bought in, or converted, some six or seven millions of this maturing loan, since the 1st inst. The city banks in their last return indicate a decrease of $6,548,610 in the deposits, $2,278,178 in the legal tender reserve, $969,532 in the specie board, and $2,340,602 in the loan averages; with an increase of $59,424 in the circulation. The closing rates for money on Wednesday were full 7 per cent. on call, to the very best street borrowers, and from 7@9 per cent. per annum in the discount line. At these figures, the inquiry for accommodation has been remarkably brisk.

The specie reserve of the city banks is now $19,744,701, against $9,968,722 same time last year. The city bank deposits are now $201,188,470, against $197,958,804 week ending March 16, 1867. The legal tender reserve amounts to $54,738,866, against $62,813,039 same time last year. The circulation now stands at $34,213,381, against $33,490,688 same time last year. The loans are now $54,738,866, against $62,813,039 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $115,213,000 a day, against a daily average of $103,203,000 the preceding week, and $141,022,000 the week ending with Feb. 29, 1868. The current week's exchanges average about $102,161,885 a day. The city banks, last week, lost $2,278,178 of legal tender, $6,548,610 in the deposit line, and $969,532 of their specie reserve. They reduced their loans, $2,340,602; and increased their circulation, $59,424.

The Philadelphia Bank movement the past week shows an increase in loans of $285,946 an increase of $18,871 in specie; a decrease in legal tenders of $495,655; a decrease of $303,311 in deposits; and an increase of $686 in circulation. The Bank Clearings show a decrease of $1,365,857, and the balances, a decrease of $901,991.

National Bank notes to the amount of $131,390 were issued last week, making the total issue to 1,673 banks thus far, $306,730,721, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $6,947,165, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,845,790.) an actual circulation at this date, of $299,783,556. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,637,400; and for the public deposits, $38,177,950—making a total of $379,815,850. The Treasury Department last week redeemed and destroyed $392,200 of worn and mutilated fractional currency, and issued $790,798 of new. The outstanding amount of fractional currency on the 1st inst. was $32,307,948, against $32,246,139 on the 1st of Feb. 1868.

The U. S. Sub-Treasury receipts, week ending with Mar. 14, were $13,214,099, including $2,542,325 from customs duties; payments, $10,458,475, including $433,000 of coin interest; balance at the close of the week, $105,343,522, against $102,587,898 at the close of the preceding week, showing an increase of $2,755,625. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday,

$3,289,130 including $376,070 from customs; and payments, $2,894,782; on Tuesday, receipts, $1,514,547 including $415,993 from customs, and payments, $1,431,446. The balance at the close of business on Tuesday stood at $105,820,972, against $102,011,491 a week previous; and $99,427,943 on Feb. 25, 1868. The office will presently make some heavy disbursements, to the great relief of the extreme stringency in the Money Market.

The aggregate issue of coin certificates by the U. S. Sub-Treasury, in this city, up to date of latest local report was $245,369,740; aggregate redemptions, $209,565,000; leaving outstanding certificates to the amount of $35,804,740. The latest report from the national capital made the outstanding amount of coin certificates on the 1st of March, $25,699,360, against $29,619,280 on the 1st of February, 1868.

Government revenues have been on a moderate scale, since our last. The excises have been less prolific, while the customs have yielded fairly. The excises, last week, yielded some four millions, against $5,458,629 the preceding week; customs at the port of New York, $2,542,325 and at the outports, about $850,000 (in coin) more, making the grand total income for the week equal to about $8,665,000 in currency. The total receipts of the National Treasury, from excises, thus far in the new fiscal year, which began on the 1st of July, have been about $140,000,000.

Government received from customs, through the port of San Francisco, from Jan. 1, to Feb. 15, 1863. $988,784.

Gold has been in much less request, since our last, particularly on speculative account, and the price has been depressed, having fallen on Wednesday, as low as 138⅛@138¼, as against 139⅜ @139½ the preceding Wednesday. The severe pinch in money has had the effect of seriously embarrassing the speculative element, and preventing anything like confident operations for a rise. The customs call for gold has been fair, while the export has been quite moderate. The *Russia* on Wednesday carried off $121,913 in specie. The latest quotation on that day was 138⅜.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $1,256,087, against $370,093 same time last year. The customs demand for Gold last week, averaged $423,721 a day; thus far, this week, it has been equal to $396,031 a day, or equal to a weekly aggregate of $2,376,186. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $506,908 and from California, none. The total customs revenue of the Government, in coin, at this port, thus far, in the current fiscal year, commencing with July 1, 1867, has been $78,817,248, against $90,978,093 same time in the preceding fiscal year. The total receipts of California gold at this port, thus far, in the current fiscal year, commencing with July 1, 1867, have been $23,573,010 against $30,458,213 same time in the preceding fiscal year, showing a decrease of $6,885,202 in 1867–'68. The exports of specie from this port, last week, were $1,096,916, against $247,744 same week last year. The exports of specie, hence, since July 1, 1867, have been $41,406,246, against $22,982,321 same time in 1866–'7. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $433,000, and since July 1, 1867, $53,952,606, against $36,133,340 same time in 1866–'7. The specie exports from San Francisco, from Jan. 1, to Feb. 15, 1868, were $4,909,745, against $6,268,078 same time last year.

Foreign Exchange has been more actively sought after at firmer prices; but it closes in favor of purchasers, the supply having gained on the demand, which was quite moderate for the outgoing steamers of Wednesday.

Bankers' prime sixty day bills on London closed on Wednesday at 109½@109¼, and on Paris to 5.16¼c.@5.15⅝; sight bills on London to 109⅞ @110⅛, and on Paris to 5.13½c.@5.12. The offering of produce bills have been more liberal this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $4,052,946, against $4,315,398 same week last year; total, since July 1, 1867, $127,663,005, against $136,286,999 same time in 1866–'67.

Government securities were in very good request early in the week at advancing figures, but toward the close, the offerings were augmented, partly by the money pressure, and prices receded a fraction, on a less confident business speculative holders, in need of current funds for Stock Exchange purposes, were realizing on their investments in the national interest bearing obligations, on Tuesday and Wednesday; and to this process was traced most of the depression noticeable, late in the week, under review. The very latest dealings indicated more steadiness, with symptoms of animation and buoyancy.

U. S. sixes of 1881 closed here on Wednesday at 110⅛@110¾; U. S. Five-twenties of 1862, 110 @110¼; U. S. Five-twenties of 1864 at 107¾@ 108; U. S. Five-twenties of 1865 at 108⅛@ 108⅜; U. S. Five-twenties of 1865, consolidated, 105¾@106; U. S. Five-twenties of 1867, 106⅞ @107⅛; U. S. Ten-forties at 100¾@101, and U. S. Seven-thirties at 105¾@106. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

May, 1865	118¼	September, 1865	116½
August, 1865	117¼	October, 1865	116

U. S. three per cent. certificates 100¼

Government paid off $80,202 of the matured loan of 1847–'67, in February.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Mar. 4.	Mar. 11.	Mar. 18.
Consols	93⅛	93¼	93⅜
U. S. 5-20's of 1862	71½	71¾	72¼
Erie	47½	48½	45¼
Ill. Central	89½	89¼	89⅜

Railway and miscellaneous share property has been less confidently dealt in, and further depressed in price, by extensive realizations, on speculative account, partly resulting from the extraordinary activity and closeness in Money; and partly from the unprecedented conflict for the control of the Erie Road. There has been a very general and decided settling of values, leading to much embarrassment among operators; and a number of more or less important failures.

General business has been less animated, in all the leading branches. Breadstuffs closed in favor of buyers. Provisions, rather more firmly. Middling upland cotton closed buoyantly at 25@ 25¼ cts., per lb. The stock of cotton now here is estimated at about 62,500 bales. The receipts at the port this week, have averaged about 3,200 bales a day. The receipts at all the ports, since Sept. 1, 1867, have been 1,751,000 bales, against 1,446,000 bales same time last year; exports, same time 1,141,000 bales, against 827,000 bales same time last year; stock on hand at latest dates, 350,000 bales, against 598,000 bales same date last year. Beeves have been in more demand and somewhat firmer this week, ranging from 12@19c. per lb.; week's receipts, 4,979. Veal calves in better supply and less request at from 10@13½c. per lb.; receipts, 1,180. Sheep and lambs moderately active at barely steady prices, ranging from 6@ 9½c. per lb.; receipts, 14,962. Swine quiet at from 8½@9¾c, per lb., all live weight, receipts, 10,720. The movements in general merchandise have been on a restricted scale, though buyers, in most instances have had any existing advantages as regards price. There has been less movement in the dry goods line. The firmness of the principal holders of seasonable fabrics has tended to check operations. The inquiry for domestic cotton has fallen off materially, and less buoyancy has been noticeable in the market. Woolens have not varied in value essentially, but have not been selling freely. Foreign goods have been in moderate request and dress fabrics have been generally steady. The total imports of foreign dry goods, last week, were $2,031,293, and the total amount marketed $2,184,305. The value of foreign merchandise imported last week, was $2,532,061 —making the grand total specie value of last week's imports of dry goods and merchandise, $4,563,354, against $4,601,700, same week last year; total since July 1, 1867, $159,662,863, against $190,493,671 same time in 1866–'67. The ocean freight market has been quiet since our last, and rates have been depressed. For Liverpool we quote flour at 2s.@2s. 3d. by sail, and 2s. 6d. by steamer, per bbl.; grain at 6d. @6½d. by sail, and 8d.@8½d. by steamer, per bushel; cotton at ¼@$\frac{5}{16}$ by sail, and $\frac{5}{16}$@⅜ by steamer, per lb.; and heavy goods at 25s.@30s. by sail, and 32s. 6d.@45s. by steamer, per ton. Total number of vessels in port on Wednesday 506.

The New York exports, exclusive of specie, for the week ending Mar. 17, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$4,315,398	$4,025,946
Prev. reported	37,279,964	32,467,174
Since January 1	$41,595,362	$36,520,120

The New York imports for the week compare as follows:

	1867.	1868.
Dry goods	$2,272,278	$2,031,293
Gen. merchandise	2,329,422	2,532,061
Total for the week	$4,601,700	$4,563,354
Previously reported	47,942,601	38,190,554
Since January 1	$52,544,301	$42,753,908

The balance in the Sub-Treasury on Wednesday was $101,229,577 89.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Hudson River Cement Works.

Up to the date of the destruction of the Works of this Company, at Jersey City, N. J., on the 17th of July last, they had been engaged for a period of *eighteen years* in the manufacture of a fine and superior quality of Hydraulic Rosendale Cement. During *twelve* years of this time MR. J. H. BUTTS has acted as agent, and part of the time as Treasurer of the company; and for the last *six* years prior to the burning of the Works, as Secretary and General Superintendent. Their Works are now located on the West Bank of the Hudson River, at Kingston, N. Y., where they have ample facilities for manufacturing 600 bbls. per day, with a dock front of 500 feet, and sufficient depth of water to load the largest class vessels. We are assured by MR. BUTTS, who still continues his services with them, that it is the determination of this company to maintain the high reputation acquired by them as manufacturers of a superior article, and one that is every way adapted to the construction of works where strength, durability, and resistance to the atmosphere and to the action of water are desired. The Cement is deliverable either at the Works, or in New York City. Address J. H. BUTTS, Agent, 95 Liberty Street, New York.

St. Louis and Iron Mt. Railroad.

The bill to restore the Iron Mountain Railroad to Mr. Allen, and confirm his title in it, which passed the State Senate some time since, but was defeated in the House, was reconsidered in the latter body on the 13th inst., stripped of its several restrictive amendments, and passed by a vote of 91 to 19. It was then returned to the Senate for concurrence in an amendment to exempt Gov. Fletcher from any legal action for seizing the road, and was immediately passed by an unanimous vote. The enterprise is an important one, and the road, it is said, will now be pushed rapidly forward, so that in one year trains will run from St Louis to Mobile and New Orleans.

Pittsburg and Connellsville Railroad.

The Mayor of Baltimore having failed to approve the ordinance for the renewal and extension of the mortgage debt due the city of Baltimore by the Pittsburg and Connellsville Railroad Company, and to fund the arrears of interest due thereon, recently passed by a three-fourths vote in each branch of the City Council, it was promptly passed over the veto: in the first branch by a vote of 19 to 3; and in the second branch by a vote of 8 to 2. It will go into effect immediately. The ordinance was published in full in our last issue.

Kent County Railroad.

The Chestertown (Md.) *News* says that the board of directors of the Kent County Railroad had another meeting at their office in Chestertown on Thursday last, and that there is a good prospect for the early completion of a contract with a New York company, upon terms much more favorable than any heretofore offered. Should this contract be consummated the unavoidable delay in the commencement of the road will inure greatly to the benefit of the company.

Railroad Earnings.—Weekly.

The earnings of the Chicago and Alton Railroad for the second week in March, 1868, were..... $65,132 00
Corresponding period previous year .. 62,000 00

Decrease..... $3,132 00

The earnings of the Chicago and Northwestern Railroad for 2d week in Mar., 1868.. $189,816 50
Corresponding week previous year .. 167,140 48

Increase $22,676 02

The earnings of the Toledo, Wabash and Western Railroad for the 1st week of March, 1868, were..... $51,644 00
Same week in 1867..... 53,569 00

Decrease $1,925 00

The earnings of the Atlantic and Great Western Railway for the second week in Mar., 1868, were..... $70,208 00
Corresponding week previous year.... 99,796 00

Decrease $29,588 00

The earnings of the Michigan Central Railroad for the 1st week in Mar., 1868, were.. $53,543 00
Corresponding week of previous year.. 93,193 00

Decrease $39,650 00

Hudson River West Shore Railroad.

A company has been incorporated with a capital of $4,500,000, to build a first class double track road from Jersey City to Athens, a distance of 115 miles, connecting by the Albany and Schenectady Railroad with the New York Central at Schenectady. The road is located on the bank of the river the whole distance, commencing at Jersey City, opposite the lower part of New York, passing under the Palisades, around West Point, on an easy curve of 4°; under Cro' Nest, and thence along the river bank to its terminal point at Athens. The company have an absolute grant from Congress along the whole river front of the Military Reservation at West Point.

Twelve miles of the road are now under contract, and it is proposed to place the line as far as Newburg under contract within sixty days. The iron for the roads as far as Newburg has been purchased by the company, to which point they expect to open the road within a year, and throughout its whole length within two years. The advantages of the road are—a shorter route to the West, a more direct route to Saratoga, Catskill, Cornwall, West Point, and other salubrious and favorite resorts on the west shore for Summer residence. The landing of passengers opposite all the ferries, from Forty second street down to Cortlandt street, will be a convenience to business men who reside out of town that cannot fail to be appreciated.

☞ A Dominion Telegraph Company has been organized, with headquarters at Toronto, in opposition to the Montreal Telegraph Company. Lines are immediately to be erected to all business points. Contracts for the poles are given out. The lines will connect on the United States side with the wires of the Atlantic and Pacific Company, in opposition to the Western Union lines.

☞ The Wayland and Sudbury Branch Railroad Corporation, having secured their character, have entered promptly into the business before them. A board of five directors, with Capt. Edword Pousland for President, have recently been chosen.

Commerce of New York.

The foreign imports at New York for the month of February, are officially stated as follows:

	1867.	1868.
Entered for consumpt'n.	$13,364,912	$10,586,053
Do. for warehousing	11,211,014	9,297,632
Free goods	918,364	718,777
Specie and bullion	136,491	415,875
Total entered at port...	$25,630,781	$20,818,337
Withdrawn fr. wareh'use	11,794,156	9,049,339

The foreign imports at New York for the two months from January 1st, were:

	1867.	1868.
Entered for consumpt'n.	$24,411,768	$18,241,883
Do. for warehousing...	20,298,716	15,945,503
Free goods	1,636,174	1,497,073
Specie and bullion.....	263,210	552,449
Total entered at port..	$46,609,868	$36,236,908
Withdrawn fr. wareh'se	21,174,640	15,780,963

The foreign imports at New York for eight months of the fiscal year, were:

	1867.	1868.
Six months ending January 1st.....	$143,210,153	$80,810,284
January.....	20,979,087	62,631,151
February.....	25,630,781	6,565,563
		2,302,092
Total 8 months.....	$189,820,021	$152,309,090

The duties received at New York for eight months ending with February, were:

	1867.	1868.
Six months ending Jan. 1	$60,531,571 82	$54,731,301 44
In January	9,472,248 48	7,133,428 42
In February	11,466,418 42	9,696,752 30
Total 8 months....	$81,470,238 72	$71,561,482 25

The exports from New York to foreign ports in the month of February, were:

	1867.	1868.
Domestic produce	$14,615,040	$13,543,674
Foreign free goods.....	36,803	36,387
Do. dutiable.....	800,663	441,528
Specie and bullion	2,124,461	4,203,825
Total exports.....	$17,576,967	$18,225,414
Do. exclusive of specie.	15,452,506	14,021,589

The exports from New York to foreign ports for two months from January 1st, were:

	1867.	1868.
Domestic produce.....	$27,526,729	$27,310,170
Foreign free goods....	151,010	49,067
Do. dutiable	1,223,414	1,110,679
Specie and bullion.....	4,675,812	11,553,650
Total exports	$33,576,965	$40,023,566
Do. exclusive of specie	28,901,153	28,469,916

The exports (exclusive of specie) from New York to foreign ports for eight months ending with February, were:

	1867.	1868.
Six months ending Jan. 1st.....	$84,590,637	$91,143,385
January	13,448,647	14,448,327
February	15,452,506	14,021,589
Total produce.....	$113,491,790	$119,613,301
Add specie	21,447,082	38,759,936
Total exports	$134,938,872	$158,373,237

☞ The contractors on the Queen Anne's and Kent Railroad have commenced work at Millington. Some 300 hands are now engaged grading the road. The directors have determined to locate stations at Millington, Sudlersville, Cox's, Carville's and Centreville. Thomas J. Keating, Esq., has been elected counsel for the board.

Journal of Railroad Law.

WHO ENTITLED TO STATUTORY DAMAGES AT THE DEATH OF A PARTY THROUGH THE NEGLIGENCE OF A RAILROAD COMPANY.

The facts in the late case of Waldo *vs.* Goodsell, Executor (33 Conn. 432) were that in a disaster on the Hartford and New Haven Railroad Company, through its negligence, a husband and wife having no children, were injured at the same time, and both died, but the husband a little before the wife.

McCurdy, J.—In this case, it being a bill of interpleader, the petitioners are merely nominal parties, and the real controversy is between the two respondents, Goodsell as the representative of Andrew D. Euson, and Shelton as the representative of Catherine S. Euson his wife.

At the common law, as is well known, neither of the respondents could have any position in court. Whatever right pertains to either, results from the recent legislation in this State. The statute of 1848 provides that an action for an injury to the person, whether the same do or do not result in death, shall survive to his executor or administrator. This statute was followed by the act of 1853, in relation to which there has been a decision in the case of Goodsell *vs.* Hartford and New Haven Railroad Company 33 Conn. 51. It was there held that the object and effect of the latter law is to select a certain class of cases, of which the present is one, and in respect to them limit the amount of damages and direct their distribution.

The question now is, what by the true construction of that statute is the line of distribution. The respondent Goodsell contends that the title of the widow to the damages was not vested in her at the time of the death of her husband, but that it was contingent and depended upon her being alive at the time of the recovery. The language of the statute is perfectly explicit, and we see nothing in it to warrant such an idea. The money is to be sued for and recovered by the executor or administrator of the husband in a case like this, for the benefit of the widow. There being no children the whole belongs to her. The right to it becomes fixed by the death of the husband and at his death. The only contingency is as to the time of payment. That depends of course upon a settlement or recovery. If her right depended upon the fact of her being alive at the time of the judgment in a law suit, there never could be a settlement with her which would be safe for the company. It would be in the power of the representative of the husband, who must be supposed to be in the interest of his heirs, to keep the case in court indefinitely in the expectation of her decease and a consequent change in the title to the property. The value of her interest and perhaps the means of her support might depend upon her winning in the strife between life and litigation. The husband could not bequeath the damages away from her, (as a part of her estate) and why should his executor be allowed to deprive her of it indirectly. The rule that her title rests absolutely in her at his death is simple, certain and consistent with both the language, and, as we think the obvious intention of the statute.

The language is similar to that of the law regulating a distribution of property to heirs. And

the question in such cases is, what heirs were living at the death of the ancestor.

The statute being preemptory, transferring the whole damages to the widow, it is difficult to see how there can be a division of them or an allowance to the executor of the husband, for any reason or any purposes. If the effect of this construction will be to give to the heirs of the wife what would seem to belong more justly to those of the husband, through whose suffering and death the estate had been acquired, it is within the power of the legislature to modify the law.

We advise that the damages be allowed to the administrator of Mrs. Euston, deducting the fees and expenses of the petitioners.

In this opinion the other judges concurred.

Imports at the Port of Boston.

The imports of foreign goods into the district of Boston and Charlestown from January 1, 1850, to December 31, 1867, yearly, inclusive, were as follows:

1850	$29,909,376	1859	$43,954,025
1851	31,850,558	1860	40,296,234
1852	33,987,144	1861	33,201,685
1853	43,317,369	1862	26,618,344
1854	46,480,444	1863	26,031,444
1855	41,984,013	1864	30,751,595
1856	43,014,900	1865	29,611,846
1857	46,907,924	1866	46,992,707
1858	32,740,716	1867	40,521,559

Muscatine, Council Bluffs and Omaha Air Line Railroad.

A convention was to have been held on the 16th of this month at Oskaloosa, Iowa, to take into consideration the feasibility of a railroad route from Muscatine on the Mississippi to Council Bluffs and Omaha on the Missouri River, at which point it would connect with the Union Pacific Railroad. At Oskaloosa this line would connect with the Des Moines Valley Railroad; at Muscatine with the Chicago and Rock Island Railroad; and at Peoria, Ill., with the Pennsylvania consolidated line direct to Philadelphia, New York and Boston. The gain in distance to Omaha by this route to Eastern cities it is estimated would be 153 miles.

Arrivals at the Port of Boston.

The following is a statement of the number of foreign arrivals at the port of Boston, for the last 30 years, say from 1838 to 1867 inclusive:

1838	1,313	1848	3,009	1858	2,874
1839	1,552	1849	3,111	1859	3,124
1840	1,628	1850	2,885	1860	3,425
1841	1,790	1851	2,872	1861	2,802
1842	1,738	1852	2,971	1862	3,051
1843	1,716	1853	3,042	1863	3,129
1844	2,174	1854	3,102	1864	3,006
1845	2,305	1855	3,178	1865	3,255
1846	2,090	1856	2 990	1866	3,023
1847	2,739	1857	2,985	1867	2,758

Chicago, Shawneetown and Nashville R. R.

This is the name of a new line which is to leave the Illinois Central at Mason or Edgewood, in Effingham County, and extend through Clay, Wayne and White or Hamilton Counties to Shawneetown, on the Ohio River, where it is to connect with the Hendersonville Railroad.

This road will tap a splendid grain and stock growing region, hitherto without connection with Chicago, and will intersect the Cairo and Vincennes Railroad which is now being built through an equally fertile region, whose trade is now carried to Evansville and Cincinnati. The completion of these two lines will send an immense amount of the products of this garden region to the markets of Chicago, and furnish its merchants and manufacturers with hundreds of new customers.

NOTICE TO RAILROAD CONTRACTORS.

OFFICE OF THE NEW YORK AND OSWEGO MIDLAND RAILROAD COMPANY,
ONEIDA, N. Y., Feb. 10, 1868.

SEALED PROPOSALS WILL BE RECEIVED AT the Office of the Company, until the 15th day of April, 1868, at noon, for the GRADING, MASONRY, and BRIDGING of that portion of the NEW YORK AND OSWEGO MIDLAND RAILROAD, extending from the City of Oswego to the Village of Sidney Plains, a distance of ONE HUNDRED AND TWENTY MILES, and passing through the Towns of Volney, Hastings, West Monroe, Constantia, Vienna, Lenox, Stockbridge, Eaton, Lebanon, Smyrna, North Norwich, Norwich, Oxford and Guilford, and that portion known as the Branch, from at or near East Guilford, in the town of Guilford, to Mt. Upton, in the same town.

The line will be divided into Sections of about One Mile each, and proposals may be made for separate Sections or for the Entire Work. The Company will entertain separate proposals for BRIDGING only.

The line passes through a desirable section of country of Central New York, and the work will be worthy of the attention of Contractors.

Plans, Profiles and Specifications will be ready for examination at the Office of the Chief Engineer, in Oneida, N. Y., where all necessary information may be obtained, on and after the 6th day of April.

D. C. LITTLEJOHN, President.
W. B. GILBERT, Chief Engineer.

PROPOSALS

For the Construction of a portion of the Summit Division of the Illinois and Michigan Canal.

OFFICE OF THE BOARD OF PUBLIC WORKS,
CHICAGO, March 11, 1868.

SEALED PROPOSALS WILL BE RECEIVED BY the Board of Public Works, at their office, until 11 A. M. Wednesday, April 15, for the construction of sections Nos. seventeen (17) to forty-four (44,) inclusive, of the Summit Division of the Illinois and Michigan Canal—a distance of about eleven (11) miles.

Maps, profiles, and specifications will be exhibited at the office of said Board in Chicago.

There will be some 1,500,000 to 2,500,000 cubic yards (according to the line which shall be adopted) of earth excavation, some of it quite hard and embracing considerable detached rock, and about 90,000 cubic yards of stratified limestone.

The work must be prosecuted so as not to interfere with the use of the canal during the season of navigation.

It is believed, however, that most of the excavation, except the stratified rock, can be done with steam dredges without interfering with the navigation of the canal, but the rock excavation will all have to be done between the close of navigation in the fall and the opening in the spring.

Proposals are invited on the present line of canal, and also on a new line, as follows, viz:

For the work on Sections 17 to 23, inclusive, according to the old line.

For the work on Sections 24 to 41, inclusive, bids will be received both for the improved old line and a new line.

For the work on Sections 42 to 44, inclusive, bids will be received both for the old line and a new line.

If a new line be adopted for any portion of the distance operations thereon may be continued the whole year. It is expected that the navigation of the canal will be suspended for at least five months in each year, unless otherwise mutually agreed by the Board and contractors.

The whole of the work must be done on or before the end of the third season of the suspension of navigation.

A large amount of machinery will be required to excavate the work within the time required, consisting mainly of steam dredges, scows, and cranes for the earth work, and drilling machines, pumping machinery, and cranes for the rock.

Contractors will be required to commence work on the earth excavation within thirty days of the time of letting, and upon rock excavation by the first of November next, or as soon thereafter as navigation shall be suspended.

Parties contracting for the work will be required to provide all machinery, and to put up and remove all dams and all works of protection, and at their own expense to do all pumping, or whatever may be necessary to secure their work from water.

Proposals must be addressed to the Board of Public Works, indorsed "Proposal for Deepening Illinois and Michigan Canal," and be accompanied with the usual two hundred dollar ($200) bond, with sureties, to be approved by the Board.

Contractors will bid, stating the price for which the work will be done on each of the different sections, and the work will be let as a whole or in part, and in such quantities as the Board shall determine.

The Board reserve the right to reject any and all bids, and no proposal will be accepted unless the party offering it shall give evidence satisfactory to the Board that he has the necessary skill, experience, energy, and ability for doing the work, is trustworthy, and has sufficient pecuniary resources.

The Board will require such security as, according to their judgment, will secure the doing of the work according to the contract.

A. H. BURLEY,
J. McARTHUR,
W. H. CARTER,
WILLIAM GOODING,
R. B. MASON,
Board of Public Works.

4t12

NEW YORK
Belting and Packing Co.,
MANUFACTURERS OF
VULCANIZED RUBBER FABRICS,
Adapted to Mechanical Purposes.

Patent Smooth Belting. (Patented Nov. 22, 1859,) vulcanized between layers of a patent metallic alloy, by which the stretch is entirely taken out, the surface made perfectly smooth, and the substance thoroughly and evenly vulcanized. This is the only process that will make reliable Rubber Belting.

Hose never needs oiling, and warranted to stand any required pressure.

Steam Packing in every variety, and warranted to stand 300 degrees of heat.

Solid Emery Vulcanite.—Wheels made of this are solid, and resemble stone or iron; will wear out hundreds of the ordinary wheels.

Directions, Prices, etc., can be obtained by mail or otherwise.

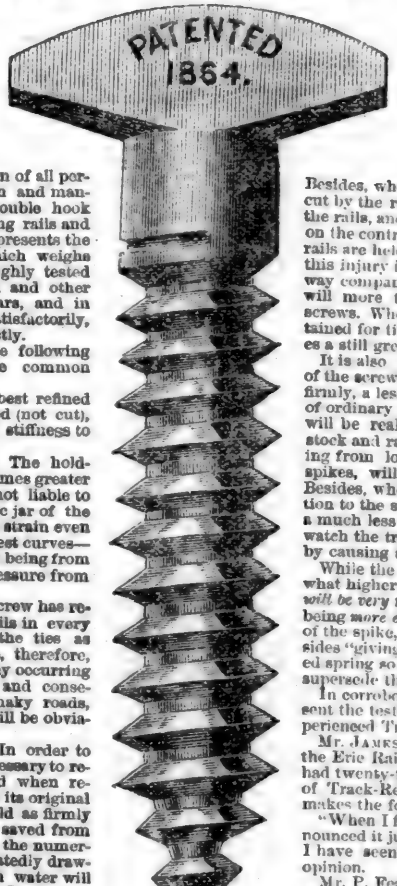
U. S. RAILROAD SCREW SPIKE COMPANY,



NO. 45 CLIFF STREET, NEW YORK,

MANUFACTURERS OF MONTIGNANI'S PATENT

RAILROAD SCREW SPIKE.

HENRY YOUNG, President.

G. B. HUBBELL, Secretary.

Works at

OSSINING,

Westchester Co., N. Y.

We respectfully call the attention of all persons engaged in the construction and management of railroads, to the double hook headed Screw Spike, for fastening rails and chairs to ties. The above cut represents the size and shape of the Screw, which weighs eight ounces. It has been thoroughly tested on the Erie, New York Central, and other Railways, from one to three years, and in every case it has stood the test satisfactorily, having performed its work perfectly.

The Screw Spike possesses the following important advantages over the common spike:

First.—They are made of the best refined Iron, and the thread, being forged (not cut), imparts additional strength and stiffness to them.

Second.—INCREASED SECURITY. The holding power of the screw is many times greater than that of the spike, and it is not liable to break nor become loosened by the jar of the cars, nor by the upward or lateral strain even on the steepest grades and sharpest curves—the holding capacity of each screw being from four to five tons, and the side pressure from three to four tons.

In three years' experience no screw has removed from its place, and the rails in every case have been held as firmly to the ties as when first put down. By its use, therefore, the numerous accidents constantly occurring from loose and broken spikes, and consequent loose and broken rails, shaky roads, and the spreading of the rails, will be obviated.

Third.—GREATER ECONOMY. In order to remove the rail it will only be necessary to reverse the screw one-quarter; and when replacing it, turn the screw back to its original position, when the rail will be held as firmly as before. The ties will thus be saved from the injury of splits, checks, and the numerous holes made in them by repeatedly drawing and replacing spikes, in which water will collect, causing their rapid decay. By the use of the screws, therefore, the durability of the ties will be greatly increased and equalized.

Besides, when the rails are loose the ties are cut by the repeated blows made on them by the rails, and are thereby materially damaged; on the contrary, where the screw is used, the rails are held so firmly in their place, that this injury is prevented. The saving to railway companies in ties alone, it is estimated will more than pay the whole cost of the screws. Where none but soft wood can be obtained for ties the screw manifestly possesses a still greater advantage over the spike.

It is also calculated, that in consequence of the screws holding the rails to the ties so firmly, a less number will be required than of ordinary spikes, also a very great saving will be realized in the wear of the rolling stock and rails. The considerable loss arising from loose, bent, broken and missing spikes, will be almost entirely prevented. Besides, where the screw is in use, in addition to the saving of time in relaying rails, a much less number of men are required to watch the track and keep it in repair, thereby causing a great saving.

While the first cost of the screw is somewhat higher than the spike, *in the end they will be very much cheaper.* The screw therefore being *more economical*, and by its use in place of the spike, *making the roads more secure*, besides "giving to the track an easy and connected spring so much desired," it must entirely supersede the common spike.

In corroboration of the foregoing, we present the testimony of several of the most experienced Track Masters in this country.

Mr. JAMES R. HILLIARD, Track Master on the Erie Railway, (Union Division), who has had twenty-four years' experience as Master of Track-Repairs, after testing the screws makes the following report:

"When I first saw your Screw Spike I pronounced it just the article wanted, and since I have seen it in use I still hold the same opinion.

Mr. P. Featherly, Track Master on the New York Central Railroad, (Albany and Schenectady Division,) says, January 9th, 1866:—

"I put down your Screw Spikes sixteen months ago, on a section of our road where our heaviest work is done, viz., a steep grade on the main track, three miles from Albany, one quarter of a mile above West Albany, and they are there to-day, firm and as secure as when first put down, while the adjacent track, fastened with common spikes, has been respiked several times during that time."

Mr. E. T. MARBLE, Track Master on the Albany and Saratoga Railroad, says:

"On examining the Screw Spikes put down by me September 16th, 1862, I find they have not started either upward or sideways, that they still hold the rail to the ties as securely as when first put down; while great numbers of common spikes are loose and out of place. And on examination I find the threads are bright and clean."

Mr. E. H. DE VERGNE, Track Master on the Shore Line Railroad, writes:—

"Having examined and tested your Screw Spikes on our road, I feel satisfied that they are more durable, safer and more reliable than common spikes. By their use our Railroads would be perfectly safe so far as the track is concerned. Although it requires somewhat more time to drive them than it does the common spike, yet it is more than counterbalanced by their greater durability and safety, and saving of time in relaying rails. With practice and the use of proper tools, even that objection can be overcome."

Mr. A. F. SNYDER, Track Master, Albany, January, 186 , writes us follows:

"This is to certify that the screw Spikes put down on the bridge over the Hudson River at Albany, N. Y., by the U. S. R. R. Screw Spike Co., February, 1866, have done their work perfectly—holding the rails securely and firmly to the ties—not having started in the least, while the ordinary spikes, which were put down on the bridge at the same time, have, many of them, started up, and are quite loose and useless."

Mr. J. W. POTTER, Superintendent of the Cincinnati, Dayton, and Eastern Rail Road, says, January 9th, 1867:—

"The Screw Spikes manufactured by your Company have thus far given entire satisfaction, more than equaling our expectations. We have had them tested at our crossings for the past six months, and find them solid in the tie as the day they were put in. I consider them invaluable for crossings and bridges."

MERRICK & SONS,

SOUTHWARK FOUNDRY,

430 WASHINGTON AV.,

PHILADELPHIA,

MANUFACTURE

Steam Engines—High and low pressure, for land, river, and marine service; Horizontal, Beam, and Vertical. Patterns on hand for 8x10, 14x12, 18x12, Oscillating; compact and cheap.

SOLE MANUFACTURERS IN PHILADELPHIA AND CHESTER OF WILLIAM WRIGHT'S PATENT VARIABLE CUT-OFF STEAM-ENGINES.

Boilers—Plain cylinder, flue, and tubular.

Steam-Hammers, of Nasmyth & Davy patterns, with all the recent improvements.

Strahan's Drill Grinding Rest and Twist Drill-Holder.

Castings—Loam, dry, and green sand, brass, &c.

Roofs—Iron frames for covering with slate or iron—neat, durable, and economical.

Gas-Holders of every description. *Builders of Holders for the Philadelphia Gas-Works of 100 and 160 feet diameter.*

Tanks of every form, for sugar estates, refineries, oil, &c.

Gas Machinery of every description, including Retorts, Bench-castings, Holders and Frames, Purifiers, Coke and Charcoal Barrows, Gas-Valves, Governors, Hoisting Machines, &c.

Manufacturers for the American Meter Company of their Patent Dry Center Valve for changing Purifiers.

Bartol's Patent Wrought Iron Retort-lid, durable, light and cheap.

Sugar Machinery, such as Vacuum Pans and Pumps, Defecators, Bone-Black and Bag Filters, Bone-Black Burners, Washers, and Elevators, Hydraulic Elevators, Sugar and Bone-black Cars, Strike Heaters, Open Steam Trains, &c.

Sole Assignees and Manufacturers in the United States of

Weston's Patent Self-centering Self-balancing Centrifugal Sugar-Draining Machine.

Glass & Bartol's improvement on Aspinwall & Woolsey's Centrifugal Sugar-Draining Machines.

N. Rillieux's Patent Sugar-Boiling Apparatus, applicable to Beet-Root and Cane Sugar.

Having had twenty years' experience in the manufacture of Sugar Machinery for Cuba, South America, and the United States, they are prepared to contract for the design and erection of apparatus for making Sugar from Beet-Root or Cane, and for Refineries for either Sugar or Molasses.

They are also in possession of plans of the most recent improvements in machinery used in France and Germany in the manufacture of Beet-Root Sugar.

LACKAWANNA BUILDINGS,

Safety Railroad Switch.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the *MAIN TRACK IS NEVER BROKEN*, and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns *The Life and Limb of all Travelers upon Railroads.*

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad company.

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

ENGINEERING WORKS.

ENGINEER'S FIELD BOOK,

By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.

2d. Railroad curve tables for expeditiously determining the points at which commences the curving.

3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.

4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent **free by mail,** upon receipt of the price. For sale at this office. Price **$1.50.**

LYONS' TABLES.

To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.				SHEET No			
1.	General Table for all Bases and all Slopes.			13.	for Base 18 ft. Slop.		1½ to 1
2.	For Side Hill Cuts and Fills.			14.	" 20	"	1½ to 1
3.	Base 12 ft.	Slopes	1½ to 1	15.	" 24	"	¾ to 1
4.	" 14	"	1½ to 1	16.	" 24	"	1½ to 1

New York, Saturday, March 28, 1868.

Southern Railroad Connections.

Railroad consolidation, based upon air lines and low grades, appears to be the policy of the most sagacious and prudent managers and directors; but this consolidation is for the present confined to the Western connections of New York, Philadelphia and Baltimore. Capital appears to shrink from all points south of States represented in Congress, capitalists, not being politicians, quickly appreciating and accurately developing all enterprises in which position, security and large profits are assured. Norfolk and Savannah are gathering to their ports only the cotton and other products cultivated and produced upon, or contiguous to lines finished and in operation, whilst New York and Philadelphia, at enormous expense, and small profits, collect cotton as low down as Vicksburg, and ship it over their Western connections. In a few months the connecting links will be finished, and an air line in operation from Baltimore to Vicksburg, with connecting roads running north and south at convenient distances. This road passes over and through a section more varied, more beautiful and more productive than any other in this country. Though this section is not now in a state of prosperity, still the products of its soil, both agricultural and mineral, are such as to yield a full measure of profits to the roads now in operation, and are capable of five hundred fold increase if operated with the vitality and unity which consolidation would produce. In the sub mountain region of Virginia, from Alexandria to Bristol, small grains, fruits and stock can be raised cheaper than in the West, and placed in the market daily, fresh and at small cost, and too early for competition with those of later maturity from the colder climates. The valley, with its rich products of the dairy, its grains and its minerals, is delivered at Charlottesville by the Virginia Central, and at Lynchburg by the canal, upon which, from Lexington to Richmond, the water power equals that of all New England. Throughout this whole region, stretching to the top of and down the southern slopes of the Blue Ridge, the highest priced and most saleable brands of tobacco, as well as the most nutricious grapes and never failing crops of fruit, are produced. From Bristol to Cleveland it is difficult to decide whether the country is richer in the products of the mine or agriculture, wheat, corn, tobacco, grapes and fruits rejoicing the eye and filling the storehouses of the active farmer; coal, iron, copper, marble, plaster of Paris, rewarding the labors of the miner. From Cleveland to Selma coal of a better quality than the Cumberland Maryland, Iron Ore superior to that of Lake Superior or Missouri, with an abundance of limestone, copper, plumbago, and a more varied assortment of minerals, are produced, than can be found upon any other portion of this continent, in the square formed by the Alabama, Chattahooche, Tennessee and Tombigbee Rivers. And from Selma to Vicksburg the very heart of the cotton region is penetrated. Through this whole route food can be cheaply produced, and the negro, for all purposes requiring unskilled labor, working either under the eye of the overseer, or on tasks, as in building and repairing railroads, working iron and coal, is fully equal to any other, and can be procured at one-third the rates of the white laborer. At Cleveland connection is made with all the Southern, Western and Northern roads, and also with Memphis and Charleston. At Meridian, Miss., with the Mobile and Ohio, at Jackson with the New Orleans and Jackson, and at the Mississippi River will be the great crossing for the Southern Pacific.

Railroads in Maryland.

Track laying will soon commence on that portion of the Philadelphia and Baltimore Central Railroad, between Rising Sun and Rowlandsville, in Cecil county, on which the grading has been finished the past winter. It is expected to be completed and in running order as far as the Susquehanna river in June, where, by means of the Columbia and Port Deposit Railroad, now under contract from Port Deposit to Octoraro, a connection will be formed with the Port Deposit Branch of the Philadelphia, Wilmington and Baltimore Railroad. A large force is now employed in grading this road, the object being to push the work forward as fast as possible in order to meet the Central Railroad at the mouth of the Octoraro early in the season. The Chester Creek Railroad, which is to connect the eastern terminus of the Philadelphia and Baltimore Central with the Philadelphia, Wilmington and Baltimore Railroad, at Chester, will also be completed during the present season.

Quincy Mining Co.

The directors of the Quincy Mining Company submit the following report of the business of the mine for the past year, and statement of its present financial condition:

The total shipment of the season was 2,358,639 pounds of mineral, which have been smelted at Detroit, and yielded 81.46 per cent., or 1,921,620 lbs. of ingot copper.

The product of the mine for the year, as prepared for shipment, was 2,248,279 lbs., or 1,124 tons of mineral, of the following description, namely: Stamp copper, 2,068,885 lbs., mass, 165,209 lbs., tribute, 14,185 lbs., for which, estimating only the product of December, left over at the mine, has been realized the gross sum of $437,482 75.

The expenses of the year are as follows: Running expenses at mine, $306,556 62; other expenses as per Treasurer's balance sheet, $57,015 40; total cost, $363,572 02, which, deducted from the gross earnings, $437,482 75, leaves as profits, $73,910 78. Of these profits there has been expended for a new hoisting engine, and

other permanent improvements, $11,045 89; giving as net result of year's business, $62,865 34.

From these net earnings a dividend of $3 per share, or $60,000, has been declared and paid.

The statement of assets and liabilities in our last report showed a balance of assets on hand, as of date, January 1, 1867, of $200,544 67; net earnings of 1867, $62,865 34; total, $263,410 01; deduct for over estimate of copper on hand, Jan. 1, 1867, $21.066 64; making as balance of assets on Jan. 1, 1868, $242,343 37.

There is also, in addition, "the special reserve fund of $50,000, set apart, as heretofore reported, for the endowment of an insurance and repairs account, and fully secured by mining supplies, materials, &c., worth to the company at least twice that amount."

After the payment of the dividend, there remains a sufficient amount of money accruing, to meet all outstanding liabilities, and the cost of working the mine during the winter months at the present rate of expenditure; so that it is probable the Treasury is in position to pay all demands upon it, without requiring any advance on copper, until the accumulated product can be brought to market on the opening of navigation; thus enabling the company to carry on its operations in the most economical manner, and at the least possible cost.

The total cost of production, conversion and sale is 20 cents per lb. Average of sales of product of 1867, 24 cents per lb.

Cleveland and Pittsburg Railroad.

The earnings of this road for the years ending November 30, 1866 and 1867, were as follows:

	1866.	1867.
From passengers	$788,222 77	$640,793 63
" freight	1,498,631 56	1,430,532 43
" miscellaneous	64,351 50	68,824 54
	$2,351,905 83	$2,140,150 60
Expenses, viz:		
Motive power and cars	$627,880 03	$581,698 74
Maintenance of way & structures	494,567 48	428,867 66
Transportation exp's	369,874 29	307,189 86
General expenses	204,857 67	171,552 07
	$1,697,179 47	$1,488,807 83
Earnings less expenses	$654,726 36	$651,342 77
Add receipts from P., Ft.W. & C. R. W	256,065 73	158,171 08
Net earnings	$910,792 09	$809,513 85
From which there has been paid—		
Mortgage interest, etc.	$263,129 99	
Lease of P., Ft. W. & C. Railway track	85,000 00	
		348,129 99
Leaving as balance of the year's business		$461,383 86

From this amount there has been paid the dividend of September 16, 1867, $284,838 15, and the remainder has been expended in real estate, and new structures and improvements. The Report says:

In view of the falling off in rates, and the general depression of business, we think the comparison with the business of the previous year, satisfactory. It clearly demonstrates that the Cleveland and Pittsburg Railroad has resources which naturally belong to it, sufficient for the interest on its debt, and a fair remuneration to its stockholders.

The iron ore traffic which has been spoken of in previous reports, has largely increased. The amount of ore now on the company's docks, is sufficient to furnish freightage to Pittsburg until the opening of navigation. The coal traffic continues to be of great importance, showing a steady increase. The transportation of lumber, from Michigan and Canada, is increasing rapidly. The business of the towns on the line of the road, steadily growing in importance, constitutes an ever enlarging source of income.

The amount charged the Pittsburg, Fort Wayne and Chicago Railway, is stated upon the basis of division of earnings which has been acted on in previous years; it may be revised. The contract between the two companies was modified in Feb., 1866, so that the future ratio of division may depend on the actual earnings of the two previous years. Thus far, the working of the contract has proved beneficial to both companies.

It was stated in the last Annual Report, that the vastly increased business of the company had rendered necessary considerable outlays, and the above shows that this necessity still continues. The final payment of the land purchased by the company, on the west side of the Cuyahoga river, has been made. Two slips are being constructed, with ample docks, so that vessels can load and unload with ease and dispatch. The length of dock already constructed, is 2,000 feet, and 2,000 feet more, it is anticipated, will be ready for use by the opening of navigation. The coal and ore traffic of the coming season, could not be done without these facilities. It is evident that a much larger extent of dock room will be required, and that more slips must be built, until the whole of the land of the company on the west side of the river is utilized. The company will then have a property, ample for its business beyond all possible contingencies.

A Bridge for the passage of railroad trains has been constructed across the Cuyahoga river, for the joint use of the Cleveland and Pittsburg, Cleveland and Erie, and Cleveland and Toledo Railroad Companies, and such other railroad companies as they may contract with for the purpose, which gives direct and commodious access to the west side of the river, for all the trains of the company. The bridge having been fully tested, gives entire satisfaction, and is now being used daily by this company, for the transportation of iron ore.

The road bed, rails, and rolling stock of the company are all in good condition—it is believed they were never better—insuring dispatch and safety in the passage of trains.

In addition to the expenditure which must be continued during the coming year, in the construction of docks, on the west side of the river, at Cleveland, it is of the first importance that the Machine Shops at Wellsville be completed, on the enlarged plan which was originally contemplated, as well as to make a comparatively small addition to the motive power, and freight car equipment.

It has been deemed best by the directors in view of the early maturity of the mortgage bonds of the company, to issue new bonds, secured by a new mortgage on all the property of the company, for the purpose of retiring the present mortgages. The second mortgage bonds, amounting to $1,130,000, fall due in about five years, and the third mortgage bonds, amounting to $1,603,000, fall due in about seven years. The new mortgage bonds, bearing seven per cent. interest, payable semi-annually, will mature in the year 1900. It is believed that the holders of the old bonds of the company will willingly exchange them for the new bonds, covering as they do, all the newly acquired property of the company, and having a long time to run before maturity, with the well established business of the company to secure the payment of interest, and a sinking fund provided for the liquidation of the principal.

It also seemed proper to the directors to provide for the payment of a portion, at least, of those improvements which are adding permanent value to the company's property, out of a permanent fund, that the working expenses may not be burdened with this class of expenditures. The new mortgage has therefore been made for $5,000,000, to cover not only the old mortgage bonds, but to furnish the means of completing these permanent improvements.

A detailed statement of the financial operations of the year just closed, in the form of an account current, is presented, as follows:

Receipts from all Sources.	
Assets to close account for 1866 as per last annual report	$499,366 75
Capital stock, and scrip issued	20,363 75
Bills payable, balance unpaid on notes issued	34,853 97
Mortgage bonds of 1900, bonds negotiated	122,681 25
Gross earnings, as above	2,140,150 60
Surplus earnings, charged P., Ft. W. & C. R. W.	158,171 08
Received from miscellane's sources.	2,200 00
Due on bills and pay-rolls audited, and warrants outstanding, on Nov. account	235,900 12
	$3,213,687 52

Disbursements on all Accounts.		
Operating expenses, as above		$1,488,807 83
Interest, dividends, &c.:		
Mortgage interest	$261,247 50	
Dividend bond interest.	1,662 50	
Interest on notes & acc'ts	219 99	
P., Ft. W. & Ch. R. W. lease of track	85,000 00	
Dividend of Sept. 16th.	270,596 25	
Government tax on same	14,241 90	
		632,968 14
Indebtedness cancelled:		
Stock scrip retired	$225 57	
Dividend bonds and scrip retired	13,314 75	
4th mortgage scrip retired	1,057 25	
Bills payable retired	9,085 84	
3d mortgage bonds converted into capital st'k	20,000 00	
Bills and pay rolls unpaid, Dec. 1, 1866	154,996 52	
Dividends, previous to Oct., 1863	308 00

Net balance personal accounts	228,908 37	
		500,821 07
		$3,213,687 52

Upon the gross earnings, the total expenses are 69½ per cent., of which the operating expenses are 61½ per cent., and showing, compared with

the previous year, a decrease in expenses of 2½ per cent.

During the year 1,971 tons of re-rolled rail, and 70,782 cross-ties have been laid in the main track, side tracks have been extended, and new sidings constructed, to an extent of 13,403 feet.

The equipment of the road November 30, 1867, consisted of 63 locomotives, 32 first-class and 5 second class passenger cars, 13 baggage, 9 express, and 1,274 freight, etc., cars.

Miles run by passenger trains, 380,749; by freight trains, 595,196; by other trains, 452,670; by mixed trains on Tuscarawas branch, 23,063—total, 1,451,678, an increase over the previous year of 10,997.

The number of tons of coal transported in 1866 was 200,155; in 1867, 243,588—an increase of 43,433. The tonnage of ore in 1866 was 89,893; in 1867, 82,155—a decrease of 7,738.

The number of tons of useful load hauled one mile in 1867 was 69,978,055—an increase over the previous year of 1,059,951. The number of cars hauled one mile in 1867 was 11,746,751—an increase of 17,207.

The number of local passengers carried was 516,064; foreign do., 77,939—total, 594,003. Total mileage of passengers, 19,285,562.

The present financial condition is represented in the following

Auditor.—R. F. SMITH.

Secretary & Treasurer.—G. A. INGERSOLL.

☞ The towns of Solon and Anson, Me., have voted to subscribe to the Somerset Railroad from Waterville to Solon—the former for $60,000 and the latter for $100,000.

Chicago, Burlington and Quincy Railroad.

The main line of the Chicago, Burlington and Quincy Railroad, as is well known, extends from Chicago to Quincy, with a cross feeder running from Peoria on the Illinois river, to Burlington on the Mississippi, the crossing of the two lines being at Galesburg, 53 miles west of this city. There is also a road owned and operated by the same corporation, running from Yates City on the Peoria branch (30 miles west of here) down through Fulton county, to Lewiston, a distance of 30 miles from Yates City. The distance from Galesburg to Chicago is 165 miles. It will be seen, therefore, that in going from Peoria to Chicago by the Chicago, Burlington and Quincy we have to travel a distance of two hundred and eighteen miles, which frightens everybody from taking that route, even if they had the courage to face the other vexations of changing cars and laying over at Galesburg. Owing to the fact that the road has no direct route from here to Chicago under its own control, has necessarily been compiled to discriminate against Peoria in the arrangement of all freight tariffs, and there has consequently grown up a bitter feeling here and at other points against the whole corporation.

We are happy to state that the proposed extension of this road is certain to be realized in the near future, and that on its completion, there will be an entire revulsion of the present universal popular sentiment, which, cropping out in the verdict of juries on the one side, and hostile freight tariff on the other, has been a subject of great annoyance and damage to all concerned. The proposed extension will cross the river here and run through Metamora, the county seat of Woodford county, and thence *via* Wenona to Ottawa, and from Ottawa up the Fox River Valley to Aurora, and thence over the main line to Chicago. By reference to a sectional map of the State it will be seen that this road forms nearly an air line from here to Aurora. Going up the valley of the Ten Mile to get out of the Illinois river bottom, carries the road a little east to Metamora out of the direct line, but otherwise it is as straight as the crow flies.

The distances on the new route are as follows:

	Miles.
Peora to Wenona	40
Wenona to Ottawa	30
Ottawa to Aurora	40
Aurora to Chicago	40

Making a total of 150 miles, and forming a shorter route by ten or fifteen miles than we now have to Chicago, and at the same time presenting the agreeable concomitant, "no change of cars."

That portion of the road between Ottawa and Wenona is already completed and operated a distance of seventeen miles. It is used to haul coal from the mines on the Vermillion to Wenona on the Illinois Central Road. Some grading has also been done between the Vermillion and Ottawa—the parties owning it desiring to reach the latter place with their coal also.

The Fox River Valley Railroad, of which Washington Bushnell (late State Senator) is President, has been organized for some time, the city of Ottawa having subscribed $150,000 to its capital stock. Other localities on the Fox river have also subscribed considerable amounts to the road.

The Wenona and Ottawa Road, and also the Fox River Valley both stand ready to turn over their charters to the Chicago, Burlington and Quincy on condition that the latter agree to a perpetual rate (fair to all parties) that will enable the Wenona and Ottawa folks to reach the Northern part of the State with their coal *via* Aurora, and the road leading North from there through Geneva and Elgin. It is proper to state that a charter was obtained during the last session of the Legislature for the Peoria and Wenona Road—the remaining link.

We have not time at present to say anything further of this splendid route, than that it runs through the very richest part of the State, and one comparatively unknown to railway enterprise, and for that very reason all the more likely to be speedily opened up to that spirit of enterprise which, from its seat in Chicago, is searching out every good channel for adding to the business thrift of that young but mighty metropolis.—*Peoria Democrat.*

Copper Falls Mining Co.

The report of this company which has just been issued, presents full details of its history for the past year, the course of the management in the administration of its heretofore somewhat complicated affairs, and the results, together with its previous condition and future prospects; the whole comprising a document of much interest to stockholders.

The copper statement is made to embrace the thirteen months ending December 31, 1867, so as to include all the copper shipped during the past season. The general accounts from the mine and from the treasurer's office, cover only the year 1867.

The whole amount of mineral produced for the thirteen months was 2,465,579 lbs., of which 2,172,154 lbs., according to the mine weights (but 2,163.290 lbs., as returned by the smelting house, the difference being attributable probably to the moisture in the stamps' product), have been shipped, leaving at the warehouse at Eagle Harbor 293,425 lbs.

The mineral shipped was smelted at Detroit, and yielded in ingot, 1,534,428 lbs.; of which 1,073,265 lbs. have been sold for $264,334 98, averaging about 24.6 cents per lb., leaving in the hands of our agent in New York 459,572 lbs. and 1,591 lbs. in the form of ingot moulds at the smelting house in Detroit. The ingot in New York is valued at $99,320 24; and the mineral left over at Eagle Harbor, assuming it to be of the same per centage as that which was smelted, would give 208,331 lbs. ingot, which, at twenty cents per lb., gives $41,666 20; making the value of the production of the mine for the thirteen months, or the gross earnings during that period $405,321 42.

The total expenses of the company for the same period amount to $393,658 73.

Included in these expenses, however, are two items which are of an exceptional and extraordinary character, and not properly chargeable to the production of copper; viz., $64,145 59 paid on account of the purchase of over issued stock, and $10,000 paid by our predecessors to John Leighton, as a gratuity for his services as president. Deducting these items, the cost of copper was $319,513 14, showing a profit of $85,808 28.

The outlay at the mine in 1867 was as follows: Mine cost, $139,970 89; stamping and dressing, $41,593 44; office expense, $5,310 51; expense, $3,357 93; surface, $37,112 52; machinery, $5,958 57; real estate, $1,750 00; making a total of $235,053 86.

The total mining cost for December, 1866, was $21,949 29, which added to the above gives total cost for thirteen months, $257,003 15, as stated in the copper return.

The assets amount to $183,832 63, and the excess of assets over liabilities, as appears by the detailed statement is $35,064 70.

Knoxville and Kentucky Railroad.

President Mayberry, of the Knoxville and Kentucky Railroad, who is now in the city, informs us that he has let out the line of the road to the State line, with the exception of a gap of nineteen miles, which will be let out next month. President Guthrie, of the Louisville and Nashville Railroad, told him, in a late interview, that he would build his end of the road to the Tennessee border as rapidly as possible, so that the connection will be made in about eighteen months. The road will be of immense benefit to both States, and will give a powerful impulse to the farming and mining interests of East Tennessee.—*Nashville Times.*

☞ Norridgewock, Me., has decided, by a vote of 328 to 19, to subscribe $80,000 to the stock of the Somerset Railroad, which is to connect with the Maine Central Railroad at Waterville. This, it is said, insures the building of the road, and measures will be immediately taken to put the work in operation.

☞ The provisional directors of the Toronto and Tripissing Railway Company met recently, and elected the following officers, viz: President, A. M. Smith; Vice President, J. E. Smith; Treasurer, T. C. Chisholm; Secretary, Chas. Robertson. Messrs. Lerfs, McMurrich and Robertson were appointed Solicitors. Meetings were appointed to be held at various places along the proposed line, and a committee named to arrange matters for promoting the speedy construction of the railway.

Richmond and Danville Railroad.

The earnings of this road for the fiscal year ending September 30, 1867, were as follows:

From passengers	$200,428 91
" freight	399,500 98
" express	28,544 15
" U. S. mail	13,072 58
" telegraph line	3,115 66
	$639,662 23

The ordinary expenses were:

Repairs of road	$102,751 47	
" bridges	9,287 41	
" structures	5,691 66	
" locomotives	17,646 64	
" cars	22,575 01	
" machinery	4,795 25	
Passenger train expenses	21,001 27	
Freight train expenses	23,762 62	
Fuel account	30,657 07	
Oil, waste, etc	5,025 18	
Depot expenses	47,910 85	
Telegraph expenses	7,254 14	
Miscellaneous expenses	20,230 85	
Losses and damages	9,649 88	
Salaries of officers, etc	15,778 01	
Taxes and insurance	6,070 06	
U. S. internal revenue tax	9,368 82	
		359,451 19
Net earnings (43.8 per cent.)		$280,211 04

The extraordinary expenses were:

For old debt incurred prior to July, 1865	$19,813 75
For iron rails, chairs, spike and labor relaying track	103,822 62
For rebuilding depots and water stations	9,603 60
For new bridge over canal at Richmond	11,693 40
Total	$144,933 37
Less cash received for old rails, credited to relaying track	21,314 93
Total extraordinary expenses	$123,618 44

Compared with the business of the previous year, the gross earnings show a decrease of $33,051 77, with a decrease in expenses of $28,473 12—making the decrease in net earnings, $4,578 65. The President in his report says:

About 11½ miles of new rail have been laid during the year, most of it between Mattoax and Tomahawk stations, and much of the worn out rail on the residue of the track eastward, replaced with the best of the old material taken up. The entire line to Greensboro is unquestionably in better condition than at any previous period of the company's existence, up to a fair average standard of repair, which will relieve the necessity in future, of so large expenditure in repairs as has, for two years past, been indispensable to the safe and economical operation of the line. New depot buildings have been erected at Meherrin, Chula and Powhatan, which replaces all south of Richmond that had been destroyed during the war. Permanent tracks and platforms have been built on part of the new depot lot in Richmond, and temporary sheds erected to facilitate the handling of Richmond freights, until such time as the company shall think proper to commence the erection of the permanent depot building.

In respect of the company's finances, very important, and it is deemed very beneficial arrangements, have been effected during the year, which are expected to be of invaluable aid to the company in relieving the embarrassments under which it was found on its reorganization in September, 1865. Briefly stated, they are as follows: To enable the company to fund its floating debt, the stockholders at their last annual meeting, it will be remembered, authorized the President and Directors to take measures to consolidate its funded debt, if practicable, into one security, and thereby enable the company to create and offer a new security that would be marketable at a fair price. In execution of this policy, application was made to the general assembly, and an act passed on the 22d day of February, 1867, authorizing the creation of a new lien on the company's property, for an issue not to exceed two millions, to enable the company to consolidate its liabilities by funding its floating and extinguishing by exchange or purchase its outstanding bonds. The act also gives priority to the new lien thus created over the mortgage to the State, and in effect, authorizes the conversion of the entire private debt into a first mortgage security, the State taking the place of a second mortgagee as to the whole private debt, as it then stood as to part. This done, the assent of the bondholders was to be obtained to an exchange of the old for the proposed new bonds; to facilitate which, material advantages were offered in the assumption by the company of the United States internal revenue tax on the new bond, and in other particulars. Most of the bondholders readily agreed to the exchange, regarding it as it clearly is, not less promotive of their own than of the interests of the company. And in June last a new deed of trust, embracing the company's entire property, was accordingly made, and has been duly recorded in all the proper offices. The new bonds have been made and recently offered for exchange. Within the few weeks that have elapsed since their preparation and readiness for delivery, about two-thirds of the entire amount of the old issue have been brought in and exchanged. It is not doubted, therefore, that the plan of conversion which has been adopted as the only thing practicable on the subject, will be completely effective. In a few instances the old bonds may be withheld for a time. If necessary to meet such, if not otherwise obtainable, an adequate sinking fund can easily be created on the new security. The important result to the company is, that instead of a *fifth* mortgage security, with a million six hundred thousand dollars ahead of it, the company can now offer to capital, in the absorption of its floating debt, a consolidated *first* mortgage bond of an issue limited to two millions, secured by the company's entire property, worth certainly not less than six millions. In a state of ordinary financial ease and confidence, these securities will continue to command, as they undoubtedly deserve to command, as good prices as any southern security, paying a six per cent. currency interest. The continued and severe stringency in money, which has prevailed almost without intermission, since the company has been able to offer the new bond, has retarded sales at satisfactory prices. About $100,000 have been disposed of at $70 to the hundred. It is hoped that more favorable circumstances for their use than now exist, will soon occur.

The following statement shows the financial condition of the company at the close of the present fiscal year:

For Funded Debt:

Amount of old mortgage bonds convertible and being converted under the new lien		$1,133,600 00
Interest due on part of same uncalled for		64,115 00
Amount of new consolidated bonds sold and issued in settlement of claims		112,500 00
Debt to State of Virginia, 2d mortgage. Balance of principal and interest to date, about		480,000 00
Bonds, not mortgage, given to Roanoke Valley Railroad Company in settlement for iron obtained in 1863, and used on Piedmont Railroad		148,200 00
		$1,938,415 00

For Unfunded Liabilities:

Amount of bills and notes to mature during 1867 and 1868, including amounts assumed for Piedmont Railroad Company		717,889 46
Amount of loans		32,543 65
Amount due for old dividends		7,983 99
		$2,696,832 10
Less—cash in banks September 30, 1867	$9,172 85	
Bills receivable	63,806 75	
Four hundred tons old rail on hand at end of year, (cash market value)	18,000 00	
Balance due from Piedmont Railroad Company for amounts assumed	403,208 84	
Balance due to company on sundry accounts per ledger	30,775 04	
Balance due from State of Virginia on subscription	11,401 50	
		536,364 98
Making total balance of debt to date		$2,160,467 12

To which may be properly credited:

The present value of 186 shares stock in the Richmond and Danville Railroad purchased and now held by the company	$3,360 00	
Present net value of 14,885 shares stock in the Piedmont Railroad now owned by this company	873,000 00	
		876,360 00
		$1,284,107 12

Of the new consolidated first mortgage bonds, $12,500 have been issued in settlement of claims in addition to the $100,000 sold. The claims of the Roanoke Valley Railroad Company against the Piedmont Company, for iron obtained during the war and used on the Piedmont road, have been settled, and the unsecured bonds of this company maturing at from two to seven years, taken in payment, to the amount of $148,200. The floating debt credited by cash in banks, bills receivable, convertible property, assets and cash balances, including that due from the Piedmont Company, is stated at $222,052 12. The Piedmont Company has a net income of $45,000, on which as a basis, it can doubtless provide for its balance to this company, as is indeed contemplated by the management of that company. That done, it is expected, that under circumstances moderately favorable, the balance of floating debt of this company, with its financial condition now re-organized as effected by the conversion above explained, can be readily disposed of in bonds under the new lien. This of course assumes the continuance of reasonable income. No reason is seen in the present or prospective condition of the country, that should

affect its ability to afford such income with certainty and regularity in the future.

The number of private passengers carried is 78,691, against 62,686 the previous year. The decrease of receipts from this source is due to the diminution of Government passengers carried this year by 4,438, and the reduction of the rate of passenger fare in April last, from 6 to 5 cents per mile. If the present passenger rates are maintained, it is expected that the income from this source will be fully sustained and gradually improved during the ensuing year. The successful adjustment of projected arrangements with connecting lines north and south of us may materially increase it.

The movement of tonnage has increased during the year nearly 20 per cent., in most respects fully meeting expectations from this source. In the item of wheat alone, a heavy deficit of the usual ante-war business has occurred. Owing to the failure of this crop to a large extent in south side Virginia and North Carolina, not more than one-third of what was reasonably expected has been transported, and not one-sixth of the quantity carried in 1860. A large part of that produced in surplus, which would otherwise have sought its market in Richmond, has been retained for home supply, to fill the vacuum produced by the unexampled failure of 1866 in this important product. We may reasonably hope for some improved results in this respect for another year. The tobacco crop has been a fair one, and the tonnage which it affords is likely to be fully maintained, as is also the usual mercantile and miscellaneous tonnage, if political agitations do not further derange our industry, and thereby produce commercial distress and disaster. From several sources we may expect some increase of profitable business. Under the recently consolidated management of the roads from Norfolk to Bristol, we should, and it is expected will, be able to recover the travel between Richmond and the southwest *via* Burkeville and Lynchburg, which, since the war, has been almost totally lost to this company without any default of effort or offered facilities on its part.

The reconstruction of the Richmond and York River Railroad was commenced last year under circumstances of embarrassment. It was opened to the White House, 24 miles from Richmond during the past summer. It is understood that the want of available means has prevented its further progress up to this period. Its completion to West Point, 38 miles from Richmond, would render it, in connection with a city track uniting both lines, of value to your interests. It has been rebuilt on a guage conforming to that of this road, and with a view to its operation in connection with this line. The connection by a continuous track through Richmond has been authorized by the city authorities. Your board have authorized the construction of this connection, to be completed as soon as the Richmond and York River Railroad is completed to West Point. This of course is contingent on the ability of the Richmond and York River Company to progress with its work. If both can be effected within reasonable time, enough is known to justify the belief, that in a comparatively short time, your line can, under energetic management, be made in reality what it is in geographical position, the central and leading carrier of the Atlantic States between New York and New Orleans, and be rendered at once independent of corporate combinations that now dwarf its business and deplete its income to a material extent. In view of the whole matter, it is recommended that you confer upon the management of your company, ample authority in their discretion, to establish with the Richmond and York River Company, if practicable and deemed prudent, such business and property relations as shall be deemed necessary to develope and secure the largest interests you have in this connection.

The Piedmont road has been continued under lease to this company, and the term extended to five years at an annual rent of $45,000, by agreement between the Boards of the two companies. The entire line from Richmond to Greensboro is therefore still operated as that of the Richmond and Danville road. This is doubtless the most convenient and economical employment of that work. Essential and much needed improvements in providing for the interchange of business with the North Carolina Railroad at Greensboro have been made during the year, and the property may now be said to be in the most efficient condition. Though not yet a profitable property to this company, it must eventually become so.

The length of the Main Line between Richmond and Danville is 140.5 miles. Branch to coal yards at Rockett's 1.52 miles. Sidings and turnouts laid 11.25 miles. Total equivalent single track 153.27 miles. The length of the Piedmont Railroad (leased) from Danville, Va., to Greensboro' N. C., is 48.5 miles, or including sidings and turnouts (1.98 miles) 50.48 miles. Total length of main and branch line operated by company 190.52 miles.

The number of locomotives owned by the company is 24. The mileage of locomotives has been 310,204—an increase over the previous year of 70,252 miles. The present stock of cars is as follows: 16 passenger, 6 baggage and mail, 135 box freight, 54 platform, 51 coal, 11 conductor's, 10 gravel, and 2 second class cars from Piedmont Railroad—total, 285. The number of miles run by passenger, mail and baggage cars, was 647,122; by express cars, 55,664; by freight and coal cars, 1,282,380; by service cars, 213,340—total miles run, 2,199,006, an increase over the previous year of 274,096. The cost of maintenance of machinery was $45,016 90, equal to 14½ cents per mile run by all trains. Passengers carried west, 38,962; do., east, 39,729; Government passengers, 815—total, 79,506. Total miles traveled by passengers, 4,106,364. Tons of freight carried, 81,637. Do., carried one mile, 5,924,892.

Statement of receipts, disbursements and liabilities of the company from its organization, November 20, 1847, to September 30, 1867:

RECEIPTS.

Capital stock		$4,000,000 00
Loan of State of Virginia, redeemable in about 34 years, from April 3, 1853, to September 30, 1854, by payment of annuity of 7 per cent.		600,000 00
Bonds guaranteed by State of Virginia, due 1875 and 1876		200,000 00
Bonds extended, due in 1863		25,500 00
Bonds of 4th mortgage, registered, due in 1873		504,000 00
Bonds of 4th mortgage, coupons, due in 1875		423,000 00
Bonds for funding interest, due in 1869 to 1876		82,100 00
Bonds for Roanoke Valley Railroad Company, due in 1869 to 1876		148,200 00
Bonds of consolidated mortgage, coupons		11,000 00
Bonds of consolidated mortgage, registered		500 00
Transportation to Sept. 30, 1866		7,199,132 43
Transportation for the year ending Sept. 30, 1867		639,662 23

LIABILITIES.

President.—A. S. BUFORD.

Directors on the part of the State.—W. T. Sutherlin, A. Y. Stokes, Thos. Branch. *Directors elected by Stockholders.*—Wood Bouldin, J. R. Edmunds.

Superintendent.—THOMAS DODAMEAD.

Secretary and Auditor.—JOHN D. BLAIR.

Treasurer.—E. A. BARBER.

Erie Railway.

The following is the text of the act passed by both branches of the New Jersey Legislature to enable the Erie Railway Company to establish offices, transfer stock, and transact its business in that State:

An act to enable certain corporations more effectually to transact their business in the State of New Jersey.

SECTION 1. Be it enacted by the Senate and General Assembly of the State of New Jersey, That where any railroad corporation which has been created by the laws of any other State or States has, by any law or laws passed by the Legislature of this State, been authorized to hold property and exercise franchises and privileges in this State, it shall be lawful for the directors of such company elected in another State to hold their meetings in this State and exercise all the powers and franchises of such company within this State, so far as it may be necessary to transact any business of such company.

SEC. 2. And be it enacted, That it shall be lawful for such company to have an office in this State for the transfer of stock, and the officers and agents of such company shall be authorized to transact the business of such company in this State.

SEC. 3. And be it enacted, That this act shall be a public act, and shall take effect immediately.

☞ About one-third of the grading of the Dorchester and Delaware Railroad (running from Seaford to Cambridge) is completed, and in about a week the engineers expect that the track laying may commence at Seaford.

☞ Mr. George H. Burrows has been appointed General Superintendent of the Toledo, Wabash and Western Railway, in place of Mr. E. A. Chapin, deceased.

American Railroad Journal.

Saturday, March 28, 1868.

Stock Exchange and Money Market.

The week has been one of unusual excitement and activity in Money. The city banks have been losing heavily, in the line of their cash balances, especially in the deposit and legal tender forms. Their last weekly exhibit showed a further falling ff of nearly ten millions in deposits, the aggregate of which is now only $191,191,526, against $217,844,548 six weeks ago, making a loss of $26,653,022 since the 8th of February. Their legal tender reserve, last week, decreased nearly 2½ millions, standing at $52,261,086, against $67,154,161 on the 25th of January, making a loss of nearly 15 millions in eight weeks. Their loans were last reported at $261,416,900, against $271,015,970 on the 15th of February, when they were most expanded, in this line. Their specie reserve is now down to about 18 millions, against over 25 millions eight weeks ago. Their circulation has varied little, since the commencement of the year. The banks are now endeavoring to prepare themselves for their regular quarterly exhibit on the coming first Monday in April, at the same time that they are striving to meet with promptness the increasing pecuniary wants of their regular customers, both local, and out of town. Hence, they are less liberal of accommodation to the speculative element at the Stock and Gold Boards, and call loans close as they have ruled most of the week, very firm at the extreme legal rate of 7 per cent. as the lowest street price. Very little currency has been reported for business paper, the best grades of which have been quoted at from 7@10 per cent. per annum. The course of the banks has made private lenders somewhat chary, in placing their available balances beyond their control, even temporarily, and this has tended to aggravate the pressure in the loan and discount market. With the aim of relieving, to some extent, the severity of the money pinch, Secretary McCulloch, toward the close of last week, gave Mr. Van Dyck, the U. S. Assistant Treasurer at this port, a discretionary authorization to issue to the city banks, an amount of the certificates not exceeding $10,000,000, the certificates to bear three per cent. interest, and to be issued either in exchange for Seven-thirties, taken at 106, or for compound interest notes, either overdue or not yet matured; the compounds not yet due to be taken at par with interest to date. Two meetings of city bank directors have been held, to discuss and act on this proposition; but each discussion ending in a decisive vote against the acceptance of the offer of the Department. At the second meeting on Wednesday a resolution was up for discussion providing for a recognition of the three per cent. certificates in Clearing House settlements. The vote on this motion at first was taken *viva voce*, and the resolution was carried by a large majority. Some directors called for the yeas and nays, which were ordered. Another, a bank officer, immediately spoke against the resolution, and the final vote stood—yeas 26, and nays 31. The meeting then adjourned. The market closed very favorably on the announcement of this result, which operated instantaneously and quite adversely, on fund, stock and gold values.

The specie reserve of the city banks is now $17,944,308, against $9,143,913 same time last year. The city bank deposits are now $191,191,526, against $192,375,615 week ending March 23, 1867. The legal tender reserve amounts to $52,261,086, against $60,904,958 same time last year. The circulation now stands at $34,212,571, against $33,519,401 same time last year. The loans are now $261,416,900, against $259,400,315 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $108,247,067 a day, against a daily average of $115,213,000 the preceding week, and $103,203,000 the week ending with Mar. 7, 1868. The current week's exchanges average about $88,400,000 a day. The city banks, last week, lost $2,477,780 of legal tender, $9,996,944 in the deposit line, and $1,800,393 of their specie reserve. They reduced their loans, $5,899,134; and increased their circulation, $810.

The Philadelphia Bank movement the past

week shows an increase in loans of $309,726; a decrease of $21,533 in specie; a decrease in legal tenders of $997,353; a decrease of $686,555 in deposits; and an increase of $9,214 in circulation. The Bank Clearings show an increase of $2,053,266, and the balances, an increase of $816,192.

National Bank notes to the amount of $118,610 were issued last week, making the total issue to 1,673 banks thus far, $306,849,331, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $7,069,765, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,845,790,) an actual circulation at this date, of $299,779,566. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,597,400; and for the public deposits, $38,177,950—making a total of $379,775,350. The Treasury Department last week redeemed and destroyed $432,700 of worn and mutilated fractional currency, and issued $244,933 of new. The outstanding amount of fractional currency on the 1st inst. was $32,307,948, against $32,246,439 on the 1st of Feb. 1868.

The U. S. Sub-Treasury receipts, week ending with Mar. 21, were $12,780,990, including $2,289,999 from customs duties; payments, $18,293,178, including $167,000 of coin interest; balance at the close of the week, $99,831,335, against $105,343,523 at the close of the preceding week, showing a decrease of $5,513,188. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $2,978,014 including $658,862 from customs; and payments, $1,961,242; on Tuesday, receipts, $1,741,881 including $410,168 from customs, and payments, $1,136,894. The balance at the close of business on Tuesday stood at $101,453,094, against $105,820,972 a week previous; and $102,011,491 on Feb. 25, 1868.

The aggregate issue of coin certificates by the U.S. Sub-Treasury, in this city, up to date of latest published local report was $245,369,740; aggregate redemptions, $209,565,000; leaving outstanding certificates to the amount of $35,804,740. The latest report from the national capital made the outstanding amount of coin certificates on the 1st of March, $25,699,360, against $29,619,280 on the 1st of February, 1868.

Government revenues have been on a moderate scale, since our last. The excises, last week, yielded some three millions, against four millions the preceding week; customs at the port of New York, $2,289,999 and at the outports, about $750,000 (in coin) more, making the grand total income for the week equal to about $7,200,000 in currency. The total receipts of the National Treasury, from excises, thus far in the new fiscal year, which began on the 1st of July, have been about $143,000,000.

Government received from customs, through the port of San Francisco, from Jan. 1, to Feb. 25, 1868, $1,225,495.

Gold has been quite depressed in price, since our last, having sold as low as 137¾ on Tuesday, and leaving off at 138¼ on Wednesday. The demand has been quite limited, all the week, from speculative sources. The money pressure checked speculation. The specie exports on Tuesday and Wednesday were near half a million. The Customs call has been fair.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $1,279,078, against $393,154 same time last year. The customs demand for Gold last week, averaged $381,667 a day; thus far, this week, it has been equal to $534,515 a day, or equal to a weekly aggregate of $3,207,090. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $22,991 and from California, $1,168,779. The total customs revenue of the Government, in coin, at this port, thus far, in the current fiscal year, commencing with July 1, 1867, has been $81,124,248, against $92,970,093 same time in the preceding fiscal year. The total receipts of California gold at this port, thus far, in the current fiscal year, commencing with July 1, 1867, have been $24,741,789, against $30,458,213 same time in the preceding fiscal year, showing a decrease of $5,716,424 in 1867–'68. The exports of specie from this port, last week, were $275,502, against $74,742 same week last year. The exports of specie, hence, since July 1, 1867, have been $41,681,748, against $23,007,063 same time in 1866–'7. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $167,000, and since July 1, 1867, $54,119,606, against $37,937,969 same time in 1866–'7. The specie exports from San Francisco, from Jan. 1, to Feb. 25, 1868, were $5,470,869, against $7,267,340 same time last year.

Foreign exchange has been lightly dealt in, since our last, at drooping rates. Bankers' prime sixty day bills on London closed on Wednesday at 109¼@109½, and on Paris to 5.20c.@5.16¼; sight bills on London to 109⅝@110, and on Paris to 5.15c.@5.13½. The offering of produce bills have been very light this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $1,946,378, against $4,836 282 same week last year; total, since July 1, 1867, $129,609,383, against $141,123,281 same time in 1866–'67.

Government securities have been quite variable in price, under the fluctuations in the Money Market, on a very moderate trade. The latest dealings on Wednesday were on a limited scale within the annexed range of quotations, the market closing unsettled.

U. S. sixes of 1881 closed here on Wednesday at 110¼@110¾; U. S. Five-twenties of 1862, 109¾@110; U. S. Five twenties of 1864 at 107½@107¾; U. S. Five-twenties of 1865 at 108@108¼; U. S. Five-twenties of 1865, consolidated, 106¼@106¾; U. S. Five-twenties of 1867, 106¾@107¼; U. S. Ten-forties at 100@100½, and U. S. Seven-thirties at 105@105½. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

May, 1865 ..... 118¼	September, 1865.. 117
August, 1865.... 118½	October, 1865 .... 116½
U. S. three per cent. certificates 100¼	

Government paid off $80,202 of the matured loan of 1847–'67, in February.

Railway and miscellaneous share property has been fairly active, but at very irregular prices. The money pinch has been severely felt by the speculative favorites, which closed heavily, with symptoms of further grave depression in ruling values.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Mar. 11.	Mar. 18.	Mar. 25.
Consols	93¼	93⅜	93⅛
U. S. 5-20's of 1862....	71¾	72¼	72¼
Erie	48½	45¼	46½
Ill. Central	89¼	89⅜	89¾

General business has been tamer, since our last. Breadstuffs and provisions have been in fair, though not urgent demand, closing pretty firmly as a rule. Middling upland cotton closed briskly and buoyantly at 25 cts., per lb. The stock of cotton now here is estimated at about 110,000 bales. The receipts at the port this week, have averaged about 2,000 bales a day. The receipts at all the ports, since Sept. 1, 1867, have been 1,831,000 bales, against 1,495,000 bales same time last year; exports, same time 1,201,000 bales, against 877,000 bales same time last year; stock on hand at latest dates, 325,000 bales, against 575,000 bales same date last year. Beeves have been fairly active and buoyant in price, this week, at from 14@19c. per lb.; week's receipts, 3,882. Veal calves, in moderate request and steady at from 9@13½c. per lb.; receipts, 1,255. Sheep and lambs in fair demand and firmer at from 6½@10½c. per lb.; receipts, 12,522. Swine moderately inquired for at from 8¾@10¼c. per lb., all live weight; receipts, 13,450. At the auction sale of Scranton coal, on Wednesday, 75,000 tons were disposed of at reduced prices, including lump at $3.65@$3.80; steamboat, $3.65@$3.70; grate, $3.80@$3.92; egg, $3.95@$4.00; stove, $4.75@$4.95; Chestnut, $3.60@$3.80 per ton of 2,240 lbs., deliverable at Elizabethport, N. J. General merchandise has been in rather better demand, but having been as a rule, freely offered, buyers have had any existing advantage as to price. The offerings of most kinds of dry goods have been on a more liberal scale, since our last, at prices more favorable to purchasers, leading to increased activity, especially in domestics. The total imports of foreign dry goods, last week, were $1,568,530, and the total amount marketed $1,878,059. The value of foreign merchandise imported last week, was $6,007,587—making the grand total specie value of last week's imports of dry goods and merchandise, equal to the unusually large sum of $7,576,117, against $6,327,866, same week last year; total since July 1, 1867, $167,388,980, against $196,821,787 same time in 1866–'67. The ocean freight market has been inactive and lower, since our last. For Liverpool we quote flour at 2s.@2s. 3d. by sail, and 2s. 3d.@2s. 6d. by steamer, per bbl.; grain at 5d.@5½d. by sail, and 5¾d.@6d. by steamer, per bushel; cotton at $\frac{3}{16}$@¼ by sail, and ¼@$\frac{5}{16}$ by steamer, per lb.; and heavy goods at 20s.@30s. by sail, and 25s.@40s. by steamer, per ton. Total number of vessels in port on Wednesday 478.

The New York exports, exclusive of specie, for the week ending Mar. 24, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$4,836,282	$1,946,878
Prev. reported	41,595,362	36,520,120
Since January 1.....	$46,431,644	$38,466,498

The balance in the Sub-Treasury on Wednesday was $101,126,208.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—New York City 6s, 1887, 101; Brooklyn 6s W. Pittsburg, Ft. Wayne & Chicago Railway.

The following is a statement of the approximate earnings and expenses of this company during the month of February, as compared with the same period of the year 1867:

	1868.	1867.
From freight	$424,671 99	$350,564 80
" passengers	152,540 71	151,390 96
" express matter	7,987 50	7,668 00
" mail	7,825 00	7,825 00
" rent of railway	7,083 88	7,083 33
" miscellaneous	2,645 00	965 46
Total	$602,753 53	$525,497 55
Expenses	398,628 78	397,231 45
Net earnings	$204,124 75	$128,266 10

This shows an increase in earnings of $77,255 98; with an increase in expenses of $1,397 32—making the increase in net earnings, $75,858 65.

The earnings and expenses, from January 1 to February 29, compare as follows:

	1868.	1867.
Earnings	$1,095,447 69	$1,067,913 35
Expenses	806,026 84	810,342 29
Net earnings	$289,421 35	$257,571 06

This shows an increase in earnings of $27,534 34; with a decrease in expenses of $4,315 95—making the increase in net earnings, $31,850 29.

Kerosene Lamps for Railroad Cars.

We have received from Messrs. WILLIAMS, PAGE & Co., Manufacturers of Car Lamps, Boston, Mass., a circular in which is recounted the causes of the burning of Railroad Cars in six different instances, viz: on the Buffalo and Erie; the Chicago, Burlington and Quincy; the Erie; the Pennsylvania; the Chicago and Northwestern; and the Pittsburg, Ft. Wayne and Chicago Railroads. In four of the six cases cited no kerosene was used, and in the other two, where it was used, the cars were believed to have been burned by the stoves, or by sparks from the engine. In a recent accident on the Boston and Providence Railroad, two cars lighted with kerosene were thrown from the track and turned over. The kerosene lights were at once extinguished by the concussion. The stoves were secured to the floor, and no fire occurred. It is further stated that probably not less than twelve or fifteen thousand kerosene lamps are now used in Railroad Cars in this country, and, considering the number of collisions, getting off the track, and other accidents since kerosene was introduced, it would be most remarkable that many fires could not be traced directly to its use, were it not from the fact, that it is the most sensitive of all lights, and a very slight collision or jar at once extinguishes it, as is well known by all who have used it. They state in conclusion that they have not yet been able to find a single instance in which a Railroad Car has been burned by the use of kerosene lamps. They have manufactured Patent Kerosene Car Lamps over five years, and have sent several thousand of them to railroads all over the country, and have never heard of an accident of any kind caused by them. They advise the testing of oil by the purchaser. This can be done in

a few minutes by the "Pyrometer," or "Oil Tester," and by using oil that will not take fire below 110° or 115°, there is no danger of any accidents from fire, if the stoves are properly secured.

Railroad Earnings.--Weekly.

The earnings of the Michigan Central Railroad for the 2d week in Mar., 1868, were ..$62,201 26
Corresponding week of previous year.. 90,633 77

Decrease $28,432 51

The earnings of the Atlantic and Great Western Railway for the second week in Mar., 1868, were.... ....$85,073 00
Corresponding week previous year.... 113,024 00

Decrease $27,951 00

The earnings of the Western Union Railroad for the week ending Mar., 14, 1868.... $3,968 00
Corresponding week previous year.... 8,146 00

Decrease $4,178 00

The earnings of the Marietta and Cincinnati Railroad the 2d week in Mar., 1868. ..$21,670 00
Corresponding week previous year.... 19,636 00

Increase $2,034 00

The earnings of the Michigan Southern and Northern Indiana Road for the 2d week in Mar., 1868, were $86,895 00
Corresponding week of 1867 .... 88,016 00

Decrease $1,121 00

Erie Railway.

The following is the text of the Bill now before the New York Legislature, legalizing the recent issue of bonds of the Erie Railway Company, and the conversion of the same into stock; also the guaranteeing of the bonds of any other company; and declaring it lawful for the Erie Railway Company to contract with any other railroad for the extension of the broad gauge, to be used by the Erie Company in the transportation of freight and passengers:

SEC. 1. The issuing of the bonds of the Erie Railway Company for the purpose of completing, furnishing, and operating its railroad, convertible into the common stock of the said company by authority of the board of directors of said company, and the conversion of the same into such stock, shall be deemed to be within the powers of said company.

SEC. 2. Whenever said company shall hereafter issue any stock it shall, on the first day of January next after such issue, cause a certificate of the same stating the number of shares and the time when the same was issued, to be filed in the office of the Secretary of State.

SEC. 3. The guarantying by the Erie Railway of the bonds or coupons of any other railroad necessary or proper, in order to secure a connection of said Erie Railway with other railroads, for the purpose of securing better facilities for the traffic of said Erie Railway, shall be deemed and taken to be within the powers of said Erie Railway Company, &c.

SEC. 4. It shall be lawful for the Erie Railway Company to contract with any other railroad to provide a track with a gauge corresponding to the present gauge of the track of the Erie Railway, and to run the engines and cars of the Erie Railway Company on the same, in order to facilitate the transportation of freight and passengers on the Erie Railway.

SEC. 5. The acts of said company in issuing bonds and stocks respectively, and in entering into such contract and guaranty prior to this date, are hereby ratified and confirmed.

SEC. 6. This act shall take effect immediately.

Journal of Railroad Law.

FENCING RAILROADS—KEEPING IN REPAIR.

The ground of recovery in the late case of the Illinois Central Railroad Co. *vs.* Swearingen (33 Ill., 289,) as set forth in the plaintiff's declaration was, that by reason of the fences along the company's road not being kept in repair, the plaintiff's horses got upon the track, and were run over by the cars and engines of the defendant, and thereby killed. It appears that the railroad ran through the pasture of the plaintiff, and the horses got out of this pasture upon the track through the railroad fence. The plaintiff alleged in his declaration that he had not as proprietor of the lands erected or agreed to erect, the fence in question.

Mr. Chief Justice Walker delivered the opinion of the Court. It is insisted that appellee was not entitled to recover, because he averred in his declaration, that he had not as proprietor of the lands, erected or agreed to erect, the fence required by the act of 1855, (Scate's Comp., 953,) when the proof shows that he did erect the fence. It also appears that the company fully admitted and recognized their liability to erect and maintain this fence, when they employed appellee, for them and with their materials furnished for the purpose to erect the fence, and for which they paid him the sum agreed between them. Is this such an agreement as the statute contemplates shall release the road from its liability and impose it upon the owner of the adjoining land? We think not. The act imposes the duty upon the company, but at the same time permits them by contract with the owner, to absolve themselves from its performance, by agreement with the owner that he shall assume it.

It cannot be imagined that it was the intention of the law makers to transfer this duty from the company to the landowner, simply because the company employed him as their agent or servant to construct the fence. The statute only contemplates the release of the company when the duty is assumed by the landowner, and in this case it is perfectly apparent that when he was employed to build this fence, he did not intend, nor did either party suppose that he was taking upon himself such a duty. It might as well be contended, that because a hand in the employment of the company under their direction and in discharging their duty, had built the fence, and afterwards became the owner, that the duty was transferred from the company to him. It is not probable that it ever occurred to appellee, that it could be imagined that he had assumed this duty, until he heard it claimed on the trial below, or to the company and its agents, until they began to prepare for the defence of this suit. The pleas of appellant, to which demurrers were sustained, only relied upon this fact as a defence, and were therefore, insufficient, and the demurrers were properly sustained to them.

It is likewise insisted that the Court erred in refusing to give appellant's last four instructions. The first of which asserts that the company, having built a good and sufficient fence, if it was blown down or thrown down by trespassers, and loss thereby ensues before a reasonable time had elapsed for its repair, that the company are not responsible for damages thus occasioned. This instruction, like the sixth, asserts that where the fence has been sufficient, and from accident or wrong over which the road has no control, it becomes insufficient to turn stock, they have a reasonable time in which to repair their fence. This is manifestly true, as it is not required that the company should have a patrol at all times, night and day, passing along their road to see the condition of the fence. If this is done daily, and they shall at once, when informed of its insufficient condition, make the necessary repairs, they shall not be held liable. This was the rule adopted in the case of The Central Railroad Co. *vs.* Dickerson, 27 Ill., 55, and the instructions numbered four and six should have been given.

Under these instructions, it would have been for the jury to consider in the light of all the circumstances appearing in the case, whether reasonable care had been used to repair the same. They as practical men, must determine this question. And the road must be held to a high degree of diligence in the performance of this duty, but not to an impossible or unreasonable extent.

Whilst the fifth instruction stated the law correctly, it would have been better had it been qualified so as to inform the jury, that while the evidence tended to prove due diligence, it was not conclusive. Properly understood by the jury, it is free from objection, but if they understood that it could not be rebutted by other evidence, or that they could not weigh it as other evidence, then it would mislead and would have been improper.

The seventh instruction was properly refused. This action is transitory, and not local, either by the common law or the statute. The act of 1853 (Sess. Law, p. 65,) only relates to actions at law or suits in chancery, where service could not be had by summons. It in such cases, authorized publication instead of actual service. And the sixth section of that act confined the bringing of suits to the county in which the cause of action accrued. This is the scope of that act. It was intended to apply to cases where service could be had. The judgment of the Court below must be reversed, and the cause remanded.

Judgment reversed.

Coal Trade of Great Britain in 1867.

We give below the quantity of coal mined in the United Kingdom in 1867, which we copy from the London *Mining Journal*, the most reliable mining publication in England:

	Tons.
Durham and Northumberland.....	25,194,550
Cumberland	1,490,481
Yorkshire....	9,714,700
Derbyshire	4,750,520
Nottinghamshire	1,600,560
Leicestershire.	866,560
Warwickshire	775,000
Staffordshire and Worstershire	12,295,850
Lancashire	12,320,500
Cheshire	895,500
Shropshire.	1,220,700
Gloucestershire and Somersetshire....	1,800,700
Monmouthshire	4,445,000
South Wales....	9,376,443
North Wales	2,082,000
Scotland....	12,625,000
Ireland	123,750
Total produce of the United Kingdom.	101,630,540

To give our readers some idea of the immensity of the coal trade of Great Britain, we will state that the whole product of the Schuylkill and Lehigh coal regions, from the commencement

the trade in 1820 to 1867, inclusive, a period of forty-seven years, only exceeds the annual product of England, Ireland and Scotland in 1867, 1,391,417 tons, as the following figures will show:

	Tons.
Whole product from Schuylkill since 1822	69,380,626
Whole product from Lehigh since 1820	33,621,335
Total	103,021,961
Prod't of the United Kingdom in 1867	101,630,544
Excess only	1,391,417

We append also the following statistics of the coal fields of Europe and the United States with their productions, taken from the valuable book entitled "Coal, Iron and Oil," which contains the latest and most authentic information on the subject:

	Area in Sq. miles.	Production. Tons. 1866.
British Islands	6,195	100,000,000
United States	200,000	26,000,000
Prussia and Saxony	1,000	12,000,000
France	1,000	11,000,000
Belgium	510	10,000,000
Austria and Bohemia	1,000	5,000,000
Spain	200	500,000
Acadia (British Provinces)	2,000	500,000
Estimated coal product'n of the world		163,000,000

AREAS OF THE COAL FIELDS OF THE UNITED STATES.

	Thickness Feet.	Square Miles.
Anthracite:		
Massachusetts and Rhode Island	7	300
Pennsylvania	90	470
Oregon	7	100
Bituminous:		
Pennsylvania	54	12,650
Maryland	30	550
West Virginia	45	15,000
East Virginia	20	225
North Carolina	10	45
Tennessee	15	3,700
Georgia	10	170
Alabama	15	4,300
Kentucky	35	13,700
Ohio	25	7,100
Indiana	20	6,700
Illinois	20	30,000
Michigan	10	13,000
Iowa	15	24,000
Missouri	15	21,000
Nebraska	..	4,000
Kansas	..	12,000
Arkansas	..	12,000
Indian Territory	..	10,000
Texas	..	3,000
Oregon	..	500
Washington Territory	..	750
Other coal fields west of the Rocky Mountains	..	5,000
Total square miles		200,960

The average thickness of the bituminous coal fields is about thirty feet, and the working thickness about twenty feet.

The Grain Trade.

The following statement shows the receipts of grain at the ports of Chicago, Milwaukee, Detroit, Cleveland, and Toledo, from January 1 to February 29, compared with the two last years:

	1868.	1867.	1866.
Flour, bbls	488,014	585,974	347,727
Wheat, bush	1,847,057	1,630,883	1,961,562
Corn, bush	5,444,470	1,672,361	1,222,477
Oats, bush	1,151,785	838,919	1,064,751
Barley, bush	274,221	253,226	110,221
Rye, bush	110,356	147,562	134,577
Total grain, bush.	8,827,889	4,542,951	4,492,588

[Intercolonial Railway.]

Mr. Sandford Fleming left Ottawa, Ca., on the 16th inst., for the purpose of organizing two exploring companies to endeavor to locate the Central, or Keswick Valley route for the Intercolonial, one company to commence at River du Loup, and the other at Monkton, N. B. The Montreal *Gazette*, noticing their departure from that place, says:

Mr. Fleming, and his staff, about fifty in number, took their departure last evening for River du Loup. There the party will be broken up into eight squads, four of which will be spread out on the line of the survey between River du Loup and Fredericton; two between Matapedia and Rimouski, the other two squads to some other section. From Mr. Fleming's ability as a surveyor and knowledge of the country through which the survey is to be made, we may reasonably anticipate that this will be the final work, and that on his report being placed in the hands of the Government, a decision will be easily arrived at. The staff is numerous and efficient, all young men of ability and well suited for the arduous task they have entered upon. A sleeping car was placed at their disposal to run through, and we were informed that the accompanying camp equipage, etc., weighs about eight tons.

The settlement of the question of routes has been postponed till the 12th of April, when it will be finally decided at Ottawa. The object of the delay is to verify some statements with respect to the Keswick Valley route, by an actual survey by Mr. Fleming's party. If this survey, which we suppose is now actually being made, does not establish certain claims made for the Keswick Valley, the issue will really come between the frontier and the Robinson, or Northern routes.

Pork Packing in the West.

The Cincinnati *Price Current* publishes its annual statement of pork packing in the Western States, of which the following is a recapitulation:

	1866-'67.	1867-'68.
Ohio	637,382	557,809
Illinois	851,945	1,072,553
Indiana	329,291	323,978
Iowa	115,441	177,044
Wisconsin	135,060	163,495
Missouri	238,230	328,611
Kentucky	188,442	157,880
Grand totals	2,490,791	2,781,370
		2,490,791
Increase in number		289,579

The average weight of hogs, and the yield of leaf lard per hog, for each State, compare with last season as follows:

	Average weight per hog.		Yield of lard per hog.	
	1867. lbs.	1868. lbs.	1867. lbs.	1868. lbs.
Ohio	234½	204½	31⅛	24 1-3
Indiana	232⅔	205⅝	31 3-7	22 1-6
Illinois	231⅜	202⅜	28	22⅝
Kentucky	228	206 1-6	27	22
Missouri	226½	208 7-9	31½	21½
Iowa	231 1-6	199¼	29 1-7	21¼
Wisconsin	218 3-5	197	31⅛	31

The general averages for all are—of hogs 201 pounds, and of leaf lard 20¾ pounds, which compare with the last two seasons as follows:

	Hogs, lbs.	Lard, lbs.
1866	231 3-10	31 1-7
1867	232 1-7	29 3-4
1868	201	20 3-4

In order to arrive at the actual result, all that is necessary is to multiply the number packed each season by the general averages of hogs and lard, which results as follows:

Pork, lbs. last year	577,863,512
Pork, lbs. this year	558,955,470
Decrease in lbs. this year	18,908,042

This is equal to a net decrease in the crop of 3⅜ per cent., and makes the crop, as regards the packing in the West, equal to 2,408,741 hogs of last season's averages, not including the falling off in the shipments to the East during the packing season, which would further materially reduce the crop.

The number of hogs packed in the West since the season of 1849-'50, compare as follows:

Year.	No. of Hogs.	Year.	No. of Hogs.
1849-'50	1,652,220	1858-'9	2,465,552
1850-'1	1,332,867	1859-'60	2,350,822
1851-'2	1,182,846	1860-'1	2,165,702
1852-'3	2,201,110	1861-'2	2,893,666
1853-'4	2,534,770	1862-'3	4,069,520
1854-'5	2,124,404	1863-'4	3,261,105
1855-'6	2,489,502	1864-'5	2,422,779
1856-'7	1,818,468	1865-'6	1,705,955
1857-'8	2,210,778	1866-'7	2,490,791
		1867-'8	2,781,370

Previous to 1852-'3 the reports were obtained only in part.

The shipments made from the west to the east, the three last packing seasons, compare as follows:

	1865-6.	1866-7.	1867-8.
Baltimore and Ohio Railroad from Wheeling	22,951	29,487	27,641
Do. do. from Parkersburg	7,250	10,556	19,993
Pennsylvania R. R	10,361	472,141	287,290
Dunkirk	12,120	4,533	4,247
Buffalo, *via* Hornellsville R. R	48,401	79,344	58,658
Totals	101,083	596,061	397,829
			596,061
Decrease			198,132

From the above it will be seen that there is a decrease this season, as compared with last, of 198,132 hogs, and if we add to this the decrease in weight, in the hogs shipped, say 16 per cent., it would make the decrease 261,654 hogs; and if we deduct this from the result as already given above, it would make the crop equal to 2,147,087 hogs of average weight of 1866-'7.

☞ The Boston and Albany Railroad Company give notice that the stockholders of record at the close of business on the 1st of April next will be entitled to receive one new share of stock of the capital of said corporation for every eleven shares held by them respectively, on the payment of one hundred dollars per share, fifty per cent. of which must be paid on or before May 1, 1868, and the balance on or before August 1, 1868, when certificates of stock will be issued.

☞ A considerable amount of Northern capital is going into the bonds of the Southern States, in the belief that they offer at the present prices a large margin for profit in the advance that will almost immediately follow reconstruction. In the integrity of those States to honestly pay interest on their bonds, those professing to be well informed exprest no doubt.

☞ The work of laying the rails of the Paterson and Newark Railway will commence about the 1st of May. The erection of bridges is now being rapidly pushed through.

☞ The St. Louis Merchants Exchange has passed resolutions strongly endorsing the St. Louis, Vandalia and Terre Haute Railroad enterprise, and recommending the citizens of St. Louis to give it all the assistance possible.

☞ The rails upon the St. Louis, Vandalia and Terre Haute Railroad have been laid as far eastward as Edwardsville.

PROPOSALS

For the Construction of a portion of the Summit Division of the Illinois and Michigan Canal.

OFFICE OF THE BOARD OF PUBLIC WORKS, CHICAGO, March 11, 1868.

SEALED PROPOSALS WILL BE RECEIVED BY the Board of Public Works, at their office, until 11 A. M. Wednesday, April 15, for the construction of sections Nos. seventeen (17) to forty-four (44,) inclusive, of the Summit Division of the Illinois and Michigan Canal—a distance of about eleven (11) miles.

Maps, profiles, and specifications will be exhibited at the office of said Board in Chicago.

There will be some 1,500,000 to 2,500,000 cubic yards (according to the line which shall be adopted) of earth excavation, some of it quite hard and embracing considerable detached rock, and about 90,000 cubic yards of stratified limestone.

The work must be prosecuted so as not to interfere with the use of the canal during the season of navigation.

It is believed, however, that most of the excavation, except the stratified rock, can be done with steam dredges without interfering with the navigation of the canal, but the rock excavation will all have to be done between the close of navigation in the fall and the opening in the spring.

Proposals are invited on the present line of canal, and also on a new line, as follows, viz:

For the work on Sections 17 to 23, inclusive, according to the old line.

For the work on Sections 24 to 41, inclusive, bids will be received both for the improved old line and a new line.

For the work on Sections 42 to 44, inclusive, bids will be received both for the old line and a new line.

If a new line be adopted for any portion of the distance operations thereon may be continued the whole year. It is expected that the navigation of the canal will be suspended for at least five months in each year, unless otherwise mutually agreed by the Board and contractors.

The whole of the work must be done on or before the end of the third season of the suspension of navigation.

A large amount of machinery will be required to excavate the work within the time required, consisting mainly of steam dredges, scows, and cranes for the earth work, and drilling machines, pumping machinery, and cranes for the rock.

Contractors will be required to commence work on the earth excavation within thirty days of the time of letting, and upon rock excavation by the first of November next, or as soon thereafter as navigation shall be suspended.

Parties contracting for the work will be required to provide all machinery, and to put up and remove all dams and all works of protection, and at their own expense to do all pumping, or whatever may be necessary to secure their work from water.

Proposals must be addressed to the Board of Public Works, indorsed "Proposal for Deepening Illinois and Michigan Canal," and be accompanied with the usual two hundred dollar ($200) bond, with sureties, to be approved by the Board.

Contractors will bid, stating the price for which the work will be done on each of the different sections, and the work will be let as a whole or in part, and in such quantities as the Board shall determine.

The Board reserve the right to reject any and all bids, and no proposal will be accepted unless the party offering it shall give evidence satisfactory to the Board that he has the necessary skill, experience, energy, and ability for doing the work, is trustworthy, and has sufficient pecuniary resources.

The Board will require such security as, according to their judgment, will secure the doing of the work according to the contract.

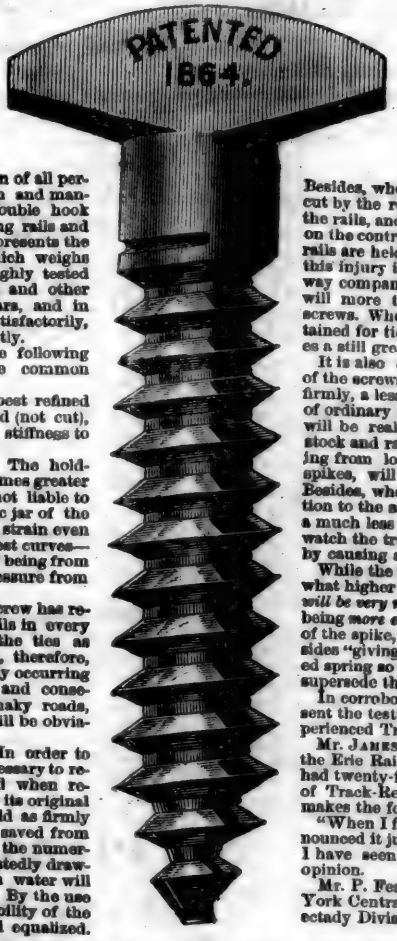
U. S. RAILROAD SCREW SPIKE COMPANY,



NO. 45 CLIFF STREET, NEW YORK,

MANUFACTURERS OF MONTIGNANI'S PATENT

RAILROAD SCREW SPIKE.

HENRY YOUNG, President.

G. B. HUBBELL, Secretary.

Works at
OSSINING,
Westchester Co., N. Y.

We respectfully call the attention of all persons engaged in the construction and management of railroads, to the double hook headed Screw Spike, for fastening rails and chairs to ties. The above cut represents the size and shape of the Screw, which weighs eight ounces. It has been thoroughly tested on the Erie, New York Central, and other Railways, from one to three years, and in every case it has stood the test satisfactorily, having performed its work perfectly.

The Screw Spike possesses the following important advantages over the common spike:

First.—They are made of the best refined Iron, and the thread, being forged (not cut), imparts additional strength and stiffness to them.

Second.—INCREASED SECURITY. The holding power of the screw is many times greater than that of the spike, and it is not liable to break nor become loosened by the jar of the cars, nor by the upward or lateral strain even on the steepest grades and sharpest curves—the holding capacity of each screw being from four to five tons, and the side pressure from three to four tons.

In three years' experience no screw has removed from its place, and the rails in every case have been held as firmly to the ties as when first put down. By its use, therefore, the numerous accidents constantly occurring from loose and broken spikes, and consequent loose and broken rails, shaky roads, and the spreading of the rails, will be obviated.

Third.—GREATER ECONOMY. In order to remove the rail it will only be necessary to reverse the screw one-quarter; and when replacing it, turn the screw back to its original position, when the rail will be held as firmly as before. The ties will thus be saved from the injury of splits, checks, and the numerous holes made in them by repeatedly drawing and replacing spikes, in which water will collect, causing their rapid decay. By the use of the screws, therefore, the durability of the ties will be greatly increased and equalized.

Besides, when the rails are loose the ties are cut by the repeated blows made on them by the rails, and are thereby materially damaged; on the contrary, where the screw is used, the rails are held so firmly in their place, that this injury is prevented. The saving to railway companies in ties alone, it is estimated will more than pay the whole cost of the screws. Where none but soft wood can be obtained for ties, the screw manifestly possesses a still greater advantage over the spike.

It is also calculated, that in consequence of the screws holding the rails to the ties so firmly, a less number will be required than of ordinary spikes, also a very great saving will be realized in the wear of the rolling stock and rails. The considerable loss arising from loose, bent, broken and missing spikes, will be almost entirely prevented. Besides, where the screw is in use, in addition to the saving of time in relaying rails, a much less number of men are required to watch the track and keep it in repair, thereby causing a great saving.

While the first cost of the screw is somewhat higher than the spike, *in the end they will be very much cheaper.* The screw therefore being *more economical*, and by its use in place of the spike, *making the roads more secure*, besides "giving to the track an easy and connected spring so much desired," it must entirely supersede the common spike.

In corroboration of the foregoing, we present the testimony of several of the most experienced Track Masters in this country.

Mr. JAMES R. HILLIARD, Track Master on the Erie Railway, (Union Division), who has had twenty-four years' experience as Master of Track-Repairs, after testing the screws makes the following report:

"When I first saw your Screw Spike I pronounced it just the article wanted, and since I have seen it in use I still hold the same opinion.

Mr. P. Featherly, Track Master on the New York Central Railroad, (Albany and Schenectady Division,) says, January 9th, 1866:—

"I put down your Screw Spikes sixteen months ago, on a section of our road where our heaviest work is done, viz., a steep grade on the main track, three miles from Albany, one-quarter of a mile above West Albany, and they are there to-day, firm and as secure as when first put down, while the adjacent track, fastened with common spikes, has been respiked several times during that time."

Mr. E. T. MARBLE, Track Master on the Albany and Saratoga Railroad, says:

"On examining the Screw Spikes put down by me September 16th, 1863, I find they have not started either upward or sideways, that they still hold the rail to the ties as securely as when first put down; while great numbers of common spikes are loose and out of place. And on examination I find the threads are bright and clean."

Mr. E. H. DE VERGNE, Track Master on the Shore Line Railroad, writes:—

"Having examined and tested your Screw Spikes on our road, I feel satisfied that they are more durable, safer and more reliable than common spikes. By their use our Railroads would be perfectly safe so far as the track is concerned. Although it requires somewhat more time to drive them than it does the common spike, yet it is more than counterbalanced by their greater durability and safety, and saving of time in relaying rails. With practice and the use of proper tools, even that objection can be overcome."

Mr. A. F. SNYDER, Track Master, Albany, January, 1867, writes as follows:

"This is to certify that the screw Spikes put down on the bridge over the Hudson River at Albany, N. Y., by the U. S. R. R. Screw Spike Co., February, 1866, have done their work perfectly—holding the rails securely and firmly to the ties—not having started in the least, while the ordinary spikes, which were put down on the bridge at the same time, have, many of them, started up, and are quite loose and useless."

Mr. J. W. POTTER, Superintendent of the Cincinnati, Dayton, and Eastern Rail Road, says, January 9th, 1867:—

"The Screw Spikes manufactured by your Company have thus far given entire satisfaction, more than equaling our expectations. We have had them tested at our crossings for the past six months, and find them solid in the tie as the day they were put in. I consider them invaluable for crossings and bridges."

MERRICK & SONS,

SOUTHWARK FOUNDRY,

430 WASHINGTON AV.,

PHILADELPHIA,

MANUFACTURE

Steam Engines—High and low pressure, for land, river, and marine service; Horizontal, Beam, and Vertical. Patterns on hand for 8x10, 14x12, 18x12, Oscillating; compact and cheap.

SOLE MANUFACTURERS IN PHILADELPHIA AND CHESTER OF WILLIAM WRIGHT'S PATENT VARIABLE CUT-OFF STEAM-ENGINES.

Boilers—Plain cylinder, flue, and tubular.

Steam-Hammers, of Nasmyth & Davy patterns, with all the recent improvements.

Strahan's Drill Grinding Rest and Twist Drill-Holder.

Castings—Loam, dry, and green sand, brass, &c.

Roofs—Iron frames for covering with slate or iron—neat, durable, and economical.

Gas-Holders of every description. *Builders of Holders for the Philadelphia Gas-Works of 100 and 160 feet diameter.*

Tanks of every form, for sugar estates, refineries, oil, &c.

Gas Machinery of every description, including Retorts, Bench-castings, Holders and Frames, Purifiers, Coke and Charcoal Barrows, Gas-Valves, Governors, Hoisting Machines, &c.

Manufacturers for the American Meter Company of their Patent Dry Center Valve for changing Purifiers.

Bartol's Patent Wrought Iron Retort-lid, durable, light and cheap.

Sugar Machinery, such as Vacuum Pans and Pumps, Defecators, Bone-Black and Bag Filters, Bone-Black Burners, Washers, and Elevators, Hydraulic Elevators, Sugar and Bone-black Cars, Strike Heaters, Open Steam Trains, &c.

Sole Assignees and Manufacturers in the United States of

Weston's Patent Self-centering Self-balancing Centrifugal Sugar-Draining Machine.

Glass & Bartol's improvement on Aspinwall & Woolsey's Centrifugal Sugar-Draining Machines.

N. Rillieux's Patent Sugar-Boiling Apparatus, applicable to Beet-Root and Cane Sugar.

Having had twenty years' experience in the manufacture of Sugar Machinery for Cuba, South America, and the United States, they are prepared to contract for the design and erection of apparatus for making Sugar from Beet-Root or Cane, and for Refineries for either Sugar or Molasses.

They are also in possession of plans of the most recent improvements in machinery used in France and Germany in the manufacture of Beet-Root Sugar.

550 and 552 Broadway,

Solicit attention to their Timing Watches, known as the "TIFFANY & Co., TIMERS."

These watches, for Railroad, Engineering, Racing, Gunnery, and Scientific purposes, are superior to any yet offered, as the arrangement of the stop is such as to note time to the nicety of one-fourth or one-fifth of a second, in such manner as to prevent the possibility of error in the calculation.

The following named gentlemen, having bought "Timers" and found them to be perfectly satisfactory, have kindly allowed Tiffany & Co. to refer to them:

Amasa Sprague,	Joseph McPherson,	August Belmont,
Frank Squire,	Geo. G. Haven,	B. W. Gibbs,
J. C. Griswold,	B. H. Bixby,	O. N. Cutler,
Leon. W. Jerome,	George Osgood,	S. D. Bradford,
Wm. M. Rysdyk,	W. M. Tilden,	J. V. Brokaw,
Wm. F. Sherley,	A. P. Spencer,	C. A. Grymes,
	and others.	

Tiffany & Co., have also a full assortment of watches of all desirable sizes and styles, of the same quality and finish as the first mentioned, in addition to their usual stock of Frodsham's and Jurgensen's.

Particular care and attention given to the repairing and adjusting of fine watches.

TIFFANY & Co., 550 and 552 Broadway. House in Paris, TIFFANY, REED & Co.

Safety Railroad Switch.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the ***MAIN TRACK IS NEVER BROKEN,*** and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns ***The Life and Limb of all Travelers upon Railroads.***

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

Railroads of Pennsylvania.

We give in another portion of this week's issue a tabular statement of the capital, length, cost, earnings, expenses, dividends, etc., of the Railroads of Pennsylvania, for the fiscal year ending October 31, 1867, compiled from the Annual Reports made to Hon. J. F. Hartranft, Auditor General. The total number of steam railroads is stated at ninety-three, of horse railways twenty-eight, and of canals at thirteen. Of the first, the Allegheny Valley, McCauley Mountain and Black Creek, and Pennsylvania and New York Canal and Railroad Company; and of the second, the Hestonville, Mantua and Fairmount, and the Plymouth and Wilkesbarre, failed to make any report in accordance with the requirements of law.

The total capital stock of railroads authorized is $134,926,429; total subscribed, $115,090,947 22; total paid in, $200,554,676 85; total funded debt, $125,174,025 84; total floating debt, $8,886,422 01; total cost of road and equipment, $300,388,516 29; total length of main line in State, 3,097¾; total branch roads, 89; total number of engines, 1,958; total number of first class passenger cars, 940; total number of baggage, mail and express cars, 498; number of freight cars on trucks, 17,304; number of coal cars, 32,526; number of iron bridges, 281; number of wooden bridges, 1,305; number of stone bridges, 328; total value of real estate held by the companies, $5,864,061 32.

The number of through passengers during the year was 4,392,964; number of passengers of all kinds, 19,232,103, number of tons of through freight, 7,550,687; gross tonnage for the year, 35,562,319.

The aggregate receipts of the roads for the year were $70,205,868 64, and the aggregate expenses, $32,432,257 65.

During the year 303 persons were killed on the roads, and 415 injured; 126 of the former and 215 of the latter being employees.

The total cost of horse railroads and equipment has been $5,925,366 68; aggregate capital stock authorized, $10,560,250; stock subscribed, $8,801,525; stock paid in, $3,969,289 02; total floating and funded debt, $1,975,205 39; real estate owned, $823,854 65; horses owned 3,885; cars, 714; total expenses, $2,510,759 78; total receipts, $3,258,054 54. Twelve persons were killed and twenty injured during the year.

The authorized capital of the Canal companies is $16,617,850; capital paid in, $35,257,155 75; total funded and floating debt, $25,912,584 50; total cost of canals and fixtures, $38,660,397 80; total value of real estate, $53,950; total expenses for the year, $1,601,856 32; total receipts, 3,327,920 31. The tabular statement of the Canals will be given in our next.

Sioux City and Pacific Railroad.

The Secretary of the Interior has received the report of the Government commissioners on the second section of twenty miles of the Sioux City and Pacific Railroad, extending from the initial point in Sioux City to the twentieth mile post south from it. Eighteen miles and three quarters of this section is in a straight line. There is one Howe truss bridge of one hundred and sixty feet span over the Floyd River, and twenty bridges supported by trestles on filling sixteen feet from centre to centre, having an aggregate length of 2,414 feet. The sidings on the first mile measure in the aggregate is 6,501 feet, and on the second mile there is a permanent water station. A large and very commodious depot, warehouse and temporary engine house have been built in Sioux City, and preparations are being made for erecting a permanent brick engine house. Materials are also being collected for large machine and repair shops at some convenient point along the road. The commissioners finding the section in every respect equal to a first class railroad, recommended that it be accepted, and on the 27th ult., the section was accepted by the President and the bonds and patents due the company ordered to be issued.

Evansville, Henderson and Nashville R.R.

A meeting of the stockholders of this road was held at Hopkinsville, Ky., on the 19th ult. The report of the President, which was presented, showed that twenty-seven miles of railroad had been built since the 1st of June last, and twenty miles of road graded ready to receive the iron, with a large number of tons ready on the track. With the means realized from the subscription of Henderson, and the aid Evansville promises, the road will be built from Henderson to Madisonville or its vicinity by 1st of December next.

The company have twenty-seven miles of track completed, with two locomotives, one passenger car, one box car, and fifteen platform cars.

The following is the list of directors and officers, and place of residence:

Gen. J. T. Boyle, President, Louisville.
J. H. Barret, Henderson.
W. J. Marshall, Henderson.
John W. Bradly, Madisonville.
R. Durrett, Hopkinsville.
T. Green, Hopkinsville.
E. G. Sebree, Trenton, Todd County.
Thomas Hassard, Chief Engineer, Hopkinsville.
A. O. Durland, Sec'y and Treas'r Hopkinsville.

The road is in regular operation from Nashville to Pembroke, in Christian county, and in a few days will run to Caskey, within five miles of Hopkinsville. The track is laid down within three miles of Hopkinsville, and in a few weeks the trains will run into the city of Hopkinsville.

☞ A contract for an iron railroad bridge over the Illinois River, at La Salle, has been awarded to Charles Kellogg, late of Detroit. It is to be built at Phœnixville, Penna.

Toledo, Ashland and Atlantic Railroad.

This company has been incorporated with a capital of $1,500,000 in $50 shares. The incorporators are John R. Osborn, D. S. Wilder, A. D. Pelton, T. C. Bushnell, John Devlin and D. R. Austin. The road will run in a southeasterly direction from Toledo to Ashland, touching Sandusky, Oberlin and Medina. It will place Sandusky within seventy miles of the best coal-beds of northeastern Ohio, and render it both an important coal mart and manufacturing point. It will also become a station on the through route from New York to San Francisco.

Atlantic and Pacific Railroad.

The following named gentlemen have been elected Directors of the Atlantic and Pacific Railroad Company for the ensuing year: Messrs. Azariah Boody, Isaac Knox, A. C. Divin, Wm. A. Stephens, W. Courtright, W. Mason, H. H. Ward, Frederick Billings, W. Colburn, H. H. Baxter, Levi Parsons, G. T. M. Davis and J. P. Robinson. The following gentlemen were elected officers for the ensuing year: For President, Azariah Boody; for Vice President, Levi Parsons; for Treasurer, Wm. A. Stephens; for Secretary, Charles F. Manson; for Engineer, Jas. P. Robinson.

Western (Mass.) Railroad.

The receipts and expenditures of this road for the years ending November 30, 1866 and 1867, were as follows:

Receipts:	1866.	1867.
From passengers	$1,379,684 03	$1,303,990 20
" freight	2,394,313 85	2,522,125 92
" mails, etc	158,019 41	260,591 50
	$3,932,017 29	$4,086,707 68
Expenses, viz:		
Repairs of roadway	$314,833 17	$346,494 62
" engines	245,485 08	301,181 19
" cars	428,277 94	489,909 69
" buildings, ferry, etc.	65,432 64	134,615 46
Transportation exp	1,447,019 55	1,525,153 25
General expenses	24,228 20	40,057 56
	$2,525,226 58	$2,837,411 77
Net income	$1,406,790 71	$1,249,295 86
From this deduct—		
Interest on State loans and exchanges	$2,666,397 44	
One per cent. to sinking funds	40,000 00	
Ten per cent. divid'ds.	771,885 00	
Excise tax on divid'ds	40,622 88	
		1,118,855 32
Surplus earnings		$130,440 54
Less Government tax on same		6,522 02
		$123,918 52
Surplus last year		1,267,858 43
Total contingent fund Nov. 30, '67		$1,391,776 95

Compared with the previous year the gross receipts show an increase of $154,690 34; with an increase in expenses of $312,185 19—making a decrease in net receipts of $157,494 85.

The receipts of the Pittsfield and North Adams Railroad were $108,893 72; and the expenses, $81,111 51—leaving the net earnings, $27,782 21. Two dividends of three per cent. each, amounting to $27,000, were paid, and the balance, $782 21, carried to Western Railroad account.

The value of the Massachusetts sinking fund November 30, 1867, was $2,956,074 02; and of the Albany sinking fund, $655,090 90—making the total value of both funds, $3,611,164 92, against $3,417,203 85 in 1866—an increase of $193,961 07. The report says:

The securities in the Massachusetts and Albany sinking funds with the accrued interest to November 30, amount to $3,611,164 92. There has been paid from the Albany fund $48,000 during the year, and the bonds thus purchased have been returned to the Mayor and the Chamberlain of the city of Albany and destroyed by burning. There now remains outstanding $641,000 of the Albany debt, none of which will be due till October 1, 1869. It will be perceived that this fund now exceeds the debt by $14,090 90. Of the Massachusetts sterling bonds £135,000 will be due on the 1st of April next, and £337,500 on the 1st of October following, the means for the payment of which are already provided. Thus at the close of the year 1868, there will have been paid £472,500 of the sterling debt, and £427,400 will remain outstanding, £90,000 of which will be due on the 1st of October, 1869; £180,000 April 1, 1870, and £157,400 April 1st 1871. These sums, it should be recollected, are payable in gold. There are, however, already in the sinking fund about £125,000 of the bonds, besides other considerable amounts of gold securities maturing in time to meet these bonds. There have also been paid during the year $132,500 of the dollar bonds of the corporation.

The heavy rock cutting in the mountain section has delayed the completion of the second track, beyond the time contemplated in our last annual report. A full quota of men has been kept constantly employed upon the work, but the difficulties attending the blasting and removing the rock, under the injunction to keep the track always clear, has made this delay unavoidable. All the material for its completion is on hand, paid for, and charged in the proper accounts of the year; and after paying the dividend and all outstanding obligations, and providing for the completion of the double track, the Treasurer will be able to carry to the account of the Boston and Albany road a very considerable amount in cash. The small amount of unfinished rock cutting is in progress this winter, and all that will remain to be done in the spring will be to prepare the road bed and lay the track for about six miles. There has been added to the rolling stock, exclusive of passenger, baggage and express cars, eighteen first class engines, three hundred and twenty-three freight cars, and further additions of cars and engines are now being made.

At the annual meeting of the stockholders in 1866, it will be recollected that a vote was passed in pursuance of a recommendation of the Board, instructing the Directors to petition the Legislature for authority to increase the capital stock, to such amount as they should deem expedient. In pursuance of this vote a petition was presented to the Legislature then in session, and an act was passed, authorizing an increase of $3,850,000, but of this amount $1,850,000 was by the provisions of the act required to be expended in construction and equipment. The amount required for these purposes has been realized from the distribution of stock at par to the stockholders, and by appropriating temporarily a portion of the contingent fund. It was the intention of the directors from the first, to issue to the stockholders, at an early day, the unrestricted 20,000 shares, as in part representing the sum which had been expended in the construction of the road, and which had been more than doubly provided for in the accumulated earnings of the corporation.

The act of 1867 authorizing consolidation, required definite action within four months of its passage. The amount of capital then represented by our stock was but little more than one-half the amount actually expended in construction; and the directors were unanimously of the opinion, that the right to issue the 20,000 shares should be exercised at once, and before any action should be had by either corporation, upon the question of consolidation.

The Boston and Worcester corporation had voted to increase its capital by an issue of 5,000 shares, being the full extent authorized by law, and while the stock was so much more desirable than cash, the stockholders of this corporation could hardly be expected to accept the act while so great a disparity existed between their stock capital, and the actual capital expended, or the cost of the road. Accordingly the 20,000 shares was issued to the stockholders and charged to the accumulated profits of the sinking fund.

By your votes, at a meeting held in Boston on the 4th day of September last, and under the provisions of the act of the Legislature, approved May 24th, 1867, a copy of which act is annexed to this report, the consolidation of the Western and Boston and Worcester corporations was made effectual and complete. At the same meeting, full power was given to the Board of Directors to agree upon and fix the terms, upon which the two properties should be united. It was first agreed that each corporation should as then organized, continue the operation of its road to the end of the fiscal year, to wit, the 30th of November, 1867, and it is in pursuance of this agreement, that we now present to you, in the name of the Western road, the full doings for the last fiscal year.

Under a call signed by the Presidents of the respective corporations, by virtue of authority given to them for that purpose in the above mentioned act, the private stockholders of the original corporations met at the Director's Rooms of the Boston and Worcester Railroad corporation on the 23d day of October, and made choice of a Board of Directors of the Boston and Albany Railroad Company, and on the 1st of December following, the new corporation came into full possession and management of the property of the consolidated road. Meanwhile, the terms upon which the properties should be united were under consideration by the committees appointed by the Boards of the respective corporations. Early in December these terms were agreed upon by the Committees, and by the respective Boards; the Directors of the Boston and Worcester corporation, however, not having full authority to bind the corporation upon the question of terms, the action of the committees was referred to the stockholders of that corporation, at a meeting held in Boston on the 16th of December, and was by them duly ratified and confirmed. The basis of the settlement is as follows: Every share of stock in each corporation is entitled to a share in the Boston and Albany corporation; and in addition thereto, each share in the Boston and Worcester corporation is entited to *Ten* dollars from the funds of the new company. In view of the magnitude of the interests involved in the union of these two roads, and the advantages to be gained by harmonious action, we may congratulate the stockholders of both corporations, and the public, that all litigation has been avoided, and that the new corporation will soon be in a condition to meet all the just demands of its patrons.

The gross receipts for the past year have exceeded $4,000,000. The close of the year finds the double track substantially completed through its entire length, the rolling stock very largely increased, and the road in excellent condition, with its line extended by consolidation, to Boston and the sea-board. The most active and eventful year in the corporate existence of the Western Road is the last. This report finishes the series of brief histories which the directors have annually prepared. It is not too much to say in closing, that the expectations of its early projectors have been more than realized. At one period in its history the result seemed doubtful, and many sagacious men were of opinion that the private capital invested must be sacrificed, and indemnity to the Commonwealth only obtained by resort to the mortgages; but the early stockholders increased their payments and nobly pledged the whole for additional capital to complete the work. The stock fell in the market to forty-two dollars a share, and indeed for a large portion of the time since operations commenced, its stock has been below par in the market. But these apprehen-

sions have passed, and the wisdom of the financial plan of its early managers stands fully vindicated. The payment of every obligation, public and private, has never been delayed. The stockholders have no reason to complain that their property has not shared in the increased values which have accrued to all properties of a similar description. To a great extent it has been a pioneer road, the experience necessary for its successful management having only been acquired in its actual operation. Notwithstanding the difficulties peculiar to its remarkable geographical location, the rates of transportation have been lower than those of other lines operated under like circumstances, and the rapid increase in the population and wealth of the Commonwealth, so far as that increase has been stimulated by the facilities afforded by the Western Railroad, attest the value to the public of a great and successful enterprise.

We may confidently predict, that, having joined hands with its natural ally, the Boston and Worcester Road, its profit and usefulness will in no degree be impaired, in the career which it now enters upon under a new corporate name.

The equipment of the road consists of 103 locomotives, 47 first-class and 8 second-class passenger cars, 19 baggage, 1,276 box, 427 platform, 112 gravel, and 80 hand cars; also 54-234ths of 24 passenger, 3 post-office, 9 baggage and 13 express cars of the New York and Boston Express line.

The number of miles run by locomotives with passenger trains was 483,150; with freight trains 1,292,115; with gravel trains, etc., 65,026—total, 1,840,291—an increase over the previous year of 180,229.

The number of through passengers carried was 66,712½; do., way passengers, 961,508½—total, 1,028,221, a decrease, as compared with the previous year, of 18,615½.

The number of tons of merchandise moved was 934,605, of which 653,950 were carried east, and 280,655 west. The through tonnage eastward amounted to 162,638; do., westward, 61,630. All other tonnage eastward, 491,312; do., westward, 219,025. Equivalent number of tons carried one mile, 84,534,424. Equivalent number of tons carried over the whole road, 541,887. This shows an increase over the previous year in the number of tons moved of 50,041; in the number of tons carried one mile, 8,883,600; and in the equivalent number of tons carried over the whole road 56,946.

An aggregate of 127,571,098 passengers or tons of freight carried one mile in 1867, against 120,604,667 passengers or tons of freight carried one mile in 1866.

The cost of transportation for each passenger and each ton of freight one mile in 1867 has been 2.224 cents against 2.094 cents in 1866, or assuming the cost of transporting each ton of freight to equal the cost of two passengers the same distance, we find the cost in 1867 to be 1.337 cents per passenger, and 2.674 cents per ton for freight, against 1.287 cents per passenger, and 2.574 cents per ton for freight per mile in 1866.

The cost of the Western, Albany and West Stockbridge, and Hudson and Boston Railroads to November 30, 1867, has been as follows:

Western Railroad	$8,481,429 93
Equipment	1,583,839 77
Albany and West Stockbridge	2,411,055 75
Hudson and Boston	203,036 01
West Stockbridge Railroad Stock	13,000 00
	$12,692,361 46

President.—C. W. CHAPIN.

Directors.—C. W. Chapin, Ignatius Sargent, Josiah Stickney, James D. Colt, George A. Shaw, Sylvanus Johson, Avery Plumer.

Auditor.—WILLIAM RITCHIE.

Pacific Mail Steamship Co.

It is the intention of this company to make four trips a month between New York and San Francisco, instead of three as heretofore, the sailing days from this port to be on the first, ninth, sixteenth, and twenty-fourth, except when these days fall on Sunday, when one day will be anticipated. This company affords a record of success, probably without parallel, in the history of steamships. Starting, originally, with a capital of four hundred thousand dollars, it has made rapid and successful progress, its capital now reaching the munificent sum of twenty millions of dollars, though its entire property, including a fleet of twenty-five steamships, aggregating sixty-one thousand four hundred and seventy-four tons register, is reputed to be worth thirty millions of dollars! Last year, the company inaugurated a branch line from San Francisco to Japan and China, upon a Government subsidy of $500,000 per annum, for ten years. This branch of the service has been an unqualified success from its inception. The company expected the initial trip would net a loss of $100,000, but they were agreeably surprised to find a balance in their favor of $61,000; and the net profits during the year on five trips reached $147,772 57. The time, hence, by this route, to Yokonama has been reduced to forty-two days, and to Shanghae to forty-seven days, and these passages are to be reduced fourteen days, on the completion of the Pacific Railroad, in 1870.

☞ The Elkhorn, Wis., *Independent* says there is a good prospect of a railroad from that region being built during the coming year. The choice of two rontes is proposed, but the one running through Elkhorn and thence through Richmond, in the northeast corner of McHenry county, in its course to Chicago, will be the line chosen. Such a route would probably strike Lake county near Antioch, and run diagonally within its bounds, to Chicago.

Chicago, Rock Island & Pacific Railroad.

A meeting of the directors of this company was held at Des Moines, on the 28th ult. Several resignations were accepted, and the vacancies filled. A majority of the Board now are Illinois and Iowa men. The act of the Iowa Legislature in regard to the road was accepted, and a certificate of acceptance was filed in the office of the Secretary of State, in that city, the same day The new members of the Board are not parties to any pending suits, and a majority being competent to transact the business of the company without reference to the suits in New York or elsewhere, it is believed that its affairs can go on smoothly again.

Ohio and Mississippi Railroad.

It is understood that the Ohio and Mississippi Railroad is to be extended this season to New Albany. The route will be from North Vernon, on nearly an air line, to New Albany. It is also understood that the Ohio and Mississippi Railroad have made a proposition to lay a third rail over the Jeffersonville road, between New Albany and Seymour, to make a direct communication between Ohio Falls and St. Louis, at Russellville, Ky.

New York Central Railroad.

The Seneca Falls *Courier* says that the managers of the Central railroad intend making a material change in the route between Seneca Falls and Auburn. It is proposed to lay a new track by the way of Mud Lock, and connecting with the old track again at the "Shunpike," between Cayuga and Auburn. The new route will save the expense of keeping the bridge across the lake in repair, and three miles in distance. It has been surveyed, and the work will probably commence as soon as the weather will permit.

Lake Superior Mines.

The total product of the Lake Superior Copper Mines as given in the Portage Lake *Mining Gazette*, from 1845 to 1867, inclusive, has been as follows:

	Tons.	Pounds
1845 to 1854	7,642	....
1855 to 1857	11,812	....
1858	3,500	....
1859	4,200	....
1860	6,000	....
1861	7,400	....
1862	9,062	....
1863	8,548	....
1864	8,472	....
1865	10,790	1,156
1866	10,375	1,688
1867	11,735	552
Total	99,037	1,396

☞ The Supreme Court of Pennsylvania has decided that all manufactories and shops of railroad companies are liable to local taxation. Only so much of their property as is indispensably necessary to running the road is exempt from such tax.

☞ The scpplement to the Lancaster, Lebanon and Pinegrove Railroad bill, granting a five years' extension, has passed both branches of the Legislature and been signed by the Governor.

☞ The Waterloo *Advertiser* says that the Stanstead, Shefford and Chambly Railroad will be extended from Waterloo to Magog next summer. Hugh Allan, Esq., has taken the matter in hand and is determined to push the road through.

Railroads of the State of Pennsylvania.

A tabular Statement of their Capital, Length, Cost, Earnings, Expenses, Dividends, &c., for the fiscal year ending October 31, 1867.

Compiled from the Annual Reports made to the Hon J. F. HARTRANFT, State Auditor.

American Railroad Journal.

Saturday, April 4, 1868.

Stock Exchange and Money Market.

Money has been very active and close all the week. The banks have been on the conservative tack, in preparation for their quarterly report, to be made up to the close of Friday of the current week, April 3, and to be forwarded to the Comptroller of the National Currency Bureau, by the following Monday. They report as the result of the past week's business, a further contraction in all the leading items of their weekly exhibit, including a loss of $4,666,393 of deposits, $620,-941 of specie, and $138,008 of legal tender as the result of the past week's business. Their loans were reduced $4,038,653, and their circulation was cut down $21,763. The U. S. Sub-Treasury added nearly two millions to its cash balances, last week, partly by sales of gold on account of the Department; but during the first half of the current week, it made some heavy disbursements, partly in redemption of maturing Seven-thirties, so that on Tuesday evening its cash reserve was nearly 3½ millions less than it stood a week previous. The influx of currency to this point has been in excess of the outflow in any direction. The available supply of capital, however, has been comparatively meagre, and to even the best street borrowers, accommodation has not been tendered anything less than the extreme legal rate of 7 per cent. on call. Less favored applicants for aid have had to pay usurious prices, for the necessary means to keep themselves afloat. Seven per cent. in gold has been a common price. There has been very little currency for mercantile paper, the best grades of which have been quoted at from 7½@10 per cent. per annum. The U. S. Sub-Treasury issued $705,000 of new three per cent. certificates in March, chiefly in the last week or ten days of the month, and for cash.

The specie reserve of the city banks is now $17,-323,367, against $8,522,609 same time last year. The city bank deposits are now $186,525,128, against $188,480,250 week ending March 30, 1867. The legal tender reserve amounts to $52,128,078, against $62,459,811 same time last year. The circulation now stands at $34,190,808, against $33,-669,195 same time last year. The loans are now $257,378,247, against $255,282,364 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $92,974,000 a day, against a daily average of $108,247,067 the preceding week, and $115,213,000 the week ending with Mar. 14, 1868. The current week's exchanges average about $91,230,132 a day. The city banks, last week, lost $138,008 of legal tender, $4,666,398 in the deposit line, and $620,941 of their specie reserve. They reduced their loans, $4,038.653; and their circulation, $21,763.

The Philadelphia Bank movement the past week shows a decrease in loans of $226,459; a decrease of $36,660 in specie; a decrease in legal tenders of $1,316,555; a decrease of $1,408,-606 in deposits; and a decrease of $7 in circulation. The Bank Clearings show a decrease of $583,070, and the balances, a decrease of $793,-807.

National Bank notes to the amount of $170,-760 were issued last week, making the total issue to 1,673 banks thus far, $307,020,091, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $7,173,615, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,845,790,) an actual circulation at this date, of $299,846,476. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,643,-400; and for the public deposits, $38,177,950—making a total of $379,821,850. The Treasury Department last week redeemed and destroyed $400,010 of worn and mutilated fractional currency, and issued $1,142,174 of new. The outstanding amount of fractional currency on the 1st inst. was $32,307,948, against $32,246,439 on the 1st of Feb. 1868.

The U. S. Sub-Treasury receipts, week ending with Mar. 28, were $15,941,796, including $2,854,-984 from customs duties; payments, $18,899,59[illegible],

including $125,000 of coin interest; balance at the close of the week, $101,813,627, against $99,831,335 at the close of the preceding week, showing an increase of $1,982,292. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $2,167,660 including $483,000 from customs; and payments, $2,894,862; on Tuesday, receipts, $6,649,941 including $499,931 from customs, and payments, $9,574,500. The balance at the close of business on Tuesday stood at $98,161,867, against $101,453,094 a week previous; and $105,820,972 on March 15, 1868. The total receipts of the office in March were $69,775,702, including $11,335,954 from customs. Total disbursements, $70,853,455, including $3,109,556 of coin interest, and $140,408 in currency interest. Balance at the close $98,161,876, against $99,239,619 at the commencement of the month.

The aggregate issue of coin certificates by the U.S. Sub-Treasury, in this city, up to date of latest published local report was $245,369,740; aggregate redemptions, $209,565,000; leaving outstanding certificates to the amount of $35,804,740. The latest report from the national capital made the outstanding amount of coin certificates on the 1st of March, $25,699,360, against $29,619,280 on the 1st of February, 1868. The Sub Treasury issued $3,124,020 of coin certificates in March.

Government revenues have been on a very limited scale, in the form of excises, since our last, as has been the case for some weeks past. The customs have been yielding satisfactorily. The excises, last week, yielded only about two millions, against three millions the preceding week; customs at the port of New York, $2,854,984 and at the outports, about $900,000 (in coin) more, making the grand total income for the week equal to about $7,156,000 in currency. The total receipts of the National Treasury, from excises, thus far in the new fiscal year, which began on the 1st of July, have been about $145,000,000, or equal to a monthly average of $16,111,111.

Government received from customs, through the port of San Francisco, from Jan. 1, to March 7, 1868, $1,419,090.

Gold has been without much activity or firmness since our last. The highly favorable cotton advices from Liverpool, and the close money market, here have operated against the speculation, which has lacked vigor. The extreme figures, since our last, have been 138⅛@139⅛, and the latest quotation on Wednesday 138¼. The export drain has been light. No specie was exported on Wednesday. The California steamer delivered here on that day $864,699 in treasure.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $1,787,449, against $408,139 same time last year. The customs demand for Gold last week, averaged $475,830 a day; thus far, this week, it has been equal to $496,500 a day, or equal to a weekly aggregate of $2,979,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $508,371 and from California, $864,699. The total customs revenue of the Government, in coin, at this port, thus far, in the current fiscal year, commencing with July 1, 1867, has been $85,065,202, against $95,482,132 same time in the preceding fiscal year. The total receipts of California gold at this port, thus far, in the current fiscal year, commencing with July 1, 1867, have been $25,606,489, against $31,298,784 same time in the preceding fiscal year, showing a decrease of $5,692,295 in 1867–'68. The exports of specie from this port, last week, were $556,675, against $445,038 same week last year. The exports of specie, hence, since July 1, 1867, have been $42,238,423, against $23,452,101 same time in 1866–'7. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $125,000, and since July 1, 1867, $54,876,162, against $38,425,764 same time in 1866–'7. The specie exports from San Francisco, from Jan. 1, to March 7, 1868, were $7,034,562, against $7,321,281 same time last year.

Government marketed about 2¼ millions of Gold, through the local office, last week.

Foreign Exchange stiffened in price during the week, on a moderate increase of demand from buyers, and a less liberal offering of prime bills. The market closed tamely, though comparatively steady. Bankers' prime sixty day bills on London closed on Wednesday at 109¾@109⅞, and on Paris to 5.20c.@5.15; sight bills on London to 109¾@110⅛, and on Paris to 5.15c.@5.12½. The offering of produce bills have been more extensive this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,996,447, against $4,650,390 same week last year; total, since July 1, 1867, $133,605,830, against $145,773,671 same time in 1866–'67.

The dealings in Government securities have been on a restricted scale since our last. The money pressure has presented anything like extensive operations. Its influence on values has been less decided. At the close the market was comparatively firm, though utterly inanimate. Government has bought some three millions of Seven-Thirties since our last.

U. S. sixes of 1881 closed here on Wednesday at 110⅞@111; U. S. Five-twenties of 1862, 109⅜@109½; U. S. Five-twenties of 1864 at 107⅝@107¾; U. S. Five-twenties of 1865 at 107@107⅞; U. S. Five-twenties of 1865, consolidated, 106½@106⅜; U. S. Five-twenties of 1867, 106¾@107; U. S. Ten-forties at 100⅝@100¾, and U. S. Seven-thirties at 105⅝@105⅞. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

May, 1865	118¼	September, 1865	116¾
August, 1865	117¼	October, 1865	116¼
U. S. three per cent. certificates			100¼

Government paid off $80,202 of the matured loan of 1847–'67, in February.

Railway and miscellaneous share property has been quite active, and, on the whole, well matured in value, in the face of an unusual stringency in money. The latest dealings were on a less confident basis the pinch in money having been rather severely felt by some of the speculative holders, who were forced to sell for cash.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Mar. 18.	Mar. 25.	April 1.
Consols	93⅜	93⅛	93⅛
U. S. 5-20's of 1862	72¼	72⅜	72⅛
Erie	45¼	46½	48⅝
Ill. Central	89⅜	89¾	89½

General business was fairly active in the produce lines. Breadstuffs, and Provisions attracted considerable attention, but closed in favor of buyers as a rule. Cotton has been unusually brisk at advanced prices. Middling upland cotton closed buoyantly at 27¾@28 cts., per lb. The stock of cotton now here is estimated at about 115,000 bales. The receipts at the port this week, have averaged about 2,500 bales a day. The receipts at all the ports, since Sept. 1, 1867, have been 1,927,000 bales, against 1,545,000 bales same time last year; exports, same time 1,265,000 bales, against 941,000 bales same time last year; stock on hand at latest dates, 325,000 bales, against 560,000 bales same date last year. At the Live Stock markets this week, Beeves have been in better supply and less demand at a shade easier prices, ranging from 14@19c. per lb.; week's receipts, 5,267. Veal calves, were dull and lower, selling down to 9@12½c. per lb.; receipts, 1,324. Sheep and lambs in good demand and firm at from 6½@10¼c. per lb.; receipts, 15,810. Swine quiet and heavy at from 8¾@9¾c. per lb., all live weight; receipts, 21,489. General merchandise has been moderately active at, in the main, full rates. Domestic Cotton Goods have been more active, and, as a rule, firmer though there has been much irregularity in prices. Domestic Woolens have been in fair demand at about previous figures. Foreign Goods have been in somewhat better request, and desirable fabrics have been selling advantageously. The total imports of foreign dry goods, last week, were $1,670,180, and the total amount marketed $2,018,199. The value of foreign merchandise imported last week, was $3,626,993—making the grand total specie value of last week's imports of dry goods and merchandise, equal to the unusually large sum of $5,297,173, against $4,242,200, same week last year; total since July 1, 1867, $172,633,158, against $201,063,937 same time in 1866–'67. The ocean freight market has been rather more active and firmer though irregular, since our last. For Liverpool we quote flour at 1s. 9d.@2s. by sail, and 2s.@2s. 3d. by steamer, per bbl.; grain at 5½d.@6d. by sail, and 7d.@7½d. by steamer, per bushel; cotton at $\frac{5}{16}$@⅜ by sail, and ⅜@$\frac{7}{16}$ by steamer, per lb.; and heavy goods at 20s.@35s. by sail, and 25s.@40s. by steamer, per ton. Total number of vessels in port on Wednesday 517.

The New York exports, exclusive of specie, for the week ending Mar. 31, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$4,650,390	$3,996,447
Prev. reported	46,431,644	38,466,498
Since January 1	$51,082,034	$42,462,945

The New York imports for the week compare as follows:

	1867.	1868.
Dry goods	$1,217,022	$1,670,180
Gen. merchandise	3,025,178	3,626,993
Total for the week	$4,242,200	$5,297,173
Previously reported	58,872,164	50,330,025
Since January 1	$63,114,364	$55,627,198

The balance in the Sub-Treasury on Wednesday was $98,766,979 23.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Brooklyn 6s W. L., 97; do., Park Loan, 95; Kings County (L. I.) 6s, 96½; New York State 7s, Bounty Loan, reg., 108¾; Georgia 7s, 86¾; Chicago and Gt. Eastern 1st mort., 86½; Toledo, Peoria and Warsaw 1st mort., 82½; Chicago and Milwaukee 1st mort., 87¾; Renssalaer and Saratoga R. R., 83; Indianapolis and Cincinnati R. ☞ The Island City *Times* says that work has "actually begun on the Railroad between Omro and Winneconne. We may therefore look on the extension of the road to Neenah, Menasha and Appleton, as a fixed fact."

Cleveland and Pittsburg Railroad.

The following is the result of the special meeting of the stockholders of the Cleveland and Pittsburg Railroad Company on the 26th ult.:

We, the undersigned, appointed and qualified as Inspectors of Election, do hereby certify that at a meeting of the stockholders of the Cleveland and Pittsburg Railroad, held this 26th day of March, 1868, the following resolution was offered for adoption:

Resolved, That by and under the provisions of an act of the Legislature of Ohio, of April 11, 1858, the Directors of the Cleveland and Pittsburg Railroad Company are hereby authorized, at their discretion, to increase the capital stock of the company to the amount of 10 per cent. of the present capital stock, and to divide the same among the shareholders *pro rata* on the amount of stock held by them respectively at this date, as shown by the books of the company, and under such provisions as to fractional shares as the directors deem proper.

That there was cast for this resolution 76,558 votes, that being the whole number of votes cast, we do therefore declare said resolution unanimously adopted.

Samuel Redfield, P. F. Geisse, and D. C. List, Inspectors of Election.

Birdsboro' and Wilmington Railroad.

The whole length of this road from Birdsboro' to Wilmington will be 63.74 miles, viz: from Birdsboro' to Springfield, 12.40 miles; to crossing of East Brandywine Railroad, 18.86; to crossing of Pennsylvania Railroad at Coatesville, 30.86; to Forks of Brandwine, 42.77; to crossing of Baltimore Central Railroad, 48.79; to connection with the P. W. & B. Railroad and the Delaware Railroad System, 62.55; to West street, Wilmington, 63.74 miles. The whole grading and bridging of the road, we learn was contracted for about $750,000 by responsible men with responsible security for performance of contract.

☞ It is officially announced that work will be commenced immediately on the new line of railroad between Indianapolis and Terre Haute; also that the new road between Terre Haute and St. Louis *via* Vandalia, Illinois, will be rapidly pushed forward. This will give two through routes from Indianapolis to St. Louis.

☞ The city of Bangor, Me., has voted to loan to its credit for $1,000,000 to the European and North American Railway, also $15,000 per mile to the Bangor and Piscataquis road. The vote stood 1,140 yeas to 45 nays on the first, and 1,123 yeas to 63 nays on the second proposition. This secures the building of both roads.

☞ The citizens of Belfast, Me., by a vote of 859 to 50, have accepted an act of the Legislature authorizing an additional subscription of $40,000 to the preferred stock of the Belfast and Moosehead Lake Railroad. This insures the immediate construction of the road.

☞ A "Red Line" freight car passed through Utica last week, on its way to Cheyenne, Colorado, from Boston, Mass., without transfer of freight. The distance is about two thousand and seventy miles.

☞ The Governor of New Jersey has signed the bill giving corporate rights to the Erie Railway Company in that State.

☞ The Toledo and Maumee street Railroad Company has been incorporated with a capital of $100,000.

Railroad Earnings.—Weekly.

The earnings of the Atlantic and Great Western Railway for the third week in Mar., 1868, were $106,449 00
Corresponding week previous year ... 116,134 00

Decrease $9,685 00

The earnings of the Western Union Railroad for the week ending Mar., 21, 1868.... $11,504 45
Corresponding week previous year 8,119 88

Increase $2,384 57

The earnings of the Marietta and Cincinnati Railroad the 3d week in Mar., 1868.... $23,233 00
Corresponding week previous year 17,798 00

Increase $5.435 00

The earnings of the Toledo, Wabash and Western Railroad for the 3d week of March, 1868, were $60,947 00
Same week in 1867..... 72,981 00

Decrease $12,034 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the 3d week in Mar., 1868, were $91,814 00
Corresponding week of 1867 ..... 87,523 00

Increase..... $4,291 00

The earnings of the Michigan Central Railroad for the 3d week in Mar., 1868, were .. $79,878 71
Corresponding week of previous year .. 77,598 28

Increase. $2,280 43

The earnings of the Chicago, Rock Island and Pacific Railroad for the third week in March, 1868 were. $70,300 00
Corresponding week of previous year. 73 165 00

Decrease $2,865 00

The earnings of the Chicago and Alton Railroad for the third week in March, 1868, were. $72,179 09
Corresponding period previous year .. 67,838 38

Increase $4,340 71

The earnings of the Chicago and Northwestern Railroad for 3d week in Mar., 1868.. $204,705 37
Corresponding week previous year .. 180,580 50

Increase $24,124 87

☞ The South Side (L. I.) Railroad, which since October last has been running from Jamaica to Babylon and connecting at the former place with the Long Island railroad, will speedily run direct from Williamsburgh. The rails are laid to Fresh Pond, but three miles from the Williamsburgh ferry. At the east end of the road grading has been completed to Patchogue, and rails will soon be laid down.

☞ The Terre Haute and Indianapolis Railroad Company contemplates laying a double track between the two cities as soon as possible, and to extend a branch of their road north and south into the coal fields of that section.

☞ The Union Pacific Railroad is complete to a point twenty-seven miles west of Cheyenne City, and within four miles of the highest summit of the entire route. The number of men now employed on that section is 3,000.

☞ At a recent meeting of the directors of Chesapeake and Ohio Canal Company in Annapolis the board reduced the tolls on coal from Cumberland to Georgetown from sixiy-nine cents to forty-six certs per ton. Mr. Benjamin Fawcett, of Montgomery county, was elected secretary and treasurer of the company.

Manufacture and Wear of Rails.

The paper read on this subject at the Institution of Civil Engineers, London, on 3d March, was by Mr. C. P. Sandberg, Assoc. Inst. C. E. The communication was divided into three parts. First, as to the best method of manufacturing rails out of common iron, and as to the time they would last. Secondly, as to the disposal of the iron rails when they were worn out. And thirdly, as to whether iron or steel, or a combination of the two materials, was the most economical to use for rails.

The mode of manufacturing iron rails for Sweden, as carried out in South Wales between the years 1856 and 1860, was described; and it was stated that, with a view of ascertaining the best method, it was decided to submit a number of sample rails, made from five different kinds of "piles," to actual practical trials. These experimental rails were laid down at the Camden-town station, by permission of the London and North Western, and the following table showed the number of tons passed over each description of rail before it was crushed, and also before the rails were taken up:

Mark of Rail.	Crushed. Tons.	Worn out. Tons.
T	3,680,000	5,060,000
Y	4,140,000	5,290,000
H	3,220,000	5,060,000
E	6,900,000	8,970,000
N	3,220,000	5,520,000

A table, calculated from the above, showed how long the rails would last, supposing them to be passed over by three thousand trains yearly, each train being composed of an engine weighing thirty tons, and of twenty wagons of ten tons each, or a gross load of 230 tons. From these tables it was ascertained that the five different descriptions of rails were on the average crushed in six years, and worn out in nine years. The conclusion was thus arrived at, that hammering after the first welding heat, for this particular kind of iron, did not improve the endurance of the rails, but that the simplest mode of manufacture had also the material advantage of being the best. These trials at the same time established the fact that it was not the wear, or the diminished sectional area caused by abrasion, which produced the unsatisfactory results in the endurance of iron rails, but the lamination caused by imperfect welding. This explained the great difference between the wear of rails made in exactly the same way, the welding in the one case being perfect, whilst in the other it had been very imperfect.

These experiments also confirmed the rule laid down in Mr. R. Price Williams's Paper, "On the Maintenance of Permanent Way"—viz., that the endurance of rails might be measured by the product of the speed and of the passing weight. Trial rails, of the same kind of manufacture as those marked E in the previous table, but of a heavier section, laid on the Great Northern might thus be said to have borne 276 million tons at a speed of 1 mile per hour. The endurance of the rails tried at Camden-town, under unusual conditions, where the wear was occasioned principally by the frequent use of the breaks and by continual shunting, was much less, and might be represented by 120 million tons at a speed of 1 mile per hour. These experiments seemed to indicate that 220 million tons might be carried over rails of the section and make referred to, at a speed of 1 mile per hour; so that any railway company, knowing the load which yearly passed over their line and the speed, might by multiplying the one into the other, and dividing this product by 220, ascertain the life of iron rails in years. The conclusions the author had arrived at were, that no rule could be laid down for the manufacture of rails that would apply to every manufacturing district; but that in the case of Welsh iron, to which he had more particularly referred, it had been proved that the best method of manufacturing the rail was that now most commonly practised—viz., rolling the iron into bars, piling these, and repeated rolling to the finished rail, without hammering. The author assumed that the prejudicial result from hammering was owing to the large amount of sulphur in the Welsh iron. Where the iron contained more phosphorous and less sulphur, as, for instance, in the Cleveland, Belgian and French iron districts, hammering had proved beneficial, and rails had been made direct from puddled bars, without the intermediate process of piling—this being, in fact, the method generally adopted in those places, and being found to answer best.

As to the disposal of the rails when worn out, and as to the possibility of re-rolling old rails with advantage by companies far removed from the seat of manufacture, such as the British colonies, the countries round the Mediterranean or the Baltic, the author thought that for railways near the seat of rail manufacture, the best way would be to continue to sell the old rails to the rail mills. For other countries, situated like Sweden, for instance, it became important to ascertain whether it would not be more advantageous to re-roll them. On this subject precise and detailed calculations were entered into, which led the author to think that the manufacture might be carried on in that country with advantage, using Swedish Bessemer steel for the head, No. 2 iron for the foot or flange, and old iron rails for the remainder of the pile.

In the third division of the paper, as to the best and most economical material to be employed for rails, the following calculations were made: Assuming that under a very heavy traffic, common iron rails would last five years, steel top rails fifteen years, and solid steel rails thirty years, and that iron rails would cost 7*l.* per ton, steel top rails 10*l.* per ton, and solid steel rails 15*l.* per ton, and that the old steel top and iron rails were valued at 4*l.* per ton, and the old solid steel at 8*l.* per ton, then, with a rail section of 84 lb. per yard, 250 tons of rails would be required for one English mile of double line, and the cost of laying the rails might be estimated at 1*l.* per ton. On these assumptions the author has calculated the following:

Annuity Table, No. 1.—*Interest calculated in each case at* 5 *per cent.*

Prices. Per Ton	When Iron rails last.	Annuity would be for Iron Rails.	Steel Top Rails.	Solid Steel Rails.
Iron rails.....£7	Years.	£	£	£
Steel top ditto ..10	2	587	395	**325**
Solid steel ditto.15	3	417	307	**271**
Credit for	4	332	247	**245**
Per Ton	5	280	**218**	230
Old iron rails.....£4	10	179	**163**	205
" steel top do.. 4	15	**134**	148	201
" solid steel do. 8	20	**130**	140	200

This table might be thus explained, as to iron rails lasting five years:

250 tons, at 7*l.* per ton	£1,750
Cost of laying down	250
	£2,000
Which sum, at the end of five years, at 5 per cent. compound interest, became...	2,552
The difference between this sum (viz., 2,552*l.*) and the value of the old rails (250 tons, at 4*l.* per ton=1,000*l.*) was.....	1,552
The annuity required to recoup this latter sum in five years was.....	£280

It might be objected that the prices quoted for solid steel rails were too high. Rails of this kind had been sold in some places as low as 12*l.* per ton, but for the best quality the present price was 15*l.* per ton, and it was only from these that the experience had been gained, as to their enduring six times as long as iron rails. However, Table No. 2 had been calculated for the different kinds and periods at the following prices—viz., iron rails at 6*l.* steel top rails at 9*l.*, and solid steel rails at 12*l.* per ton, crediting the old iron and

steel top rails at 3*l.* per ton, and the old solid steel rails at 5*l.* per ton.

Annuity Table No. 2.

Prices. Per Ton	When Iron Rails	Annuity Iron Rails.	would be for Steel Top Rails.	Solid Steel Rails.
Iron rails.....£6				
Steel top ditto.... 9	last.			
Solid Steel ditto..12				
	Years.	£	£	£
	2	574	382	**288**
	3	404	283	**233**
Credit for	4	319	234	**230**
Per ton	5	268	206	**174**
Old iron rails £3	10	166	**149**	168
" steel top ditto. 3	15	**133**	136	163
" solid steel do.. 5	20	**117**	126	150

This table showed that in all cases solid steel rails were the cheapest. The amount of traffic must, therefore, decide which material it was the most economical to use for the maintenance of the permanent way. For all railways where ordinary iron rails were worn out in five years, or in a shorter time, solid steel rails were the most economical, at the prices quoted in Table 1. Where ordinary iron rails lasted over five and up to ten years, steel-top rails would be the cheapest; iron rails in these cases being clearly proved to be the most expensive, although the cheapest where they lasted from fifteen to twenty years.

The preceding tables referred to rails of the Vignoles section. Table No. 3 had been made up for the ordinary double-headed rail, for one English mile of double line, according to the prices stated, the considerations being the same as in Table No. 2, excepting that the chairs had been taken into account. Allowance had been made for 140 tons of new chairs per mile at 5*l.* per ton, credit being given for the value of the old chairs at 2*l.* 10s. per ton. It might be observed that steel headed rails were here estimated to last four times, and solid steel rails eight times, as long as ordinary iron rails—that was, making allowance for the use of both faces.

Annuity Table No. 3.

" solid st'l do. 5 0	15	183	**166**	
" chairs..... 2 10	20	163	**162**	

Table No. 3 indicated that the iron rails were in no instance the cheapest; but, on the contrary, that when iron rails had the advantage, and where iron rails had a longer duration, then that steel-headed rails were the most economical.

Another fact had still to be taken into consideration, the safety of the three different materials, in regard to high speeds, severe climates, &c. A report recently published by Professor Styffe, the director of the Government School of Mines at Stockholm, showed the extent to which the tenacity and elongation of various materials were influenced by the amount of carbon they contained. From the tables which accompanied this report it appeared that the hardest material had the greatest absolute strength, both before and after permanent set had taken place, but it had the least ductility; on the other hand, a softer material had the greatest tenacity or elongation, the Bessemer material giving the same results as that prepared from the same pig iron by puddling, refining, or the cast-steel process. In a diagram illustrating these results, the per-centage of carbon and prosphorus was stated in nearly all cases. The limit for the amount of carbon seemed to be for the Bessemer material 1-2 to 1-5 per cent. With a larger amount the absolute strength, as well as the tenacity, had been found to decrease. When the amount of carbon did not exceed 0-4 per cent., and the material was not worked at too low a heat, the elongation seemed to be 16 per cent., or the same as for puddled iron from the same pig iron; and, as such Bessemer material was not only much stronger, but also more solid or homogeneous than the puddled material, it deserved a decided preference for all railway purposes. The few cases of the failure of rails by breaking might be accounted for as the result of too hard a material, not perfectly manufactured, having been made at an early period of the introduction of the process. The experience which had now been gained should certainly prevent any recurrence of this.

It must, however, be observed that the raw material used in both cases was charcoal pig iron of a superior quality compared with that used in England for making Bessemer rails, which might be seen from analyses made by two eminent chemists of both countries, which were given. These analyses showed that the great difference between the two was the excess of silicon in the English, and of manganese in the Swedish pig iron; thus explaining why the one gave a better product than the other, although worked entirely without the addition of spiegel-eisen. If there were only 0·6 per cent. of carbon in the solid steel, and 0·3 per cent. in the steel for the steel head, the safety ought to be the same for all the three kinds, and this would not influence the former calculations as to which was the best and most economical material for rails.

Having watched the development of the Bessemer process in England, as well as on the Continent, it seemed to the author that by that process a good and pure raw material had the same advantage over an inferior one as in all other processes, and that a superior product could not be obtained from an inferior raw material by that process any more than by any other. In having mentioned Swedish material as an example, it must not be supposed that it was wished to advocate the use of Swedish iron in this country, but simply to draw attention to the better material; as equally good charcoal iron could be supplied from Canada and India—both English colonies. It might also be remarked that the author's endeavor had been to arrive at the truth irrespective of prejudice, and that he had no wish to be deemed an advocate for one kind of rail more than for any other.

☞ The directors of the Union Pacific Railroad Company have decided unanimously to locate and construct its railroad bridge across the Missouri River, opposite the present terminus of their road at Omaha. The bridge is to be sufficiently high to allow the passage of boats, and will be constructed immediately.

☞ The Cumberland *Civilian* says the Pittsburg and Connellsville Railroad will be pushed forward to an early completion. By the 15th day of May the entire road will be under contract.

☞ An offer has been made, by a reliable party, to build and equip the Intercolonial Railway on the Robinson route, between Truro and River du Loup, for $14,600,000.

IMPROVED DOUBLE-ACTION PUMPS, SUITABLE for deep mines, railroad water stations, ships, breweries, distilleries, mills, factories, etc. Send for circular. Manufactured by G. MARSHALL,
3m14 21 Dunham Place, Brooklyn, E. D., N. Y.

PROPOSALS.

NOTICE TO RAILROAD CONTRACTORS.

OFFICE OF THE NEW YORK AND OSWEGO MIDLAND RAILROAD COMPANY,
ONEIDA, N. Y., Feb. 10, 1868.

SEALED PROPOSALS WILL BE RECEIVED AT the Office of the Company, until the 15th day of April, 1868, at noon, for the GRADING, MASONRY, and BRIDGING of that portion of the NEW YORK AND OSWEGO MIDLAND RAILROAD, extending from the CITY OF OSWEGO to the VILLAGE OF SIDNEY PLAINS, a distance of ONE HUNDRED AND TWENTY MILES, and passing through the Towns of VOLNEY, HASTINGS, WEST MONROE, CONSTANTIA, VIENNA, LENOX, STOCKBRIDGE, EATON, LEBANON, SMYRNA, NORTH NORWICH, NORWICH, OXFORD AND GUILFORD, and that portion known as the Branch, from at or near EAST GUILFORD, in the town of GUILFORD, to MT. UPTON, in the same town.

The line will be divided into Sections of about One Mile each, and proposals may be made for separate Sections or for the Entire Work. The Company will entertain separate proposals for Bridging only.

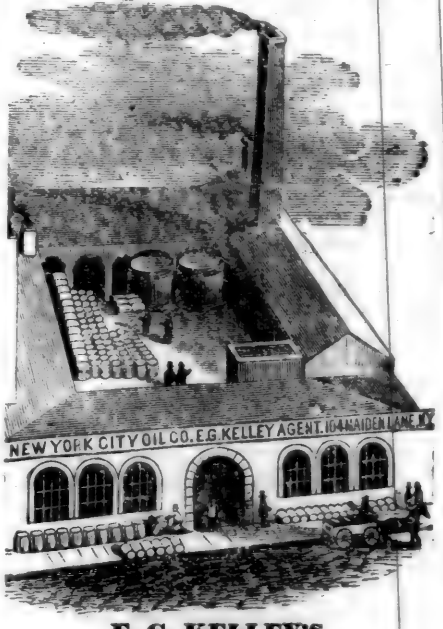
The line passes through a desirable section of country of Central New York, and the work will be worthy of the attention of Contractors.

Plans, Profiles and Specifications will be ready for examination at the Office of the Chief Engineer, in Oneida, N. Y., where all necessary information may be obtained, on and after the 6th day of April.

D. C. LITTLEJOHN, President.
W. B. GILBERT, Chief Engineer.

POSTPONEMENT.

In consequence of the unfavorable weather for field work for the past three weeks, the above Letting will be Postponed until THE FIRST DAY OF MAY, AT NOON. Plans, Profiles and Specifications will be ready for examination as above noticed, on and after the 22d day of April.



Dated Oneida, March 20th, 1868.
D. C. LITTLEJOHN, President.
4t14 W. B. GILBERT, Chief Engineer.

Notice to Contractors.

PROPOSALS FOR THE GRADUATION AND MASONRY of the Nineteen Miles of the Knoxville and Kentucky Railroad not yet under contract, extending from a point two miles south of Elk Gap to the Kentucky line near the town of Boston will be received until the 24th of April next.

The profile and specifications for this section, which includes four Tunnels, varying from two hundred and fifty to seventeen hundred and fifty feet in length, with other heavy work, can be seen at the ENGINEER'S OFFICE, in Knoxville, after the 14th of April. The Company reserve the right to reject all bids. For further particulars address— ADRIAN TERRY, Chief Engineer, &c.
Knoxville, Tenn., March 26, 1868.

PROPOSALS

For the Construction of a portion of the Summit Division of the Illinois and Michigan Canal.

OFFICE OF THE BOARD OF PUBLIC WORKS,
CHICAGO, March 11, 1868.

SEALED PROPOSALS WILL BE RECEIVED BY the Board of Public Works, at their office, until 11 A. M. Wednesday, April 15, for the construction of sections Nos. seventeen (17) to forty-four (44,) inclusive, of the Summit Division of the Illinois and Michigan Canal—a distance of about eleven (11) miles.

Maps, profiles, and specifications will be exhibited at the office of said Board in Chicago.

There will be some 1,500,000 to 2,500,000 cubic yards (according to the line which shall be adopted) of earth excavation, some of it quite hard and embracing con iderable detached rock, and about 90,000 cubic yards of stratified limestone.

The work must be prosecuted so as not to interfere with the use of the canal during the season of navigation.

It is believed, however, that most of the excavation, except the stratified rock, can be done with steam dredges without interfering with the navigation of the canal, but the rock excavation will all have to be done between the close of navigation in the fall and the opening in the spring.

Proposals are invited on the present line of canal, and also on a new line, as follows, viz:

For the work on Sections 17 to 23, inclusive, according to the old line.

For the work on Sections 24 to 41, inclusive, bids will be received both for the improved old line and a new line.

For the work on Sections 42 to 44, inclusive, bids will be received both for the old line and a new line.

If a new line be adopted for any portion of the distance operations thereon may be continued the whole year. It is expected that the navigation of the canal will be suspended for at least five months in each year, unless otherwise mutually agreed by the Board and contractors.

The whole of the work must be done on or before the end of the third season of the suspension of navigation.

A large amount of machinery will be required to excavate the work within the time required, consisting mainly of steam dredges, scows, and cranes for the earth work, and drilling machines, pumping machinery, and cranes for the rock.

Contractors will be required to commence work on the earth excavation within thirty days of the time of letting, and upon rock excavation by the first of November next, or as soon thereafter as navigation shall be suspended.

Parties contracting for the work will be required to provide all machinery, and to put up and remove all dams and all works of protection, and at their own expense to do all pumping, or whatever may be necessary to secure their work from water.

Proposals must be addressed to the Board of Public Works, indorsed "Proposal for Deepening Illinois and Michigan Canal," and be accompanied with the usual two hundred dollar ($200) bond, with sureties, to be approved by the Board.

Contractors will bid, stating the price for which the work will be done on each of the different sections, and the work will be let as a whole or in part, and in such quantities as the Board shall determine.

The Board reserve the right to reject any and all bids, and no proposal will be accepted unless the party offering it shall give evidence satisfactory to the Board that he has the necessary skill, experience, energy, and ability for doing the work, is trustworthy, and has sufficient pecuniary resources.

The Board will require such security as, according to their judgment, will secure the doing of the work according to the contract.

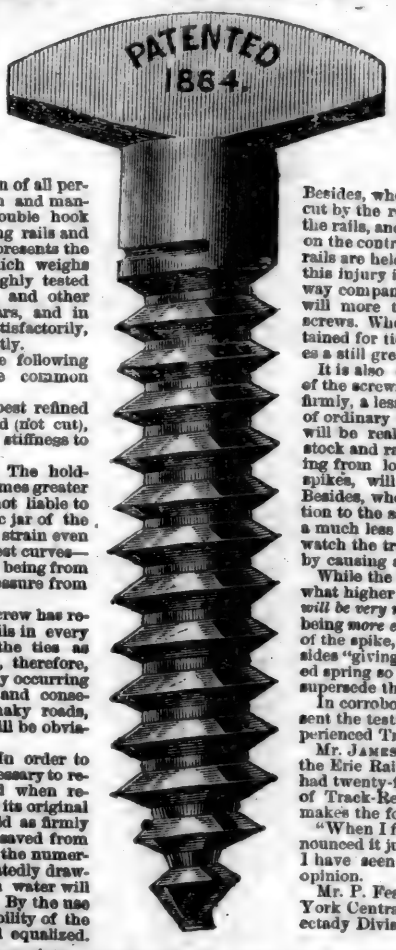
U. S. RAILROAD SCREW SPIKE COMPANY,



NO. 45 CLIFF STREET, NEW YORK,

MANUFACTURERS OF MONTIGNANI'S PATENT

RAILROAD SCREW SPIKE.

HENRY YOUNG, President.

G. B. HUBBELL, Secretary.

Works at
OSSINING,
Westchester Co., N. Y.

We respectfully call the attention of all persons engaged in the construction and management of railroads, to the double hook headed Screw Spike, for fastening rails and chairs to ties. The above cut represents the size and shape of the Screw, which weighs eight ounces. It has been thoroughly tested on the Erie, New York Central, and other Railways, from one to three years, and in every case it has stood the test satisfactorily, having performed its work perfectly.

The Screw Spike possesses the following important advantages over the common spike:

First.—They are made of the best refined Iron, and the thread, being forged (not cut), imparts additional strength and stiffness to them.

Second.—INCREASED SECURITY. The holding power of the screw is many times greater than that of the spike, and it is not liable to break nor become loosened by the jar of the cars, nor by the upward or lateral strain even on the steepest grades and sharpest curves—the holding capacity of each screw being from four to five tons, and the side pressure from three to four tons.

In three years' experience no screw has removed from its place, and the rails in every case have been held as firmly to the ties as when first put down. By its use, therefore, the numerous accidents constantly occurring from loose and broken spikes, and consequent loose and broken rails, shaky roads, and the spreading of the rails, will be obviated.

Third.—GREATER ECONOMY. In order to remove the rail it will only be necessary to reverse the screw one-quarter; and when replacing it, turn the screw back to its original position, when the rail will be held as firmly as before. The ties will thus be saved from the injury of splits, checks, and the numerous holes made in them by repeatedly drawing and replacing spikes, in which water will collect, causing their rapid decay. By the use of the screws, therefore, the durability of the ties will be greatly increased and equalized.

Besides, when the rails are loose the ties are cut by the repeated blows made on them by the rails, and are thereby materially damaged; on the contrary, where the screw is used, the rails are held so firmly in their place, that this injury is prevented. The saving to railway companies in ties alone, it is estimated will more than pay the whole cost of the screws. Where none but soft wood can be obtained for ties, the screw manifestly possesses a still greater advantage over the spike.

It is also calculated, that in consequence of the screws holding the rails to the ties so firmly, a less number will be required than of ordinary spikes, also a very great saving will be realized in the wear of the rolling stock and rails. The considerable loss arising from loose, bent, broken and missing spikes, will be almost entirely prevented. Besides, where the screw is in use, in addition to the saving of time in relaying rails, a much less number of men are required to watch the track and keep it in repair, thereby causing a great saving.

While the first cost of the screw is somewhat higher than the spike, *in the end they will be very much cheaper.* The screw therefore being *more economical*, and by its use in place of the spike, *making the roads more secure*, besides "giving to the track an easy and connected spring so much desired," it must entirely supersede the common spike.

In corroboration of the foregoing, we present the testimony of several of the most experienced Track Masters in this country.

Mr. JAMES R. HILLIARD, Track Master on the Erie Railway, (Union Division), who has had twenty-four years' experience as Master of Track-Repairs, after testing the screws makes the following report:

"When I first saw your Screw Spike I pronounced it just the article wanted, and since I have seen it in use I still hold the same opinion.

Mr. P. Featherly, Track Master on the New York Central Railroad, (Albany and Schenectady Division,) says, January 9th, 1866:—

"I put down your Screw Spikes sixteen months ago, on a section of our road where our heaviest work is done, viz., a steep grade on the main track, three miles from Albany, one-quarter of a mile above West Albany, and they are there to-day, firm and as secure as when first put down, while the adjacent track, fastened with common spikes, has been respiked several times during that time."

Mr. E. T. MARBLE, Track Master on the Albany and Saratoga Railroad, says:

"On examining the Screw Spikes put down by me September 16th, 1863, I find they have not started either upward or sideways, that they still hold the rail to the ties as securely as when first put down; while great numbers of common spikes are loose and out of place. And on examination I find the threads are bright and clean."

Mr. E. H. DE VERGNE, Track Master on the Shore Line Railroad, writes:—

"Having examined and tested your Screw Spikes on our road, I feel satisfied that they are more durable, safer and more reliable than common spikes. By their use our Railroads would be perfectly safe so far as the track is concerned. Although it requires somewhat more time to drive them than it does the common spike, yet it is more than counterbalanced by their greater durability and safety, and saving of time in relaying rails. With practice and the use of proper tools, even that objection can be overcome."

Mr. A. F. SNYDER, Track Master, Albany, January, 1867, writes as follows:

"This is to certify that the screw Spikes put down on the bridge over the Hudson River at Albany, N. Y., by the U. S. R. R. Screw Spike Co., February, 1866, have done their work perfectly—holding the rails securely and firmly to the ties—not having started in the least, while the ordinary spikes, which were put down on the bridge at the same time, have, many of them, started up, and are quite loose and useless."

Mr. J. W. POTTER, Superintendent of the Cincinnati, Dayton, and Eastern Rail Road, says, January 9th, 1867:—

"The Screw Spikes manufactured by your Company have thus far given entire satisfaction, more than equaling our expectations. We have had them tested at our crossings for the past six months, and find them solid in the tie as the day they were put in. I consider them invaluable for crossings and bridges."

MERRICK & SONS,

SOUTHWARK FOUNDRY,

Safety Railroad Switch.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the ***MAIN TRACK IS NEVER BROKEN,*** and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns ***The Life and Limb of all Travelers upon Railroads.***

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

New York, Saturday, April 11, 1868.

Albany and Susquehanna Railroad.

In the discussion of the question of State aid to *complete* this road it should be borne in mind that this company had expended over two millions of dollars, and completed forty-five miles of their road before they received one dollar from the State; that the line is very expensive to build, there being several heavy cuts and embankments, and a tunnel of 2,200 feet upon that portion yet to complete, and although over five millions of dollars have already been expended, it will require over a million dollars to complete the road. The company have, in good faith, complied with the conditions entitling them to the former aid, and the instalment now asked for has twice before this been voted by the Legislature and defeated by the vetoes of the Governor.

The section this road penetrates has never had canals built to accommodate it, but in lieu thereof now asks this aid in part payment of an old debt for taxes paid for canals and improvements in other parts of the State. While the sum asked is not one-tenth the cost of a canal, it will be worth more to the State in the construction of this road. The sum to be raised is only one-tenth of a mill ($150,000,) there being a surplus in the Treasury from the former tax to make up the balance.

The State of New York is doing much less in proportion, than several other States in aid of railroads. Massachusetts has within the last two years voted over five million dollars for that purpose, and to-day has more miles of railroads in proportion to her territory than any other State in the Union.

It is said the appropriation is to a *private* corporation. This is not true. The Supreme Court of the United States as well as the State Courts, have repeatedly held otherwise. There is now no conflict in the decisions upon that point. Governor Marcy, when a Judge of the Supreme Court, as long ago as the decision in the case of Conklin *vs.* Baldwin, 4 Wen., 670 says: "The execution of a *public* work may as well be committed to an individual or a company as to public agents; its character as a public work remains the same." Again, in 14 Wen., 51, the Court say:

"That the taking of private property for the use of a railroad company, is taking it for *public* use, within the meaning of the Constitution, and that such corporations are *public* and not private corporations."

In 21st Penn. R., 149, the Court say:

"Railroads are not *private* affairs. They are *public* improvements, and it is the right and duty of the State to advance the commerce, and promote the welfare of the people, by making or causing them to be made at the public expense.

"If the State declines to make a desirable public improvement, she may permit it to be done by a company, and the fact that it is done by a corporation does not take away its character as a *public work*.

"The right of the company, by which it is made, to be compensated for the expense of constructing it by taking tolls for its use, though it gives the corporation an interest in it, does not extinguish the interest of the public, nor make the work a *private one;* because, to say nothing of other advantages, the public can pay the toll, and still carry and travel on it very much cheaper than without it.

"The State may, therefore, rightfully *aid* in the execution of such public works, by delegating to the corporation the right of eminent domain, as she always does, or by an exertion of the taxing power as she has done very often."

It is not my purpose to discuss the merits of the several applications now before the Legislature. Several of them are meritorious and worthy projects, and when completed, will add largely to the aggregate wealth and taxable property of the State, and should be aided, particularly where the work has been commenced and prosecuted in good faith; but let each be considered on its own merits. The State is not so poverty-stricken as not to be able to aid, to a reasonable extent, in the construction of public works, which, in direct taxes, will return to the Treasury in a short time more than the aid rendered. Let every appropriation be cut off that can be, and particularly those that tend to promote *private* rather than public interests.

The same arguments now used against State aid, have been used against the construction of the Erie Canal and other public works. The only difference is, that in one case the State only renders aid, and in the other does the whole and pays for it out of the Treasury. It certainly is more economical for the State to aid, than construct and keep in repair, wholly out of the Treasury, notwithstanding the receipt of tolls.

There are politicians who suppose political capital can be made by opposing the construction of public works. This is a mistake. The party that stopped the Erie Canal enlargement with the cry of "forty millions debt," went under on that very issue. The party of progress always in the end succeeds. Every civilized nation taxes for such purpose, and always will. The important question is to discriminate and restrict the appropriations to such cases as will truly promote the public interest and add to the wealth and prosperity of the State. J. H. R.

Kent County Railroad.

The Middletown *Transcript* publishes the proceedings of a meeting held at Sassafras, Kent County, Maryland, on the 24th ult., for the purpose of concerting measures to build the Kent County Railroad from Massey's *via* Sassafras and Warwick, to Middletown. Forty thousand dollars had previously been subscribed for that purpose, and a committee was appointed to raise $16,000 more, making a total subscription of $56,000, with which sum, one of the contractors assured the meeting, the road would be built—the contractors themselves, Messrs. Sears, Harri-

son and Stratton, agreeing to supply the remainder, about $24,000. Major Sears further proposed to build the entire road, without a dollar of subscription money, or any guarantee of three or six per cent., provided the Directors of the Kent County Railroad will execute to him a lease for ninety-nine years. A committee was appointed to lay the first proposition before the Board of Directors, at their next meeting.

Norwich and Worcester Railroad.

The receipts of this company for the years ending November 30, 1866 and 1867, have been as follows:

	1866.	1867.
From passengers	$255,491 05	$252,960 21
" freight	473,252 18	409,443 94
" mails, express, etc.	21,934 94	18,033 71
	$750,678 17	$680,437 86
Expenses, viz.:		
Repairs of road	$81,587 87	$78,017 71
" bridges	440 11	449 70
" locomotives	67,106 62	45,256 64
" cars	58,378 80	82,857 81
" tools	8,451 48	6,111 20
" stations	17,948 33	7,660 26
Fuel	60,364 18	57,034 66
Oil and waste	10,475 28	6,697 76
Passenger expenses	31,216 65	31,658 01
Freight expenses	75,955 95	78,431 90
Taxes and insurance	48,698 44	37,088 67
Gratuities and damages	15,308 01	3,534 56
Salaries	10,849 86	11,000 00
Removing snow and ice	57 62	3,413 21
Printing & advertising	2,922 99	3,019 09
All other expenses	10,387 55	27,139 55
	$500,149 74	$476,551 64
Net earnings	$250,528 43	$204,086 22
Interest paid	26,591 71	30,411 23
Balance	$223,936 72	$173,674 99

A dividend of four per cent. was paid in July 1867, and one of three per cent. in January 1868.

The capital stock of the company consists of 28,250 shares of $100 each ($2,825,000), of which 23,540 shares are in the hands of Stockholders upon which dividends are paid; 590 shares are in the hands of the company's Treasurer; 4,000 shares are held by the State of Massachusetts as collateral to debt; and 96 shares of common stock never surrendered, and made preferred, to which add one-fourth, or 24 shares, to be paid in on the surrender of the 96—making the total as above, 28,250 shares.

The road is 59.4 miles in length extending from Norwich to Worcester. The aggregate length of sidings, and other tracks, excepting main track and branch is 9⅓ miles. Branch line to Allyn's Point 7 miles.

Cost of road from Norwich to Worcester	$2,613,694 21
Allyn's Point Extension	177,544 29
Junction at Norwich	54,941 67
Equipment	554,524 20
Tools and machinery	29,771 78
Total cost of road, equipment, etc.	$3,430,476 15

The equipment consists of 20 locomotives, 19 passenger cars, and 491 merchandise cars.

Miles run by passenger trains, 165,840; by freight trains, 190,724; by other trains, 7,967—364,521. Number of passengers carried, 386,836; do., carried one mile, 6,925,609. Tons of merchandize carried, 189,579; do., carried one mile, 8,888,209. Estimated weight in tons of passenger cars (not including passengers) hauled one mile, 7,567,667. Do., mdze cars, (not including freight) 13,382,313.

The assets and liabilities of the company November 30, 1866 and 1867 were as follows:

Assets:	1866.	1867.
Cash, notes & balances due the company	$80,956 44	$48,291 83
Steamboat stock	270,000 00	270,000 00
Sinking fund steamboat bonds	29,850 00	.....
Inventory of wood, iron rails, etc	75,551 71	81,302 35
Surplus real estate	5,304 98	9,004 98
	$461,663 13	$403,599 16
Liabilities:		
Massachusetts loan, due July 1, 1877	$195,000 00	$185,000 00
Bonds due 1874	59,000 00	59,000 00
Steamboat bonds	96,000 00	70,500 00
Construction bonds	.....	100,000 00
Accrued interest	3,883 92	7,376 90
Dividends not called for	1,550 00	1,550 00
U. S. taxes not due	214 08	184 92
Balances due to companies & individuals	464 58	59 78
	$356,112 58	$423,671 60
Excess of assets	$105,550 55	.....
Excess of liabilites	.....	$20,072 44

President.—AUGUSTUS BREWSTER.

Directors.—Augustus Brewster, Charles Johnson, J. N. Perkins, John T. Wait, Franklin Nichols, John F. Slater, Moses Pierce, Robert Bayard, H. C. Stimson, Alex. DeWitt, H. K. Horton, W. F. Weld, F. H. Dewey, Vachel Worthington.

Treasurer.—GEORGE L. PERKINS.

Superintendent.—P. ST. M. ANDREWS.

Secretary.—EDWARD T. CLAPP.

Pittsburg, Ft. Wayne & Chicago Railway.

To the Shareholders and Bondholders of the Pittsburg, Ft. Wayne and Chicago Railway Co.:

Your Board of Directors, in again surrendering the trust confided to them, present their Sixth Annual Report.

The condition of the company at the close of the last fiscal year ending December 31, 1867, was as follows:

Capital stock		$11,500,000 00
Bonds—First mort.	$5,250,000 00	
" second "	5,160,000 00	
" third "	2,000,000 00	
" bridge, (Ohio & Penn. R.R. Co.)	153,000 00	
		12,563,000 00
Miscellaneous liabilities		149,851 06
Due for current expenditures, mainly in December		573,289 40
Balance to credit of income acc'nt		3,480,126 88
Total		$28,266,267 34

To represent, or to pay which, you have the property named below:

Main line, equipment, &c		$25,271,285 63
Akron Branch		207,575 03
Stock of supplies, or materials for current operations		561,443 99
Due from other Co.'s	$368,596 14	
Less due them	77,514 60	
		291,081 54
Cost of first and second mortgage bonds held by Trustees of the sinking fund		404,710 26
Miscellaneous assets, including investments in other companies		633,641 44
Cash		896,529 45
Total		$28,266,267 34

The strength of the company's financial position may be more readily determined by reference to the following statement:

For current expenditures, in December, &c	$573,289 40
For other miscellaneous liabilities	149,851 06
Total liabilities	$723,140 46
To pay which, you have the following:	
Cash	$896,529 45
Net amount due by other companies	291,081 54
Miscellaneous assets	633,641 44
Total assets	1,821,252 43
Excess of assets for liabilities	$1,098,111 97

Out of this sum was to be provided the interest on the mortgage debt, and installment of sinking fund, due January 1, 1868, amounting to $112,775, and the dividend declared on the third mortgage bonds, and on the capital stock, payable January 18, 1868, amounting to $336,875, in all $449,650, which would leave a balance of $648,461 97. This sum, which may to some appear large, is not, however, more than sufficient for carrying on the operations of the Treasury with that promptness and comfort which is desirable, especially when it is remembered that it includes an amount of current accounts that must remain, from the nature of the business, more or less unadjusted.

Of the balance to the credit of income account, amounting to $3,480,126 88, your board has directed the Auditor to charge off the sum of $2,382,014 91, which will reduce this balance to $1,098,111 97, being the amount of the excess of assets over liabilities as shown above, and to credit to cost of the Main Line and equipment the sum thus charged off, thus reducing the cost to $22,889,270 72.

The earnings of the Main Line were:

From local freights		$1,821,207 36
" foreign freights		2,662,409 06
		$4,483,616 42
From local passengers	$1,361,189 73	
" foreign pass	1,077,823 66	
		2,489,013 39
From express matter		100,632 65
" mail service		93,900 00
" rent of railway		85,000 00
" rent of other property		6,651 92
" miscellaneous sources		33,311 97
Total		$7,242,125 96

These earnings are at the rate of $15,764 76 per mile of road, and compared with 1866, show a decrease in the aggregate of $225,091 60.

The expenses of doing the above mentioned business were:

For conducting transportation	$1,192,485 87
For motive power	1,488,633 48
For maintenance of railway	1,382,384 72
For maintenance of cars	505,342 63
For general expenses	844,725 87
Total, (67⅛ per cent. of earnings)	$4,863,572 07
Net earnings of Main Lines	$2,378,553 89
Net earnings of Main Line, 1866	2,319,531 02
Increase	$59,022 89
The earnings of the New Castle Br., 15 miles, were	$184,207 31
Of which was paid to N. C. & B. V. R. R. Co., 40 per cent	73,682 84
P., F. W. & C. Railway Co.'s proportion	$110,524 47
From which deduct the expenses	55,180 54
Leaves as net profit to this company	$55,343 93
Profit for 1866	55,460 56
Decrease	$116 63

Since the date of the last Annual Report, the Lawrence Railroad, extending from Mahoningtown, about two miles south of New Castle, Pa.,

to Youngstown, O., has been completed and opened for business, under the management of this company. No permanent contract has yet been made for the operating of that road, your board deeming it best to defer making such contract until there has been a more full development of the business and capacity of the line.

The business done upon the road (21 miles,) to December 31, has been settled by charging against the earnings the expenses of operating and maintaining the road and equipment in use upon it, together with a reasonable sum for the use of such equipment.

The earnings of this Branch from March to December, 1866, were		$11,587 93
And during the year 1867		72,533 09
Total to December 31, 1867		$84,121 02
The expenses were:		
From March to December, 1866	$5,310 48	
And during the year 1867	27,956 14	
		33,266 62
Net		$50,854 40
Deduct amount paid to Lawrence R.R.		32,598 52
Leaves as profit to this company		$18,255 88

The business on this branch has steadily increased, and from the time of its completion through, its increase is much beyond the expectations of the officers of the road, and would appear for the last six months of the year to have been limited only by the deficiency of the particular class of equipment necessary for the trade originating upon it.

Considerable expenditure is yet necessary to effect a desirable entrance into Youngstown, O., the present terminus of the road, the entrance now being accomplished temporarily over the track of the Cleveland and Mahoning Railroad, leased by the Atlantic and Great Western Railway Company.

The Akron Branch, 61 miles in length, from Hudson, O., to Millersburg, O., has continued to be operated as a separate organization from that of this company, under the careful and judicious management of Col. Simon Perkins.

Its earnings during the past year were		$160,287 17
And the expenses were		135,404 98
Profit		$24,882 19

This amount, after paying the interest on the mortgage debt, subject to which this company purchased the property, has been used partly towards extending the road, and partly in the purchase of the bonds, secured by such mortgage. The amount of the bonds has, in this manner, been reduced from $200,000 to $160,000.

Reference was made in the last report of your board to the arrangements for the extension of this road from its terminus at Millersburg to the bituminous coal fields, a few miles south of that place, and it was confidently expected to have the track down and ready for use before last autumn, but unforseen difficulties on the part of the coal company engaged in opening mines, and which prevented it from laying down its tracks, rendered it unnecessary to hasten the putting down the track of our extension until the coal company was ready to make a connection.

The track, however, at the date of writing this report, is being laid, and a large coal traffic over the entire line to Cleveland may soon be reasonably expected.

The expenditures during the year for this exsion were $27,745 63.

A summary of the company's financial operations will show the following result:

Profit in operating Main Line		$2,378,553 89
Profit in operating New Castle Br.		55,348 93
Profit in operating Lawrence Br.		18,255 88
Received of purchasing committee of old organization		80,000 00
Total net revenue		$2,532,153 70
This sum has been appropriated to interest on mortgage debt	$864,074 74	
Sinking fund	104,100 00	
Interest on bonds taken up by Trustees of sinking fund	22,475 26	
Cleveland and Pittsburg R. R. Co. under contract for division of earnings	170,903 77	
Dividends on stock, (10 per cent.)	1,034,375 00	
U. S. tax on same	54,441 31	
		2,250,370 08
Surplus		$281,783 62
Add amount stated in last Annual Report, as balance of previous years' operations	$199,918 53	
Less cost of purchase of Akron Branch, erroneously included in this sum—See Fourth Annual report	179,829 40	
		20,089 13
Proceeds of issue of 15,000 shares of new stock authorized by the stockholders in May, 1867		1,216,060 02
Total means applicable to improvements, etc.		$1,517,932 77
Appropriated as follows:		
Extension of Akron Br.	$27,745 63	
Less contributed by earnings of that road	5,200 00	
	$22,545 63	
New construction & equipment for Main Line	963,895 60	
Indebtedness liquidated existing prior to Jan. 1, 1867	338,798 14	
		1,245,239 37
Balance unexpended		$192,693 40

By comparing the earnings of the Main Line with those of 1866 it will be found that the revenue from freights has fallen off $223,965 70, of which $170,307 11 occurred in the local, and $53,658 59 in the foreign business, or that which emanates from, or is destined to points on other roads, and that may be reached by competing lines; that the revenue from passengers has decreased but the trifling sum of $2,882 31, which occurred wholly in the competitive travel, and that the revenue from miscellaneous sources decreased $2,360 34, while on the other hand there is shown an increase of $338 83 in the amount received from express companies, and $3,782 92 from rents of property, the aggregate decrease having been $225,091 60.

Although the earnings from transportation of freights exhibit the decrease above stated, the volume of business in this department was greater than in the previous year, for the tonnage carried increased 128,578 tons. Of this increase 103,151 tons was local, and 25,422 tons were foreign or competitive tonnage. The whole tonnage of the Main Line was: local, 671,348 tons, and foreign, 483,003. Total, 1,154,351 tons.

This apparent anomaly of a reduced revenue from an increased amount of tonnage is explained by three facts:

First—In the local business on the Eastern Division, where the entire increase of tonnage occurred, the average haul per ton was twenty per cent. less than in 1866. This was mainly occasioned by the large transportation of coal and pig iron to and from the New Castle and Lawrence Branches.

Second—In both the local and foreign business on the Western Division there was a reduced amount of tonnage, coupled with a less haul per ton.

Third—Owing to the general depression of business, and the consequent competition between the lines leading to the Atlantic seaboard, lower rates were established during the greater part of the year on the foreign or competitive tonnage.

The large increase of tonnage on the Eastern Division, amounting last year to 159,803 tons, or about twenty per cent., rather more than half of which was local to the road, and which is likely to be still further augmented hereafter by the growth of manufacturing on this division, and the development of the iron and coal interests on the New Castle and Lawrence Branches, which are tributary to it, indicates the necessity for increasing at an early day, the equipment of the road for this kind of traffic.

The following table will exhibit the kind of tonnage transported, classified under general heads, and compared with 1866:

	1867.	1866.
Products of the forest	115,317	93,266
Products of the animals	211,882	214,680
Vegetable products	152,975	192,149
Manufactures	207,512	186,250
Merchandise	136,692	108,751
Iron rails	38,270	25,959
Coal	205,553	158,382
Oil, cinder, &c	86,150	46,341
Totals	1,154,351	1,025,778

While the passenger earnings were in the aggregate but $2,882 31 less than in 1866, a comparison of the local and foreign travel with the same class of business in that year will show important changes.

For, while the number of local passengers increased 77,729, or seven per per cent., with an increased revenue of $107,027 89, the foreign passengers decreased 63,926, or a trifle less than thirty-one per cent., with a corresponding reduction in revenue of $107,910 20, which would have been much further reduced had not this class of travel averaged a greater number of miles per passenger than in 1866. The average mileage per passenger in 1866 was 218 miles, and in 1867, 293 miles.

The whole increase of revenue from local travel occurred on the Eastern Division, and ninety per cent. of the reduction in the revenue from travel also occurred on the same division.

These deductions from the accounts of the company, and a comparison of them with the results of previous years, would seem to establish three important facts bearing upon the future income of the road, which are that the local travel, generally, is steadily increasing in numbers and revenue; that the foreign travel is decreasing in numbers, and to a limited extent in revenue, principally from the effects of competition to southwestern points, which business has hitherto augmented the revenue of the Eastern Division, (Pittsburg to Crestline,) and that the foreign travel still possessed by the company is yet assuming a more valuable character, in that a larger income is received from a smaller number of persons carried, by reason of their journeys being for greater continuous distances.

The continued high price of labor and materials has prevented much of a reduction in the expenses of operating and maintaining the Main Line.

They will, however, compare favorably with other leading railways. A comparison with 1866 will show a decrease of $87,986 57 in conducting transportation; $129,562 56 in motive power; $47,567 87 in maintenance of cars; 130,849 18 in general expenses, and an increase of $111,851 71 in maintenance of way, in the aggregate a decrease of $284,114 47, or 5½ per cent. The foregoing, however, does not exhibit the true relative reduction in the expenses, as a larger volume of business was done, and consequently a greater amount of train mileage made.

In 1867, the train mileage was 4,723,603 miles, exeluding the mileage of wood and gravel trains, and in 1866 the amount was 4,574,204 miles, an increase of 149,399 miles. The aggregate expense per mile of trains in 1866 was $1.12 3, while in 1867 it was 1 03, showing a reduction of

.99 cents per mile, or at the rate of eight per cent.

This, therefore, is the true measure of the reduction in expenses during the past year, and the result certainly reflects credit upon the officers in charge of the line, especially when it is considered that the whole property has been much improved.

Acting upon the principle that the more perfect the track of a railway is, the greater the economy will be in the other departments of operation, continued efforts have been made towards the attainment of a more substantial road bed by large expenditures for ballasting. The amount thus expended and charged to repairs was $165,269 85. The continued rapid deterioration of the iron rails has rendered it necessary to continue the extensive renewals, which for the past five years have been the cause of such heavy drains on the income of the company. During the past year 116 miles have been relaid with new and re-rolled iron, equal to 25 per cent. of the entire length of the road, at a cost of $480,127 10.

The average renewal of cross ties has also been continued, 246,801 having been put in the track, equal to about 128 miles.

Since and including 1864, there have been 500 miles of track renewed with new or re rolled rails, and 400 miles with cross ties.

This is equivalent to a re-laying of the whole road with new iron every four years, and with new cross ties every four and two-thirds years.

This deterioration of iron rails must be attributed mainly to the increased weight of locomotives and cars that have of late years gradually, and almost imperceptibly, come into use; partly, in the case of the passenger business, from the necessity of running heavier trains at high speed, which require more powerful, and, therefore, heavier machines, to move them at the required speed, but, mainly, by reason of a prevalent idea, although mistaken, in the judgment of your board, that long freight trains, with greatly increased weight of motive power, are more economical upon the whole, than short and more numerous trains, and lighter locomotives.

It is not the purpose of your board to enter now upon the discussion of the subject, involving, as its correct elucidation does much time and labor in the preparation of the necessary data by research and experiment, and patient and judicious reasoning as to the conclusions to be drawn from given results. The subject is merely introduced at this time, in connection with the proposition now generally favored among companies possessing a heavy traffic, of re-laying their roads with steel rails, to counteract, to a greater or less extent, the damaging effects of increased weight of motive power and cars. There can be no doubt from the nature of the metal that steel will resist the action of heavy trains longer than iron, but considering the much greater cost of steel, and viewed in an economical aspect, and in the light of the proposition previously stated, of reducing the dead weight, not only of locomotives, but of cars, also, especially those employed in freight traffic, and thereby reducing the wear of the rails, the repairs of the machinery, and the interest on the original outlay, together with the interest on the constantly increasing excess expended for repairs, the question may at least be considered unsettled.

Your board, however, as an experiment, authorized the purchase of three hundred tons of what are known as the Bessamer steel rails, and they were put in the track early in the past year between Pittsburgh and the shops of the company in Allegheny City, over which part of the road, locomotives and trains are constantly moving, although at low speed. Thus far no perceptible wear is reported by the General Superintendent, and during the time they have been laid probably two sets of the ordinary iron rails would have been so worn as to have rendered it necessary to replace them by new ones.

Your board have also authorized the purchase of one hundred tons of the Pennsylvania Steel Company, who have recently established works at Harrisburg, Pa. These rails have, at this date, just been delivered, and will be laid in the main track on one of the most difficult grades on the road, where a better opportunity will, probably, be offered for properly testing them.

The track, and especially the road bed and bridges, are in a better condition at this time than ever before, and it will be the policy of the officers in charge of the line, not only to keep them so, but still further improve their present condition.

Considerable extra expenditure has been made on the passenger equipment, to bring it up to the higher standard gradually being adopted on the through east and west lines. It will now compare favorably with competing roads. This class of expenditure must continue to increase, inasmuch as superior accommodations seem to be generally demanded by the travelling public.

The whole equipment is reported by the General Superintendent as being in good order, with less than the average amount undergoing repairs.

The expenditures for permanent additions to the railway have been as large as your Board expected, at the commencement of the year, to accomplish.

Of the whole amount expended for new work and additional equipment, $476,085 52 was done under the supervision of the Chief Engineer, and $487,860 08 under the direct authority of your Executive, and General Superintendent.

The details of these expenditures will be exhibited by the following table:

	Eastern Division.	Western Division.	Total.
Bridge masonry	$48,829 12	$26,402 94	$75,232 06
Bridge superstructure	80,110 14	23,288 53	103,398 67

The principal expenditures by the Chief Engineer have been for the completion of the new wrought iron bridges over the Allegheny River, and the south branch of the Chicago River; the addition of ten stalls to the engine house at Crestline; grading for new coach shop and new line in Allegheny City, and the new line at and near Wallace Run, including the filling for the ravine at that place, also at Hog Creek, near Lima, O., and at Deep River, near Hobart, Ind.; completing six additional station buildings, hitherto reported in progress, and commencing the erection of four others, and completing and bring into use eleven new water houses.

The completion of the Allegheny River bridge is a great relief to the anxiety heretofore experienced by the managers of your property, on its account, in connection with a possible interruption of the company's business by reason of its liability to destruction by fire. The present structure is a double track bridge, the superstructure of which is built wholly of wrought iron, excepting the floor beams and bed plates, and the nine spans of which it is composed have an aggregate length of 1,172 feet, being little less than a quarter of a mile, and has cost, including the necessary additional masonry, $540,000, of which $139,787 84 has been charged to ordinary repairs, that amount being the estimated cost to renew the bridge on the original plan of the so-called "Howe Truss." The existing structure was designed by Mr. John B. Jervis, the late Chief Engineer, assisted by Mr. F. Slataper, one of the present Engineers of the company who has personally superintended its erection, and is known as the latticed girder plan with vertical stiffenings. It combines great strength with simplicity of construction, and will rank among the important works of the kind in the United States. Your board is not aware of another in this country, although the plan is extensively used, in modified forms, on the German, Italian and Russian Railways.

The bridge over the south branch of the Chicago River is also an important structure, and was completed in time for the opening of spring navigation. It was re-built of wrought iron after the "Pratt Truss" plan, with Linville and Piper's improvements. It is a single track bridge 227 feet long, and cost $78,500, one-half of which was borne by the Chicago and Alton Railroad Company, who use it in common with this company.

It will be noticed that considerable expenditure has been made for station buildings, although not as much as the needs of the road would warrant. The deficiency in this respect is still great, especially west of Crestline, and large outlays are still necessary to meet the growing demands of the public, and to conduct the increasing business of the company with economy.

The Chief Engineer and his Assistants have, in the work committed to them, exhibited professional skill, as well as judgment and economy, and you are referred for fuller details of expenditures in this department to the report of the Chief Engineer, which will be found both interesting and instructive.

The expenditures for new work and equipment by the General Superintendent have been mainly on the latter account. Of the locomotives added eight were purchased of Messrs. Baldwin & Son, of Philadelphia, and one built at the company's shops which will compare favorably, both as regards cost and quality, with those purchased at outside works. Two new coaches, with five compartments, each of which will accommodate six persons, have been built at the company's shops at Fort Wayne, according to plans originated by the company's master mechanic.

These coaches are intended to be run through between Jersey City and Chicago without change, and to be used both as day and night cars, and were put permanently in service in December last. They have recently been sold to the Central Transportation Company, the owner of the sleeping coaches at present running between Chicago and Philadelphia and Jersey City.

The experience thus far had with them would seem to indicate their success, as they combine increased comfort with privacy, and are admirably adapted to families, or parties making long journeys. The Central Transportation Company propose adding four more to complete the requisite number for the line.

Besides these coaches, six new baggage cars have been added to the passenger equipment, and one hundred box, and one hundred stock, and one hundred flat cars, one caboose, and one market car to the freight equipment. The total expenditure for additional equipment was $450,752 76.

This portion of your property now consists of the following:—199 locomotives; 93 first-class coaches, 26 second-class coaches, 28 baggage cars, 7 mail cars, 19 express cars, 1 pay-master's car, 1 directors car, 1,157 box freight cars, 542 stock cars, 885 flat cars, 6 market cars, 94 caboose cars, 8 tool cars.

The relations of this company with connecting roads and lines have not been materially changed during the past year excepting an arrangement

for the working of the St. Louis, Alton and Terre Haute Railroad for a period of ninety nine years, jointly with the Indianapolis and Cincinnati Railroad Company, and the several companies owning the three roads between Indianapolis and Erie, Pennsylvania. The companies agreeing to work the road are to pay thirty per cent. of the gross earnings until they reach $2,000,000 per annum, and twenty-five per cent. of the gross earnings which exceed $2,000,000, and less than $3,000,000 per annum, and twenty per cent. on all gross earnings over $3,000,000 per annum, and have guaranteed to the St. Louis, Alton and Terre Haute Railroad Company a sum of $450,000 a year under the arrangement. The condition of their property at the time the arrangement was made was such as to require some advances on the part of this and the other companies to put the track and equipment in a condition so as to realize profitable results. This is being done, and will be continued to some extent, during the current year, after which it is believed that the road will yield a profit to the companies working it.

The object of your board of directors in entering into the arrangement for operating the St. Louis, Alton and Terre Haute Railroad was to harmonize all interests east of Indianapolis in the working of the single line of road from Indianapolis to St. Louis, in such way as to give to the several roads and lines east of Indianapolis their several fair and equitable proportions of the business east from St. Louis by this route, and at the same time remove all temptation from the parties in an effort, each for itself, to get an exclusive contract of the single railway line west of Indianapolis. For nearly a year previous to the consummation of the arrangement each of the lines of road north and south of your road had been engaged in efforts to obtain exclusive control west of Indianapolis, the effect of which, if accomplished, would have been to cut this company off from all St. Louis business excepting by the way of Chicago. When, therefore, the plan was suggested to your board of directors to join with all the other interests in an arrangement for working the line between Indianapolis and St. Louis for the common benefit on an equitable basis, it seemed so eminently to the interests of this company, as well as to all, that they did not hesitate to commit this company to the plan. Unfortunately before the final signing of the papers, and the formal taking possession of the property, the Pennsylvania Railroad Company withdrew from the arrangements for reasons which the other parties were not, and have not yet been able, to appreciate, and consequently they were unwilling to adopt them, and thus break the pledge entered into by them with the St. Louis, Alton and Terre Haute Railroad Company. It is hoped, as it is very desirable, that the Pennsylvania Railroad Company will yet join in the arrangement, and thus harmonize all interests as was originally designed.

The managers of the Grand Rapids and Indiana Railroad Company, whose road is to connect with your line at Fort Wayne, have completed and brought into use during the past year twenty miles of road, and have a large force at work on the forty-eight miles lying between Kalamazoo and Grand Rapids, Michigan, which it is expected to complete and bring into use this year. The completion of this road from Fort Wayne to the Straits of Mackinaw, through the best portion of the State of Michigan, will add largely to the business of your line. Your board had hoped to be able to inform you in this report that the American Central Railway Company had completed some portion of their road during the year. But owing to the European parties with whom they had contracted failing to comply with their engagements, the whole of last year was lost in the prosecution of their work. Relying now more upon the local means and energies of the country, as well as upon new European parties who have come into the enterprise, the executive officers express confidence that the work will now go rapidly forward to completion. This line is to be built on a route practically east and west from Fort Wayne to Omaha, five hundred miles in length.

The legislative restrictions upon the Pittsburgh and Connellsville Railroad Company have recently been removed, so that the only delay in the completion of that road to Cumberland, and thus, with the Baltimore and Ohio Railroad Company, make the shortest route from Pittsburgh to Tide Water, will be in obtaining the pecuniary means to accomplish it. As the Baltimore and Ohio Railroad Company has the controlling interest in the stock of the Pittsburg and Connellsville Company, and owns the 180 miles of the eastern end of the line to Baltimore, which will be greatly benefited by the new business brought upon it by the completion of the road to Pittsburg, she will doubtless take immediate and efficient steps to effect the completion of the ninety miles of unfinished work between Connellsville and Cumberland.

The marked characteristic in railway policy the past year has been to the aggregation of capital and roads, and this policy is likely to continue through the current year. Within certain limits the policy is well enough both for the interest of shareholders to secure permanent income, and for the public to bring the leading avenues under such a unit of management that they can be worked with greater efficiency and economy, and thereby better serve the purpose of the public. The objectionable feature to this aggregation is the rapidity with which the controlling interest in these great corporations change ownership, without consulting the wishes or interest of minority holders, and sometimes without any considerations of public policy. Your board of directors have avoided all such alliances and combinations, excepting in the case of the St. Louis, Alton and Terre Haute Road, heretofore noticed, and which cannot be regarded as of the character just described.

The greatest harmony and active co-operation exists in all the various departments of the road, thereby developing to the fullest extent the capacity of the property, and causing it to yield the largest income from its business at the rates which were obtained. To the General Superintendent and his chief officers this result is primarily due; and the board also desires to commend the subordinate officers and employees generally for the faithful manner in which each in his respective sphere discharged his duties.

Respectfully submitted.

By order of the Board of Directors.

GEO. W. CASS, *President.*

Pittsburg, March 18th, 1868.

Intercolonial Railway.

The great topic in the capital at present, is the Intercolonial Railway. The rumors of differences of a grave character in the Government on the location of the route, have not been exaggerated. Two weeks ago the troubles were so great, that a rupture was imminent, and although there is a temporary truce until a further survey is made of part of one of the frontier lines, still the battle is only postponed, not ended. It is rumored—in fact it is well-known by those best informed—that two or three companies of eminent capitalists have offered to construct and keep open two of the proposed frontier lines for a comparatively moderate bonus. The Government have offers to build that portion of the frontier line from River du Loup to Woodstock—about 200 miles—for a bonus of $6,000,000; there has also been another offer made to construct a line which will run on the east side of the St. John River, and at least ten miles from the American frontier, for a bonus of $8,000,000. According to a carefully prepared printed document put in my possession, the cost of three different lines is set down as follows:

Major Robinson's route.	$21,716,540
Line from River du Loup to Woodstock	11,500,000
Direct line from River du Loup to Fredericton	13,500,000

The first estimate is that of Major Robinson, the latter two are made out in accordance with the offers of the private companies referred to above—adding on in each case the sum of $5,200,000, the estimated cost of the Nova Scotian section from Moncton to Truro, and $300,000 for land damages, fencing, &c. There is every reason to believe these figures are pretty nearly correct, and they certainly show that an immense saving can be made by the Government choosing either of the lines running near the frontier. According to the same statement, there would be a large saving in the annual expense by taking either of the lines referred to, in preference to the North Shore line. The figures given are as follows:

Annual charge of	Robinson line	$1,255,094
"	Woodstock line	464,600
"	Fredericton line.....	545,000

This statement is made up by taking the interest on the capital expended on each line as given above, with a small sum for commission, but adding in the case of the Robinson route $234,000 on the probable loss which would annually accrue to the Government in running it. As the other lines would be in the hands of the companies who offer to make the roads for the bonus mentioned, the Government could come to no loss, as these companies are perfectly reliable. I have very little hesitation in expressing a belief that the Fredericton could be made for about $7,500,000 less than the North Shore, whilst the annual charge would not be over one-half as much! It is this line which Mr. Fleming has received orders to survey, and to obtain which the Government has decided to postpone the final decision of the question.—*Ottawa Cor. Montreal Trade Review.*

Western Maryland Railroad.

At a called meeting of the stockholders of this road held in Baltimore on the 2d inst., the following board of directors was chosen: G. S. Haines, Joshua Biggs, John Welty, Isaac Motter, and P. P. Pendleton. Wendell Bollman, Esq., was subsequently elected president. From a statement made by the retiring president, it appears that the original contract for building the road was $1,597,000 including the construction of a tunnel. The tunnel was subsequently avoided, thereby reducing the cost to $1,447,000. From the sale of securities $641,000 have been realized. Three-fourths of the graduation and masonry of the road have been completed. Railroad iron, spike and cross ties for seven miles have been purchased at a cost of $56,256 72. Three miles of track have been laid from Union Bridge to Middleburg, and paid for in bonds at 90 cents; and four miles further, to Double Pipe Creek, will be finished in 30 or 40 days. To raise the means to complete the road to Hagerstown, 39 miles, it is proposed to waive the priority of a mortgage for $600,000, held by the city of Baltimore and Washington County in favor of another mortgage to be given for $500,000. Three laws had been passed by the Legislature in favor of the road—the first being for the extension of time for the completion of the road for five years from the 15th of March, 1868; the second to authorize the Washington county commissioners and the city of Baltimore to postpone the liens on the road for the purpose of letting in a mortgage for $500,000, with which the road will be finished to Hagerstown; the third law is to enable the company to issue any part of $1,000,000 of bonds in the event of the liens spoken of being postponed.

☞ The bill authorizing the construction of a bridge over the Ohio River to connect Cincinnati with Newport, passed the Legislature of Ohio on the 3d inst. The span over the main channel is to be 300 feet in length, and 100 feet above low water. The adjoining spans each 200 feet long.

American Railroad Journal.

Saturday, April 11, 1868.

Stock Exchange and Money Market.

After a fortnight of unequalled stringency in Money, we gladly note a decided relaxation in the local market, which has been developing advantageously for responsible borrowers, since the city banks finished on Friday last their preparations for the quarterly statement of Monday. There has been an encouraging increase in the offerings of capital, especially on private account, which circumstance has had the effect of arresting for the present season at least all temporary negotiations on an usurious basis. Call loans have settled down to 7 per cent., as the controlling street figure. Some of the more prominent dealers in the public funds have been accommodated, within a day or two, at the minimum price of 6 per cent.; but this has been an exceptional quotation. The tendency of rates, however, is unmistakably downward. A better inquiry has been experienced for prime business paper which closes at 7@8 per cent. per annum, on a comparatively moderate supply. The city banks, last week made a further exhibit of loss in their leading averages, but the return proved less unfavorable than had been anticipated. The deposits fell off some 5½ millions, or to $180,956,846, against $217,844,648 on the 8th of February, showing a decrease of nearly 37 millions in nine weeks, or an average loss of over four millions a week. The loans were reduced some three millions, or to $254,287,891, as against $271,015,970 eight weeks previously. The changes in the other items were not important. The banks held at the close of the week some 13 per cent. more of legal tender reserve, than even the law required them to hold. The U. S. Sub Treasury reduced its cash balances last week, nearly four millions, or precisely $3,879,076. It disbursed over four millions, on account of retired Seven-Thirties, which had been bought in by the office, in anticipation of their maturing a few months hence. The Treasury Department closed the month of March with a cash reserve of $122,509,645, including $99,279,617 in coin, and $23,230,027 in currency. This cash reserve was $5,867,812 less than that in the Treasury a month previous, which amounted to $106,623,374 in coin, and $21,754,082 in currency, or an aggregate of $128,377,457. The outstanding volume of plain legal tender notes on the 1st inst. was $356,144,727, against $353,157,747 on the 1st ult. Less than a quarter of a million of matured or maturing compound interest notes were redeemed during March. The amount of coin in the Treasury decreased during the month $7,343,757. The amount of currency was increased $1,475,948.

The specie reserve of the city banks is now $17,097,299, against $8,138,813 same time last year. The city bank deposits are now $180,956,846, against $183,861,269 week ending April 6, 1867. The legal tender reserve amounts to $51,709,706, against $59,021,775 same time last year. The circulation now stands at $34,227,108, against $33,774,573 same time last year. The loans are now $254,287,891, against $254,470,027 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $94,630,523 a day, against a daily average of $92,974,000 the preceding week, and $108,247,067 the week ending with Mar. 21, 1868. The current week's exchanges average about $100,602,205 a day. The city banks, last week, lost $413,372 of legal tender, $5,568,282 in the deposit line, and $226,068 of their specie reserve. They reduced their loans, $3,090,356; and increased their circulation, $36,300.

The Philadelphia Bank movement the past week shows a decrease in loans of $1,241,644; an increase of $22,977 in specie; a decrease in legal tenders of $1,139,766; a decrease of $1,150,271 in deposits; and a decrease of $936 in circulation. The Bank Clearings show an increase of $3,955,356, and the balances, an increase of $1,076,984.

National Bank notes to the amount of $119,840 were issued last week, making the total issue to 1,673 banks thus far, $307,139,931, against $282,555,440 at the close of the fiscal year ending

June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $7,378,109, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,845,790,) an actual circulation at this date, of $299,761,822. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,643,400; and for the public deposits, $38,127,950—making a total of $379,771,350. The Treasury Department last week redeemed and destroyed $495,000 of worn and mutilated fractional currency, and issued $401,000 of new. The outstanding amount of fractional currency on the 1st inst. was $32,588,690, against $32,307,947 on the 1st of March, and $32,246,489 on the 1st of Feb. 1868.

The U. S. Sub-Treasury receipts, week ending with April 4, were $20,292,279, including $2,545,341 from customs duties; payments, $24,171,355, including $75,000 of coin interest; balance at the close of the week, $97,934,551, against $101,813,627 at the close of the preceding week, showing a decrease of $3,879,076. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $5,397,293 including $340,239 from customs; and payments, $5,084,849; on Tuesday, receipts, $5,220,282 including $346,470 from customs, and payments, $3,384,347. The balance at the close of business on Tuesday stood at $100,082,930, against $98,161,867 a week previous; and $101,453,094 on March 22, 1868.

Of the cash in the Treasury on the 1st inst., amounting to $122,509,645, the Sub-Treasury office in this city held $98,161,876.

The aggregate issue of coin certificates by the U.S. Sub-Treasury, in this city, up to date of latest published local report was $245,869,740; aggregate redemptions, $209,565,000; leaving outstanding certificates to the amount of $35,804,740. The latest report from the national capital made the outstanding amount of coin certificates on the 1st of April $17,742,060 against $25,699,360, on the 1st of March, and $29,619,280 on the 1st of February, 1868. The Sub-Treasury issued $3,124,020 of coin certificates in March. It reported an issue, last week, of $3,901.000 of these certificates.

Government revenues are again yielding quite satisfactorily. The excises, last week, yielded $5,858,705 against about two millions the preceding week; customs at the port of New York, $2,545,341 and at the outports, about $850,000 (in coin) more, making the grand total income for the week equal to about $10,527,200 in currency. The total receipts of the National Treasury, from excises, thus far in the new fiscal year, which began on the 1st of July, have been about $149,000,000.

Government received from customs, through the port of San Francisco, from Jan. 1, to March 7, 1868, $1,419,090.

Gold has been without much animation or buoyancy since our last. The speculative and export demand has been on a very moderate scale. The customs inquiry has been up to a fair average. Government has been marketing coin to some extent, probably to nearly the aggregate of its receipts from customs. It believed that the sales made on account of the Department last month, reached seven million dollars. The coin reserve of the Treasury showed a reduction of $7,343,757 for March; while a liquidation of some $7,957,300 of coin certificates was reported for the same month. The coin reserve on the 1st inst. was $99,279,617, including $17,742,060 represented by outstanding coin certificates; against an aggregate coin reserve of $106,623,374 on the 1st ult., of which $25,699,360 were represented by coin certificates. The range of the price of gold in this market, during the week, has been from 137⅝@138½. The latest figures were 138¼@138⅜. The *China* on Wednesday carried off $190,112 in specie, for Liverpaol.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $1,945,275, against $477,340 same time last year. The customs demand for Gold last week, averaged $424,223 a day; thus far, this week, it has been equal to $343,355 a day, or equal to a weekly aggregate of $2,060,130. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $157,826 and from California, none. The total customs revenue of the Government, in coin, at this port, thus far, in the current fiscal year, commencing with July 1, 1867, has been $86,632,202, against $97,900,132 same time in the preceding fiscal year. The total receipts of California gold at this port, thus far, in the current fiscal year, commencing with July 1, 1867, have been $25,606,487, against $32,197,065 same time in the preceding fiscal year, showing a decrease of $6,590,578 in 1867–'68. The exports of specie from this port, last week, were $1,281,052, against $500,618 same week last year. The exports of specie, hence, since July 1, 1867, have been $43,519,475, against $23,952,718 same time in 1866–'7. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $75,000, and since July 1, 1867, $54,451,162, against $36,481,964 same time in 1866–'7. The specie exports from San Francisco, from Jan. 1, to March 7, 1868, were $7,034,562, against $7,321,281 same time last year.

Foreign exchange has shown less activity, without much change in the ruling prices. Bankers' prime sixty day bills on London closed on Wednesday at 109⅜@109⅝, and on Paris to 5.18¾c. @5.15; sight bills on London to 109⅞@110⅛, and on Paris to 5.14¾c.@5.12½. The offering of produce bills have been quite liberal this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $4,731,689, against $4,392,123 same week last year; total, since July 1, 1867, $138,387,519, against $150,165,794 same time in 1866–'67.

Government securities rallied sharply toward the close, on a decidedly brisk investment demand stimulated by the relaxation in the money market, and the unexpectedly favorable debt exhibit for April 1. At the improved prices, on Wednesday, the offerings of both bonds and notes were very moderate. The Six per cent. coin bearing bonds were quite scarce. Less than nine millions of the loans of 1847–'48 now remain to be redeemed. Sixes of 1881 are difficult to procure in round lots. The outstanding aggregate is now $283,677,150, or about the same as on the 1st of March. Five twenties of all issues are much less freely offered than they were during the money pressure. The department added $17,083,800 to the aggregate issue, during March, making the total now outstanding $1,424,405,600, against $1,407,321,800 a month ago. Ten-forties are in reduced supply in the open market. The outstanding issue of Ten forties on the 1st inst., was $187,442,450, against $185,762,400 on the 1st of March. Seven thirties have been disappearing from market. Private holders of round lots have been confidently looking for higher figures and have not been offering to sell any considerable amounts. The Treasury Department has been retiring notes, quite energetically. It bought in, or converted, some $17,067,000 worth of the notes during March, leaving the outstanding aggregate on the 1st inst., $185,884,100, against $202,951,100 on the 1st ult., and an original issue of 830 millions, showing that about 644 millions of this great temporary loan have been funded ahead of maturity, under Secretary McCulloch's administration of the National finances. Compound Interest Notes have been in very light supply. The unliquidated balance of the notes is only $46,010,530, against $46,244,780 on the 1st of March. There has been an increased call for the three per cent. certificates which the Secretary has decided are payable only in legal tender notes, thus making them eminently desirable for banking purposes. The aggregate is now $26,290,000.

U. S. sixes of 1881 closed here on Wednesday at 112¾@113; U. S. Five-twenties of 1862, 111¾@111⅞; U. S. Five-twenties of 1864 at 109⅞@110⅛; U. S. Five-twenties of 1865 at 110¼@110⅜; U. S. Five-twenties of 1865, consolidated, 108⅛@108⅜; U. S. Five-twenties of 1867, 108½@108⅝; U. S. Ten-forties at 102½@102⅝, and U. S. Seven-thirties at 107@107¼. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

May, 1865 .....118¼	September, 1865..116¾
August, 1865....117¼	October, 1865....116¼

U. S. three per cent. certificates 100¼

Government paid off $474,550 of the matured loan of 1847–'67, in February.

Railway and miscellaneous share property has been less freely dealt in, and has been less variable in price, as a rule, pending the issue of the legal and legislative conflict on the Erie and Central lines. The general market closed dull and weak on Wednesday.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Mar. 25.	April 1.	April 8.
Consols..... .....93⅛	93⅛	93⅜
U.S. 5-20's of 1862....72¼	72⅛	72¾
Erie..... ....46½	48⅝	48½
Ill. Central..... .....89¾	89⅛	95

General business has shown a little more activity in a few branches, mainly in provisions, in which there have been some vigorous operations, largely on speculative account, at improved prices. Breadstuffs have been in less demand and heavy. Cotton has been variable in price, and decidedly less sought after, closing 2 cts. off the highest figures of the week. Middling upland cotton closed tamely at 28 cts., per lb. The stock of cotton now here is estimated at about 85,000 bales. The receipts at the port this week, have averaged about 2,000 bales a day. The re-

ceipts at all the ports, since Sept. 1, 1867, have been 1,976,000 bales, against 1,581,000 bales same time last year; exports, same time 1,327,000 bales, against 1,038,000 bales same time last year; stock on hand at latest dates, 815,000 bales, against 552,000 bales same date last year. At the Live Stock markets this week, Beeves have been in more demand at a shade firmer prices, ranging from 14@20c. per lb.; week's receipts, 4,515. Veal calves, were quiet and heavy, selling down to 8@11½c. per lb.; receipts, 1,907. Sheep and lambs in active demand and firm at from 6½@10¾c. per lb.; receipts, 16,315. Swine dull and lower at from 8@9¼c. per lb., all live weight; receipts, 12,392. Foreign merchandise has been in moderate request at about former rates. The total imports of foreign dry goods, last week, were $2,067,307, and the total amount marketed $2,414,506. The value of foreign merchandise imported last week, was $3,633,918—making the grand total specie value of last week's imports of dry goods and merchandise, equal to the unusually large sum of $5,701,225, against $4,759,407, same week last year; total since July 1, 1867, $178,337,378, against $205,823,344 same time in 1866–'67. The ocean freight market has been moderate and active, but quite irregular, since our last. For Liverpool we quote flour at 1s. 9d.@2s. by sail, and 2s. 6d.@3s. by steamer, per bbl.; grain at 3¾d.@4d. by sail, and 5½d.@6d. by steamer, per bushel; cotton at 5/16@⅜ by sail, and ⅜@5/8 by steamer, per lb.; and heavy goods at 20s.@35s. by sail, and 25s.@40s. by steamer, per ton. Total number of vessels in port on Wednesday 476.

The New York exports, exclusive of specie, for the week ending April 7, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week.....	$4,392,123	$4,731,689
Prev. reported.....	51,082,034	42,462,945
Since January 1.....	$55,474,157	$47,194,634

The New York imports for the week compare as follows:

	1867.	1868.
Dry goods	$1,714,385	$2,067,307
Gen. merchandise.....	3,045,022	3,633,918
Total for the week.....	$4,759,407	$5,701,225
Previously reported....	63,114,364	55,627,198
Since January 1.....	$67,873,771	$61,328,423

The balance in the Sub-Treasury on Wednesday was $101,031,892 39.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Marietta and Cincinnati Railroad.

Such is the increase of business on this road, in both freight and passengers, that it will be compelled to build at an early day its independent track down and through Mill Creek Valley. The Baltimore and Ohio Railroad now having a deep interest in this road's welfare, has commenced the reironing of the entire track. The proposed track through Mill Creek Valley will have its line west of and parallel with the present bed of the creek, thus proving a valuable nucleus to the filling up of Mill Creek Valley.

☞ Messrs. Kasson & Co., 62 Broadway, N. Y., have for sale four new first class locomotives and tenders—two of which are 4 feet 8½ inch gauge, and two of 5 feet gauge, 16×24 cylinders, and 5 feet drivers. Also, one locomotive 4 feet 8½ in. gauge in perfect repair, 15×20 cylinder, 5½ feet drivers. Messrs. K. & Co., have for sale Railroad Iron, Locomotives, cars, chairs, spike, and Railroad Material of every description.

Railroad Earnings.—Weekly.

The earnings of the Chicago and Northwestern Railroad for 4th week in Mar., 1868. $292,555 21
Corresponding week previous year .. 257,803 85

Increase $34,751 36

The earnings of the Chicago, Rock Island and Pacific Railroad for the fourth week in March, 1868 were. $74,900 00
Corresponding week of previous year.. 57 759 00

Increase $17,141 00

The earnings of the Atlantic and Great Western Railway for the fourth week in Mar., 1868, were..... $119,489 00
Corresponding week previous year... 109,092 00

Increase $10,397 00

The earnings of the Western Union Railroad for the week ending Mar., 31, 1868.... $16,707 42
Corresponding week previous year.... 10,541 47

Increase..... $6,165 95

The earnings of the Chicago and Alton Railroad for the fourth week in March, 1868, were..... $68,859 95
Corresponding period previous year .. 56,825 42

Increase $12,034 53

The earnings of the Michigan Southern and Northern Indiana Railroad for the 4th week in Mar., 1868, were..... $136,361 00
Corresponding week of 1867 ..... 116,543 00

Increase..... $19,818 00

The earnings of the Toledo, Wabash and Western Railroad for the 4th week of March, 1868, were..... $91,113 75
Same week in 1867..... 87,910 84

Increase $3,202 91

The earnings of the Detroit and Milwaukee Railroad for the fourth week in March, 1868, were $33,466 36
Corresponding week of 1867 ..... 30,127 19

Increase $3,339 17

Hannibal and St. Joseph Railroad.

In addition to the extensive improvements which have recently been made upon this road, the company have just decided to expend $1,000,000 more during the present year in purchasing and putting down new iron. This amount will lay at least forty miles of track, and when once down the road will have been nearly or quite reironed. The company has just received one of the eight new locomotives ordered from the Manchester Works, and the others will arrive shortly. Two new and elegant passenger coaches have just been turned out from the company's works at Hannibal, and four more are in process of completion. By the 15th of April a fast train will be run between St. Joseph and Chicago, reducing the time to twenty one hours—eleven hours from St. Joseph to Quincy, and ten hours from Quincy to Chicago.

☞ The *Eastern Shoreman* states that the Pocomoke and Wicomico Railroad, passing through portions of Wicomico and Worcester Counties, Md., will be completed and ready for freight and travel about the first of May.

☞ The Governor of Pennsylvania has sent to the House his veto of the Free Railroad bill recently passed. He declares it to be unconstitutional, and giving extraordinary powers by authorizing railroad companies to increase their capital stock without limit.

(a) Leased to Lehigh Coal and Navigation Company, from Jan. 1, 1867.

The Public Debt.

The following is a comparative statement of the Public Debt of the United States March 1, and April 1, 1868:

	March 1, 1868.	April 1, 1868.
DEBT BEARING COIN INTEREST.		
Five per cent. bonds	$212,764,400.00	$214,464,450.00
Six per cent. bonds of 1867 and 1868	9,378,191.80	8,903,641.80
Six per cent. bonds of 1881	283,676,600.00	283,677,150.00
Six per cent. Five-twenty bonds	1,407,321,800.00	1,424,405,600.00
Navy pension fund	13,000,000.00	13,000,000.00
Total	$1,926,160,991.80	$1,944,440,841.80
DEBT BEARING CURRENCY INTEREST.		
Six per cent. bonds	$22,470,000.00	$23,582,000.00
Three-year compound interest notes	46,244,780.00	46,010,530.00
Three-year seven-thirty notes	202,951,100.00	185,884,100.00
Three per cent. certificates	25,585,000.00	26,290,000.00
Total	$297,250,880.00	$281,766,630.00
MATURED DEBT NOT PRESENTED FOR PAYMENT.		
Three years Seven-thirty notes, due Aug. 15, 1867	$1,519,600.00	$1,303,550.00
Compound interest notes matured June 10th, July 15, Aug. 15, Oct. 15, and Dec. 15, 1867	6,163,600.00	5,393,030.00
Bonds of Texas indemnity	256,000.00	256,000.00
Treasury notes, acts July 17, 1861, and prior thereto	159,661.64	158,611.64
Bonds, April 15, 1842	6,000.00	6,000.00
Treasury notes, March 3, 1863	616,192.00	616,192.00
Temporary loan	1,890,700.00	1,284,000.00
Certificates of indebtedness	19,000.00	19,000.00
Total	$10,630,153.64	$9,036,383.64
DEBT BEARING NO INTEREST.		
United States notes	$353,157,747.00	$356,144,727.00
Fractional currency	32,307,947.51	32,588,689.94
Gold certificates of deposit	25,699,360.00	17,742,060.00
Total	$414,165,054.51	$406,475,476.94
Total debt	$2,648,207,079.95	$2,641,719,332.38
AMOUNT IN THE TREASURY.		
Coin	$106,623,374.75	$99,279,617.68
Currency	21,754,082.36	23,230,027.34
Total	$128,377,457.11	$122,509,645.02
Amount of debt less cash in the Treasury	$2,519,829,622.89	$2,519,209,687.39

By comparing this with the statement of March 1, it is shown that the debt bearing coin interest has increased $18,279,850; the debt bearing currency interest has decreased $15,484,250; the matured debt not presented for payment has decreased $1,593,770 00; and the debt bearing no interest has decreased $7,689,577 57—making the decrease in the total debt since March 1, 1868, $6,487,747 57. The amount of coin in the Treasury during the same period has decreased $7,343,757 07, and the amount of currency has increased $1,475,944 98—leaving the amount of debt less cash in the Treasury April 1, $619,935 53 less than on March 1st.

☞ The grading on the Portland and Rochester Railroad is nearly finished to Alfred. The cars will run to that town on or before the 1st of July. Other towns west of Alfred are calling meetings to vote on taking stock.

☞ A survey is to be made for the extension of the New Bedford and Taunton Railroad to Hebronville.

Journal of Railroad Law.

LIABILITY AS COMMON CARRIER CEASES WHEN GOODS ARE DISCHARGED FROM THE CARS, AND STORED IN THE WAREHOUSE.

The facts in the late case of The Cincinnati and Chicago Air Line R. R. Co. *vs.* McCool sufficiently appear in the opinion of the court delivered by Chief Justice Gregory as follows:

This case was submitted to the Court below on an agreed statement of facts. Finding for the plaintiff, motion for a new trial overruled and judgment. The evidence is in the record. The defendant at the time &c., was a common carrier from Cincinnati to Kokomo. In October, 1864, the appellant received at the former, for transportation to the latter place, a barrel of whisky, the property of the appellee, of the value of $229 92. It was transported over the line of appellants railroad by the regular freight train. The train arrived at Kokomo at 8 o'clock in the evening, the usual and regular hour for the arrival thereof. The appellee resided in, and was at the time engaged in business, at the latter place. He was not at the depot on the arrival of the train, and the agents of the railroad company stored the whisky in the company's warehouse, situated on the side track of the road, at the station, as had been the practice and usage of the company for years, in such cases. No notice was given to the plaintiff of the arrival of the property, nor had he any such notice in fact, nor did he call at the warehouse to receive the same. The warehouse was securely locked and fastened, and left for the night. During the night, some person, to the parties unknown, crawled through a grain-shoot constructed in the warehouse, and with an auger bored through the barrel, whereby the whiskey was lost. The whisky was received at the depot in good order, and the warehouse was reasonably secure and safe.

After the whisky was discharged from the cars and placed in the warehouse of appellant, the liability was that of a warehouseman and not that of common carrier. Bansemer *vs.* Toledo and Wabash R. R. Co., 25 Ind. 434.

Under the facts the appellant is not liable for the loss of the whisky. Ordinary care was all that the law required. The Court below erred in over-ruling the motion for a new trial.

The judgment is reversed, and the cause remanded, with directions to grant a new trial, and for further proceedings in accordance with this opinion.

American Central Railway.

Articles of association have been filed in the office of the Secretary of State at Indianapolis for the incorporation of the American Central Railway company, with a capital stock of $3,000,000, in shares of $50 each. The proposed road is to run from Ft. Wayne to Macon, Marshall County, Ill., and will pass into or through the counties of Allen, Whitley, Kosciusko, Fulton, Pulaski, Jasper and Newton, in Indiana. The length of the road to the State line is about 120 miles. The directors for the Indiana division are: John S. Thompson, of Illinois, and Lot S. Bayless, Pliny Hoagland, Philo Rumsey, Sol. D. Bayless, Robert C. and William Fleming, of Ft. Wayne.

☞ The Welland Canal will be opened for navigation on the 15th of April.

Union Pacific Railroad, Eastern Division.

The annual meeting of the stockholders of this road was held at Lawrence, Kansas, on the 6th inst. From the reports of the directors and superintendent, which were read and approved, it appears that 335 miles of main line and 34 miles of branch road are in operation; that the increase last year was 199 miles, and that the average length of road operated last year was 260 miles. Total earnings, $1,888,858; net earnings, $606,-235; gross earnings per mile, $7,229. Twenty miles of additional track were completed last Saturday, thus taking the track to within 30 miles of Pond Creek, which point, it is expected the road will reach by the 15th of May. The indications are that the business this year on the extended road will be double that of last year. Directors were elected as follows: John D. Perry, Adolphus Meir, C. S. Greeley, W. M. McPherson, and Thomas L, Price of Missouri; W. H. Clement, and H. J. Jewett of Ohio; Thomas A. Scott and John McManus of Pennsylvania. John D. Perry was re-elected President; Adolphus Meir, Vice-President; C. B. Lamborn, Secretary; and W. J. Palmer, Treasurer. The company have 29 locomotives, 20 passenger and 771 freight cars.

Wilder's Railroad Guide.

We have received a copy of "Wilder's Official Guide of the Springfield Line between Washington, Baltimore, Philadelphia, New York, Boston, Portland and the East" for the month of April, 1868—containing: general rules and suggestions for travelers by this line; a table showing the difference between the time in the cities of the line; a Hotel Directory, giving the names and locations of the principal hotels, with the prices charged at each. Also, refreshments stations, location of depots, places of transfer, rates of fare for hackney coaches, and places of interest to visitors in the principal cities of the line. Through time tables between Washington and Portland are also given, and excellent maps of the cities of Boston and Philadelphia. It is published by David Clapp & Son, 334 Washington street, Boston, Mass.

☞ In 1860 a charter was granted to build a railroad from Easton to Miles River Ferry. Up to a short time ago no effort had been made to secure stock, but the Easton *Gazette* learns that steps are now being taken to push the matter through. The line will run from Easton to Easton Point, and from thence to Miles River Ferry.

☞ The Lebanon *Courier* says that the early completion of the Lebanon and Pinegrove Railroad can be regarded but as a question of time. The damages to landholders are about being settled and contractors are looking over the route, preparing to make their bids. The *Courier* will be greatly surprised if the work is not in full progress by the 1st of July.

☞ All the remaining portion of the Columbia and Port Deposit Railroad between the latter place and Octoraro creek has been contracted for by Messrs. Wendell & Coyle, who will immediately commence work upon it.

☞ An exchange says that the Hartford and New Haven Railroad interest has had the route of the proposed Connecticut Western Railroad viewed by a competent engineer, and offers to subscribe $600,000 to the stock.

Chicago, Rock Island and Pacific R. R.

Messrs. Clark Durant, Thomas C. Durant, Charles W. Durant, David Dows, and Thomas T. Sturgis, having resigned the directorship of this road, the following named gentlemen were elected in their stead: William F. Coolbaugh, J. W. Drury, George C. Campbell, E. A. McNair and B. F. Allen. John B. Drake was elected to fill a vacancy. The re-organized Board of Directors now stands as follows: John F. Tracy, John B. Drake, and William F. Coolbaugh, Chicago; Oliver Charlick, David Crawford, Jr., and Francis H. Towes, New York; Robert A. Forsythe, Newburgh; N. B. Curtis, Peoria; J. W. Drury, Rock Island; George C. Campbell, Ottawa, Ills.; E. A. McNair, and Ebenezer Cook, Davenport, Iowa; and B. F. Allen, Des Moines, Iowa.

☞ The West Jersey, and Millville and Glassboro Railroads have been consolidated under the law specially passed for that purpose.

PROPOSALS.

NOTICE TO RAILROAD CONTRACTORS.

OFFICE OF THE NEW YORK AND OSWEGO MIDLAND RAILROAD COMPANY, ONEIDA, N. Y., Feb. 10, 1868.

SEALED PROPOSALS WILL BE RECEIVED AT the Office of the Company, until the 15th day of April, 1868, at noon, for the GRADING, MASONRY, and BRIDGING of that portion of the NEW YORK AND OSWEGO MIDLAND RAILROAD, extending from the CITY OF OSWEGO to the VILLAGE OF SIDNEY PLAINS, a distance of ONE HUNDRED AND TWENTY MILES, and passing through the Towns of VOLNEY, HASTINGS, WEST MONROE, CONSTANTIA, VIENNA, LENOX, STOCKBRIDGE, EATON, LEBANON, SMYRNA, NORTH NORWICH, NORWICH, OXFORD AND GUILFORD, and that portion known as the Branch, from at or near EAST GUILFORD, in the town of GUILFORD, to MT. UPTON, in the same town.

The line will be divided into Sections of about One Mile each, and proposals may be made for separate Sections or for the Entire Work. The Company will entertain separate proposals for Bridging only.

The line passes through a desirable section of country of Central New York, and the work will be worthy of the attention of Contractors.

Plans, Profiles and Specifications will be ready for examination at the Office of the Chief Engineer, in Oneida, N. Y., where all necessary information may be obtained, on and after the 6th day of April.

D. C. LITTLEJOHN, President.
W. B. GILBERT, Chief Engineer.

POSTPONEMENT.

In consequence of the unfavorable weather for field work for the past three weeks, the above Letting will be Postponed until THE FIRST DAY OF MAY, AT NOON. Plans, Profiles and Specifications will be ready for examination as above noticed, on and after the 22d day of April.

Dated Oneida, March 20th, 1868.

D. C. LITTLEJOHN, President.
4t14 W. B. GILBERT, Chief Engineer.

Notice to Contractors.

PROPOSALS FOR THE GRADUATION AND MAsonry of the Nineteen Miles of the Knoxville and Kentucky Railroad not yet under contract, extending from a point two miles south of Elk Gap to the Kentucky line near the town of Boston will be received until the 24th of April next.

The profile and specifications for this section, which includes four Tunnels, varying from two hundred and fifty to seventeen hundred and fifty feet in length, with other heavy work, can be seen at the ENGINEER'S OFFICE, in Knoxville, after the 14th of April. The Company reserve the right to reject all bids. For further particulars address— ADRIAN TERRY, Chief Engineer, &c.

Knoxville, Tenn., March 26, 1868.

C. F. I. & C. For COST, FREIGHT, INSURANCE, and COMMISSION, any production of Great Britain can be procured at the lowest market rates, through Messrs. BELDING, KEITH & Co., American Bankers and Merchants, 80, Lombard Street, London. Orders by Cable promply executed. Circulars issued weekly on application.

PROPOSALS

For the Construction of a portion of the Summit Division of the Illinois and Michigan Canal.

OFFICE OF THE BOARD OF PUBLIC WORKS, CHICAGO, March 11, 1868.

SEALED PROPOSALS WILL BE RECEIVED BY the Board of Public Works, at their office, until 11 A. M. Wednesday, April 15, for the construction of sections Nos. seventeen (17) to forty-four (44,) inclusive, of the Summit Division of the Illinois and Michigan Canal—a distance of about eleven (11) miles.

Maps, profiles, and specifications will be exhibited at the office of said Board in Chicago.

There will be some 1,500,000 to 2,500,000 cubic yards (according to the line which shall be adopted) of earth excavation, some of it quite hard and embracing considerable detached rock, and about 90,000 cubic yards of stratified limestone.

The work must be prosecuted so as not to interfere with the use of the canal during the season of navigation.

It is believed, however, that most of the excavation, except the stratified rock, can be done with steam dredges without interfering with the navigation of the canal, but the rock excavation will all have to be done between the close of navigation in the fall and the opening in the spring.

Proposals are invited on the present line of canal, and also on a new line, as follows, viz:

For the work on Sections 17 to 23, inclusive, according to the old line.

For the work on Sections 24 to 41, inclusive, bids will be received both for the improved old line and a new line.

For the work on Sections 42 to 44, inclusive, bids will be received both for the old line and a new line.

If a new line be adopted for any portion of the distance operations thereon may be continued the whole year. It is expected that the navigation of the canal will be suspended for at least five months in each year, unless otherwise mutually agreed by the Board and contractors.

The whole of the work must be done on or before the end of the third season of the suspension of navigation.

A large amount of machinery will be required to excavate the work within the time required, consisting mainly of steam dredges, scows, and cranes for the earth work, and drilling machines, pumping machinery, and cranes for the rock.

Contractors will be required to commence work on the earth excavation within thirty days of the time of letting, and upon rock excavation by the first of November next, or as soon thereafter as navigation shall be suspended.

Parties contracting for the work will be required to provide all machinery, and to put up and remove all dams and all works of protection, and at their own expense to do all pumping, or whatever may be necessary to secure their work from water.

Proposals must be addressed to the Board of Public Works, indorsed "Proposal for Deepening Illinois and Michigan Canal," and be accompanied with the usual two hundred dollar ($200) bond, with sureties, to be approved by the Board.

Contractors will bid, stating the price for which the work will be done on each of the different sections, and the work will be let as a whole or in part, and in such quantities as the Board shall determine.

The Board reserve the right to reject any and all bids, and no proposal will be accepted unless the party offering it shall give evidence satisfactory to the Board that he has the necessary skill, experience, energy, and ability for doing the work, is trustworthy, and has sufficient pecuniary resources.

The Board will require such security as, according to their judgment, will secure the doing of the work according to the contract.

U. S. RAILROAD SCREW SPIKE COMPANY,

NO. 45 CLIFF STREET, NEW YORK,

MANUFACTURERS OF MONTIGNANI'S PATENT

RAILROAD SCREW SPIKE.

HENRY YOUNG, President.

G. B. HUBBELL, Secretary.

Works at

OSSINING,

Westchester Co., N. Y.

We respectfully call the attention of all persons engaged in the construction and management of railroads, to the double hook headed Screw Spike, for fastening rails and chairs to ties. The above cut represents the size and shape of the Screw, which weighs eight ounces. It has been thoroughly tested on the Erie, New York Central, and other Railways, from one to three years, and in every case it has stood the test satisfactorily, having performed its work perfectly.

The Screw Spike possesses the following important advantages over the common spike:

First.—They are made of the best refined Iron, and the thread, being forged (not cut), imparts additional strength and stiffness to them.

Second.—INCREASED SECURITY. The holding power of the screw is many times greater than that of the spike, and it is not liable to break nor become loosened by the jar of the cars, nor by the upward or lateral strain even on the steepest grades and sharpest curves—the holding capacity of each screw being from four to five tons, and the side pressure from three to four tons.

In three years' experience no screw has removed from its place, and the rails in every case have been held as firmly to the ties as when first put down. By its use, therefore, the numerous accidents constantly occurring from loose and broken spikes, and consequent loose and broken rails, shaky roads, and the spreading of the rails, will be obviated.

Third.—GREATER ECONOMY. In order to remove the rail it will only be necessary to reverse the screw one-quarter; and when replacing it, turn the screw back to its original position, when the rail will be held as firmly as before. The ties will thus be saved from the injury of splits, checks, and the numerous holes made in them by repeatedly drawing and replacing spikes, in which water will collect, causing their rapid decay. By the use of the screws, therefore, the durability of the ties will be greatly increased and equalized.

Besides, when the rails are loose the ties are cut by the repeated blows made on them by the rails, and are thereby materially damaged; on the contrary, where the screw is used, the rails are held so firmly in their place, that this injury is prevented. The saving to railway companies in ties alone, it is estimated will more than pay the whole cost of the screws. Where none but soft wood can be obtained for ties, the screw manifestly possesses a still greater advantage over the spike.

It is also calculated, that in consequence of the screws holding the rails to the ties so firmly, a less number will be required than of ordinary spikes, also a very great saving will be realized in the wear of the rolling stock and rails. The considerable loss arising from loose, bent, broken and missing spikes, will be almost entirely prevented. Besides, where the screw is in use, in addition to the saving of time in relaying rails, a much less number of men are required to watch the track and keep it in repair, thereby causing a great saving.

While the first cost of the screw is somewhat higher than the spike, *in the end they will be very much cheaper.* The screw therefore being *more economical*, and by its use in place of the spike, *making the roads more secure*, besides "giving to the track an easy and connected spring so much desired," it must entirely supersede the common spike.

In corroboration of the foregoing, we present the testimony of several of the most experienced Track Masters in this country.

Mr. JAMES R. HILLIARD, Track Master on the Erie Railway, (Union Division), who has had twenty-four years' experience as Master of Track-Repairs, after testing the screws makes the following report:

"When I first saw your Screw Spike I pronounced it just the article wanted, and since I have seen it in use I still hold the same opinion.

Mr. P. Featherly, Track Master on the New York Central Railroad, (Albany and Schenectady Division,) says, January 9th, 1866:—

"I put down your Screw Spikes sixteen months ago, on a section of our road where our heaviest work is done, viz., a steep grade on the main track, three miles from Albany, one-quarter of a mile above West Albany, and they are there to-day, firm and as secure as when first put down, while the adjacent track, fastened with common spikes, has been respiked several times during that time."

Mr. E. T. MARBLE, Track Master on the Albany and Saratoga Railroad, says:

"On examining the Screw Spikes put down by me September 16th, 1863, I find they have not started either upward or sideways, that they still hold the rail to the ties as securely as when first put down; while great numbers of common spikes are loose and out of place. And on examination I find the threads are bright and clean."

Mr. E. H. DE VERGNE, Track Master on the Shore Line Railroad, writes:—

"Having examined and tested your Screw Spikes on our road, I feel satisfied that they are more durable, safer and more reliable than common spikes. By their use our Railroads would be perfectly safe so far as the track is concerned. Although it requires somewhat more time to drive them than it does the common spike, yet it is more than counterbalanced by their greater durability and safety, and saving of time in relaying rails. With practice and the use of proper tools, even that objection can be overcome."

Mr. A. F. SNYDER, Track Master, Albany, January, 1867, writes as follows:

"This is to certify that the screw Spikes put down on the bridge over the Hudson River at Albany, N. Y., by the U. S. R. R. Screw Spike Co., February, 1866, have done their work perfectly—holding the rails securely and firmly to the ties—not having started in the least, while the ordinary spikes, which were put down on the bridge at the same time, have, many of them, started up, and are quite loose and useless."

Mr. J. W. POTTER, Superintendent of the Cincinnati, Dayton, and Eastern Rail Road, says, January 9th, 1867:—

"The Screw Spikes manufactured by your Company have thus far given entire satisfaction, more than equaling our expectations. We have had them tested at our crossings for the past six months, and find them solid in the tie as the day they were put in. I consider them invaluable for crossings and bridges."

MERRICK & SONS,

SOUTHWARK FOUNDRY,

WATCHES.

TIFFANY & CO.,

550 and 552 Broadway,

Solicit attention to their Timing Watches, known as the "TIFFANY & Co., TIMERS."

These watches, for Railroad, Engineering, Racing, Gunnery, and Scientific purposes, are superior to any yet offered, as the arrangement of the stop is such as to note time to the nicety of one-fourth or one-fifth of a second, in such manner as to prevent the possibility of error in the calculation.

The following named gentlemen, having bought "Timers" and found them to be perfectly satisfactory, have kindly allowed Tiffany & Co. to refer to them:

Amasa Sprague,	Joseph McPherson,	August Belmont,
Frank Squire,	Geo. G. Haven,	B. W. Gibbs,
J. C. Griswold,	B. H. Bixby,	O. N. Cutler,
Leon. W. Jerome,	George Osgood,	S. D. Bradford,
Wm. M. Ryedyk,	W. M. Tilden,	J. V. Brokaw,
Wm. F. Sherley,	A. P. Spencer,	C. A. Grymes,
	and others.	

Tiffany & Co., have also a full assortment of watches of all desirable sizes and styles, of the same quality and finish as the first mentioned, in addition to their usual stock of Frodsham's and Jurgensen's.

Particular care and attention given to the repairing and adjusting of fine watches.

TIFFANY & Co., 550 and 552 Broadway. House in Paris, TIFFANY, REED & Co.

Safety Railroad Switch.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the ***MAIN TRACK IS NEVER BROKEN,*** and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns ***The Life and Limb of all Travelers upon Railroads.***

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

New York, Saturday, April 18, 1868.

Southern Railroads and Emigration.

We gave recently a short sketch of the Southern route to the Mississippi River, *via* Alexandria, Lynchburg, Chattanooga and Selma, the object being to attract attention to the subject, and elicit discussion and inquiry. In the cotton region, before 1860, cotton growing was as much a closed monopoly as cotton spining, requiring a large combination of labor, land and skill to produce results. At present the land and labor, then held in block, are separated and subject to the control of capital; or it may combine with skill in operating either manufactures, varied agriculture, mining, railroads or cotton as preferred—the result being more reliable in any product than cotton, the production of a crop of which requires twelve months' uninterrupted labor; an interruption, from any cause, for even a few days, resulting in loss of amount invested in a year's labor. The cotton laborer, a slave, was an eye servant—unskilled, from ten to sixty years of age, doing daily and hourly as he was told; not only untaught, but not allowed to think, either of his occupation or of any provision for his wants, or providing for the hour or day in which he could not take his place in the row. As a freeman he is left uneducated for the struggle of life, and the contest between his indolence, his wants, and the means to gratify his passions, is continuous. His indolence, combining with strong hope, when left to himself, everthing is postponed, deferred and done in a slovenly manner. But give him a short *cash job*, and good rations, and, thoughtless that he will destroy his health, he will, under the eye of a steamboat mate, work half naked in all sorts of weather, and will, when paid, waste his money, rarely providing himself even with clothing. When starved out he makes another trip, and so continues until his constitution is destroyed. This state of affairs, separating the land and labor, leaves the most productive portion of the continent open to emigration and skilled labor, using the negro as the drudge and the scavenger. None of the objections to a new country exist. The lands are cleared, avenues are open to market in shape of railroads, dirtroads, and steamboats. Organized churches, schools and societies exist. The skilled farmer, mechanic or miner can use this labor under his own eye, the land and labor costing but little, and skill reaping the reward which in every other country is absorbed by capital. Upon the steamboats and railroads, in saw mills and brick yards, negroes have driven out the white laborer, working for a trip or a week, and others taking their places. The inhabitants of the United States are emphatically a money-making people, whether North or South, native or emigrated. The native white population of the South will rapidly change, and diversify their pursuits; immigration will flow in, and the negro, having been christianized and civilized, and having fulfilled his destiny by opening up and clearing out a country which the white man, owing to climate, was unable to cope with, will gradually die off, or be absorbed in the active struggle of life. To-day is in the knowledge of every one, to-morrow is theory. A divine providence controlling, and man, even in his passions and vices, being only the instrument, what a field the South opens up for intelligence, enterprise and industry. By the aid of a map of Alabama, we see that the railroads now in operation are—the Montgomery and West Point, from Montgomery, Ala., to West Point, Georgia, 87⅛ miles; the Alabama and Florida, from Montgomery to Tensas station on Tensas River, 158 miles; the Alabama and Tennessee, from Selma to Blue Mountain, 145 miles; the Selma and Meridian, from Selma to Mississippi line, 85 miles; the Mobile and Ohio, from Mobile to Mississippi line, 72 miles; the Girard and Mobile, from Girard on the Chattahoochie River to Union Springs, 52 miles; the Montgomery and Eufaula, from Montgomery to Oak Grove, 10 miles; the Memphis and Charleston, from Bear Creek to Tennessee line, 162 miles; the Marion Junction, from Selma and Meridian road to Marion, 14 miles; the Newbern branch, from Selma and Meridian road to Newbern, 9 miles; the Gainesville Junction, from Mobile and Ohio road to Gainesville; making an aggregate of 659¼ miles of railroads in operation in the State. The Alabama and Tennessee Railroad will connect with the Tennessee River at Guntersville, and with the Georgia State Road at Dalton. There are besides, in process of construction, the Montgomery and Eufaula, connected with the Chattahoochie River, and by rail with Macon and Savannah, Ga., the Central and North and South connecting Montgomery with Decatur; the Western from Montgomery to Selma; the Northeast and Southwest from, Gadsden to Meridian; and the Opelika and Tuscumbia; and a charter has been granted by the Legislature for the New Orleans, Mobile and Chattanooga Railroad.

The climate is mild and genial, and generally healthy, the exceptions being in the low river bottoms, on which at certain seasons the inhabitants are subject to bilious, intermittent and congestive fevers; extremes of heat or cold are rare and of short duration. During the summer the mercury ranges from 60° to 104° Fahrenheit, in winter from 18° to 82°, and in spring from 22° to 92°; the mean temperature being about 63°, and the mercury seldom rising above 93°. In the middle and northern portions of the State, the various kinds of oak, hickory, cedar, beech, chestnut, pine, mulberry, ash and elm abound; southwardly, the cypress, magnolia and pine are most numerous. Apples, pears, peaches, nectarines and pomegranate are confined to no particular section, but flourish in all. The principal vegetable products are asparagus, lettuce, peas, beans, okra,

squashes, cucumber, onions, cabbage, Irish and sweet potatoes, tomatoes, corn, lima beans, egg plants, cantilopes, water melons, radishes, turnips and carrots; the time of ripening dependant on the weather, but the crop is sure, and to the thrifty gardener a source of great profit. Strawberries, raspberries, &c., also abound.

Alabama with Mississippi were the great cotton growing States, furnishing before the war more of that staple than any of the other States. The principal portion of the Alabama cotton was raised in the central, southeast and southwest portions of the State. The counties peculiarly adapted to the staple numbering about twenty; in all of them the plant flourishes, but in the "Cainbrake" regions, between Selma and Demopolis, it is particularly luxuriant. Whilst this region is prominently the cotton section of the State, the exuberant fertility of its soil produces nearly every article, vegetables, grains and fruits, adapted to the wants of man. Alabama is rich in mineral treasures, particularly in coals, iron ore, limestone and marble.

There are four extensive coal fields in the State which may be thus designated: the Tuscaloosa, or Black Warrior Coal field, which is the largest, and is situated in the valley of the Warrior and its tributaries; the Coosa Coalfield, on the west side of Coosa River, in the vicinity of Broken Arrow, in St. Clair County; the Cahaba Coalfield, in the valley of the Cahaba river and its tributaries, commencing at a point near Centerville, in Bibb County, and extending northeast, through portions of the counties of Shelby, Jefferson and St. Clair; and the fourth is in Marshall and DeKalb Counties, between the Tennessee and Coosa Rivers. The coal in these several fields has been subjected to both a scientific and practical test, and proved to be of excellent quality. The analysis is given as follows:

Specific gravity, 1,351.

Volatile combustible matter	40.60
Fixed carbon	54.07
Ashes	3.09
Moisture	1.18
Sulphur	1.06
	100.00

Taking these coal fields all together, they are comprised within the area of nearly six thousand miles, in the counties of Marion, Winston, Walker, Tuscaloosa, Fayette, Jefferson, Blount, Bibb, Shelby, St. Clair, Morgan, Marshall and DeKalb. These coal fields are inexhaustible, and will necessarily supply the Gulf of Mexico, which, at an early period, must be the seat of an immense commerce. In close proximity there are extensive beds of the best quality of iron ore.

An analysis before us gives:

Specific gravity, 4.012.

Per oxide iron	88.02
Silica	11.59
Alumina	07
Lime	05
Oxide Manganese	trace.
Phosphoric	09
	99.82

—contains 61.61 per cent of Metallic Iron.

The ore is found in almost exhaustless quantities in the counties of Bibb, Shelby, Talladega, Calhoun, Cherokee, St. Clair, Jefferson, and Tuscaloosa. Limestone also abounds and in localities favorable for transportation; and from it a Lime is made equal to the best.

Beautiful, variegated marble exists in the counties of Bibb and Talladega, some of these marbles are buff colored, filled with organic remains, others are white and crystalline, and others black. The quarries are very extensive, particularly in Talladega County, and the quality very fine—good judges pronouncing them equal to the best Italian. Copper is found in the counties of Talladega and Clay, and there is reason to believe it exists in Tallapoosa and Randolph. The Montgomery Mining and Manufacturing company have developed rich copper mines in Talladega County. From those mines, beautiful specimens of sulphate of copper, brimstone, brown oxide of iron, sulphuric acid, saltpetre, and some other articles were sent to the Paris Exposition. In Coosa County, there are several quarries of statuary Granite, the stone is of a beautiful gray and easy of access, being almost entirely above the surface of the ground. It is easily split, and may, without difficulty, be worked into any desirable shape or size. There is some gold in Randolph, Talladega, Coosa, Autauga and Tallapoosa Counties, and gold mining has been carried on to a considerable extent at Arbacooche in Randolph, and Goldville in Tallapoosa. We have thus endeavored to show the great and varied advantages offered in the single State of Alabama; and may at another time, present facts in regard to the other Southern States, to prove that they are equally favored in climate, soil and natural productions.

Our object being to elicit information by detail of advantage of this section of country as a location for the enterprising, the skillful and the industrious. What a change it would be for thousands of the suffering in our cities to transfer them to this country with only food enough to sustain them until a crop could be raised. In any portion of the Southern States the title to land can be had in fee by white or black, the purchase money to be paid out of the crops after support of the purchaser.

Russian Railways.

Russian railways are rapidly multiplying. The Ryasan-Morschansk line, a portion of the Moscow-Volga, line, has recently been opened. It is one hundred and fifty miles long, and has taken only a year and three months in construction. The Koslow-Woronesh railway, a link in the long line to be laid between Moscow and the sea of Azof, is expected to be completed in a short time, the Moscow-Odessa railway is progressing so rapidly that it is expected to be finished this year; and the works between Poti and Tiflis, a line which, after its extension to the Caspian harbor of Baku, will monopolize a considerable portion of the Persian trade, have just begun. The Russian Government have been most liberal in finding or guaranteeing the capital for these railway purposes.

☞ The lease of the Washington, Alexandria and Georgetown Railroad has been vacated by order of the Equity Court of Washington, and the lessees, Messrs. Stevens and Phillips, are directed to forthwith surrender to the Washington and Alexandria Railroad Company its road and estate of all kinds held under said lease, and to appear before an auditor of the court and render an account of all revenues and moneys received by them by virtue of the lease now canceled.

Central Railroad of New Jersey.

The Directors of the Central Railroad Company of New Jersey present to the stockholders the following report, for the year ending December 31st, 1867. For convenience of comparison, many of the statements are made to cover the year 1866, as well as the past year.

SERVICE OF THE ROAD AND FERRY.

The service of the road has been as follows:

	1867.	1866.
Miles run by passenger trains.	500,869	448,545
" merchandise "	418,066	292,110
" coal trains	551,245	494,160
Total by transportat'n trains.	1,469,680	1,234,815
Miles run by wood, gravel and construction trains...	79,766	140,210
Total miles run by trains...	1,549,446	1,375,025

During the year the ferry boats have made 25,578 trips between New York and Jersey City, against 12,717 trips last year. The ferry is now run by the Central, Communipaw and Elizabeth—three boats larger in size and superior in beauty and convenience to those of any other ferry. The ferry to Elizabeth has also been regularly kept up.

PASSENGERS, FREIGHT AND COAL.

A comparison of the passenger business of the year 1867 with the year 1866 gives the following results:

	1867.	1866.
Number of passengers	1,204,130	1,083,592
Miles traveled by pass	27,284,393	25,866,378
Equal to through pass	363,792	344,885

A comparison of the merchandise business of the two years, in tons of 2,000 lbs. (excluding iron,) gives the following results:

	1867.	1866.
Number of tons carried	518,232	434,002
Tons carried one mile	30,404,947	24,045,007
Equal to through tonnage.	405,399	320,067

A comparison of the iron tonnage of the two years, in tons of 2,240 lbs., gives the following results:

	1867.	1866.
Number of tons carried	53,248	103,008
Tons carried one mile	3,407,872	6,592,512
Equal to through tonnage.	53,248	103,008

A comparison of the coal business of the two years, in tons of 2,240 lbs., gives the following results, the through tonnage being calculated from Easton to Port Johnston:

	1867.	1866.
Number of tons carried	1,369,045	1,289,249
Tons carried one mile	73,764,596	69,421,516
Equal to through tonnage.	1,084,773	1,020,905

There was an increase in Lackawanna coal of 77,447 tons, and in Lehigh coal of 2,349 tons.

The coal tonnage over the road since the transportation of coal was commenced, has been as follows:

	Lackawanna. Tons.	Lehigh. Tons.	Total. Tons.
1856	98,670	33,325	131,995
1857	209,950	84,841	294,791
1858	417,726	122,923	540,649
1859	455,681	183,277	638,958
1860	590,863	263,906	854,769
1861	568,869	254,345	823,214
1862	502,875	314,195	816,570
1863	613,954	435,927	1,049,881
1864	675,743	474,221	1,149,964
1865	494,687	509,819	1,004,506
1866	778,173	511 076	1,289,249
1867	855,620	513,425	1,369,045
Total	6,262,311	3,701,280	9,963 591

EQUIPMENT.

The company own 88 engines, of which 16 burn wood or soft coal, and 72 hard coal. Of the freight engines 10 are broad gauge. Their condition is reported to be as follows: 29 in thorough repair, 26 in fair order, 20 wanting general re-

pairs, 9 in shop repairing, and 4 condemned. Five new freight engines have been placed on the road during the year, and 4 passenger engines are ordered for early delivery. About 75 engines are required for daily service, including shifting and construction.

The equipment of cars is as follows: 51 first class passenger cars, 6 second class passenger cars, 6 first class smoking cars, 14 baggage and mail cars, 2 express cars, 116 eight-wheel box freight cars, 40 four-wheel box freight cars, 20 eight-wheel cattle cars, 10 eight-wheel gondola cars, 146 eight wheel platform cars, 149 six-wheel iron or lime cars, 806 eight-wheel coal cars, 381 four-wheel coal cars, 142 four-wheel dirt cars, 4 eight-wheel caboose cars, 25 four wheel caboose cars, and 2 wrecking cars. Twenty new passenger cars are under contract for early delivery.

TRANSPORTATION ACCOUNT.

The following is a statement of the ordinary receipts and expenses for the year 1867 compared with 1866:

Receipts:	1867.	1866.
Passengers	$808,581 09	$762,470 56
Merchandise	1,034,089 59	1,099 239 13
Coal	1,380,487 59	1,619,744 24
Mail	15,806 59	10,183 33
Express	51,121 95	42,147 31
Rents	40,534 18	27,119 50
Miscellaneous	19,776 94	20,340 21
Total receipts	$3,350,397 93	$3,581,244 28
Expenses:		
Running expenses	$431,019 86	$425,850 94
Wood consumed	72,735 69	69,938 70
Coal consumed	165,676 95	244,026 98
Repairs of road	319.845 86	314,461 77
Repairs of engines	189,688 60	176,565 28
Repairs pass'nger cars	42,736 25	38,287 99
Repairs freight cars	47,213 75	50,316 46
Repairs coal cars	52,380 66	53,511 47
Repairs docks, Elizabethport	31,174 42	23,237 90
Repairs b'ld'gs, bridges	96,365 61	66,915 27
Repairs tools, mach'y.	23,141 38	33,152 01
Expense account	110,442 52	86,700 03
Miscellaneous exp	74,247 96	124,734 01
Ferry running exp.	127,841 59	118,270 05
Ferry boat repairs	41,422 54	40,312 08
Ferry miscel. expenses	6,001 03	11,869 82
Car service	46,087 00	85,824 93
Total expenses	$1,878,021 67	$1,968,975 69
Balance net earnings	$1,472,876 26	$1,617,268 59

The following table shows the receipts, expenses and net earnings from the beginning of the annual reports to the Legislature, to the present time:

	Receipts.	Expenses.	Net Earnings.
1853.	$349,018	$197,629	$151,389 or 43 p.c.
1854.	378,145	197,349	180,796 or 48 "
1855.	393,729	208.856	184,873 or 47 "
1856.	553,479	258,308	295,171 or 53 "
1857.	682,314	340,502	341,812 or 51 "
1858.	836,934	345,614	491,320 or 58 "
1859.	971,702	385,716	585,986 or 61 "
1860.	1,185,888	475,457	710,391 or 60 "
1861.	1,201,895	522,452	679,443 or 57 "
1862.	1,397,586	623,245	774,341 or 56 "
1863.	1,941,976	814,732	1,127,244 or 58 "
1864.	2,537,185	1,231,554	1,305,631 or 51 "
1865.	3,036,390	1,748,434	1,287,956 or 43 "
1866.	3,581,244	1,963,976	1,617,268 or 45 "
1867.	3,350,398	1,878,022	1,472,376 or 44 "
Tot.	$22,397,843	$11,191,846	$11,205,997 or 50 p.c.

A decrease in receipts is here shown of $230,846 35, or 6 per cent. The increase in passenger receipts was $46,110 53, or 6 per cent. The decrease in merchandise receipts was $65,149 54 or 6 per cent.; in coal receipts, $239,256 65, or 15 per cent.

The expenses show a decrease of $85,954 02 or 4 per cent. There has been an increase in running expenses of $5,168 92; in repairs of road of $5,384 09; in repairs of equipment of $13,838 06; in other repairs of $27,376 23; in ferry expenses of $4,813 21. There has been a decrease in fuel consumed of $75,553 04; in general expenses of $26,743 56, and in car service of $39,737 93.

The gross receipts per mile run have been as follows: From passenger trains, $1.63 against $1.70 in 1866; from merchandise trains, $2.47 against $3.76; from coal trains $2.50 against $3.28. The average receipts per mile run from all trains have been $2.16, against $2.90 the previous year.

The gross expenses per mile run have been $1.21 against $1.59 the previous year.

FINANCIAL CONDITION.

The following is a statement of the financial operations during the year:

Credits—	
Gross earnings, as per statement	$3,350,397 93
Capital, instalments paid on new stock	768,600 00
Cash and accounts receivable, decrease	3,944 58
Total	$4,122,942 51
Debits—	
Ordinary expenses, as per statement	$1,878,021 67
Grading, second track, extension, etc	166,170 94
Masonry	82,066 71
Railway superstructure	48,503 97
Bridge superstructure	24,068 56
Engineering	13,219 56
Land damage	27,617 12
Ferry boats	45,002 23
Station houses	81,941 99
Port Johnston coal wharves	8,870 08
Docks in New York	1,601 40
Engines	7,250 00
Passenger cars	9,399 17
Freight cars	9,421 18
Coal cars	84,822 75
Lands, machinery, miscel. property, material, etc., increase	199,904 89
Quarterly dividends for year, 10 per cent	1,297,850 00
Interest account for year, balance	13,127 45
State taxes for year	88,540 40
United States taxes	85,547 44
Total	$4,122,942 51

The profit and loss account has been credited.

Gross earnings		$3,350,397 93
It has been debited as follows:		
Ordinary expenses	$1,878,021 67	
Interest account	13,127 45	
Taxes to State	88,540 40	
United States taxes	85,547 44	
Dividends, 10 per ct	1,297,850 00	
		3,313,086 96
Balance		$37,310 97

which has been appropriated to the reduction of various accounts. The balance of surplus profits remains $628,159 26, as heretofore.

The increase in the construction accounts of the railroad and appendages has been	$454,055 33
Increase in equipment accounts	110,893 10
Increase in all other property acc'ts.	244,907 12
Total	$809,855 55

The cost of the railroad, double tracked, with its coal wharves, station houses, shops, and other appendages, stands at $8,160,643 57, and that of the equipment at $2,075,493 10.

CONSTRUCTION.

But little new work has been undertaken during the year, and the improvements heretofore in progress have been generally finished. The Lopatcong stone viaduct is completed and in use. The Bloomsbury bridge is filled up and finished, except a little widening. The Springtown embankment has been widened. All the large river bridges, therefore, in the middle and western parts of the road, which heretofore were causes of insecurity and possible interruption to business, have now been removed; three by filling up and one by the substitution of a handsome stone viaduct of five arches. They have cost respectively: High Bridge embankment, including masonry, $251,000; Musconetcong or Bloomsbury, $157,000; Pohatcong or Springtown, $152,000; Lopatcong stone viaduct and approaches, $120,000. All these works have been constructed at a moderate expense, notwithstanding the high prices that have prevailed. The contractor, Sidney Dillon, deserves great credit for the nerve, ability and good judgment shown in the prosecution of these works, by which he saved himself from loss under his contracts, while the company showed their appreciation of his services by making promptly such concessions as were just to both parties. The above remarks will apply also fully in all respects to the construction of the extension from Elizabeth to Jersey City.

At Spruce Run additional track room is providing for the Lackawanna coal trade, and the station grounds and buildings at Glen Gardner are commenced. A passenger house has been built at Pamrepo. Other buildings have been put up at stations requiring additional facilities. Houses for the operatives have also been put up where urgently required, including a block of eighteen buildings at Bergen Point for the men employed on the Port Johnston coal wharves. The existing engine houses at Communipaw and elsewhere have been enlarged, and a new brick house and turn table built at Port Johnston.

COAL TRADE AND PORT JOHNSTON.

The new facilities for coal at Port Johnston have continued to be developed and improved. More than half the Lehigh coal brought over the road during the past year was shipped at this point, and the additional room and economical handling at this place have been a great advantage to the trade. The exceeding dullness of trade has prevented much increase in the gross business, while the same stagnation has made it occupy all the space provided, both at Elizabethport and Port Johnston. Three or four times the amount of coal could readily be taken care of with the same facilities in more active times. To facilitate the consolidation of Lehigh coal at Port Johnston, a second large wharf has been put under contract. Improvements in the storage wharf tracks have also been made.

The Lackawanna coal trade shows also a moderate increase in spite of low prices. The Delaware, Lackawanna and Western Railroad Company have under consideration a plan for the removal of a portion at least of their coal business to Jersey City.

LOCAL BUSINESS.

There is a marked activity in real estate along the line. The population seems to be only limited by the houses to be had, and many building operations, for occupation or for sale, are going on at all the points within reasonable distance of the city. To facilitate this, and to enable the surplus lands belonging to the company to be sold to advantage, some money has been spent in grading and fencing streets in the vicinity of Scotch Plains, Plainfield and New Market, with the best results. The local passenger business shows, at almost every station within its influence, the impetus given by this activity, as may be seen by consulting the table of passengers. The local freight also increases, but more slowly.

STOCK YARD AND MARKET.

This establishment has had to contend with the determined opposition of the butchers to the ordinance requiring the removal of slaughter houses from the city; but a large and successful business has been and is doing, and the entire removal of the trade from the city to this and the other abattoirs is only a matter of time.

PETROLEUM.

A large station for petroleum has been established by parties largely interested in this trade, on land purchased from the American Dock Company, at a safe distance from other buildings.

Extensive warehouses, iron tanks and other improvements have been erected by the parties on the premises, a track laid to connect it with the stock yard track, and the business is now in full operation.

LEHIGH COAL AND NAVIGATION CO.

The well-constructed road of this company on the north side of the Lehigh, is now nearly ready to open for business, the only part unfinished being the bridge over the Lehigh, at Easton. Beyond this the road is completed and in operation. No new region is opened by this road, but more perfect facilities will be given to the country through which it passes, and a large amount of business will undoubtedly be developed, as well as a certain amount of that already in existence diverted from the canal to this railroad.

AMERICAN DOCK AND IMPROVEMENT COMPANY.

Bulkheads have been sunk by this company on the north and south sides of the basin, 500 feet wide, which the people of Jersey City desire to have left south of their city and north of the station grounds and improvements connected therewith. The bulkheads south of the station grounds have also been extended in uniformity with the general plans adopted by the Dock Company. The filling in has been steadily prosecuted in accordance with their contract, especially along the places required for immediate use, by contracts, or for the safety of tracks.

PROSPECTS OF BUSINESS.

Another dull year may be reasonably anticipated. In the coal trade low prices will rule, and therefore low rates for transportation will have to be accepted. It seems probable also that the general derangement and depression will affect passenger and freight business to a considerable extent. From its geographical position, however, it is thought that this company can sustain its general business and receipts, especially with the assistance of the rapid growth of the local business. Another reduction in expenses can be safely calculated on.

BALANCE SHEET, January 1, 1868.

Railroad	$7,155,947	53
Port Johnston coal wharves	827,246	85
Station houses, shops, and water stations	875,362	67

Commerce of New York.

The foreign imports at New York for the month of March, are officially stated as follows:

	1867.	1868.
Entered for consumpt'n.	$11,373,974	$11,999,520
Do. for warehousing	9,069,756	12,391,956
Free goods	923,377	821,682
Specie and bullion	145,867	1,299,776
Total entered at port	$21,512,974	$26,512,934
Withdrawn fr. wareh'use	13,318,411	10,296,124

The foreign imports at New York for the three months from January 1st, were:

	1867.	1868.
Entered for consumpt'n.	$35,785,742	$30,241,403
Do. for warehousing	29,368,472	28,337,459
Free goods	2,559,551	2,318,755
Specie and bullion	409,077	1,852,225
Total entered at port	$68,122,842	$62,749,842
Withdrawn fr. wareh'se	34,493,051	26,077,087

The foreign imports at New York for nine months of the fiscal year, were:

	1867.	1868.
Six months	$148,210,158	$116,072,182
January	20,979,087	15,418,571
February	25,630,781	20,818,837
March	21,512,974	26,512,934
Total 9 months	$211,332,995	$178,822,024
Deduct specie	8,806,920	3,601,868
Total mdse.	$202,526,075	$175,220,156

The duties received at New York for nine months ending with March, were:

	1867.	1868.
Six months	$60,581,571 82	$54,731,301 44
January	9,472,248 48	7,133,428 42
February	11,466,418 42	9,696,752 39
March	11,977,418 19	11,195,861 33
Total 9 months	$93,447,656 91	$82,757,343 58

The exports from New York to foreign ports in the month of March, were:

	1867.	1868.
Domestic produce	$19,679,955	$12,882,808
Foreign free goods	31,133	24,761
Do. dutiable	764,138	655,881
Specie and bullion	1,891,141	3,694,912
Total exports	$22,366,367	$17,258,362
Do. exclusive of specie.	20,475,226	13,563,450

The exports from New York to foreign ports for three months from January 1st, were:

	1867.	1868.
Domestic produce	$47,206,684	$40,192,978
Foreign free goods	182,143	73,828
Do. dutiable	1,987,552	1,766,560

☞ The Canal Commissioners have determined to open the Eastern Division of the Erie Canal on the 20th of April, and the Middle and Western Divisions, May 1. The Black River and Champlain Canal will also be opened on the 1st of May.

Baltimore and Ohio Railroad.

The regular monthly meeting of the directors of this company was held in Baltimore on the 8th inst. The President, J. W. Garrett, Esq., in the chair. The Committee on Finance reported the following resolutions, which were adopted:

Resolved, That a dividend of four per cent. be declared on the stock of the Main Stem of the Baltimore and Ohio Railroad Company, payable on and after the 30th of April inst., at the Merchants' National Bank of Baltimore, and that the transfer books be closed on the 18th inst., and remain closed until the 30th inst.

Resolved, That the United States tax be paid by the company.

Resolved, That a dividend of five per cent. be declared on the stock of the Washington Branch Railroad for the half year ending 31st of March last, payable on and after the 16th of April, at the Merchants' National Bank of Baltimore.

Resolved, That the United States tax be paid by the company.

The President stated in relation to the financial condition of the company that the great works in which it had been engaged, especially since the close of the war, had absorbed its means to such an extent, that in order to obtain the requisite capital for the prosecution of works of vital interest to the community, a suitable plan must be promptly adopted. Whilst the large expenditures in completing the double track, in constructing the Washington County road, in adding extensively to the equipment, and in constructing iron bridges upon the main line, would soon cease, yet other leading improvements required vigorous prosecution. Within the next ten days the "Camden cut-off" will be brought into regular use; its first class double track and the superior iron bridge over Gwynn's Falls having been completed. Upon the opening of this improved line the time of the trains between Baltimore and Washington will be reduced to one hour and fifteen minutes.

The heavy and costly work in the construction of the tunnels at Point of Rocks and Williams' Point is nearly completed, so that it is expected that the double track through those tunnels will be opened during the current month. The arching of the tunnel upon the Parkersburg Branch road progresses rapidly, and the expenditures thereon continue to amount to $50,000 per month. The remainder of this work will be completed by the first of October next. Although thus many heavy expenditures will cease, yet as arrangements have been made for building rapidly the bridges over the Ohio River, to connect the Parkersburg Branch and the Marietta and Cincinnati road and the Main Stem of the Baltimore and Ohio road with the Central Ohio road—it is anticipated that a million and a half of dollars will be required for those structures within the next eighteen months.

Additional contracts have recently been made upon the Metropolitan Branch road, and so large an amount of work has been undertaken upon this branch that arrangements must be made for the heavy payments that will be required.

The construction of the Pittsburg and Connellsville, Winchester and Strasburg and other lines, which will be assisted by the Baltimore and Ohio Company, will require a large amount of capital.

During its late session the Legislature of Maryland adopted the following law in relation to corporations:

Every corporation, incorporated under the laws

of this State, which has the power to issue bonds as evidences of indebtedness, and to secure the same by mortgage of the property of such corporation, or which has the power to obtain money upon mortgage, may, whenever in the judgment of said corporation it is expedient so to do, in place of issuing such bonds, and securing the same by a mortgage of the property of the said corporation, or instead of obtaining money upon mortgage, issue a preferred stock for any amount for which the said corporation may be authorized to issue its bonds, or for any amount for which the said corporation may be authorized to obtain upon mortgage of its property, and may dispose of the said stock by sale, on such terms as it may prescribe, or by permitting the same to be subscribed for, as in the judgment of said corporation may be deemed expedient; and every corporation creating such preferred stock, as aforesaid, may execute an agreement under seal, guaranteeing to the purchasers of or subscribers to such preferred stock a perpetual dividend of six per centum per annum out of the profits of the said corporation, payable yearly or half yearly, as said corporation shall determine, before any dividend is distributed to any of the stockholders of the said corporation other than the holders of said preferred stock; and the said preferred stock, so created, and the holders thereof, shall have all the incidents, rights, privileges, and immunities and liabilities, to which the capital stock of said corporation, or the holders thereof, may be entitled or subject; provided, however, that no corporation shall exercise any power under this section, unless the creation of the said preferred stock shall be authorized by a general meeting of the stockholders of said corporation.

Under this act it will be seen that this company is authorized to issue, with the assent of its stockholders, preferred stock, entitled to a perpetual dividend of six per cent. per annum, and that such stock is entitled to the same immunities as its common stock. Under its charter the company is authorized to issue additional common stock.

It has also the same privilege in the supplement to its charter, authorizing the construction of the Metropolitan Branch road. As, however, the surplus earnings of the company have been largely invested in the Parkersburg road, the double track, in increased plant, etc., it would doubtless embarrass the State and city authorities and many shareholders if the company decided to issue common stock which is entitled to participate in the advantages of the fund stated. Whilst the division of such an issue of stock might be made in proportion to existing ownerships, yet the inability of many parties to obtain the requisite capital for the additional investments would probably cause numerous interests to fail in securing those advantages to which they would be entitled. And in the cases of the city of Baltimore and the State of Maryland, their representatives might be embarrassed in regard to legal authority to make such additional investments. Under the circumstances, the Committee of Finance, after careful deliberation, approved, as the most judicious and advantageous plan, the issue of preferred stock, in order to obtain the capital requisite to prosecute the works in view, which are so important for the public interests. The President, therefore, proposed the following resolution, for the purpose of calling a general meeting of the stockholders, viz:

Resolved by the President and Directors of the Baltimore and Ohio Railroad Company, That a general meeting of the stockholders of the said company be, and is hereby, called at the Directors' room of the said company, at Camden Station, in the city of Baltimore, on the eleventh day of May, in the year eighteen hundred and sixty-eight, at one o'clock P. M., to consider the propriety of authorizing the creation of a new preferred stock of said company, to the amount of two millions of dollars, upon which a perpetual dividend of six per centum per annum, and no more, shall be paid out of the profits of said company.

After full explanations of the subject the resolution was unanimously adopted.

The President subsequently referred to the recent action of the City Councils of Baltimore, adopting the ordinance subordinating their lien to a mortgage to be created for four millions of dollars for the purpose of completing the road from Connellsville to Cumberland. He had the satisfaction of stating that the Chief Engineer of that company, B. H. Latrobe, Esq., had revised the estimates of the cost of constructing that line, basing his calculations upon actual bids made in 1864 for a large portion of the work, and on estimates for iron, ties, etc., at present prices, and that the result would thus show a cost of $3,487,902. As it is expected that the $4,000,000 first mortgage bonds proposed will be negotiated at ninety per cent., the $3,600,000 thus realized will furnish a margin for contingencies beyond the estimated cost of $162,000.

In the discussions which this important and interesting subject elicited when being considered by the Councils, it was clear that all interests in Baltimore appreciated the value of this great route, and the enthusiasm so universally manifested for its construction will doubtless result in aid to the company in the negotiation of its bonds.

It is gratifying to find that capitalists exhibit confidence in the entire legality of the action of the city, and in this connection the President stated that he was informed by counsel that the section of the Constitution under which the authority is obtained for the action of the city of Baltimore is practically identical with the section of the then existing Constitution under which the State of Maryland, with the same limit of power, passed the law making an agreement with the Northern Central road, involving sums of great magnitude. Under that similar constitutional provision the Northern Central Railroad Company obtained from the State of Maryland, to which it was indebted $3,200,000, a concession by act of the Legislature, by which it substituted an annuity of but $90,000 for that entire debt. As $90,000 a year represent a principal, at six per cent., of but a million and a half of dollars, it will be seen that the State lost by this transaction $1,700,000. Yet the legal authority for that transaction, involving so immense a loss to the tax payers of Maryland, has not heretofore been questioned. What a contrast is presented by these transactions of the city of Baltimore and the State of Maryland. In the one case the city, without additional investment or abandonment of any part of her claim, arranges to secure additional capital, by which the completion of a work universally admitted to be of vital moment to her interests will be assured. In the other case, $1,700,000, were practically given away to a corporation, in connection with which the city of Baltimore also made immense losses through her investments, and the subsequent compromise of its obligations. That company now (the city and State having submitted to such great losses) is making large dividends to its stockholders, the chief of which is the Pennsylvania Railway Company, which is the holder of a majority of its stock, and which wields absolutely its control.

As it is desirable that arrangements be promptly made for the commencement of the work upon the Pittsburg and Connellsville road, the President proposed the adoption of the following resolution:

Resolved, That if the Finance Committee shall so determine, it shall have power to authorize and direct the President of this company to subscribe on behalf of said company for one million of dollars of the first mortgage bonds of the Pittsburg and Connellsville Railroad Company, the issue of which said first mortgage bonds to the extent of four millions of dollars is contemplated by the ordinance, No. 16, of the Mayor and City Council of Baltimore, passed finally on the thirteenth day of March, in the year eighteen hundred and sixty-eight, entitled "An ordinance for the renewal and extension of the mortgage debt due the city of Baltimore by the Pittsburg and Connellsville Railroad Company, and to fund arrears of interest due thereby."

Mr. Garrett stated that he had reason to expect that other parties would join at an early day in a subscription which would, with the one million proposed to be subscribed by the Baltimore and Ohio Company, amount to $2,000,000, which is the sum required by the ordinances to be subscribed before it becomes effective. After full discussion of the subject, the resolution was unanimously adopted.

After the transaction of the regular and all other business presented, the Board adjourned.

Maysville and Lexington Railroad.

A meeting of the stockholders of the Maysville and Lexington Railroad—Northern Division—was held in Maysville, Ky., on the 25th ult., at which the following gentlemen were elected directors for the ensuing year: Hiram T. Pearce, Andrew M. January, James H. Hall, Lewis H. Long, James Barbour, Abner Hord, Alex. K. Marshall. At a subsequent meeting of the directors, Hiram T. Pearce was chosen President, and Henry Pelham, Clerk. Dr. William H. McGranaghan was then elected a member of the Board, in the place of Mr. Pearce, made President.

Thomas J. Glenn, of Nicholas County, was appointed engineer of the road, and is charged with the immediate duty of making a thorough survey of the route from Maysville to Paris, and of estimating the expense of construction.

Delhi (India) Railway.

The works on this railway are progressing satisfactorily. It is expected that the section from Meerut to Umballah, upwards of 120 miles in length, will be ready for traffic by the first of January next, and that from Umballah to Loodianah, about 65 miles, very shortly after the commencement of the year. When these sections are completed there will be 277 miles of line in full operation from Delhi towards Lahore, leaving only 57 miles to complete the connection with the Punjaub section from Umritsur to the Beas.

☞ The work of surveying the Nashua and Epping Railroad has been commenced. Two routes are to be surveyed, one intersecting with the Concord Railroad, the other coming on to the Worcester and Nashua Railroad.
